- Install the gang box into the hole with 4 screws.
- Insert the device to the gang box. Secure the device with 4 supplied screws.
- Fix the cover onto the device with the screw.

★ Flush Mounting with Protective Shield

- Stick the mounting template on the wall. Drill the hole according to the mounting template. Remove the template from the wall. The suggested size of hole is 169.4 mm × 86.2 mm × 33.5 mm.
- Install the gang box into the hole with 4 screws.
- Align the protective shield with gang box.
- Insert the device to the gang box. Secure the device with 4 supplied screws.
- Fix the cover onto the device with the screw.

5 Configuration via Web

1 Activate Device via Web

You are required to activate the device first by settings a strong password before you can use the device.

Default parameters of door station are as follows:

- Default IP Address: 192.0.0.65.
- Default Port No.: 8000.
- Default User Name: admin

- Power on the device, and connect the device to the network.
- Enter the IP address into the address bar of the web browser, and click Enter to enter the activation page.

Note: The computer and the device should belongs to the same subnet.

- Create and enter a password into the password field.

- Confirm the password.

- Click OK to activate the device.

Note: When the device is not activated, the basic operation and remote configuration of device cannot be performed.

2 Access to the Device by Web Browsers

- In the browser address bar, enter the IP address of the device, and press the Enter key to enter the login page.
- Enter the user name and password and click Login.

3 Communicate with Indoor Station

- Click Settings -> Intercom -> Press Button to Call to enter the settings page.
- Set the parameters.
 - Edit call No. for every button.
 - Check Call Management Center to set the button calling center.

Note: If you check Call Management Center and set the call No. as well, call management center has higher privilege than call No.

- Press button to call indoor station.

4 Issue Card

- Click User to enter the settings page.
- Click Add -> Add Card. Present the card on the card reading area.
- When issuing finished, the windows pop up on the settings page.

Note:

- Only M1 card supported, and M1 card with non-standard shape is recommended.
- Up to 10000 cards can be issued and managed by V series door station. A voice prompt (No more cards can be issued.) can be heard when the issued card amount exceeds the upper limit.

5 Unlock Door

After issuing cards, you can unlock the door by presenting the issued cards.

Refers to Video Intercom Villa Door Station User Manual (Scan the QR code) for details.
