Warm tips:

1. APEMAN LC350 Projector is mainly used for home cinema and video games, NOT recommended for PPT, Word, Excel or business presentation.
2. It will perform the best effect if the projector is under relatively dark room environment.
3. For all home projectors, the screen edge is not as clear as the center.
4. The USB port only supports USB flash drive, NOT support cord connection and data transfer.
5. Choose "PCM" Digital Audio Output in your Blue-ray DVD player, NOT support AC-3 audio format and Dolby sound.
6. You need a supporting video decoding device to play 4K video files (MKV and HEVC), Such as TV box, computer, iPad etc.
7. The light of this projector goes off suddenly and goes back on while using, which is caused by the self-protection mechanism, not quality problem.
