

**DENON**

**AVR-4520**

**INTEGRATED NETWORK AV RECEIVER**

# **Owner's Manual**

## SAFETY PRECAUTIONS

**CAUTION**  
**RISK OF ELECTRIC SHOCK**  
**DO NOT OPEN**

### CAUTION:

**TO REDUCE THE RISK OF ELECTRIC SHOCK, DO NOT REMOVE COVER (OR BACK). NO USER-SERVICEABLE PARTS INSIDE. REFER SERVICING TO QUALIFIED SERVICE PERSONNEL.**

The lightning flash with arrowhead symbol, within an equilateral triangle, is intended to alert the user to the presence of uninsulated "dangerous voltage" within the product's enclosure that may be of sufficient magnitude to constitute a risk of electric shock to persons.

The exclamation point within an equilateral triangle is intended to alert the user to the presence of important operating and maintenance (servicing) instructions in the literature accompanying the appliance.

### WARNING:

**TO REDUCE THE RISK OF FIRE OR ELECTRIC SHOCK, DO NOT EXPOSE THIS APPLIANCE TO RAIN OR MOISTURE.**

Hot  
surface  
mark

### CAUTION:

**HOT SURFACE. DO NOT TOUCH.**

The top surface over the internal heat sink may become hot when operating this product continuously. Do not touch hot areas, especially around the "Hot surface mark" and the top panel.

## IMPORTANT SAFETY INSTRUCTIONS

1. Read these instructions.
2. Keep these instructions.
3. Heed all warnings.
4. Follow all instructions.
5. Do not use this apparatus near water.
6. Clean only with dry cloth.
7. Do not block any ventilation openings. Install in accordance with the manufacturer's instructions.
8. Do not install near any heat sources such as radiators, heat registers, stoves, or other apparatus (including amplifiers) that produce heat.
9. Protect the power cord from being walked on or pinched particularly at plugs, convenience receptacles, and the point where they exit from the apparatus.
10. Only use attachments/accessories specified by the manufacturer.
11. Use only with the cart, stand, tripod, bracket, or table specified by the manufacturer, or sold with the apparatus. When a cart is used, use caution when moving the cart/apparatus combination to avoid injury from tip-over.
12. Unplug this apparatus during lightning storms or when unused for long periods of time.
13. Refer all servicing to qualified service personnel. Servicing is required when the apparatus has been damaged in any way, such as power-supply cord or plug is damaged, liquid has been spilled or objects have fallen into the apparatus, the apparatus has been exposed to rain or moisture, does not operate normally, or has been dropped.
14. Batteries shall not be exposed to excessive heat such as sunshine, fire or the like.

### CAUTION:

To completely disconnect this product from the mains, disconnect the plug from the wall socket outlet. The mains plug is used to completely interrupt the power supply to the unit and must be within easy access by the user.

### • DECLARATION OF CONFORMITY

We declare under our sole responsibility that this product, to which this declaration relates, is in conformity with the following standards: EN60065, EN55013, EN55020, EN61000-3-2 and EN61000-3-3. Following the provisions of Low Voltage Directive 2006/95/EC and EMC Directive 2004/108/EC, the EC regulation 1275/2008 and its frame work Directive 2009/125/EC for Energy-related Products (ErP).

DENON EUROPE  
Division of D&M Germany GmbH  
An der Kleinbahn 18, Nettetal,  
D-41334 Germany

### A NOTE ABOUT RECYCLING:

This product's packaging materials are recyclable and can be reused. Please dispose of any materials in accordance with the local recycling regulations.

When discarding the unit, comply with local rules or regulations.

Batteries should never be thrown away or incinerated but disposed of in accordance with the local regulations concerning battery disposal.

This product and the supplied accessories, excluding the batteries, constitute the applicable product according to the WEEE directive.

Pb

## ❑ NOTES ON USE

### WARNINGS

- Avoid high temperatures.  
Allow for sufficient heat dispersion when installed in a rack.
- Handle the power cord carefully.  
Hold the plug when unplugging the cord.
- Keep the unit free from moisture, water, and dust.
- Unplug the power cord when not using the unit for long periods of time.
- Do not obstruct the ventilation holes.
- Do not let foreign objects into the unit.
- Do not let insecticides, benzene, and thinner come in contact with the unit.
- Never disassemble or modify the unit in any way.
- Ventilation should not be impeded by covering the ventilation openings with items, such as newspapers, tablecloths or curtains.
- Naked flame sources such as lighted candles should not be placed on the unit.
- Observe and follow local regulations regarding battery disposal.
- Do not expose the unit to dripping or splashing fluids.
- Do not place objects filled with liquids, such as vases, on the unit.
- Do not handle the mains cord with wet hands.
- When the switch is in the OFF (STANDBY) position, the equipment is not completely switched off from MAINS.
- The equipment shall be installed near the power supply so that the power supply is easily accessible.
- Do not keep the battery in a place exposed to direct sunlight or in places with extremely high temperatures, such as near a heater.

## ❑ CAUTIONS ON INSTALLATION

**\* For proper heat dispersal, do not install this unit in a confined space, such as a bookcase or similar enclosure.**

- More than 0.3 m is recommended.
- Do not place any other equipment on this unit.

# Getting started

Thank you for purchasing this DENON product. To ensure proper operation, please read this owner's manual carefully before using the product. After reading them, be sure to keep them for future reference.

## Features

### Digital video processor up-scales analog video signals (SD resolution) to 4K

This unit is equipped with the 4K video upscaling function, which allows for outputting analogue or SD (standard video quality) video to HDMI at 4K (3840 × 2160 pixels). This enables the unit and a TV connected with a single HDMI cable and any video source to be reproduced precisely with HD level of quality.

### DENON's unique high quality playback technology "Denon Link HD" (👉 [page 42](#))

By connecting to a DENON Blu-ray Disc player compatible with Denon Link HD, the sound localization becomes more precise, reproducing a clear and three-dimensional sound image. Because this unit makes the integrated circuits operate while sharing the same clock with the Blu-ray Disc player, the transmitted digital audio has less jitter. This effect applies to any media audio source from the Blu-ray Disc player.

### Equipped with "Hybrid PLL Jitter Reducer" capable of reducing jitter and phase noise that negatively affect sound quality

"Hybrid PLL Jitter Reducer" provided with this unit improves the sound localization, reproducing a natural sound field.

### Equipped with a Multi-Zone Function 4 source, 4 zone output

This unit is equipped with a multi-zone function, so you can enjoy separate sound sources in four rooms including MAIN ZONE.

### Equipped with an HDMI output for ZONE4

This unit is equipped with an HDMI output for ZONE4, which allows you to enjoy video and audio in a room in ZONE4 as well. You can enjoy video sources other than those in MAIN ZONE.

### With a discrete-circuit configuration, the power amplifier provides identical quality for all 9 channels (190 W x 9ch)

The unit is equipped with a power amplifier that reproduces high-fidelity sound in sound mode with equal quality and power for all channels, true to the original sound.

The power amplifier circuit adopts a discrete-circuit configuration that achieves high-quality surround sound reproduction.

### Supports Internet Radio, music, and photograph streaming

#### Supports AirPlay® (👉 [page 82](#))

You can enjoy a wide variety of content, including listening to Internet Radio, playing the audio files stored on your PC, and displaying on a TV the photographs stored on your PC.

This unit also supports AirPlay that lets you stream your music library from an iPhone®, iPad®, iPod touch® or iTunes®.

### Compatible with "Denon Remote App" for performing basic operations of the unit with an iPad, iPhone\*1 or Android smartphone

"Denon Remote App" is application software that allows you to perform basic operations with an iPad, iPhone, Android smartphone or Android tablet such as turning the unit ON/OFF, controlling the volume, and switching the source.

\*1 Download "Denon Remote App" from iTunes® App Store. The unit needs to be connected to a LAN and the iPhone/iPod touch needs to be connected to the same network by Wi-Fi (wireless LAN).

### **“Setup Assistant”, providing easy-to-follow setup instructions**

First select the language when prompted. Then simply follow the instructions displayed on the TV screen to set up the speakers, network, etc.

### **Easy to use, Graphical User Interface**

This unit is equipped with an easy to see “Graphical User Interface” that uses menu displays and levels. The use of level displays increases operability of the this unit.

### **HDMI connectors enable connection to various digital AV devices (input: 7, output: 3)**

The unit is equipped with 7 HDMI input connectors for connecting devices with HDMI connectors, such as a Blu-ray Disc player, game machine, HD digital camcorder, etc.

### **Supports HDMI (3D, ARC, Deep Color, “x.v.Color”, Auto Lip Sync, 4K) and HDMI control function (page 9)**

In addition to HDMI 3D and ARC (Audio Return Channel) functions, this unit supports the video pass-through function, which outputs video to TV without changing the video quality when video signals of 4K (3840×2160 pixels) are input, and the GUI overlay function, which overlays the menu screen (GUI) on the 4K video screen.

### **Simultaneous playback on two HDMI channels (for MAIN ZONE)**

This unit is equipped with two HDMI MONITOR outputs. You can connect one output to a projector and the other output to a TV for simultaneous signal outputs.

### **Direct play for iPod and iPhone via USB**

(page 23)

Music data from an iPod can be played back if you connect the USB cable supplied with the iPod via the iPod/USB port of this unit, and also an iPod can be controlled with the remote control unit for this unit.

### **Audyssey DSX®**

This unit is equipped with Audyssey DSX® processor. By connecting front height speakers to this unit and playing back through Audyssey DSX®, you can experience a more powerful playback expression in the height audio range. By connecting front wide speakers, you can experience a more powerful playback expression in the wide audio range.

### **DTS Neo:X**

This technology enables the playback of 2-channel source audio or 7.1/5.1 multi-channel source audio through a maximum 11.1 channel speakers, achieving an even broader sound field.

### **Audyssey LFC™ (Low Frequency Containment)**

Audyssey LFC™ solves the problem of low frequency sounds disturbing people in neighboring rooms or apartments. Audyssey LFC™ dynamically monitors the audio content and removes the low frequencies that pass through walls, floors and ceilings. It then applies psychoacoustic processing to restore the perception of low bass for listeners in the room. The result is great sound that no longer disturbs the neighbors.

### **Discrete subwoofers and Audyssey Sub EQ HT™**

The unit has two subwoofer output capability and can adjust the level and delay for each subwoofer individually.

Audyssey Sub EQ HT makes the integration seamless by first compensating for any level and delay differences between the two subwoofers and then applying Audyssey MultEQ® XT 32 to both subwoofers together.

### **InstaPrevue Technology**

Live picture-in-picture preview of HDMI input connected to an AV receiver.

### **MHL (Mobile High-Definition Link) function**

You can charge your mobile device that supports MHL by providing power from this unit while outputting video from that mobile device. You can also control mobile devices that support MHL through this unit.

## Cautions on handling

- **Before turning the power on**

Check once again that all connections are correct and that there are no problems with the connection cables.

- Power is supplied to some of the circuitry even when the unit is set to the standby mode. When going on vacation or leaving home for long periods of time, be sure to unplug the power cord from the power outlet.

- **About condensation**

If there is a major difference in temperature between the inside of the unit and the surroundings, condensation (dew) may form on the operating parts inside the unit, causing the unit not to operate properly.

If this happens, let the unit sit for an hour or two with the power turned off and wait until there is little difference in temperature before using the unit.

- **Cautions on using mobile phones**

Using a mobile phone near this unit may result in noise. If that occurs, move the mobile phone away from this unit when it is in use.

- **Moving the unit**

Turn off the power and unplug the power cord from the power outlet. Next, disconnect the connection cables to other system units before moving the unit.

- **About care**

- Wipe the cabinet and control panel clean with a soft cloth.
- Follow the instructions when using a chemical cleaner.
- Benzene, paint thinner or other organic solvents as well as insecticide may cause material changes and discoloration if brought into contact with the unit, and should therefore not be used.

## Basic version

---

Here, we explain the connections and basic operation methods for this unit.

- **Connections**  [page 6](#)
- **Setup**  [page 33](#)

- **Network contents**  [page 61](#)
- **Selecting a listening mode (Sound Mode)**  [page 84](#)

# Connections

## Important information

Make connections before using this unit.

To create a home theater that can play back higher quality video and audio by fully utilizing the capabilities of this unit and your video devices, connect this unit to each of your video devices with HDMI cables.

### ❑ HDMI-compatible device

If your video device does not support HDMI connections, use the following connection.

### ❑ HDMI-incompatible device

This unit can change the source that is assigned to the DIGITAL AUDIO IN, ANALOG AUDIO IN, COMPONENT VIDEO IN and VIDEO IN connectors.

For details on assigning a source to connectors, see “Changing the source assigned to connectors” (page 15). For the setting method, see “Input Assign” (page 135).

#### NOTE

- While signals are being upscaled to 4K, the menu screen is only displayed on a TV that is connected to this unit via HDMI.
- Do not plug in the power cord until all connections have been completed. However, when the “Setup Assistant” is running, follow the instructions in the “Setup Assistant” (page 7) screen for making connections. (During “Setup Assistant” operation, the input/output connectors do not conduct current.)
- When running the “Setup Assistant” (page 7), turn off the power supply of connected devices.
- When making connections, also refer to the operating instructions of the other devices being connected.
- Be sure to connect the left and right channels properly (left with left, right with right).
- Do not bundle power cords together with connection cables. Doing so can result in noise.

page 32

## Converting input video signals for output (Video conversion function)

This unit is equipped with three types of video input connectors (HDMI, Component video and video) and three types of video output connectors (HDMI, Component video and video).

This function automatically converts various formats of video signals input to this unit into the formats used to output the video signals from this unit to a monitor.

For example, when an HDMI-compatible TV is connected to this unit with an HDMI cable, input signals other than HDMI video signals are automatically converted to HDMI signals that are then output from the HDMI connector to the TV. Only one type of video signals is output, so video signals output from this unit to the TV do not change even when the source for playback is switched to a device that outputs video signals in a different format, which allows you to continue with playback without the need to switch the video input source on the TV. Furthermore, the video quality improves because analog video signals such as video and component video signals that are input to this unit are converted to digital HDMI video signals with a higher resolution for output. When a TV does not support the HDMI connection, make an analog connection between this unit and the TV for video signals. This unit cannot convert HDMI input signals to analog video signals, so when signals are input from an HDMI device, use the component video input connector or video input connector. In this case, the component video signals that are input to this unit are converted to video signals.

### Make Settings as Necessary

- If you do not want this unit to convert video signals automatically, use the following setting item to disable this function.  
**"Video Conversion"** ([page 131](#))
- If you want to change the resolution of video signals output to the TV, use the following setting item to do so.  
**"Resolution"** ([page 132](#))

- The video conversion function supports the NTSC, PAL, SECAM, NTSC 4.43, PAL-N, PAL-M and PAL-60 formats.
- Resolutions of HDMI-compatible TVs can be checked at "Video" – "HDMI Monitor 1" or "HDMI Monitor 2" ([page 153](#)).

### NOTE

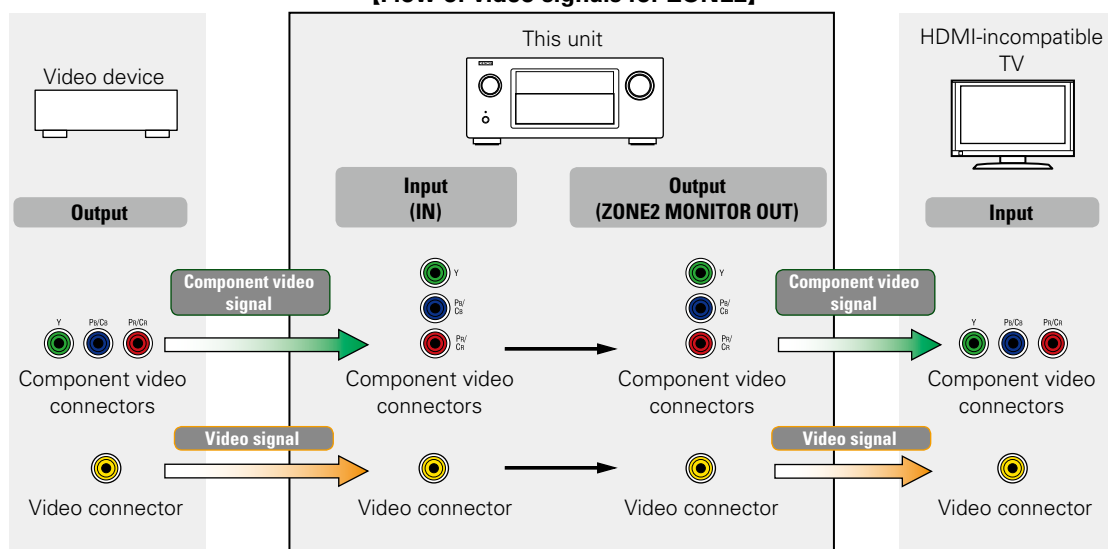

- While signals are being upscaled to 4K, the menu screen is only displayed on a TV that is connected to this unit via HDMI.
- When a non-standard video signal from a game machine or some other source is input, the video conversion function might not operate.

## [Flow of video signals for ZONE4]

**NOTE**

- HDMI signals are digital. HDMI signals cannot be converted into analog signals.
- The HDMI ZONE4 function is only compatible with the HDMI 1 – 6 IN connectors. It is not compatible with the HDMI 7 IN connector.

## [Flow of video signals for ZONE2]

## Connecting an HDMI-compatible device

You can connect up to ten HDMI-compatible devices (7-inputs/3-outputs) to the unit.

When a TV is connected to the HDMI ZONE4 OUT connector, you can play back a video or audio from the device connected to the HDMI 1 – 6 IN connector in ZONE4 ([page 111](#)).

If the device connected to this unit is equipped with an HDMI connector, it is recommended to use HDMI connections. Connections with an HDMI cable offer the following benefits that can not be achieved with other connection methods.

- **High quality playback by transmitting audio and video via digital signals**

HDMI connections can transmit high definition video and high quality audio formats adopted by Blu-ray disc players (Dolby Digital Plus, Dolby TrueHD, dts-HD, dts-HD Master Audio).

HDMI connections also convey information required for playback between devices. The information is used for copyright protection and TV resolution recognition, the ARC function, the HDMI control function, etc.

- **Transmission of audio and video signals with a single HDMI cable**

Previous connections require multiple audio and video cables, but HDMI connections require only a single HDMI cable to transmit audio and video signals. This allows wires in a home theater system, which tend to be complicated, to be more organized.

- **Mutual control through the HDMI control function ([page 102](#))**

This unit and the HDMI device connected via HDMI can be linked to perform operations such as power control, volume control, and input source switching.

- **Other video and audio functions, such as 3D video playback, Content Type, the ARC function, are supported ([page 13](#)).**

- There is more than one version of HDMI standard. The supported functions and the performance vary according to the version. This unit complies with the HDMI standard, supporting the ARC and 3D playback functions. To enjoy these functions, the HDMI device connected to this unit also needs to use the same version of the standard. For the version of the HDMI standard on the device connected to this unit, see the device's manual.
- Some TVs do not support audio input via HDMI connections. For details, see your TV's manual.

❑ **Before connecting this unit to TV via HDMI connections** ([page 10](#))

❑ **Connecting this unit to a TV via HDMI connections** ([page 11](#))

❑ **Connecting this unit to video devices via HDMI connections** ([page 12](#))

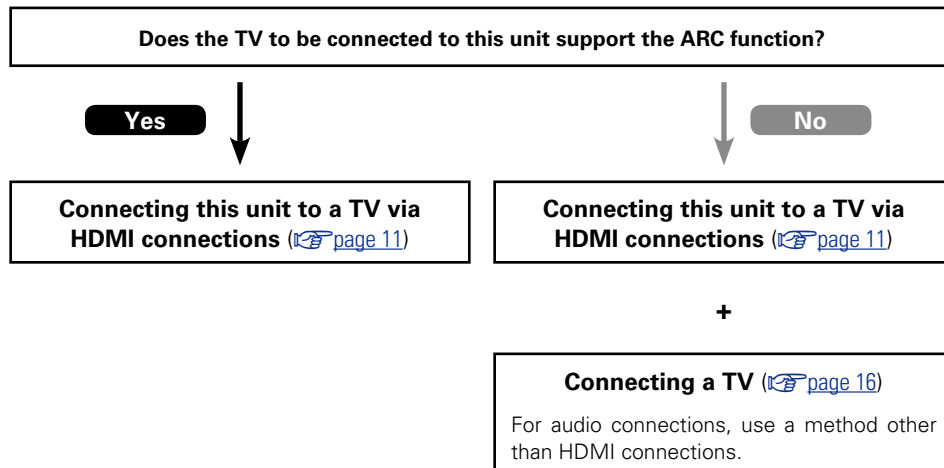

❑ **HDMI function** ([page 13](#))

❑ **Settings related to HDMI connections** ([page 14](#))

## Before connecting this unit to TV via HDMI connections

There are 2 methods to connect HDMI-compatible TV to this unit.  
Use the connection method that suits your TV.

### About ARC (Audio Return Channel) function

This function plays TV audio on this unit by sending the TV audio signal to this unit via HDMI cable.

If a TV without the ARC function is connected via HDMI connections, video signals of the playback device connected to this unit are transmitted to the TV, but this unit can not play back the audio from the TV. If you want to enjoy surround audio for TV program, a separate audio cable connection is required.

In contrast, if a TV with the ARC function is connected via HDMI connections, no audio cable connection is required. Audio signals from the TV can be input to this unit through the HDMI cable between this unit and the TV. This function allows you to enjoy surround playback on this unit for the TV.

When the ARC function is used, connect a device with a "Standard HDMI cable with Ethernet" or "High Speed HDMI cable with Ethernet" for HDMI.

Refer to the owner's manual for your TV for details about TV connection and settings.

#### NOTE

The HDMI ZONE4 OUT connector is not compatible with the ARC function.

#### [Connection to a TV with the ARC function]

#### [Connection to a TV without the ARC function]

## Connecting this unit to a TV via HDMI connections

When a TV is connected to the HDMI ZONE4 OUT connector, you can play back a video or audio from the device connected to the HDMI 1 – 6 IN connector in ZONE4 ([page 111](#)).

### Cables used for connections

- This interface allows transfer of digital video signals and digital audio signals over a single HDMI cable.

- Video signals are not output if the input video signals do not match the monitor's resolution. In this case, switch the Blu-ray Disc/DVD player's resolution to a resolution with which the monitor is compatible.
- When this unit and monitor are connected with an HDMI cable, if the monitor is not compatible with HDMI audio signal playback, only the video signals are output to the monitor. Make audio connections ([page 16](#) "Connecting a TV").

### NOTE

- The HDMI 7 / MHL connector on the front panel does not support the HDMI ZONE4 function.
- The audio signal from the HDMI output connector (sampling frequency, number of channels, etc.) may be limited by the HDMI audio specifications of the connected device regarding permissible inputs.
- When connecting a TV that does not support the ARC function, an audio cable connection is required in addition to the HDMI cable. In this case, refer to "Connecting a TV" ([page 16](#)) for the connection method.**
- For the ARC function, see "About ARC (Audio Return Channel) function" ([page 10](#)).**

### Connecting to a device equipped with a DVI-D connector

The DVI-D (Digital Visual Interface) method is also used for video transmission via digital signals. This is developed mainly for computers, and some AV devices such as projectors are equipped with this interface. To output HDMI video signals to a DVI-D video input compatible device, use an HDMI/DVI conversion cable, which converts HDMI video signals to DVI signals. The DVI-D connector can transmit high quality digital signals, but the copy guard and other issues may hinder normal operations for some device combinations.

### NOTE

- No sound is output when connected to a device equipped with a DVI-D connector. Make audio connections as described in "Connecting a TV" ([page 16](#)).
- Signals cannot be output to DVI-D devices that do not support HDCP.
- Depending on the combination of devices, the video signals may not be output.

### Settings required when using a TV that supports the ARC function

When using a TV that supports the ARC function, make the following settings.

- Set "HDMI Control" ([page 130](#)) to "On".
- Set "Control Monitor" ([page 130](#)) to match the number of the HDMI MONITOR connector connected to the TV that supports the ARC function.

### NOTE

If the TV that supports the ARC function is connected to both HDMI MONITOR 1 and HDMI MONITOR 2 connectors, you cannot use ARC function at the same time.

## Connecting this unit to video devices via HDMI connections

### Cables used for connections

[Rear panel]

[Front panel]

- Connect Mobile (Smartphone etc.) to the HDMI 7 / MHL connector on the front panel.
- When this unit is connected to other devices with HDMI cables, connect this unit and TV also with an HDMI cable.
- When connecting a device that supports Deep Color or 4K, please use a “High Speed HDMI cable” or “High Speed HDMI cable with Ethernet”.
- Video signals are not output if the input video signals do not match the monitor’s resolution. In this case, switch the Blu-ray Disc/DVD player’s resolution to a resolution with which the monitor is compatible.

### NOTE

- The HDMI 7 / MHL connector on the front panel does not support the HDMI ZONE4 function.
- The HDMI 7 / MHL connector on the front panel does not support the InstaPrevue function.
- The HDMI 7 / MHL connector on the front panel does not support the 4K.

## ❑ Connecting a player compatible with the Denon Link HD function

By making a Denon Link HD connection to a player compatible with the Denon Link HD function, you can enjoy higher quality playback compared with when only the HDMI connector connection is made. For the playback method, see “Playing a Blu-ray Disc player compatible with Denon Link HD” ([page 42](#)).

When making this connection, set “Input Assign” – “DIGITAL” ([page 136](#)) to “D.LINK”.

### NOTE

The Denon Link HD connector is not an audio signal input connector. Audio signals cannot be played back only by making a connection with the Denon Link HD connector.

## HDMI function

This unit supports the following HDMI functions:

### ❑ About 3D function

This unit supports input and output of 3D (3 dimensional) video signals of HDMI.

To play back 3D video, you need a TV and player that provide support for the HDMI 3D function and a pair of 3D glasses.

### NOTE

- When playing back 3D video, refer to the instructions provided in the manual of your playback device together with this manual.
- When playing back 3D video content, the menu screen or status display screen can be superimposed over the image. However, the menu screen or status display screen cannot be superimposed over certain 3D video content.
- If 3D video with no 3D information is input, the menu screen and status display on this unit are displayed over the playback video.
- If 2D video is converted to 3D video on the television, the menu screen and status display on this unit are not displayed correctly. To view the menu screen and status display on this unit correctly, turn the television setting that converts 2D video to 3D video off.

### ❑ About 4K function

This unit supports input and output of 4K (3840 x 2160 pixels) video signals of HDMI.

When a device supporting 4K is connected, use a cable compatible with “High Speed HDMI cable” or “High Speed HDMI cable with Ethernet”.

### ❑ HDMI pass through function ([page 130](#))

Signals input to the HDMI input connector are output to the television or other device connected to the HDMI output connector, even if the power of this unit is in standby.

## ❑ HDMI control function (👉 page 102)

This function allows you to operate external devices from the unit and operate the unit from external devices.

### NOTE

- The HDMI control function may not work depending on the device it is connected to and its settings.
- You cannot operate a TV or Blu-ray Disc player/DVD player that is not compatible with the HDMI control function.
- The HDMI ZONE4 function is compatible with the HDMI control function. To enable the HDMI control for the ZONE4 HDMI monitor, set "Control Monitor" (👉 page 130) to "ZONE4".

## ❑ About Content Type

This function was added with the HDMI standard. It automatically makes settings suitable for the video-output type (content information).

### NOTE

To enable the Content Type, set "Video Mode" to "Auto" (👉 page 131).

## ❑ Deep Color (👉 page 193)

When a device supporting Deep Color is connected, use a cable compatible with "High Speed HDMI cable" or "High Speed HDMI cable with Ethernet".

## ❑ Auto Lip Sync (👉 page 129, 193)

## ❑ "x.v.Color", sYCC601 color, Adobe RGB color, Adobe YCC601 color (👉 page 193, 195)

## ❑ High definition digital audio format

## ❑ ARC (Audio Return Channel) (👉 page 10)

### Copyright protection system

In order to play back digital video and audio such as BD-Video or DVD-Video via HDMI connection, both this unit and TV or the player need to support the copyright protection system known as HDCP (High-bandwidth Digital Content Protection System). HDCP is copyright protection technology comprised of data encryption and authentication of the connected AV devices. This unit supports HDCP.

- If a device that does not support HDCP is connected, video and audio are not output correctly. Read the owner's manual of your television or player for more information.

## Settings related to HDMI connections

Set as necessary. For details, see the respective reference pages.

## ❑ HDMI Setup (👉 page 129)

Make settings for HDMI video/audio output.

- |                  |                     |                       |
|------------------|---------------------|-----------------------|
| • Auto Lip Sync  | • Vertical Stretch  | • Pass Through Source |
| • HDMI Audio Out | • HDMI Pass Through | • Control Monitor*    |
| • Video Output   | • HDMI Control*     | • Power Off Control   |

\* Only these items are supported for HDMI ZONE4.

### NOTE

To output audio signals that are input from the HDMI input connector to a TV connected via HDMI, set "HDMI Audio Out" (👉 page 129) to "TV".

Audio signals input via the Analog/Coaxial/Optical input connectors cannot be output from the HDMI MONITOR output connector.

## Connecting an HDMI-incompatible device

For high quality video and surround playback, it is recommended to use an HDMI cable to connect this unit to TV and other video devices (see [page 9](#) “Connecting an HDMI-compatible device”).

This section describes connections when your device does not support HDMI connections.

### Connection methods for various devices

	<a href="#">page 16</a>		<a href="#">page 17</a>
	<a href="#">page 18</a>		<a href="#">page 19</a>
	<a href="#">page 20</a>		<a href="#">page 21</a>
	<a href="#">page 22</a>		<a href="#">page 23</a>

Audio cable (sold separately)	
Coaxial digital cable	
Optical cable	
Audio cable	
Cable (sold separately)	
Ethernet cable	

### Changing the source assigned to connectors

This unit can change the source that is assigned to the HDMI IN, DIGITAL AUDIO IN, COMPONENT VIDEO IN, VIDEO IN and AUDIO IN connectors.

Let us take a digital audio connection for Blu-ray Disc players for an example. The rear panel digital audio input connectors do not have the input connector indication for Blu-ray disc players (Blu-ray). However, DIGITAL AUDIO IN connectors have the “ASSIGNABLE” indication, which means that you can change the source assigned to these connectors. You can assign Blu-ray disc players to these connectors to use them for Blu-ray disc players. Select “Blu-ray” when switching functions on this unit to play back the source connected to these connectors.

#### How to change the source assigned to connectors [page 135](#)

## Connecting a TV

- This section describes how to connect when your TV does not support HDMI connections. For instructions on HDMI connections, see “Connecting an HDMI-compatible device” ([page 9](#)).
- To listen to TV audio through this device, use the optical digital connection.

For video connections, see “Converting input video signals for output (Video conversion function)” ([page 7](#)).

You can also make connections for the      part on the connection diagram. To make connections for these connectors, you need to make the input connector settings.

### To make connections for connectors indicated by **1**

Assign a connector to which an audio cable is inserted to “TV AUDIO” in “Input Assign” – “DIGITAL” ([page 136](#)).

### To make connections for connectors indicated by **2**

Assign a connector to which an audio cable is inserted to “TV AUDIO” in “Input Assign” – “ANALOG” ([page 136](#)).

## Connecting a set-top box (Satellite tuner/cable TV)

This section describes how to connect when your satellite tuner or cable TV does not support HDMI connections.

For instructions on HDMI connections, see “Connecting an HDMI-compatible device” ([page 9](#)).

You can also make connections for the   part on the connection diagram. To make connections for these connectors, you need to make the input connector settings.

### To make connections for connectors indicated by **1**

Assign a connector to which an audio cable is inserted to “CBL/SAT” in “Input Assign” – “DIGITAL” ([page 136](#)).

## Connecting a DVD player

This section describes how to connect when your DVD player does not support HDMI connections. For instructions on HDMI connections, see “Connecting an HDMI-compatible device” ([page 9](#)).

You can also make connections for the   part on the connection diagram. To make connections for these connectors, you need to make the input connector settings.

### To make connections for connectors indicated by 1

Assign a connector to which an audio cable is inserted to “DVD” in “Input Assign” – “DIGITAL” ([page 136](#)).

## Connecting a Blu-ray Disc player

This section describes how to connect when your Blu-ray disc player does not support HDMI connections. For instructions on HDMI connections, see “Connecting an HDMI-compatible device” ([page 9](#)).

When you want to play back HD Audio (Dolby TrueHD, DTS-HD, Dolby Digital Plus, DTS Express) and Multi-channel PCM with this unit, use an HDMI connection ([page 9](#) “Connecting an HDMI-compatible device”).

You can also make connections for the part on the connection diagram. To make connections for these connectors, you need to make the input connector settings.

### To make connections for connectors indicated by **1**

Assign a connector to which an audio cable is inserted to “Blu-ray” in “Input Assign” – “DIGITAL” ([page 136](#)).

### To make connections for connectors indicated by **2**

Assign a connector to which a video cable is inserted to “Blu-ray” in “Input Assign” – “VIDEO” ([page 136](#)).

## Connecting a game console

This section describes how to connect when your game console does not support HDMI connections. For instructions on HDMI connections, see “Connecting an HDMI-compatible device” ([page 9](#)).

You can also make connections for the   part on the connection diagram. To make connections for these connectors, you need to make the input connector settings.

### To make connections for connectors indicated by **1**

Assign a connector to which an audio cable is inserted to “GAME” in “Input Assign” – “DIGITAL” ([page 136](#)).

### To make connections for connectors indicated by **2**

Assign a connector to which a video cable is inserted to “GAME” in “Input Assign” – “VIDEO” ([page 136](#)).

### To make connections for connectors indicated by **3**

Assign a connector to which a video cable is inserted to “GAME” in “Input Assign” – “COMP” ([page 136](#)).

## Connecting a digital camcorder

This section describes how to connect when your digital camcorder does not support HDMI connections. For instructions on HDMI connections, see “Connecting an HDMI-compatible device” ([page 9](#)).

You can also make connections for the      part on the connection diagram. To make connections for these connectors, you need to make the input connector settings.

### To make connections for connectors indicated by **1**

Assign a connector to which an audio cable is inserted to “AUX1” in “Input Assign” – “DIGITAL” ([page 136](#)).

### To make connections for connectors indicated by **2**

Assign a connector to which a video cable is inserted to “AUX1” in “Input Assign” – “COMP” ([page 136](#)).

[Rear panel]

You can enjoy games by connecting a game machine via the AUX1 input connector. In this case, select the input source to “AUX1”.

### NOTE

When a non-standard video signal from a game machine or some other source is input, the video conversion function ([page 7](#)) might not operate. In this case, use the monitor output of the same connector as the input.

## Connecting a media player

- This section describes how to connect when your media player does not support HDMI connections. For instructions on HDMI connections, see “Connecting an HDMI-compatible device” ([page 9](#)).
- When recording analog audio, use the analog connection.
- See “REC OUT mode” ([page 107](#)) for operating instructions.

### NOTE

To record video signals through this unit, use the video cable for connection between this unit and the player.

You can also make connections for the      part on the connection diagram. To make connections for these connectors, you need to make the input connector settings.

### To make connections for connectors indicated by 1

Assign a connector to which an audio cable is inserted to “MEDIA PLAYER” in “Input Assign” – “DIGITAL” ([page 136](#)).

### To make connections for connectors indicated by 2

Assign a connector to which a video cable is inserted to “MEDIA PLAYER” in “Input Assign” – “COMP” ([page 136](#)).

## Connecting an iPod or USB memory device to the iPod/USB port

- You can enjoy music stored on an iPod or USB memory device.
- For operating instructions see “Playing an iPod” ([page 44](#)) or “Playing a USB memory device” ([page 47](#)).

DENON does not guarantee that all USB memory devices will operate or receive power. When using a portable USB connection type HDD of the kind to which an AC adapter can be connected to supply power, use the AC adapter.

### NOTE

- You cannot use the USB ports on the front panel and rear panel simultaneously.** Select and connect the USB port to use ([page 76](#)).
- USB memory devices will not work via a USB hub.
- It is not possible to use this unit by connecting the unit's iPod/USB port to a PC via a USB cable.
- Do not use an extension cable when connecting a USB memory device. This may cause radio interference with other devices.
- When connecting an iPhone to this unit, keep the iPhone at least 20 cm away from this unit. If the iPhone is kept closer to this unit and a telephone call is received by the iPhone, noise may be output from this device.
- If the iPod is connected using an iPod cable (commercially available) that is longer than 2 m, sound may not be played correctly. In this case, use a genuine iPod cable, or a cable that is shorter than 1 m.

## Cables used for connections

To connect an iPod to this unit, use the USB cable supplied with the iPod.

## Supported iPod models

### • iPod classic

iPod classic  
80GB

iPod classic  
160GB (2007)

iPod classic  
160GB (2009)

### • iPod nano

iPod nano  
3rd generation (video)  
4GB 8GB

iPod nano  
4th generation (video)  
8GB 16GB

iPod nano  
5th generation (video camera)  
8GB 16GB

iPod nano  
6th generation  
8GB 16GB

### • iPod touch

iPod touch  
1st generation  
8GB 16GB 32GB

iPod touch  
2nd generation  
8GB 16GB 32GB

iPod touch  
3rd generation  
32GB 64GB

iPod touch  
4th generation  
8GB 32GB 64GB

### • iPhone

iPhone  
4GB 8GB 16GB

iPhone 3G  
8GB 16GB

iPhone 3GS  
8GB 16GB 32GB

iPhone 4  
8GB 16GB 32GB

iPhone 4S  
16GB 32GB 64GB

## Connecting a CD player

You can enjoy CD sound.

You can also make connections for the   part on the connection diagram. To make connections for these connectors, you need to make the input connector settings.

### To make connections for connectors indicated by **1**

Assign a connector to which an audio cable is inserted to "CD" in "Input Assign" – "DIGITAL" ([page 136](#)).

## Connecting a record player

You can enjoy playing records.

- This unit is compatible with record players with an MM cartridge. When you connect to a record player with an MC cartridge, use a commercially available MC head amp or a step-up transformer.
- If you set this unit's input source to "PHONO" and increase the volume without connecting the record player, there may be a "booming" noise from the speakers.

### NOTE

The SIGNAL GND terminal of this unit is not a safety ground connection. Connect it to reduce noise when noise is excessive. Note that depending on the record player, connecting the ground line may have the reverse effect of increasing noise. In this case, it is not necessary to connect the ground line.

## Connecting an FM antenna

- Connect the FM antenna supplied with the unit to enjoy listening to radio broadcasts.
- After connecting the antenna and receiving a broadcast signal ([page 50](#) “Listening to FM broadcasts”), fix the antenna with tape in a position where the noise level becomes minimal.

### NOTE

- Do not connect two FM antennas simultaneously.
- If you are unable to receive a good broadcast signal, we recommend installing an outdoor antenna. For details, inquire at the retail store where you purchased the unit.

## Connecting a device with a multi-channel output connector

- You can connect this unit to an external device fitted with multi-channel sound audio output connectors to enjoy music and video.
- To play analog signals input from EXTERNAL IN connectors, set "Input Mode" ([page 138](#)) to "EXTERNAL IN".
- The video signal can be connected in the same way as a Blu-ray Disc player / DVD player ([page 18](#) "Connecting a DVD player", [page 19](#) "Connecting a Blu-ray Disc player").

## Connecting an external power amplifier

- You can use this unit as a pre-amp by connecting a commercially available power amp to the PRE OUT connector. Adding a power amp to each of the channels provides an even greater sound presence.
- Select the terminal to use and connect the device.

- When using just one surround back speaker, connect it to the left channel (L) terminal.
- Use the volume control on the subwoofer to control subwoofer volume.
- If the subwoofer volume sounds low, use the volume control provided on the subwoofer to adjust the volume.

# Connecting an external control device

## REMOTE CONTROL jacks

If this unit is installed in a location that is out of range of the signal from the remote control unit, you can still operate the unit and the devices connected to it by using a commercially available IR receiver. You can also use it to remotely control ZONE2, ZONE3 and ZONE4 (another room).

## RS-232C connector

When you connect an external control device, you can control this unit with the external control device (such as power supply operation, volume adjustment, and input source switching).

- Perform the operation below beforehand.
- ① Turn on the power of this unit.
  - ② Turn off the power of this unit from the external controller.
  - ③ Check that the unit is in the standby mode.

## TRIGGER OUT jacks

When a device with TRIGGER IN jack is connected, the connected device's power on/standby can be controlled through linked operation to this unit.

The TRIGGER OUT jack outputs a maximum 12 V/150 mA electrical signal.

- NOTE**
- Use the monaural mini-plug cable for connecting TRIGGER OUT jacks. Do not use the stereo mini-plug cable.
  - If the permissible trigger input level for the connected device is larger than 12 V/150 mA, or has shorted, the TRIGGER OUT jack cannot be used. In this case, turn off the power to the unit, and disconnect it.

## Connecting to a home network (LAN)

You can connect this unit to your home network (LAN) to perform various types of playbacks and operations as follows. This unit is also equipped with a switching hub function. Make network connections for this unit by carefully reading information on this page.

- Playback of network audio such as the Internet Radio and Media Servers
- Playback of music from online services
- AirPlay
- Operations on this unit via the network

In addition, when an updated firmware becomes available for improving this unit, the update information is delivered from us to this unit over the network. You can then download the latest firmware. For more information, on the menu, select "Update" ([page 154](#)).

Network settings are necessary. See "Network" on the menu ([page 146](#)) for more information on network setting.

The figure above is an example. Connect the LAN cable to any of the NETWORK connectors from 1 – 4.

**For connections to the Internet, contact an ISP (Internet Service Provider) or a computer shop.**

## Required system

### ❑ Broadband internet connection

#### ❑ Modem

Device that connects to the broadband circuit and conducts communications on the Internet. A type that is integrated with a router is also available.

#### ❑ Router

When using this unit, we recommend you use a router equipped with the following functions:

- Built-in DHCP server  
This function automatically assigns IP addresses on the LAN.
- Built-in 100BASE-TX switch  
When connecting multiple devices, we recommend a switching hub with a speed of 100 Mbps or greater.

### NOTE

- Connect the router to one of the NETWORK connectors on this unit. Furthermore, do not use more than 2 LAN cables when connecting this unit with a router.
- When connecting a hub to this unit, connect using just 1 LAN cable per hub. Connecting with two or more LAN cables may cause a malfunction.
- To use a NETWORK connector as a hub, set "Network" ([page 147](#)) in the menu to "Always On".
- The loop detection function is not provided.
- Do not connect in the following ways.

## Ethernet cable

### (CAT-5 or greater recommended)

- Use only a shielded STP or ScTP LAN cable which is available at retailer.
- The normal shielded-type Ethernet cable is recommended. If a flat-type cable or unshielded-type cable is used, other devices could be affected by noise.
- This product is equivalent to the crossover cable.

- If you have an Internet provider contract for a line on which network settings are made manually, make the settings at “Network” – “Settings” (page 148).
- With this unit, it is possible to use the DHCP and Auto IP functions to make the network settings automatically.
- When using this unit with the broadband router’s DHCP function enabled, this unit automatically performs the IP address setting and other settings.  
When using this unit connected to a network with no DHCP function, make the settings for the IP address, etc., at “Network” (page 146).
- When setting manually, check the setting contents with the network administrator.

### NOTE

- A contract with an ISP is required to connect to the Internet.  
No additional contract is needed if you already have a broadband connection to the Internet.
- The types of routers that can be used depend on the ISP. Contact an ISP or a computer shop for details.
- DENON assumes no responsibility whatsoever for any communication errors or troubles resulting from customer’s network environment or connected devices.
- This unit is not compatible with PPPoE. A PPPoE-compatible router is required if you have a contract for a type of line set by PPPoE.
- To listen to audio streaming, use a router that supports audio streaming.

## Connecting the power cord

After completing all the connections, insert the power plug into the power outlet.

### NOTE

- Do not plug in the power cord until all connections have been completed.
- Do not plug in the power cord until all connections have been completed. However, when the “Setup Assistant” is running, follow the instructions in the “Setup Assistant” (page 7) screen for making connections. (During “Setup Assistant” operation, the input/output connectors do not conduct current.)
- Do not bundle power cords together with connection cables. Doing so can result in humming or noise.

# Setup

Here, we explain “Audyssey® Setup”, which allows you to automatically make the optimal settings for your speakers, and “Network”, which allows you to connect this unit to a home network (LAN).

This unit lets you play via your home network (LAN) music files stored on a computer and music content such as that from Internet Radio.

❑ **Speaker connection** (🔗 [page 93](#))

❑ **Set up speakers (Audyssey® Setup)** (🔗 [page 33](#))

❑ **Making the network settings (Network)**  
(🔗 [page 40](#))

**Playback (Basic operation)** (🔗 [page 41](#))

**Selecting a listening mode (Sound Mode)**  
(🔗 [page 84](#))

**Playback (Advanced operation)** (🔗 [page 102](#))

## Set up speakers (Audyssey® Setup)

The acoustic characteristics of the connected speakers and listening room are measured and the optimum settings are made automatically. This is called “Audyssey® Setup”.

To perform measurement, place the setup microphone in multiple locations all around the listening area. For best results, we recommend you measure in six or more positions, as shown in the illustration (up to eight positions).

- When performing Audyssey® Setup, Audyssey MultEQ® XT 32/ Audyssey Dynamic EQ®/Audyssey Dynamic Volume® functions become active (🔗 [page 125, 126](#)).
- To set up the speakers manually, use “Speakers” (🔗 [page 139](#)) on the menu.

### NOTE

- Make the room as quiet as possible. Background noise can disrupt the room measurements. Close windows and turn off the power on electronic devices (TVs, radios, air conditioners, fluorescent lights, etc.). The measurements could be affected by the sounds emitted by such devices.
- During the measurement process, place cell phones outside the listening room. Cell phone signals could disrupt the measurements.
- Do not unplug the setup microphone from the main unit until Audyssey® Setup is completed.
- Do not stand between the speakers and setup microphone or allow obstacles in the path while the measurements are being made. This will cause inaccurate readings.
- During the measurement process, loud test sounds may be played, but this is part of normal operation. If there is background noise in room, these test signals will increase in volume.
- Operating **VOLUME ▲▼** on the remote control unit or **MASTER VOLUME** on the main unit during the measurements will cancel the measurements.
- Measurement cannot be performed when headphones are connected. Unplug the headphones before performing Audyssey® Setup.

### About setup microphone placement

- Measurements are performed by placing the setup microphone successively at multiple positions throughout the entire listening area, as shown in **[Example ①]**. For best results, we recommend you measure in six or more positions, as shown in the illustration (up to eight positions).
- Even if the listening environment is small as shown in **[Example ②]**, measuring at multiple points throughout the listening environment results in more effective correction.

**[Example ①]**

**[Example ②]**

**FL** Front speaker (L)  
**FR** Front speaker (R)  
**C** Center speaker

**SW** Subwoofer  
**SL** Surround speaker (L)  
**SR** Surround speaker (R)

### About the main listening position (\*M)

The main listening position is the position where listeners would normally sit or where one would normally sit alone within the listening environment. Before starting Audyssey® Setup, place the setup microphone in the main listening position. Audyssey MultEQ® XT 32 uses the measurements from this position to calculate speaker distance, level, polarity, and the optimum crossover value for the subwoofer.

## 1 Prepare the included setup microphone

Mount the setup microphone on a tripod or stand and place it in the main listening position.

When placing the setup microphone, adjust the height of the sound receptor to the level of the listener's ear.

If you do not have a tripod or stand, set up the microphone on, for example, a seat without a back.

### NOTE

- Do not hold the setup microphone in your hand during measurements.
- Avoid placing the setup microphone close to a seat back or wall as sound reflections may give inaccurate results.

## About Audyssey Sub EQ HT™

Audyssey Sub EQ HT™ makes the integration seamless by first compensating for any level and delay differences between the two subwoofers and then applying Audyssey MultEQ® XT 32 to both subwoofers together.

\* To run Audyssey Sub EQ HT™ you must select "Measure (2 spkrs)" in "Set up "Channel Select"" ([page 101](#)).

## 2 Set up the subwoofer

If using a subwoofer capable of the following adjustments, set up the subwoofer as shown below.

For details, see your subwoofer's manual.

### □ When using a subwoofer with a direct mode

Set the direct mode to "On" and disable the volume adjustment and crossover frequency setting.

### □ When using a subwoofer without a direct mode

Make the following settings:

- **Volume** : "12 o'clock position"
- **Crossover frequency** : "Maximum/Highest Frequency"
- **Low pass filter** : "Off"
- **Standby mode** : "Off"

## 3 Set up the zone mode

Press **ZONE SELECT** to switch the zone mode.

The **[M]** indicator lights.

### NOTE

When using a remote control with preset codes registered ([page 160](#)), press **AVR** to set the remote control to the AVR-operation mode before operation.

## Preparation

## 4 Connect the setup microphone to the SETUP MIC jack of this unit.

When the setup microphone is connected, the following screen is displayed.

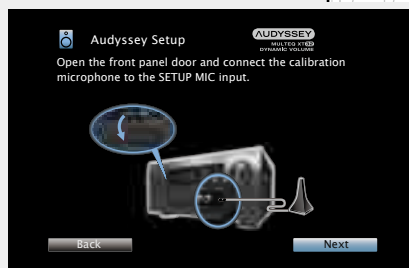

- Here, we explain setup using the example of 7.1-channel speaker playback.

For settings other than 7.1-channel speaker playback, select "Amp Assign" and perform step 3 to 10 of "Set up "Amp Assign"" ([page 99](#)).

If unused channels are set with "Channel Select", measuring time can be shortened. For setting, perform steps 13 to 19 of "Set up "Channel Select"" ([page 101](#)).

## Preparation (Continued)

**5** Select “Start” and then press **ENTER**.**6** Select “Next” and then press **ENTER**.  
The subwoofer volume setting screen is displayed.

## Detection &amp; Measurement (Main)

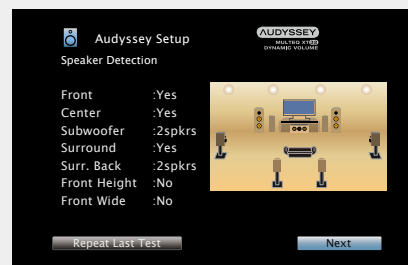

This step automatically checks the speaker configuration and speaker size, and calculates the channel level, distance, and crossover frequency. It also corrects distortion in the listening area.

**7** Select “Begin Test” and then press **ENTER**.  
The volume level for the subwoofer is measured.

- If the volume level for the subwoofer is not appropriate, an error message is displayed. See “Subwoofer level error message and how to adjust” ([page 39](#)) and adjust the volume level for the subwoofer.
- Measurement requires several minutes.
- To stop measuring, select “Cancel” and then press **ENTER**.

**8** The detected speakers are displayed.

- The illustration below shows an example of when the front speakers, center speaker, subwoofer, surround and surround back speakers have been detected.

**NOTE**

If a connected speaker is not displayed, the speaker may not be connected correctly. Check the speaker connection.

**9** Select “Next” and then press **ENTER**.**NOTE**

If “Caution!” is displayed on TV screen:

Go to “Error messages” ([page 38](#)). Check any related items, and perform the necessary procedures.

If the problem is resolved, return and restart “Audyssey® Setup”.

**Going back to the previous screen**

Select “Back” and then press **ENTER**.

**When measuring has stopped**

- ① Press **BACK** to display the popup screen.
- ② Press **<** to select “Yes”, and then press **ENTER**.

**Setting up the speakers again**

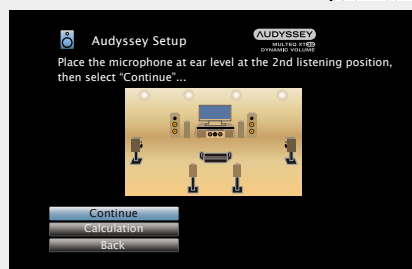

Repeat the operation from step 4.

## Measurement (2nd – 8th)

- In this step, you will perform measurements at multiple positions (two to eight positions) other than the main listening position.
- Just one position can be measured but measuring multiple positions increases the accuracy of the correction of acoustic distortion within the listening area.

### 10 Move the setup microphone to position 2, select “Continue”, and then press ENTER.

The measurement of the second position starts. Measurements can be made in up to eight positions.

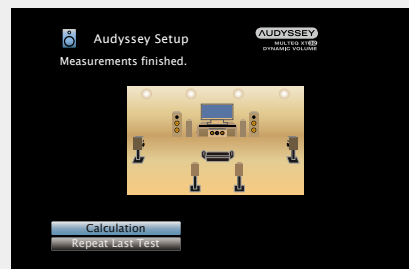

- To skip measuring the third and subsequent listening position, use  $\Delta \nabla$  to select “Calculation” and press **ENTER** to proceed to step 13.
- To measure the second position again, use  $\Delta \nabla$  to select “Repeat Last Test” and press **ENTER**.

## Calculation

### 11 Repeat step 10, measuring positions 3 to 8.

When measurement of position 8 is completed, a “Measurements finished.” message is displayed.

### 12 Select “Calculation” and then press ENTER.

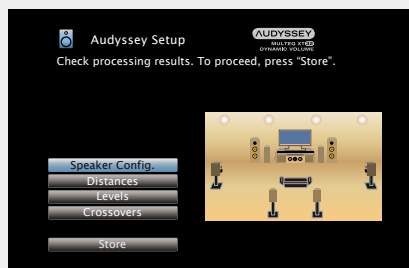

Measuring results are analyzed, and the frequency response of each speaker in the listening room is determined.

- Analysis takes several minutes to complete. The more speakers and measurement positions that there are, the more time it takes to perform the analysis.

## Check

**13** Use  $\Delta$ / $\nabla$  to select the item you want to check, and then press **ENTER**.

- Subwoofers may measure a greater reported distance than the actual distance due to added electrical delay common in subwoofers.
- If you want to check another item, press **BACK**.

**NOTE**

- If the result differs from the actual connection status, or if "Caution!" is displayed, see "Error messages" ([page 38](#)). Then carry out Audyssey® Setup again.
- If you change speaker positions or orientation, perform Audyssey® Setup again to find the optimal equalizer settings.

## Store

**14** Select "Store" and then press **ENTER**.  
Save the measurement results.

- Saving the results requires about 20 seconds.
- During saving of measurements results, "Now storing...Please wait." is displayed. When saving is completed, "Storing complete. Audyssey® Setup is now finished. Please unplug microphone." is displayed.

**NOTE**

During saving of measurement results, be sure not to turn off the power.

## Finish

**15** Unplug the setup microphone from the unit's **SETUP MIC** jack.

**16** Set Audyssey Dynamic Volume®.

- This feature adjusts the output volume to the optimal level while constantly monitoring the level of the audio input to the unit. Optimal volume control is performed automatically without any loss in the dynamism and clarity of the sound when, for example, the volume suddenly increases for commercials shown during television programs.

☐ **When turning Dynamic Volume on**

- Press  $\Delta$  to select "Yes", and then press **ENTER**.  
The unit automatically enters "Medium" ([page 126](#)) mode.

☐ **When turning Dynamic Volume off**

- Press  $\nabla$  to select "No", and then press **ENTER**.

**NOTE**

After performing Audyssey® Setup, do not change the speaker connections or subwoofer volume. In event of a change, perform Audyssey® Setup again.

## Error messages

### NOTE

- An error message is displayed if Audyssey® Setup could not be completed due to speaker placement, the measurement environment, etc. If an error message is displayed, check the relevant items and perform the necessary measures. Then perform Audyssey® Setup again.
- If the result still differs from the actual connection status after remeasurement or the error message still appears, it is possible that the speakers are not connected properly. Turn this unit off, check the speaker connections and repeat the measurement process from the beginning.
- Be sure to turn off the power before checking speaker connections.

Examples	Error details	Measures
 <p>Audyssey Setup Caution! : Please check the cable connection and retry. Microphone or Speaker is None Retry</p>	<ul style="list-style-type: none"> <li>• The connected setup microphone is broken, or a device other than the supplied setup microphone is connected.</li> <li>• Not all speakers could be detected.</li> </ul>	<ul style="list-style-type: none"> <li>• Connect the included setup microphone to the SETUP MIC jack of this unit.</li> <li>• Check the speaker connections.</li> </ul>
 <p>Audyssey Setup Caution! Ambient noise is too high or level is too low Retry</p>	<ul style="list-style-type: none"> <li>• There is too much noise in the room for accurate measurements to be made.</li> <li>• Speaker or subwoofer sound is too low for accurate measurements to be made.</li> </ul>	<ul style="list-style-type: none"> <li>• Either turn off any device generating noise or move it away.</li> <li>• Perform again when the surroundings are quieter.</li> <li>• Check the speaker installation and the direction in which the speakers are facing.</li> <li>• Adjust the subwoofer's volume.</li> </ul>
 <p>Audyssey Setup Caution! : Please check the cable connection and retry. Front R :None Retry</p>	<ul style="list-style-type: none"> <li>• The displayed speaker could not be detected. (The screen on the left indicates that the front right speaker cannot be detected.)</li> </ul>	<ul style="list-style-type: none"> <li>• Check the connections of the displayed speaker.</li> </ul>
 <p>Audyssey Setup Caution! : Please check the cable connection and retry. Front R :Phase Retry Phase Info. If you are sure the connection is correct, use ◀▶ to select "Skip Error", then press <b>ENTER</b>.</li> </ul> 

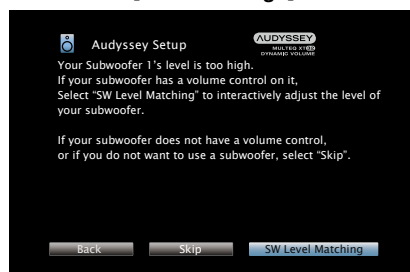

## ❑ Subwoofer level error message and how to adjust

The optimal level of each subwoofer channel for Audyssey Setup measurement is 75 dB.

During subwoofer level measurement (see [page 33](#) “Set up speakers (Audyssey® Setup)”), an error message is displayed when one level of subwoofers is outside the 72 – 78 dB range.

When using a subwoofer with built-in amplifier (active type), adjust the subwoofer volume so that the subwoofer level is within the 72 to 78 dB range.

### [Error message]

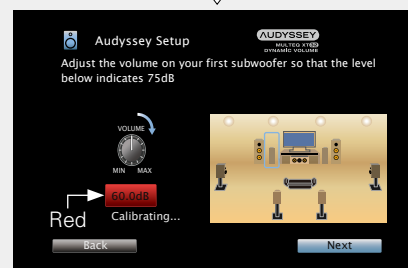

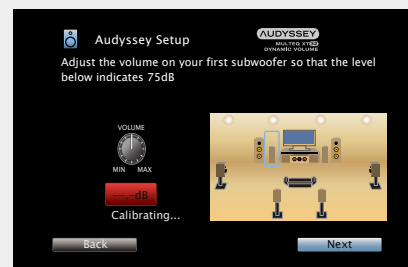

## 1 Select “SW Level Matching” and then press ENTER.

Subwoofer level measurement begins.

During measuring, a “Calibrating...” message is displayed.

The measured level appears on the level indicator after about 3 to 5 seconds.

- If the measured level is outside the 72 to 78 dB range, the level indicator is red.

- When measuring finishes, select “Back” and then press **ENTER**.

## 2 Adjust the volume control on your subwoofer so that the measured level is within the 72 to 78 dB range.

- If the measured level is within the 72 to 78 dB range, the level indicator is green.

## 3 When the measured level is within the 72 to 78 dB range, select “Next” and then press ENTER.

- If you use two subwoofers, the second subwoofer’s adjust will be started. Repeat the operation from step 2, 3.

When you use two subwoofers, adjust each subwoofer so that the volume levels of Subwoofer 1 and Subwoofer 2 are appropriate for your needs.

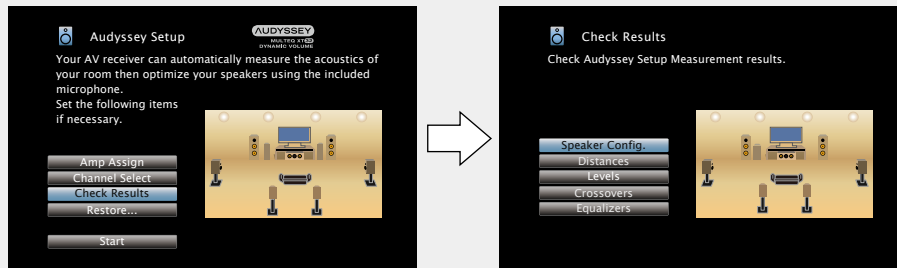

## Check Results

This function enables you to check the measurement results and equalizer characteristics after Audyssey® Setup.

**1** Press **SETUP** to display the menu on the TV screen.

**2** Use  $\Delta/\nabla$  to select “Speakers” – “Audyssey® Setup” and then press **ENTER** or  $\triangleright$ .

**3** Use  $\Delta/\nabla$  to select “Check Results” and then press **ENTER**.

**4** Use  $\Delta/\nabla$  to select the item you want to check, then press **ENTER**.  
Measurement results for each speaker are displayed.

**Speaker Config.** Check the speaker configuration.

**Distances** Check the speaker distance.

**Levels** Check the speaker channel level.

**Crossovers** Check the speaker crossover frequency.

**Equalizers** Check the equalizer.

- If “Equalizers” is selected, press  $\Delta/\nabla$  to select equalizing curve (“Audyssey” or “Audyssey Flat”) to be checked.  
Use  $\Delta/\nabla$  to switch the display between the different speakers.

**5** Press  $\triangleleft$  or **BACK**.  
The confirmation screen reappears. Repeat step 2.

## Retrieving Audyssey® Setup settings

If you set “Restore...” to “Restore”, you can return to Audyssey® Setup measurement result (value calculated at the start by MultEQ® XT 32) even when you have changed each setting manually.

## Making the network settings (Network)

This unit can be connected to a home network (LAN) to listen to Internet Radio or play back music files and still image (JPEG) files stored on a computer.

**1** Connect the Ethernet cable (🔗 [page 31](#) “Connecting to a home network (LAN)”).

**2** Turn on this unit (🔗 [page 41](#)).

This unit performs automatic network setup due to the DHCP function.

When connecting to a network that has no DHCP function, perform the setting in “Settings” (🔗 [page 148](#)).

# Playback (Basic operation)

## Setup (page 33)

- ❑ Turning the power on (page 41)
- ❑ Selecting the input source (page 41)
- ❑ Adjusting the master volume (page 42)
- ❑ Turning off the sound temporarily (page 42)

- ❑ Playing a Blu-ray Disc player/DVD player (page 42)
- ❑ Playing a Blu-ray Disc player compatible with Denon Link HD (page 42)
- ❑ Playing Super Audio CD (page 43)
- ❑ Playing a CD player (page 43)
- ❑ Playing an iPod (page 44)
- ❑ Playing a USB memory device (page 47)
- ❑ Listening to FM broadcasts (page 50)

- ❑ Listening to Internet Radio (page 61)
- ❑ Playing back files stored on a PC and NAS (page 64)
- ❑ Using online services (page 68)
- ❑ Convenient functions (page 76)
- ❑ AirPlay function (page 82)

## Selecting a listening mode (Sound Mode) (page 84)

## Playback (Advanced operation) (page 102)

## Important information

Before starting playback, make the connections between the different devices and the settings on the unit.

### NOTE

Also refer to the operating instructions of the connected devices when playing them.

## Turning the power on

Press **POWER** to turn on power to the unit.

The power indicator flashes green and the power turns on.

You can also switch the power to standby by pressing **POWER** on the main unit.

## When power is switched to standby

Press **POWER**.

### [Power indicator status in standby mode]

Normal standby : Off

- When "HDMI Pass Through" or "HDMI Control" (page 130) is set to "On" : Red
- When "Network" (page 147) is set to "Always On" : Red
- When a mobile device that supports MHL is being charged : Red

## Selecting the input source

Press the input source select button (CBL/SAT, Blu-ray, GAME, MEDIA PLAYER, DVD, AUX1, AUX2, CD, TUNER, PHONO, NETWORK, TV AUDIO, iPod/USB or INTERNET RADIO) to be played back.

The desired input source can be selected directly.

You can also use the following operation to select an input source.

## Select the input source using the main unit

Turn **SOURCE SELECT**.

- Turning **SOURCE SELECT** switches the input source, as shown below.

## Adjusting the master volume

Use **VOLUME ▲▼** to adjust the volume.

- The volume display method varies depending on the "Scale" setting ([page 124](#)).

❑ When the "Scale" setting ([page 124](#)) is "0 – 98"

[Adjustable range] 0.0 0.5 – 98.0

❑ When the "Scale" setting ([page 124](#)) is "–79.5dB – 18.0dB"

[Adjustable range] --- -- –79.5dB – 18.0dB

- The variable range differs according to the input signal and channel level setting.

You can also adjust the master volume by turning **MASTER VOLUME** on the main unit.

## Turning off the sound temporarily

Press **MUTE** .

- "MUTE" indicator on the display flashes.
-  appears on a TV screen.

- The sound is reduced to the level set at "Mute Level" ([page 124](#)).
- To cancel, press **MUTE**  again. Muting can also be canceled by adjusting the master volume.

## Playing a Blu-ray Disc player/DVD player

The following describes the procedure for playing Blu-ray Disc player/DVD player.

### 1 Prepare for playback.

- Turn on the power of the TV, subwoofer and player.
- Change the TV input to the input of this unit.
- Load the disc in the player.

### 2 Press **POWER** to turn on power to the unit.

### 3 Press **Blu-ray** or **DVD** to switch an input source for a player used for playback.

### 4 Play the Blu-ray Disc player or DVD player.

- Make the necessary settings on the player (language setting, subtitles setting, etc.) beforehand.

## Playing a Blu-ray Disc player compatible with Denon Link HD

- Denon Link HD uses the clock of the AV amplifier connected by Denon Link to achieve HDMI signal transfer with low jitter when playing BD.
- To play Denon Link HD signals, make HDMI and Denon Link connections with a compatible Blu-ray disc player ([page 13](#) "Connecting a player compatible with the Denon Link HD function").

### 1 Prepare for playback.

- Turn on the power of the TV, subwoofer and player.
- Change the TV input to the input of this unit.
- Load the disc in the player.

### 2 Press **POWER** to turn on power to the unit.

### 3 Perform the settings of the "Input Assign" menu ([page 135](#)).

- Assign HDMI connectors for the input source (example: Blu-ray).
- Set "DIGITAL" to "D.LINK".
  - The default assign of "D.LINK" is "Blu-ray".

### 4 Press the input source select button (example: **Blu-ray**) to switch an input source assigned in step 3 - ①.

### 5 Set the audio input mode to "Auto" or "HDMI" using the "Input Mode" menu ([page 138](#)).

- The default setting of "Input Mode" is "Auto".

### 6 Play the component connected to this unit.

- Make the necessary settings on the player (language setting, subtitles setting, etc.) beforehand.

## Playing a Blu-ray Disc player compatible with Denon Link HD

### NOTE

- Set the Blu-ray disc player's "Denon Link" setting to "On". For instructions on operation, refer to the Blu-ray disc player's manual.
- When a Blu-ray disc is played with the "Input Mode" (☞ [page 138](#)) set to "Auto" or "HDMI", playback is performed in the Denon Link HD mode.

## Playing Super Audio CD

The following describes the procedure for playing Super Audio CD.

### 1 Prepare for playback.

- ① Turn on the power of the subwoofer and player.
- ② Load the disc in the player.

### 2 Press **POWER** to turn on power to the unit.

### 3 Perform the settings of the "Input Assign" menu (☞ [page 135](#)).

Assign HDMI connectors for the input source(example: DVD).

### 4 Press the input source select button (example: DVD) to switch an input source assigned in step 3.

### 5 Set the audio input mode to "Auto" using the "Input Mode" menu (☞ [page 138](#)).

- The default setting of "Input Mode" is "Auto".

### 6 Play the component connected to this unit.

The **[DSD]** indicator lights on the display.

## Playing a CD player

The following describes the procedure for playing CD player.

### 1 Prepare for playback.

- ① Turn on the power of the subwoofer and player.
- ② Load the disc in the player.

### 2 Press **POWER** to turn on power to the unit.

### 3 Press **CD** to switch the input source to "CD".

### 4 Play the CD player.

When playing back Super Audio CD, DSD signals are converted into PCM signals which are then converted into analog signals.

## Playing an iPod

You can use the USB cable provided with the iPod to connect the iPod with the unit's iPod/USB port and enjoy music stored on the iPod. For information on the iPod models that can be played back with this unit, see "Connecting an iPod or USB memory device to the iPod/USB port" ([page 23](#)).

### Listening to music on an iPod

The iPod display modes include "From iPod" and "On-Screen". By default, "From iPod", where you directly operate iPod itself while seeing the iPod screen, is set. To change to "On-Screen", where you perform operations while having the iPod information displayed on the TV screen, see "Setting operation mode (iPod Browse Mode)" ([page 45](#)).

**1** Using the USB cable provided with the iPod, connect the iPod to the iPod/USB port ([page 23](#)).

**2** Press **POWER**  to turn on power to the unit.

**3** Press **iPod/USB** to switch the input source to "iPod/USB". "Remote iPod" is displayed on the display of this unit.

- Nothing is displayed on the TV screen.

**4** Operate iPod itself directly while seeing the iPod screen to play back music.

- ☐ Streaming music stored in iPhone, iPod touch, or iPad directly to the unit ([page 82](#))
- ☐ Playing iTunes music with this unit ([page 82](#))

### Operations available through the OPTION button

Press the **OPTION** button to display a menu of functions that can be used on the TV screen. Select the function you want to use from this menu. You can easily find and use the desired function.

☐ **Setting the USB port to use (USB Select)**  
([page 76](#))

☐ **Setting operation mode (iPod Browse Mode)**  
([page 45](#))

☐ **Performing repeat playback (Repeat)**  
([page 46](#))

☐ **Performing random playback (Random)**  
([page 46](#))

☐ **Adjusting the picture quality for your viewing environment (Picture Mode)** ([page 80](#))

☐ **All Zone Stereo function** ([page 80](#))

## ❑ Setting operation mode (iPod Browse Mode)

In this mode, various lists and screens during playback on iPod are displayed on the TV screen.

This section describes the steps up to playing back tracks on iPod in "On-Screen".

**1 Press iPod/USB to switch the input source to "iPod/USB".**

**2 Press OPTION.**  
The option menu screen is displayed.

**3 Select "iPod Browse Mode", then press ENTER.**  
The "iPod Browse Mode" screen is displayed.

**4 Use ◀ ▶ to select "On-Screen", then press ENTER.**  
The iPod screen is displayed.

- English letters, numbers and certain symbols are displayed. Incompatible characters are displayed as "." (period).
- Operations available for "On-Screen" and "From iPod" are listed below.

Display mode		From iPod	On-Screen
Playable files	Music file	✓	✓
	Video file	*	
Active buttons	Remote control unit (This unit)	✓	✓
	iPod	✓	

\* Only the sound is played.

**5 Use △▽ to select the item, then press ENTER or ▶ to select the file to be played.**

**6 Press ENTER, ▶ or ►.**  
Playback starts.

## ❑ Adjusting the sound quality (Restorer)

Make this setting at "Restorer" ([page 124](#)) in the menu.

You can use the "Restorer" function to restore to a state close to the audio before compression while correcting the bass feel to enjoy a richer playback experience. The default setting is "Mode 3 (Low)".

## ❑ Changing the screen display duration

Make this setting at "Now Playing" ([page 133](#)) in the menu. The default setting is "Always On".

When "Auto Off" is set, the on-screen display is turned off 30 seconds after an operation.

Press △▽◀▶ while the display is off to return to the original screen.

## ❑ Switching the screen display

Press **STATUS** on this unit during playback with "iPod Browse Mode" set to "On-Screen".

The display switches between track title, artist name, and album title etc. each time the button is pressed.

### NOTE

- Depending on the type of iPod and the software version, some functions may not operate.
- Note that DENON will accept no responsibility whatsoever for any problems arising with the data on an iPod when using this unit in conjunction with the iPod.

## Performing repeat playback (Repeat)

**1** Press **OPTION** with “iPod Browse Mode” set to “On-Screen”.  
The option menu screen is displayed.

**2** Use  $\Delta \nabla$  to select “Repeat”, then press **ENTER**.

**3** Use  $\triangleleft \triangleright$  to select repeat playback mode.

• Each time  $\triangleleft \triangleright$  is pressed, the setting is changed as shown below.

**Off** Repeat playback mode is canceled.

**One** A file being played is played repeatedly.

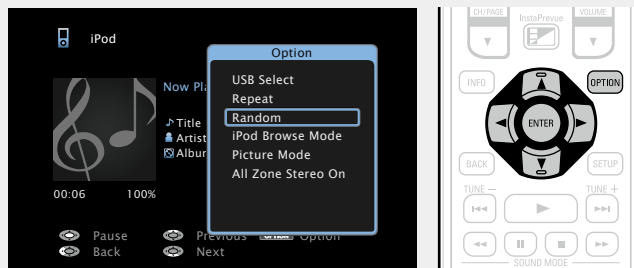

**All** All files in the folder currently being played are played repeatedly.

**4** Press **ENTER**.  
The display returns to the playback screen.

## Performing random playback (Random)

**1** Press **OPTION** with “iPod Browse Mode” set to “On-Screen”.  
The option menu screen is displayed.

**2** Use  $\Delta \nabla$  to select “Random”, then press **ENTER**.

**3** Use  $\triangleleft \triangleright$  to select random playback mode.

• Each time  $\triangleleft \triangleright$  is pressed, the setting is changed as shown below.

**Off** Disable random playback.

**On** Randomly play back all tracks in the current playback folder.

**4** Press **ENTER**.  
The display returns to the playback screen.

During random playback, each time playback of a track is completed, another track is randomly selected for playback from tracks in the folder. Therefore, the same track may be played back consecutively.

## iPod operation buttons

Operation buttons	Function
<b>CH/PAGE</b> $\Delta \nabla$	Page search

# Playing a USB memory device

Playing back music or still picture (JPEG) files recorded on a USB memory device.

## Important information

- Only USB memory devices conforming to mass storage class and MTP (Media Transfer Protocol) standards can be played on this unit.
- This unit is compatible with USB memory devices in “FAT16” or “FAT32” format.
- This unit is compatible with MP3 files conforming to “MPEG-1 Audio Layer-3” standards.
- File types that this unit can play back and specifications are shown below.

### [Supported file types]

Supported file types	USB memory devices *1
<b>WMA</b> (Windows Media Audio)	✓ *2
<b>MP3</b> (MPEG-1 Audio Layer-3)	✓
<b>WAV</b>	✓
<b>MPEG-4 AAC</b>	✓ *3
<b>FLAC</b> (Free Lossless Audio Codec)	✓
<b>JPEG</b>	✓
<b>ALAC</b> (Apple Lossless Audio Codec)	✓

\*1 USB memory device

- This unit is compatible with MP3 ID3-Tag (Ver. 2) standard.
- This unit can show the artwork that was embedded by using MP3 ID3-Tag Ver. 2.3 or 2.4.
- This unit is compatible with WMA META tags.
- If the image size (pixels) of an album artwork exceeds 500 × 500 (WMA/MP3/WAV/FLAC) or 349 × 349 (MPEG-4 AAC), then music may not be played back properly.
- WAV format Quantization bit length: 16 or 24 bits.
- FLAC format Quantization bit length: 16 or 24 bits.

\*2 Copyright-protected files can be played on certain portable players compatible with MTP.

\*3 Only files that are not protected by copyright can be played on this unit.  
Content downloaded from pay sites on the Internet are copyright protected. Also, files encoded in WMA format when ripped from a CD, etc. on a computer may be copyright protected, depending on the computer’s settings.

### NOTE

File types that this unit does not support are not displayed.

### [Compatible formats]

	Sampling frequency	Bit rate	Extension
<b>WMA</b> (Windows Media Audio)	32/44.1/48 kHz	48 – 192 kbps	.wma
<b>MP3</b> (MPEG-1 Audio Layer-3)	32/44.1/48 kHz	32 – 320 kbps	.mp3
<b>WAV</b>	32/44.1/48/88.2/96/ 176.4/192 kHz	–	.wav
<b>MPEG-4 AAC</b>	32/44.1/48 kHz	16 – 320 kbps	.aac/ .m4a/ .mp4
<b>FLAC</b> (Free Lossless Audio Codec)	32/44.1/48/88.2/96/ 176.4/192 kHz	–	.flac
<b>ALAC</b> (Apple Lossless Audio Codec) *	32/44.1/48/88.2/96 kHz	–	.m4a

\* Copyright [2012] [D&M Holdings. Inc.]

Licensed under the Apache License, Version 2.0 (the “License”); you may not use this file except in compliance with the License. You may obtain a copy of the License at <http://www.apache.org/licenses/LICENSE-2.0>

## Maximum Number of Playable Files and Folder

The limits on the number of folders and files that can be displayed by this unit are as follows.

Media	USB memory devices
Item	
Memory capacity	FAT16 : 2 GB, FAT32 : 2 TB
Number of folder directory levels *1	8 levels
Number of folders	500
Number of files *2	5000

\*1 The limited number includes the root folder.

\*2 The allowable number of files may differ according to the USB memory device capacity and the file size.

## Playing files stored on USB memory devices

**1** Connect the USB memory device to the iPod/USB port (page 23).

**2** Press **iPod/USB** to switch the input source to “iPod/USB”.

**3** Use  $\Delta$ / $\nabla$  to select the search item or folder, then press **ENTER** or  $\triangleright$ .

**4** Use  $\Delta$ / $\nabla$  to select the file, then press **ENTER**,  $\triangleright$  or  $\blacktriangleright$ . Playback starts.

### Adjusting the sound quality (Restorer)

Make this setting at “Restorer” (page 124) in the menu.

You can use the “Restorer” function to restore to a state close to the audio before compression while correcting the bass feel to enjoy a richer playback experience. The default setting is “Mode 3 (Low)”.

### Going back to the previous screen

Press  $\triangleleft$  or **BACK**.

### Changing the screen display duration

Make this setting at “Now Playing” (page 133) in the menu. The default setting is “Always On”.

When “Auto Off” is set, the on-screen display is turned off 30 seconds after an operation.

Press  $\Delta$ / $\nabla$ / $\triangleleft$   $\triangleright$  while the display is off to return to the original screen.

- When an MP3 music file includes album art data, the album art can be displayed while playing the file.
- If the USB memory device is divided into multiple partitions, only the first partition is played back.

### NOTE

- Note that DENON will accept no responsibility whatsoever for any problems arising with the data on a USB memory device when using this unit in conjunction with the USB memory device.
- USB memory devices will not work via a USB hub.
- DENON does not guarantee that all USB memory devices will operate or be supplied power. When using a USB portable hard disk that can draw power from an AC adapter, we recommend using the AC adapter.
- It is not possible to connect and use a computer via the iPod/USB port of this unit using a USB cable.

## Operations available through the OPTION button

Press the **OPTION** button to display a menu of functions that can be used on the TV screen. Select the function you want to use from this menu. You can easily find and use the desired function.

For antenna connections, see “Connecting an FM antenna” (page 27).

The modes for receiving FM broadcasts consists of “Auto” mode that automatically searches available broadcast stations and “Manual” mode that lets you tune in using buttons to change the frequency. The default setting is “Auto”. You can also use “Direct Tune” to tune in by entering the frequency directly.

In “Auto” mode, you cannot tune in to radio stations if the reception is not good. If this is the case, then use the “Manual” mode or “Direct Tune” to tune in.

## Listening to FM broadcasts

**1** Press **TUNER** to switch the input source to “FM”.

## 2 Press **TUNE +** or **TUNE -** to select the station you want to hear.

Scanning is performed until it finds an available radio station. When it finds a radio station, it stops the scan automatically and tunes in.

**❑ Adding to the FAVORITE STATION button**  
( page 78)

### Operations available through the OPTION button

Press the **OPTION** button to display a menu of functions that can be used on the TV screen. Select the function you want to use from this menu. You can easily find and use the desired function.

- ☐ **Tuning in by entering the radio frequency (Direct Tune)** ( [page 52](#))
- ☐ **RDS search** ( [page 57](#))
- ☐ **PTY search** ( [page 58](#))
- ☐ **TP search** ( [page 59](#))
- ☐ **Radio Text** ( [page 60](#))
- ☐ **Tuning in to radio stations and presetting them automatically (Auto Preset Memory)** ( [page 53](#))
- ☐ **Changing the tuning mode (Tune Mode)**  
( [page 51](#))
- ☐ **Presetting the current broadcast station (Preset Memory)** ( [page 54](#))
- ☐ **Specify a name for the preset broadcast station (Preset Name)** ( [page 55](#))
- ☐ **Skipping preset broadcast stations (Preset Skip)** ( [page 56](#))
- ☐ **All Zone Stereo function** ( [page 80](#))

## ❑ Changing the tuning mode (Tune Mode)

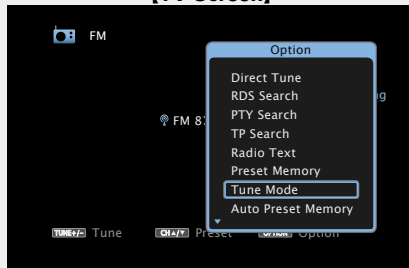

You can change the mode for tuning into FM broadcasts. If you cannot tune in automatically with “Auto” mode, then change the mode to “Manual” and tune in manually.

**1** Press **TUNER** to switch the input source to “FM”.

**2** Press **OPTION**.  
The option menu screen is displayed.

**3** Use  $\Delta \nabla$  to select “Tune Mode”, then press **ENTER**.

[TV Screen]

[Display of this unit]

**4** Use  $\triangleleft \triangleright$  to select tuning mode, then press **ENTER**.

[TV Screen]

[Display of this unit]

**Auto** Automatically tune to the station.

**Manual** Manually tune to the station.

**5** Press **TUNE +** or **TUNE -** to select the station you want to hear.  
The frequency changes in steps each time the button is pressed.

When tuning in stations manually, press and hold **TUNE +** or **TUNE -** to change frequencies continuously.

## ❑ Changing the screen display duration

Make this setting at “Now Playing” ([page 133](#)) in the menu.  
The default setting is “Always On”.

When “Auto Off” is set, the on-screen display is turned off 30 seconds after an operation.

Press  $\Delta \nabla \triangleleft \triangleright$  while the display is off to return to the original screen.

## ❑ Tuning in by entering the radio frequency (Direct Tune)

You can enter the receiving frequency directly to tune in.

**1** Press **TUNER** to switch the input source to “FM”.

**2** Press **OPTION**.  
The option menu screen is displayed.

**3** Use  $\Delta \nabla$  to select “Direct Tune”, then press **ENTER**.  
The direct tuner screen is displayed and “--” in the display flashes.

[TV Screen]

[Display of this unit]

**4** Use  $\Delta \nabla$  or **0 – 9** to select a number and press  $\triangleright$ .  
The screen that lets you enter the frequency is displayed.

[TV Screen]

[Display of this unit]

• If  $\triangleleft$  is pressed, the immediately preceding input is cancelled.

**5** Repeat step 4 and enter the frequency of the radio station you want to hear.

**6** When setting is completed, press **ENTER**.  
The preset frequency is tuned in.

## Presetting broadcast stations

### ❑ Tuning in to radio stations and presetting them automatically (Auto Preset Memory)

Up to 56 stations can be preset.

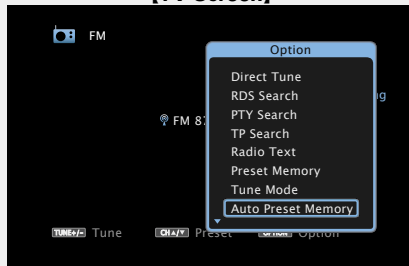

If "Auto Preset Memory" is performed after performing "Preset Memory", the "Preset Memory" settings will be overwritten.

**1** Press **TUNER** to switch the input source to "FM".

**2** Press **OPTION**.  
The option menu screen is displayed.

**3** Use  $\Delta$ / $\nabla$  to select "Auto Preset Memory", then press **ENTER**.

[TV Screen]

[Display of this unit]

**4** Press **ENTER**.

The unit starts to tune in to radio stations automatically and preset them.

[TV Screen]

[Display of this unit]

- When presetting is completed, "Completed" is displayed for about 5 seconds and the option menu screen turns off.

❑ Presetting the current broadcast station (Preset Memory)

Your favorite broadcast stations can be preset so that you can tune them in easily. Up to 56 stations can be preset.

**1** Tune in the broadcast station you want to preset.

**2** Press **OPTION**.  
The option menu screen is displayed.

**3** Use  $\Delta \nabla$  to select “Preset Memory”, then press **ENTER**.  
The list of already preset channels is displayed.

[TV Screen]

[Display of this unit]

**4** Use  $\Delta \nabla$  or **0 – 9** to select the channel you want to preset, then press **ENTER**.  
The current broadcast station that is preset.

- To preset other stations, repeat steps 1 to 4.

[TV Screen]

[Display of this unit]

The channel numbers of broadcast stations set as “Preset Skip” (see [page 56](#)) are grayed out, but these stations can be preset. When grayed out channel numbers are preset, these are highlighted and the “Preset Skip” setting changes to “On”.

Channel	Default Settings
1 – 8	87.50 / 89.10 / 98.10 / 108.00 / 90.10 / 90.10 / 90.10 / 90.10 MHz
9 – 16	90.10 / 90.10 / 90.10 / 90.10 / 90.10 / 90.10 / 90.10 / 90.10 MHz
17 – 24	90.10 / 90.10 / 90.10 / 90.10 / 90.10 / 90.10 / 90.10 / 90.10 MHz
25 – 32	90.10 / 90.10 / 90.10 / 90.10 / 90.10 / 90.10 / 90.10 / 90.10 MHz
33 – 40	90.10 / 90.10 / 90.10 / 90.10 / 90.10 / 90.10 / 90.10 / 90.10 MHz
41 – 48	90.10 / 90.10 / 90.10 / 90.10 / 90.10 / 90.10 / 90.10 / 90.10 MHz
49 – 56	90.10 / 90.10 / 90.10 / 90.10 / 90.10 / 90.10 / 90.10 / 90.10 MHz

Listening to preset stations

Use **CH/PAGE**  $\Delta \nabla$  or **0 – 9** to select the desired preset channel.

[Display of this unit]

## Specify a name for the preset broadcast station (Preset Name)

You can set the name to the preset broadcast station or change it. Up to eight characters can be input.

### 1 Press TUNER to switch the input source to "FM".

### 2 Press OPTION.

The option menu screen is displayed.

### 3 Use $\Delta$ / $\nabla$ to select "Preset Name", then press ENTER.

The Preset Name screen is displayed.

[TV Screen]

[Display of this unit]

### 4 Use $\triangleleft$ / $\triangleright$ to select the group of the broadcast station you want to name.

- Each time  $\triangleleft$ / $\triangleright$  is pressed, the setting is changed as shown below.

[TV Screen]

[Display of this unit]

### 5 Use $\Delta$ / $\nabla$ to select the broadcast station you want to name, then press ENTER.

[TV Screen]

[Display of this unit]

### 6 Use $\Delta$ / $\nabla$ to select a name label, then press ENTER.

The screen that lets you edit the preset name is displayed.

- If you select "Set Defaults", then the unit returns to displaying the frequency.

### 7 Enter the characters, then press **OK**.

- For character input, see [page 118](#).

### 8 Press BACK three times.

The display returns to the playback screen.

## ❑ Skipping preset broadcast stations (Preset Skip)

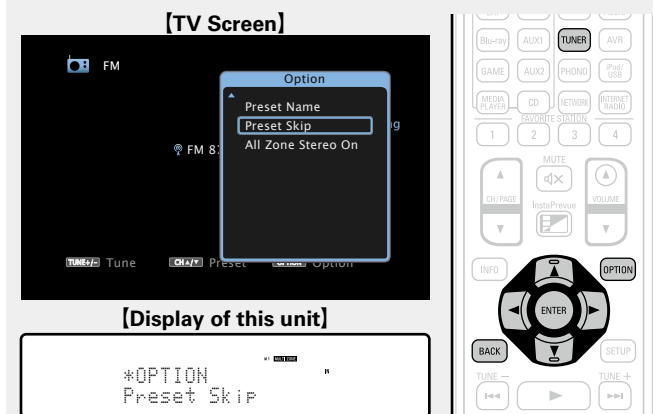

You can set in advance, the stations you do not want to be displayed when tuning in, by groups or by stations.

The preset skip setting is useful when tuning in, because only your favorite stations are displayed.

**1** Press **TUNER** to switch the input source to “FM”.

**2** Press **OPTION**.  
The option menu screen is displayed.

**3** Use  $\Delta \nabla$  to select “Preset Skip”, then press **ENTER**.  
The Preset Skip screen is displayed.

### 4-1 [To set the stations you want to skip by groups]

**①** Use  $\triangleleft \triangleright$  to select the group of broadcast stations you want to skip.

- Each time  $\triangleleft \triangleright$  is pressed, the setting is changed as shown below.

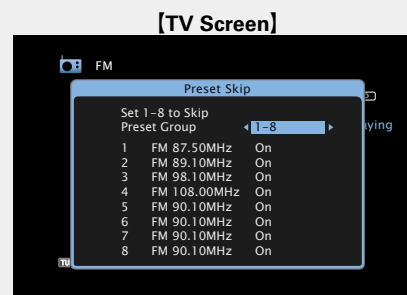

**②** Press  $\Delta$  to select “Set \* – \* to Skip”, then press **ENTER**.

All broadcast stations in the group “\* – \*” you selected are not displayed.

(\* are the selected group numbers)

**③** Press **BACK**.

[Display of this unit]

SKIP [ 1- 8 ]  
Set 1- 8 to Skip

### 4-2 [To set the stations you want to skip by stations]

**①** Use  $\triangleleft \triangleright$  to select the group of broadcast stations you want to skip.

- Each time  $\triangleleft \triangleright$  is pressed, the setting is changed as shown below.

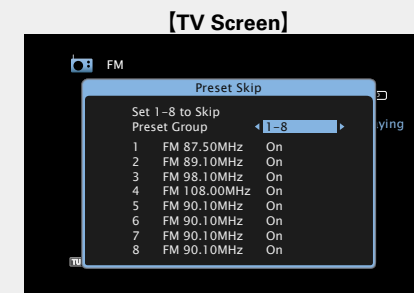

**②** Use  $\Delta \nabla$  to select the broadcast station you want to skip.

**③** Use  $\triangleleft \triangleright$  to select “Skip”.

The station you selected is not displayed.

**④** Press **BACK**.

[Display of this unit]

SKIP [ 1- 8 ]  
1 87.50MHz:45kP

## Cancelling preset skip

**1** While the Preset Skip screen is displayed, use ◀▶ to select a group containing a broadcast station to cancel the skip for.

**2** Use △▽ to select a broadcast station to cancel the skip for.

[TV Screen]

[Display of this unit]

**3** Use ◀▶ to select “On”.  
The skip is cancelled.

### NOTE

You cannot cancel the skip for each group.

## RDS search

RDS (works only on the FM band) is a broadcasting service which allows a station to send additional information along with the regular radio program signal.

Use this function to automatically tune to FM stations that provide the RDS service.

### NOTE

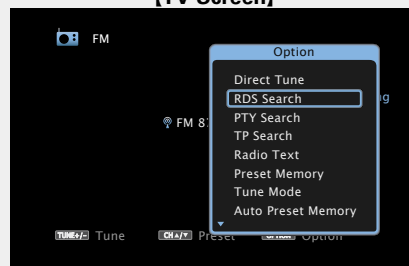

Note that the RDS function only works when receiving RDS compatible stations.

**1** Press **TUNER** to switch the input source to “FM”.

**2** Press **OPTION**.  
The option menu screen is displayed.

**3** Use △▽ to select “RDS Search”, then press **ENTER**.

[TV Screen]

[Display of this unit]

**4** Press **ENTER**.  
The search for RDS stations begins automatically.

[TV Screen]

[Display of this unit]

- If no RDS stations are found with the above operation, all the reception bands are searched.
- When a broadcast station is found, that station's name appears on the display.
- If no RDS station is found when all the frequencies have been searched, “NO RDS” is displayed.

If you press ◀▶ within 5 seconds after the broadcast station name is shown on the display, you can search for a different station.

## □ PTY search

Use this function to find RDS stations broadcasting a designated program type (PTY).

PTY identifies the type of RDS program.

The program types and their displays are as follows:

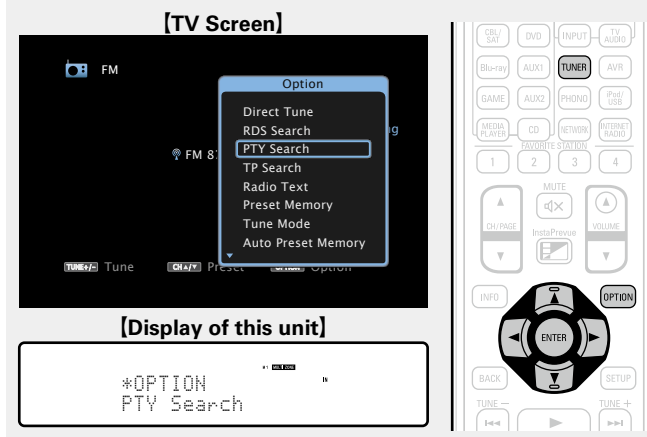

<b>NEWS</b>	News	<b>WEATHER</b>	Weather
<b>AFFAIRS</b>	Current Affairs	<b>FINANCE</b>	Finance
<b>INFO</b>	Information	<b>CHILDREN</b>	Children's program
<b>SPORT</b>	Sports	<b>SOCIAL</b>	Social Affairs
<b>EDUCATE</b>	Education	<b>RELIGION</b>	Religion
<b>DRAMA</b>	Drama	<b>PHONE IN</b>	Phone In
<b>CULTURE</b>	Culture	<b>TRAVEL</b>	Travel
<b>SCIENCE</b>	Science	<b>LEISURE</b>	Leisure
<b>VARIED</b>	Varied	<b>JAZZ</b>	Jazz Music
<b>POP M</b>	Pop Music	<b>COUNTRY</b>	Country Music
<b>ROCK M</b>	Rock Music	<b>NATION M</b>	National Music
<b>EASY M</b>	Easy Listening Music	<b>OLDIES</b>	Oldies Music
<b>LIGHT M</b>	Light Classical	<b>FOLK M</b>	Folk Music
<b>CLASSICS</b>	Serious Classical	<b>DOCUMENT</b>	Documentary
<b>OTHER M</b>	Other Music		

**1 Press TUNER to switch the input source to “FM”.**

**2 Press OPTION.**

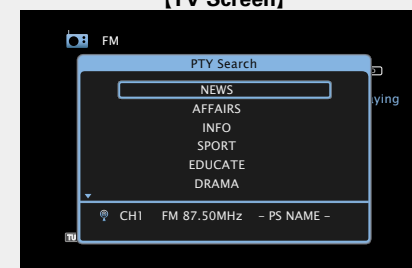

The option menu screen is displayed.

**3 Use  $\Delta$ / $\nabla$  to select “PTY Search”, then press ENTER.**

**4 Watching the display, press  $\Delta$ / $\nabla$  to call out the desired program type.**

[TV Screen]

[Display of this unit]

**5 Press ENTER.**

PTY search begins automatically.

- If there is no station broadcasting the designated program type with the above operation, all the reception bands are searched.
- The station name is displayed on the display after searching stops.
- If no station broadcasting the designated program type is found when all the frequencies have been searched, “NO PROGRAMME” is displayed.

If you press  $\triangleleft$ / $\triangleright$  within 5 seconds after the broadcast station name is shown on the display, you can search for a different station.

## TP search

TP identifies programs that carry traffic announcements.

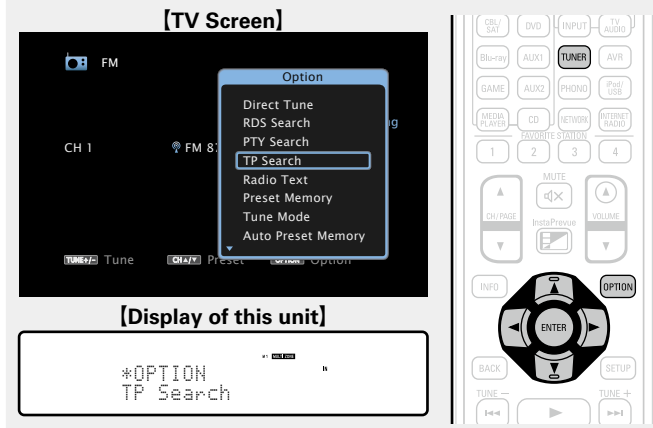

This allows you to easily find out the latest traffic conditions in your area before leaving home.

Use this function to find RDS stations broadcasting traffic programs (TP stations).

**1 Press TUNER to switch the input source to “FM”.**

**2 Press OPTION.**  
The option menu screen is displayed.

**3 Use  $\Delta$ / $\nabla$  to select “TP Search”, then press ENTER.**

**4 Press ENTER.**  
TP search begins automatically.

[TV Screen]

[Display of this unit]

- If no TP station is found with the above operation, all the reception bands are searched.
- The station name is displayed on the display after searching stops.
- If no other TP station is found when all the frequencies have been searched, “NO PROGRAMME” is displayed.

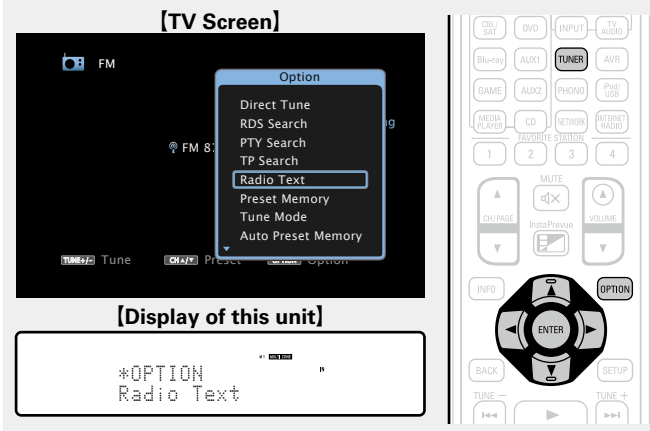

If you press  $\triangleleft$ / $\triangleright$  within 5 seconds after the broadcast station name is shown on the display, you can search for a different station.

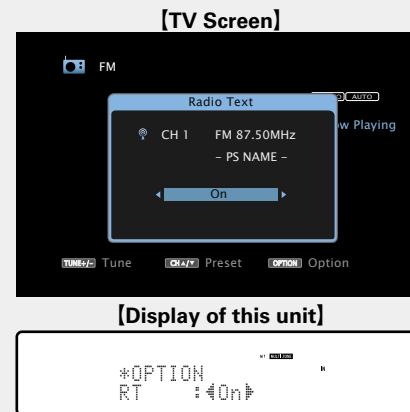

## Radio Text

RT allows RDS stations to send text messages that appear on the display.  
"Radio Text" appears on the display when radio text data is received.

- 1 Press **TUNER** to switch the input source to “FM”.
- 2 Press **OPTION**.  
The option menu screen is displayed.
- 3 Use  $\Delta \nabla$  to select “Radio Text”, then press **ENTER**.

- 4** Use  $\triangleleft \triangleright$  to select “On”, then press **ENTER**.

- While receiving an RDS broadcast station, the text data broadcast from the station is displayed.
- If no text data is being broadcast, "NO TEXT DATA" is displayed.

# Network contents

## Listening to Internet Radio

Internet Radio refers to radio broadcasts distributed over the Internet. Internet Radio stations from around the world can be received.

### Important information

The broadcast station types and specifications supported by this unit for playback are as follows.

#### [Playable broadcast station types]

Supported file types	Internet Radio
<b>WMA</b> (Windows Media Audio)	✓
<b>MP3</b> (MPEG-1 Audio Layer-3)	✓

#### [Playable broadcast station specifications]

	Sampling frequency	Bit rate	Extension
<b>WMA</b> (Windows Media Audio)	32/44.1/48 kHz	48 – 192 kbps	.wma
<b>MP3</b> (MPEG-1 Audio Layer-3)	32/44.1/48 kHz	32 – 320 kbps	.mp3

## Listening to Internet Radio

### 1 Prepare for playback.

- ① Check the network environment, then turn on this unit's power ([page 31](#) "Connecting to a home network (LAN)").
- ② If settings are required, make the "Settings" ([page 148](#)).

### 2 Press NETWORK.

- You can also press **INTERNET RADIO** to select the input source "Internet Radio" directly.

### 3 Use $\Delta \nabla \triangleleft \triangleright$ to select "Internet Radio", then press ENTER.

### 4 Use $\Delta \nabla$ to select the item you want to play, then press ENTER or $\triangleright$ .

<b>*****</b> (Country name)	Displays typical Internet Radio stations your country.
<b>Search Stations</b>	Displays all Internet Radio stations that this unit can tune in to.
<b>Search Podcasts</b>	Displays Internet Radio stations in the podcasts that this unit can tune in to.
<b>Recommended Stations</b>	Displays recommended Internet Radio stations.
<b>radiodenon.com</b>	Displays Internet Radio stations added to favorites in vTuner. For instructions on how to add to favorites in vTuner, see "Using vTuner to add Internet Radio stations to favorites" ( <a href="#">page 63</a> ).
<b>Recently Played</b>	Displays recently played Internet Radio stations. Up to 20 stations stored in "Recently Played".
<b>Search by Keyword</b>	Displays Internet Radio stations searched by keyword. For character input, see <a href="#">page 118</a> .

### 5 Repeat step 4 until the station list is displayed.

The station list is displayed.

### 6 Use $\Delta \nabla$ to select the station, then press ENTER or $\triangleright$ .

Playback starts once buffering reaches "100%".

### ❑ Adjusting the sound quality (Restorer)

Make this setting at “Restorer” (🔗 [page 124](#)) in the menu.

You can use the “Restorer” function to restore to a state close to the audio before compression while correcting the bass feel to enjoy a richer playback experience. The default setting is “Mode 3 (Low)”.

### ❑ Switching the screen display

Press **STATUS** on the main unit.

The display switches between track title and radio station name etc. each time the button is pressed.

### ❑ Going back to the previous screen

Press ◀ or **BACK**.

### ❑ Changing the screen display duration

Make this setting at “Now Playing” (🔗 [page 133](#)) in the menu. The default setting is “Always On”.

When “Auto Off” is set, the on-screen display is turned off 30 seconds after an operation.

Press △▽◀▶ while the display is off to return to the original screen.

- There are many Internet Radio stations on the Internet, and the quality of the programs they broadcast as well as the bit rate of the tracks varies widely. Generally, the higher the bit rate, the higher the sound quality, but depending on the communication lines and server traffic, the music or audio signals being streamed may be interrupted. Inversely, lower bit rates mean a lower sound quality but less tendency for the sound to be interrupted.
- “Radio station server full” or “Connection down” is displayed if the station is busy or not broadcasting.
- On this unit, folder and file names can be displayed as titles. Any characters that cannot be displayed are replaced with “.” (period).

#### NOTE

The radio station database service may be suspended without notice.

### Operations available through the OPTION button

Press the **OPTION** button to display a menu of functions that can be used on the TV screen. Select the function you want to use from this menu. You can easily find and use the desired function.

❑ **Searching content with keywords (Text Search)** (🔗 [page 76](#))

❑ **Add to favorites from the Option menu (Save to Favorites)** (🔗 [page 78](#))

❑ **Playing back music and a favorite picture at the same time (Slideshow)** (🔗 [page 79](#))

❑ **Adjusting the picture quality for your viewing environment (Picture Mode)** (🔗 [page 80](#))

❑ **All Zone Stereo function** (🔗 [page 80](#))

### ❑ Playing the last played Internet Radio station

This unit memorizes the last played Internet Radio station. If you press **INTERNET RADIO** to switch to the Internet Radio function from another input source, the last Internet Radio station you listened to is played.

#### Press INTERNET RADIO.

The source switches to “Internet Radio” and the last played radio station plays.

## ❑ Using vTuner to add Internet Radio stations to favorites

There are many Internet Radio stations in the world, and this unit can tune into these stations. But finding the radio station you want to hear may be difficult, because there are too many stations. If this is the case, then please use vTuner, an Internet Radio station search website specifically designed for this unit. You can use your PC to search Internet Radio stations and add them as your favorites. This unit can play radio stations added to vTuner.

### 1 Check the MAC address of this unit (☞ page 147).

The screen that lets you edit the preset name is displayed.

MAC address:

- The MAC address is necessary when you create an account for vTuner.

### 2 Use your PC to access the vTuner website (<http://www.radiodenon.com>).

The vTuner login screen is displayed.

### 3 Enter the MAC address of this unit, then click “Go”.

The account creation screen is displayed.

### 4 Enter your E-mail address and a password of your choice.

The account is registered and you can now log in.

### 5 Enter your account information (E-mail address and password) and log in.

The top menu of vTuner is displayed.

### 6 Select the search criteria (genre, region, language, etc.) of your choice.

The list of radio stations matching the criteria is displayed.

- You can also enter a keyword to search for a station you want to hear.

### 7 Select the radio station of your choice from the list, and then click the Add to Favorites icon.

The screen that lets you create a favorite group is displayed.

### 8 Enter the name of the favorite group, then click “Go”.

A new favorite group that includes the selected radio station is created.

- Internet Radio stations added to favorites in vTuner can be played from “radiodenon.com” (☞ page 61) with this unit.

## ❑ Internet Radio operation buttons

Operation buttons	Function
<b>TV</b>	TV power on/standby
<b>TV INPUT</b>	Switch TV input
<b>INTERNET RADIO</b>	Last played Internet Radio station
<b>FAVORITE STATION 1 – 4</b>	Call up favorites
<b>FAVORITE STATION 1 – 4</b> (Press and hold)	Add to the favorites list
<b>CH/PAGE</b>	Page search

# Playing back files stored on a PC and NAS

This unit can play back music files and playlists (m3u, wpl) stored on a PC and on Network Attached Storage (NAS) that supports DLNA.

## Important information

- The network audio playback function of this unit connects to the server using technologies shown below.
  - Windows Media Player Network Sharing Service
  - Windows Media DRM10
- File types that this unit can play back and specifications are shown below.

**[Supported file types]**

Supported file types	Media Server *1
<b>WMA</b> (Windows Media Audio)	✓
<b>MP3</b> (MPEG-1 Audio Layer-3)	✓
<b>WAV</b>	✓
<b>MPEG-4 AAC</b>	✓*2
<b>FLAC</b> (Free Lossless Audio Codec)	✓
<b>JPEG</b>	✓
<b>ALAC</b> (Apple Lossless Audio Codec)	✓

A server or server software compatible with distribution in the corresponding formats is required to play music files via a network.

\*1 Media Server

- This unit is compatible with MP3 ID3-Tag (Ver. 2) standard.
- This unit can show the artwork that was embedded by using MP3 ID3-Tag Ver. 2.3 or 2.4.
- This unit is compatible with WMA META tags.
- If the image size (pixels) of an album artwork exceeds 500 × 500 (WMA/MP3/WAV/FLAC) or 349 × 349 (MPEG-4 AAC), then music may not be played back properly.
- WAV format Quantization bit length: 16 or 24 bits.
- FLAC format Quantization bit length: 16 or 24 bits.

\*2 Only files that are not protected by copyright can be played on this unit.

Content downloaded from pay sites on the Internet are copyright protected. Also, files encoded in WMA format when ripped from a CD, etc. on a computer may be copyright protected, depending on the computer's settings.

### NOTE

File types that this unit does not support are not displayed.

**[Specifications of supported files]**

	Sampling frequency	Bit rate	Extension
<b>WMA</b> (Windows Media Audio)	32/44.1/48 kHz	48 – 192 kbps	.wma
<b>MP3</b> (MPEG-1 Audio Layer-3)	32/44.1/48 kHz	32 – 320 kbps	.mp3
<b>WAV</b>	32/44.1/48/88.2/96/ 176.4/192 kHz	–	.wav
<b>MPEG-4 AAC</b>	32/44.1/48 kHz	16 – 320 kbps	.aac/ .m4a/ .mp4
<b>FLAC</b> (Free Lossless Audio Codec)	32/44.1/48/88.2/96/ 176.4/192 kHz	–	.flac
<b>ALAC</b> (Apple Lossless Audio Codec) *	32/44.1/48/88.2/96 kHz	–	.m4a

## Applying media sharing settings

Here, we apply the settings to share music files stored on a PC and NAS on the network.

### ☐ Sharing media stored in PC

If you are using a Media Server, be sure to apply this setting first.

### When using Windows Media Player 12 (Windows 7)

#### NOTE

Perform this procedure after changing the control panel display to “Category”.

- 1** In the PC’s “Control Panel”, select “Network and Internet” - “Choose homegroup and sharing options”.
- 2** Select the “Stream my pictures, music, and videos to all devices on my home network” check box and select “Choose media streaming options”.
- 3** Select “Allowed” in the drop-down list for “AVR-4520”.
- 4** Select “Allowed” in the drop-down list for “Media programs on this PC and remote connections...”.
- 5** Click “OK” to finish.

### When using Windows Media Player 11

- 1** Start up Windows Media Player 11 on the PC.
- 2** Select “Media Sharing” in the “Library”.
- 3** Click the “Share my media” check box, select “AVR-4520”, and then click “Allow”.
- 4** As you did in step 3, select the icon of the device (other PCs and mobile devices) you want to use as a media controller, and then click “Allow”.
- 5** Click “OK” to finish.

### Sharing media stored in NAS

Change settings on the NAS to allow this unit and other devices (PCs and mobile devices) used as media controllers to access the NAS. For details, see the owner’s manual that came with the NAS.

## Playing back files stored on a PC and NAS

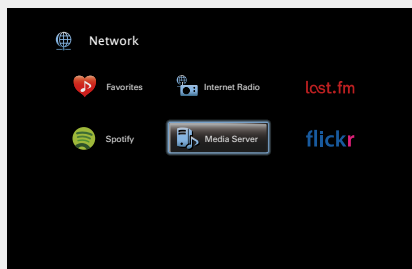

Use this procedure to play music files, image files or playlists.

### 1 Prepare for playback.

- ① Check the network environment, then turn on this unit's power (☞ [page 31](#) "Connecting to a home network (LAN)").
- ② If settings are required, make the "Settings" (☞ [page 148](#)).
- ③ Prepare the computer (☞ Computer's operating instructions).

### 2 Press **NETWORK**.

### 3 Use $\Delta \nabla \triangleleft \triangleright$ to select "Media Server", then press **ENTER**.

### 4 Use $\Delta \nabla$ to select the server including the file to be played, then press **ENTER** or $\triangleright$ .

### 5 Use $\Delta \nabla$ to select the search item or folder, then press **ENTER** or $\triangleright$ .

### 6 Repeat step 4 until the file is displayed.

### 7 Use $\Delta \nabla$ to select the file, then press **ENTER** or $\triangleright$ . Playback starts once buffering reaches "100%".

### ❑ Adjusting the sound quality (Restorer)

Make this setting at "Restorer" (☞ [page 124](#)) in the menu.

You can use the "Restorer" function to restore to a state close to the audio before compression while correcting the bass feel to enjoy a richer playback experience. The default setting is "Mode 3 (Low)".

### ❑ Switching the screen display

Press **STATUS** on the main unit.

The display switches between track title, artist name, and album title each time the button is pressed.

### ❑ Going back to the previous screen

Press  $\triangleleft$  or **BACK**.

### ❑ Changing the screen display duration

Make this setting at "Now Playing" (☞ [page 133](#)) in the menu. The default setting is "Always On".

When "Auto Off" is set, the on-screen display is turned off 30 seconds after an operation.

Press  $\Delta \nabla \triangleleft \triangleright$  while the display is off to return to the original screen.

- When a WMA (Windows Media Audio), MP3 or MPEG-4 AAC file includes album art data, the album art can be displayed while the music files are playing.
- If you use Ver.11 or later of Windows Media Player, the album art for WMA files can be displayed.
- WMA Lossless files can be played when using a server supporting transcoding, such as Windows Media Player Ver. 11 or later.

#### NOTE

- Depending on the size of the still picture (JPEG) file, some time may be required for the file to be displayed.
- The order in which the tracks/files are displayed depends on the server specifications. If the tracks/files are not displayed in alphabetical order due to the server specifications, searching by the first letter may not work properly.

## Operations available through the OPTION button

Press the **OPTION** button to display a menu of functions that can be used on the TV screen. Select the function you want to use from this menu. You can easily find and use the desired function.

❑ **Searching content with keywords (Text Search)** (🔗 [page 76](#))

❑ **Performing repeat playback (Repeat)** (🔗 [page 77](#))

❑ **Performing random playback (Random)** (🔗 [page 77](#))

❑ **Add to favorites from the Option menu (Save to Favorites)** (🔗 [page 78](#))

❑ **Playing back music and a favorite picture at the same time (Slideshow)** (🔗 [page 79](#))

❑ **Playing back still images in sequential order (Slideshow Interval)** (🔗 [page 79](#))

❑ **Adjusting the picture quality for your viewing environment (Picture Mode)** (🔗 [page 80](#))

❑ **All Zone Stereo function** (🔗 [page 80](#))

## Media Server operation buttons

Operation buttons	Function
<b>TV</b>	TV power on/standby
<b>TV INPUT</b>	Switch TV input

## Using online services

This unit supports playback of the online services shown below.

### ❑ About Last.fm (👉 [page 69](#))

Last.fm learns what you love... and it's a great way to discover new music.

Your new DENON AV receiver is very clever. You can create a free Last.fm profile when you start using your DENON AV receiver and magically keep track of all the songs you hear.

When you sign in at <http://www.last.fm>, you can see your top music charts, view thousands of reviews, biographies and artwork, and get recommendations for local performances you won't want to miss.

With an affordable subscription you can enjoy an endless choice of personalised ad-free radio stations.

Check out <http://www.last.fm/subscribe> today for more details.

Your subscription also gives you access to Last.fm radio on a great range of music products, including your DENON AV Receiver. This feature is not available in all countries.

Visit <http://www.last.fm/hardware> to find out more.

### ❑ About Flickr (👉 [page 72](#))

Flickr is an online photograph sharing service that started in 2004. You can use this unit to view photographs that have been made public by Flickr users. You do not need an account to use Flickr.

To view photographs that you recorded yourself, you need an account in order to upload these photographs to the Flickr server. For details, see the Flickr homepage.

<http://www.flickr.com/>

### ❑ About Spotify (👉 [page 74](#))

Introduce your DENON to a whole new world of music. With Spotify, you can enjoy instant access to millions of songs.

A Spotify Premium subscription is required.

For details, see the Spotify homepage.

<http://www.spotify.com>

## Listening to Last.fm

Last.fm radio is not available in all countries. Please check <http://www.last.fm/hardware> for more information. You'll also need a subscription. Get one today at <http://www.last.fm/subscribe>.

### 1 Prepare for playback.

- ① Check the network environment, then turn on this unit's power (ⓘ [page 31](#) "Connecting to a home network (LAN)").
- ② If settings are required, make the "Settings" (ⓘ [page 148](#)).
- ③ Complete step 3 and obtain a Last.fm account.
  - If you already have a Last.fm account, you do not need to obtain a new account. Use your existing Last.fm account.

### 2 Press NETWORK.

### 3 Use $\Delta \nabla \triangleleft \triangleright$ to select "Last.fm", then press ENTER.

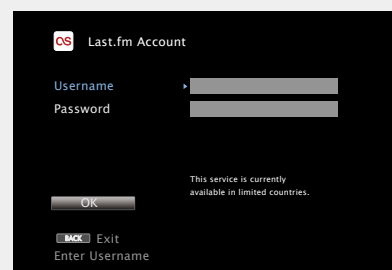

### 4 If you have a Last.fm account, press $\Delta \nabla$ to select "I have a Last.fm account". Then press ENTER or $\triangleright$ .

- If you do not have a Last.fm account, press  $\nabla$  to select "I am new to Last.fm". Then press ENTER. Create an account in accordance with the instructions on the screen.

### 5 Use $\Delta \nabla \triangleright$ to enter your username and password.

- For character input, see [page 118](#).

### 6 After inputting the username and password, select "OK", then press ENTER.

If the username and password match, the top menu for Last.fm is displayed.

### 7 Use $\Delta \nabla$ to select menu and then press ENTER.

**Popular Stations** Play popular artists and tags in your area.

**Your Recent Stations** Play your recent stations.

**Your stations** You can play tracks from the following personalised stations ("Your Recommended Radio", "Your Library", "Your Friends' Radio", "Your Top Artists".)

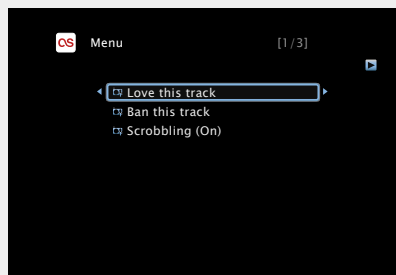

**Search Stations** You can search station by Artist or Tag.

### 8 Use $\Delta \nabla$ to select a station, and press ENTER or $\triangleright$ to start playback.

Playback starts and the following screen appears.

## 9 Menu items on playback screen.

**Love this track** Loving tracks improves your Last.fm recommendations, and you can optionally share them on popular social networks.

**Ban this track** If you ban a track, we won't play it again. You can undo this on the Last.fm website.

**Scrobbling** Scrobbling sends the tracks you played to your Last.fm account. You can see charts of the music you've been listening to, get recommendations for new music and events in your area and share your listening tastes with your friends. You can turn this service on or off using this option. The more you scrobble, the better your recommendations will become.

### NOTE

- The password should be no longer than 99 characters.
- Press **BACK** to cancel the input. When "Cancel input?" is displayed, select "Yes", then press **ENTER**.

### Adjusting the sound quality (Restorer)

Make this setting at "Restorer" ([page 124](#)) in the menu.

You can use the "Restorer" function to restore to a state close to the audio before compression while correcting the bass feel to enjoy a richer playback experience. The default setting is "Mode 3 (Low)".

### Switching the screen display

Press **STATUS** on the main unit.

The display switches between track title and radio station name each time the button is pressed.

### Going back to the previous screen

Press **<** or **BACK**.

### Changing the screen display duration

Make this setting at "Now Playing" ([page 133](#)) in the menu. The default setting is "Always On".

When "Auto Off" is set, the on-screen display is turned off 30 seconds after an operation.

Press **△▽<▷** while the display is off to return to the original screen.

### Log out

Disassociate this unit from your Last.fm account.

## 1 While the Last.fm top menu is displayed, press **BACK**.

## 2 When the popup menu appears, use **<▷** to select "Yes", then press **ENTER**.

## □ Last.fm operation buttons

Operation buttons	Function
<b>CH/PAGE ▲▼</b>	Page search
<b>INFO</b>	Display of information such as the source name, volume, and sound mode name
△▽◀▶	Cursor operation / Auto search (cue, △▽)
<b>ENTER</b> (Press and release)	Enter
<b>ENTER</b> (Press and hold)	Stop
<b>BACK</b>	Return
<b>SETUP</b>	Setup menu
▶▶I	Auto search (cue)

## Viewing photographs on the Flickr site

You can view photographs shared by particular users, or all of the photographs shared on Flickr.

### Viewing photographs shared by particular users

#### 1 Prepare for playback.

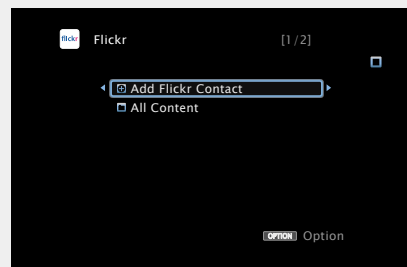

- ① Check the network environment, then turn on this unit's power (☞ [page 31](#) "Connecting to a home network (LAN)").
- ② If settings are required, make the "Settings" (☞ [page 148](#)).

#### 2 Press **NETWORK**.

#### 3 Use $\triangle \nabla \triangleleft \triangleright$ to select "Flickr", then press **ENTER**.

#### 4 Use $\triangle \nabla$ to select "Add Flickr Contact", then press **ENTER** or $\triangleright$ .

#### 5 In "Contact", add the screen name (user name you want to view) you want to add.

- For character input, see [page 118](#).

#### 6 After inputting the "Contact", press **OK**.

The screen name is added to "Contact", and the screen name you entered in Step 5 is displayed on the top screen of Flickr.

- If you enter a screen name that does not exist, "The Flickr Contact you entered could not be found" is displayed. Check and enter the correct screen name.

#### 7 Use $\triangle \nabla$ to select the folder, and then press **ENTER** or $\triangleright$ .

<b>Favorites</b>	Displays the favorite photographs of the specified user.
<b>Photostream</b>	Displays a list of shared photographs.
<b>PhotoSets</b>	Displays the folder (photograph album) list.
<b>Contacts</b>	Displays the screen name used by the specified user in Contacts.
<b>Remove this Contact</b>	Deletes a user from Flickr Contact.
<b>Add this Contact</b>	Adds a user from Flickr Contact.

#### 8 Use $\triangle \nabla$ to select the file, and then press **ENTER** or $\triangleright$ .

The selected file is displayed.

#### Going back to the previous screen

Press  $\triangleleft$  or **BACK**.

#### Operations available through the **OPTION** button

Press the **OPTION** button to display a menu of functions that can be used on the TV screen. Select the function you want to use from this menu. You can easily find and use the desired function.

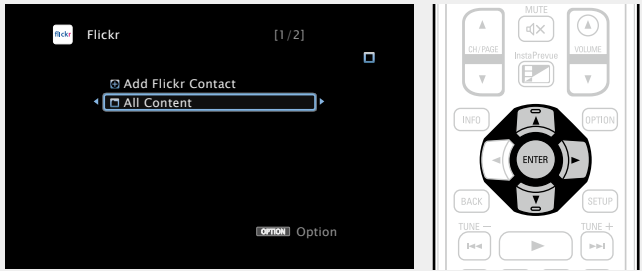

Playing back still images in sequential order (Slideshow Interval) (☞ [page 79](#))

Adjusting the picture quality for your viewing environment (Picture Mode) (☞ [page 80](#))

All Zone Stereo function (☞ [page 80](#))

❑ Viewing all photographs on Flickr

**1** Use  $\Delta \nabla$  to select “All Content”, then press **ENTER** or  $\triangleright$ .

**2** Use  $\Delta \nabla$  to select the folder, and then press **ENTER** or  $\triangleright$ .

- Interestingness** Displays photographs that are popular from the number of user comments or number of times they are added as favorites.
- Recent** Displays the most recently added photographs.
- Search by text** Search for photographs by keyword.

**3** Use  $\Delta \nabla$  to select the file, and then press **ENTER** or  $\triangleright$ .  
The selected file is displayed.

**NOTE**  
Depending on the file format, some photographs cannot be viewed.

❑ Flickr operation buttons

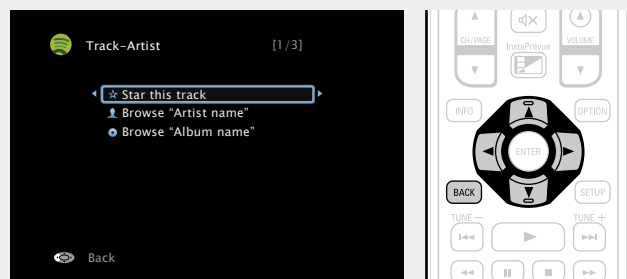

Operation buttons	Function

## Convenient functions

Here, we explain how to use convenient functions for NETWORK sources and USB sources. The source names under the titles of each function's description are sources that allow use of these functions.

### ❑ Setting the USB port to use (USB Select)

([page 76](#))

### ❑ Searching content with keywords (Text Search)

([page 76](#))

### ❑ Performing repeat playback (Repeat)

([page 77](#))

### ❑ Performing random playback (Random)

([page 77](#))

### ❑ Favorites function

([page 78](#))

### ❑ Playing back music and a favorite picture at the same time (Slideshow)

([page 79](#))

### ❑ Playing back still images in sequential order (Slideshow Interval)

([page 79](#))

### ❑ Adjusting the picture quality for your viewing environment (Picture Mode)

([page 80](#))

### ❑ All Zone Stereo function

([page 80](#))

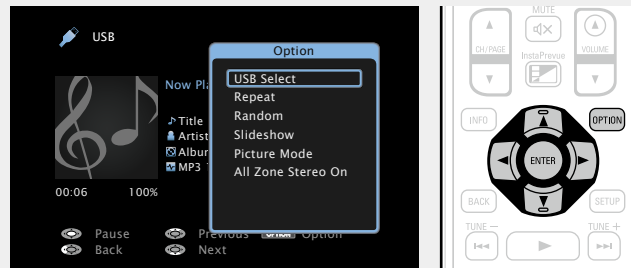

## Setting the USB port to use (USB Select)

iPod USB

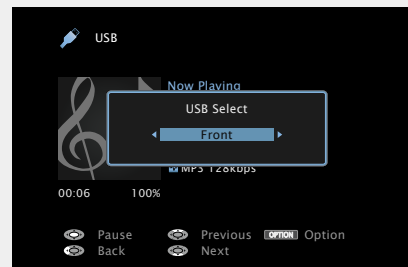

### 1 Press **OPTION**.

The option menu screen is displayed.

### 2 Use $\Delta$ / $\nabla$ to select "USB Select", then press **ENTER**.

### 3 Use $\triangleleft$ / $\triangleright$ to select the USB port to use.

• Each time  $\triangleleft$ / $\triangleright$  is pressed, the setting is changed as shown below.

Front  $\longleftrightarrow$  Rear

**Front** Uses the USB port on the front panel.

**Rear** Uses the USB port on the rear panel.

### 4 Press **ENTER**.

The display returns to the playback screen.

## Searching content with keywords (Text Search)

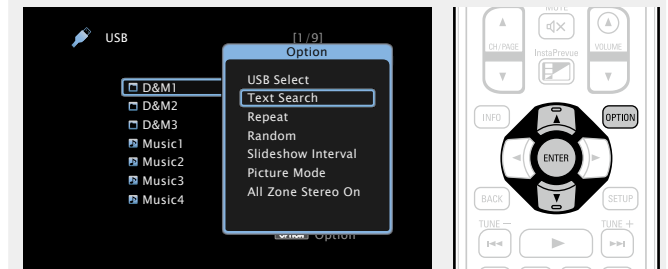

USB Internet Radio Media Server

### 1 While content is playing, press **OPTION**.

The option menu screen is displayed.

### 2 Use $\Delta$ / $\nabla$ to select "Text Search", then press **ENTER**.

The keyboard input screen is displayed.

### 3 Enter the first character of the Internet Radio station or file you want to search for, and then press **OK**.

• For character input, see [page 118](#).

"Text Search" searches for Internet Radio stations or files that start with the entered first character from the displayed list.

### NOTE

"Text Search" may not work for some lists.

### ❑ Playing back a search result content

Use  $\Delta$ / $\nabla$  to select the content you want to play, and then press **ENTER** or  $\triangleright$ .

Playback starts.

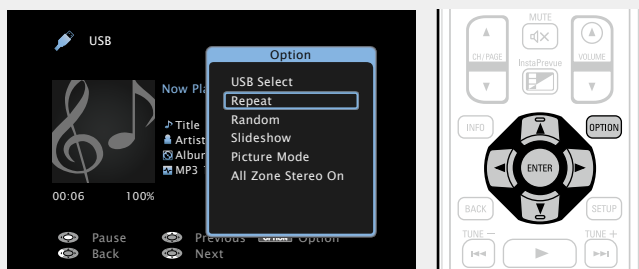

## Performing repeat playback (Repeat)

USB Media Server Spotify

**1** While content is playing, press **OPTION**.  
The option menu screen is displayed.

**2** Use  $\Delta$ / $\nabla$  to select “Repeat”, then press **ENTER**.

**3** Use  $\triangleleft$ / $\triangleright$  to select repeat playback mode.

• Each time  $\triangleleft$ / $\triangleright$  is pressed, the setting is changed as shown below.

**Off** Repeat playback mode is canceled.

**One** A file being played is played repeatedly.

**All** All files in the folder currently being played are played repeatedly.

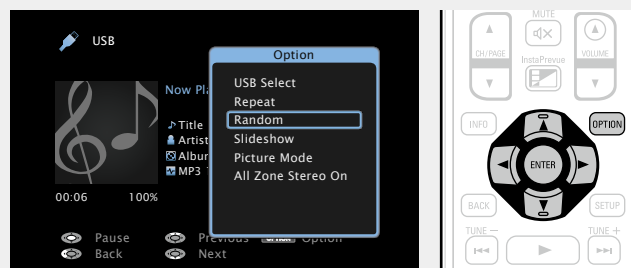

**4** Press **ENTER**.  
The display returns to the playback screen.

## Performing random playback (Random)

USB Media Server Spotify

**1** While content is playing, press **OPTION**.  
The option menu screen is displayed.

**2** Use  $\Delta$ / $\nabla$  to select “Random”, then press **ENTER**.

**3** Use  $\triangleleft$ / $\triangleright$  to select random playback mode.

• Each time  $\triangleleft$ / $\triangleright$  is pressed, the setting is changed as shown below.

**Off** Disable random playback.

**On** Randomly play back all tracks in the current playback folder.

**4** Press **ENTER**.  
The display returns to the playback screen.

During random playback, each time playback of a track is completed, another track is randomly selected for playback from tracks in the folder. Therefore, the same track may be played back consecutively.

## Favorites function

There are two ways to add content to favorites:

- ① Add to favorites from the Option menu
- ② Add to the **FAVORITE STATION** button

### ❑ Add to favorites from the Option menu (Save to Favorites)

**Internet Radio** **Media Server**

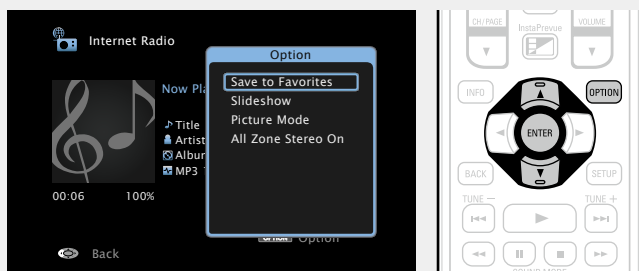

You can add up to 100 items as favorites for all sources (Internet Radio and Media Server).

#### 1 While content is playing, press **OPTION**.

The option menu screen is displayed.

#### 2 Use $\Delta \nabla$ to select “Save to Favorites”, then press **ENTER**.

“Favorite added” is displayed, and the current content is added to favorites.

- The display returns to the playback screen when the procedure is completed.

## Playing back content added in “Save to Favorites”

#### 1 Press **NETWORK**.

#### 2 Use $\Delta \nabla \triangleleft \triangleright$ to select “Favorites”, then press **ENTER**.

#### 3 Use $\Delta \nabla$ to select the content you want to play, and then press **ENTER** or $\triangleright$ . Playback starts.

### ❑ Adding to the **FAVORITE STATION** button

You can add up to four types of content.

#### NOTE

- Please note that if you add new content to a number that already contains content, the older content is deleted.
- The following operations update the database on the Media Server, which may make the added music files unplayable.
  - When you quit the Media Server and then restart it.
  - When music files are deleted or added on the Media Server.

#### While content is playing, press and hold one of the **FAVORITE STATION 1 – 4** buttons for more than 3 seconds.

The content is added to the button you pressed.

Contents that can be added to the **FAVORITE STATION** button differ depending on the input source.

Input source	Contents that can be added
<b>FM</b>	Radio station
<b>Internet Radio</b>	Top list of content / Internet Radio station
<b>Media Server</b>	Top list of content / Track
<b>Last.fm</b>	Top list of content
<b>Flickr</b>	Top list of content
<b>Spotify</b>	Top list of content
<b>Favorites</b>	Top list of content

## Playing back content added to the **FAVORITE STATION** button

You can easily call up content by pressing the **FAVORITE STATION** button.

#### Press one of the **FAVORITE STATION 1 – 4** buttons that you added content to.

Playback starts.

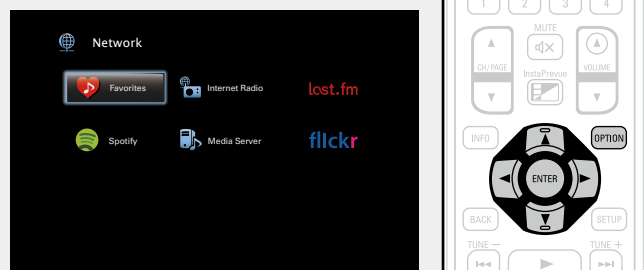

- When the **FAVORITE STATION 1 – 4** buttons is pressed, the AVR-operation mode starts automatically.
- Internet Radio stations are already registered to the **FAVORITE STATION 1 – 4** buttons. However, you may not be able to play the stations due to restrictions imposed by the radio stations.

## Deleting content added to favorites (Remove from Favorites)

**1** Press **NETWORK**.

**2** Use  $\Delta \nabla \triangleleft \triangleright$  to select “Favorites”, then press **ENTER**.

**3** Use  $\Delta \nabla$  to select the content you want to delete from favorites, then press **OPTION**.  
The option menu screen is displayed.

**4** Use  $\Delta \nabla$  to select “Remove from Favorites”, then press **ENTER**.  
“Favorite removed” is displayed, and the selected content is deleted from favorites.

- The display returns to the original screen when the procedure is completed.

## Playing back music and a favorite picture at the same time (Slideshow)

**USB** **Internet Radio** **Media Server**

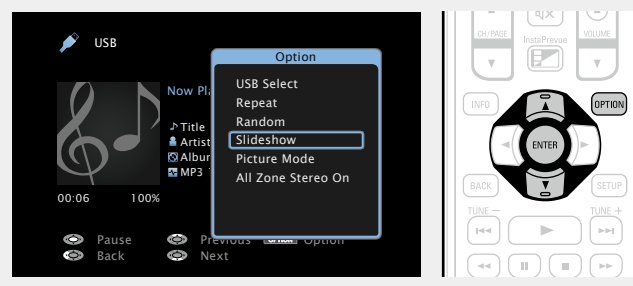

**1** Play back a still picture.

- Playing back still pictures stored on USB memory devices (page 48).
- Playing back still pictures stored on Flickr (page 72).

**2** Play back a music file or Internet Radio station (page 61, 66).

**3** Press **OPTION**.  
The option menu screen is displayed.

**4** Use  $\Delta \nabla$  to select “Slideshow”, then press **ENTER**.  
The option menu disappears, and the picture you were viewing is shown on the screen.

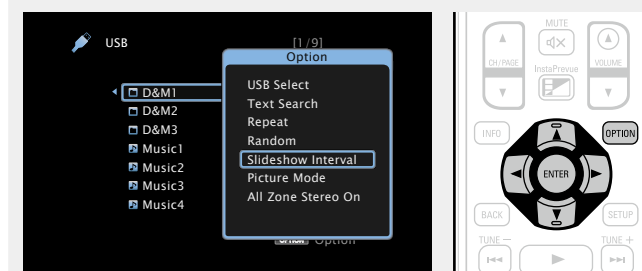

## Playing back still images in sequential order (Slideshow Interval)

You can play back still image (JPEG) files stored on a USB memory device or Media Server and pictures on Flickr website as a slide show. The display time can also be set.

**USB** **Media Server** **Flickr**

**1** Play back an image and press **OPTION**.  
The option menu screen is displayed.

**2** Use  $\Delta \nabla$  to select “Slideshow Interval”, then press **ENTER**.

**3** Use  $\triangleleft \triangleright$  to set the display time.

- Each time  $\triangleleft \triangleright$  is pressed, the setting is changed as shown below.

**Off** The slide show is not played back.

**5s – 60s** Set the time for displaying a single image when playing back images in the slide show.

**4** Press **ENTER**.  
The slide show is displayed on the screen.

This unit plays back image (JPEG) files in the orientation in which they are stored in the folder.

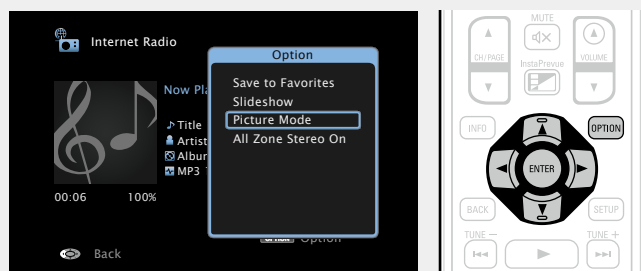

## Adjusting the picture quality for your viewing environment (Picture Mode)

CBL/SAT DVD Blu-ray GAME AUX1 AUX2 MEDIA PLAYER  
USB Internet Radio Media Server Flickr CD \* TV AUDIO \*

\* You can set the picture mode when an HDMI, component video or video connector is assigned.

**1** While content is playing, press **OPTION**.  
The option menu screen is displayed.

**2** Use  $\Delta \nabla$  to select “Picture Mode”, then press **ENTER**.

**3** Use  $\triangleleft \triangleright$  to select picture mode.

• Each time  $\triangleleft \triangleright$  is pressed, the setting is changed as shown below.

- Off** No picture quality adjustment is done with this unit.
- Standard** The standard mode suited for most living room viewing environments.
- Movie** A mode suited for watching movies in a dark room such as a theater room.
- Vivid** A mode that makes graphic images for games, etc. brighter and more vivid.
- Streaming** A mode suited for low bit rate video sources.
- Custom** Adjusts the picture quality manually.

**4** Press **ENTER**.  
The display returns to the playback screen.

## All Zone Stereo function

You can play back music in multi-zones (ZONE2/ZONE3) simultaneously that is played back in MAIN ZONE.

It is useful when you want to enjoy the same music at the same time in multiple rooms during home party or when you want to play back the same BGM in the entire house.

### Using the All Zone Stereo function (All Zone Stereo On)

The All Zone Stereo function can be set for any source.

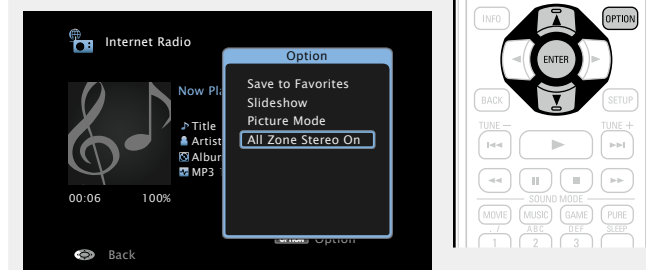

Before setting this function, you need to turn on the multi-zones (ZONE2/ZONE3) for which you want to use the All Zone Stereo function.

**1** Press **ZONE SELECT** to switch the zone mode.  
The **[M]** indicator lights.

**2** Press **OPTION**.  
The option menu screen is displayed.

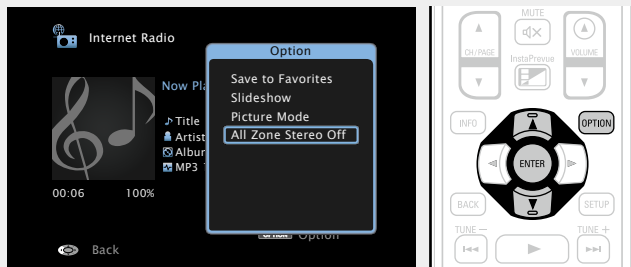

**3** Use  $\Delta \nabla$  to select “All Zone Stereo On”, then press **ENTER**.  
The input source for the multi-zones (ZONE2/ZONE3) is switched to the same as the one for MAIN ZONE, and playback in the All Zone Stereo mode starts.

## ❑ Stopping the All Zone Stereo function (All Zone Stereo Off)

**1** During playback in All Zone Stereo, press **OPTION**.  
The option menu screen is displayed.

**2** Use  $\Delta$ / $\nabla$  to select “All Zone Stereo Off”, then press **ENTER**.

The All Zone Stereo function is also stopped when you:

- Turn MAIN ZONE off.
- Change the input source for MAIN ZONE.
- Change the sound mode.

### NOTE

When “HDMI Audio Out” ([page 129](#)) is set to “TV”, the All Zone Stereo function is not available.

## AirPlay function

Enjoy music from your iTunes library with high quality sound anywhere in your home.

Use the Apple Remote App\* for iPhone, iPod touch and iPad to control iTunes from any room in your home.

\* Available as a free download from the App Store.

### Streaming music stored in iPhone, iPod touch, or iPad directly to the unit

If you update your "iPhone/iPod touch/iPad" to iOS 4.2.1 or later, you can stream music stored in your "iPhone/iPod touch/iPad" directly to this unit.

#### 1 Make the Wi-Fi settings for iPhone, iPod touch, or iPad.

• For details, see your device's manual.

#### 2 Startup iPhone, iPod touch, or iPad music or iPod app.

 is displayed on the iPhone, iPod touch or iPad screen.

#### 3 Tap the AirPlay icon .

#### 4 Select the speaker you want to use.

#### NOTE

In playback using the AirPlay function, the sound is output at the iPhone, iPod touch, iPad or iTunes volume setting level.

You should turn down the iPhone, iPod touch, iPad or iTunes volume prior to playback and then adjust it to a suitable level.

### Playing iTunes music with this unit

#### 1 Install iTunes 10, or later, on a Mac or Windows PC that is connected to the same network as this unit.

#### 2 Turn this unit ON.

Set "Network" ([see page 147](#)) to "Always On" for this unit.

#### NOTE

When "Network" is set to "Always On", the unit consumes more standby power.

#### 3 Launch iTunes and click the AirPlay icon displayed in the lower right of the window and select this unit from the list.

#### 4 Choose a song and click play in iTunes.

The music will stream to this unit.

### Selecting multiple speakers (devices)

It is possible to play iTunes songs on your home's AirPlay compatible speakers (devices) other than those of this unit.

#### 1 Click the AirPlay icon and select "Multiple Speakers" from the list.

#### 2 Check the speakers you want to use.

## ❑ Perform iTunes playback operations with the remote control unit of this unit

With this unit's remote control unit, you can perform iTunes song play, pause, and auto search (cue) operations.

**1** Select “Edit” – “Preferences...” on the menu.

**2** Select “Devices” in the iTunes setting window.

**3** Check “Allow iTunes control from remote speakers”, and then click “OK”.

-  is displayed on the menu screen while AirPlay is being operated.
- Source input will be switched to “NETWORK” when AirPlay playback is started.
- You can stop AirPlay playback by pressing the  or choosing other input source.
- To see song and artist names together, press **STATUS** on the main unit.
- For information about how to use iTunes, also see the Help for iTunes.
- The screen may differ depending on the OS and software versions.

# Selecting a listening mode (Sound Mode)

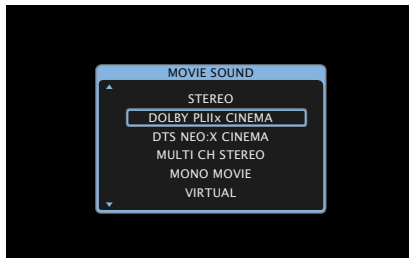

This unit allows you to enjoy various kinds of surround and stereo playbacks.

Multi-channel audio formats are adopted by many of the contents including Blu-ray disc and DVD as well as digital broadcasting and Internet-delivered movies and music.

This unit supports playback of almost all of these multi-channel audio formats. It also supports surround playback of audio formats other than multi-channel audio such as 2-channel stereo audio.

This unit automatically generates a list of all the playable sound modes based on the input audio format and the current speaker setup configuration and displays the list on the screen. Therefore, you can select a correct surround playback mode even if you are not familiar with sound mode selection. Try out various surround playback modes and enjoy surround playback in your favorite mode.

**[Example]** When **MOVIE** is pressed and held

This unit provides not only sound modes that conform to the formats recorded in discs such as Dolby and DTS but also extended types of modes that match your speaker configuration including front height speakers and surround back speakers and “original listening modes” that create atmosphere of ROCK ARENA and JAZZ CLUB, etc. The displayed sound modes include the 2-channel stereo playback mode.

For audio formats recorded in a disc, see the disc jacket.

## Selecting a listening mode

### 1 Play the selected device (page 42 – 74).

### 2 Press and hold **MOVIE**, **MUSIC** or **GAME** to select a listening mode.

This unit automatically generates and displays a list of selectable sound modes.

- Each time **MOVIE**, **MUSIC** or **GAME** is pressed, the listening mode is switched.

**MOVIE** Switches to the listening mode suitable for enjoying movies and TV programs.

**MUSIC** Switches to the listening mode suitable for enjoying music.

**GAME** Switches to the listening mode suitable for enjoying games.

- Pressing **MOVIE**, **MUSIC** or **GAME** displays a list of the listening modes that can be selected. Each time you press **MOVIE**, **MUSIC** or **GAME**, the listening mode changes.
- While the list is displayed, you can also use  $\Delta$ / $\nabla$  to select a listening mode.

- The **MOVIE**, **MUSIC**, or **GAME** button memorizes the last sound mode selected for its button. Pressing **MOVIE**, **MUSIC**, or **GAME** recalls the same sound mode as the one selected at the previous playback.
- If the content played back does not support the previously selected sound mode, the most standard sound mode for the content is automatically selected.

## Direct/DSD Direct playback

Sound recorded in source is played as is.

### 1 Play the selected device (page 42 – 74).

### 2 Press **PURE** to select “DIRECT” or “DSD DIRECT”. Direct playback begins.

“DSD DIRECT” is shown on the display when playing DSD signals in the DIRECT mode.

## Pure direct playback

This mode is for playback in higher sound quality than in “DIRECT” mode. Turn the display of the amplifier off to stop the analogue video circuit. This suppresses the source of noise that affects sound quality.

### 1 Play the selected device (page 42 – 74).

### 2 Press **PURE** to select “PURE DIRECT”. The display goes dark, and pure direct playback begins.

In DIRECT/DSD DIRECT and PURE DIRECT listening mode, the following items cannot be adjusted.

- Tone (page 123)
- Restorer (page 124)
- MultEQ® XT 32 (page 125)
- Dynamic EQ (page 125)
- Dynamic Volume (page 126)

### NOTE

- Video signals are only output when HDMI signals are played in the PURE DIRECT mode.
- When in the PURE DIRECT mode, the menu screen is not displayed.
- When in the PURE DIRECT mode, the display turns off and appears as if there is no electricity.

## Listening mode

- The following listening modes can be selected using the **MOVIE**, **MUSIC**, **GAME**, and **PURE** buttons.
- Adjust the sound field effect with the menu “Surround Parameter” ([page 121](#)) to enjoy your favorite sound mode.

When "Wides/Heights" is selected, a front wide channel and a front height channel are added in playback.
- \*5 This mode cannot be selected when DSD signals are input.

## Views on the TV screen or display

- ① Shows a decoder to be used.
- A DOLBY DIGITAL Plus decoder is displayed as "DOLBY D +".
- ② Shows a decoder that creates sound output from the surround back speakers.
- "+ PLIIz" indicates the front height sound from front height speakers.
- ③ Shows the name of the input source being played back.

## □ Description of listening mode types

### Dolby listening mode

Listening mode type	Description
DOLBY PLIIx*1	This mode can be selected when a Dolby Pro Logic IIx decoder is used to play back 2-channel source in 6.1/7.1-channel surround sound including the surround back channel. By adding the surround back channel, a stronger surround feeling is obtained compared to Dolby Pro Logic II. There are three playback modes: “Cinema” mode that is optimized for movie playback, “Music” mode that is optimized for music playback, and “Game” mode that is optimized for game play.
DOLBY PLII	This mode can be selected when a Dolby Pro Logic II decoder is used to play back 2-channel source in 5.1-channel surround sound with a natural, realistic feel.
DOLBY PLIIz*2	This mode can be selected when a Dolby Pro Logic IIz decoder is used to play back 2-channel source in 7.1-channel surround sound with added front height channel. By adding a front height channel, the vertical expression is emphasized, improving the three-dimensionality of the sound.
DOLBY DIGITAL	This mode can be selected when playing sources recorded with Dolby Digital.
DOLBY DIGITAL EX*1	Using a Dolby Digital EX decoder, this mode plays Dolby Digital source in 6.1/7.1 channel surround sound with added surround back channel. By adding a surround back channel, spacial expressiveness and sound localization are enhanced.
DOLBY TrueHD	This mode can be selected when playing sources recorded in Dolby TrueHD.
DOLBY DIGITAL Plus	This mode can be selected when playing sources recorded with Dolby Digital Plus.

\*1 This can be selected when “Speaker Config.” – “Surr. Back” ([page 142](#)) is not set to “None”.

\*2 This can be selected when “Speaker Config.” – “Front Height” ([page 142](#)) is not set to “None”.

### DTS listening mode

Listening mode type	Description
DTS NEO:X*1	This matrix decoding technology uses the DTS NEO:X decoder to playback 2-channel source or 5.1/6.1/7.1 channel surround sources as a maximum of 11.1 channel surround sound. There are 3 modes: “Music” suited for playing music, “Cinema” suited for playing movies, and “Game” which is optimized for playing games.
DTS SURROUND	This mode can be selected when playing sources recorded in DTS.
DTS ES DSCRT6.1*2	This mode is suitable for playing discs recorded in DTS-ES. The surround back channel added using the discrete method is played as an independent channel. Since all channels are independent, the 360-degree spacial expressiveness and sound localization are enhanced.
DTS ES MTRX6.1*3	This mode is suitable for playing discs recorded in DTS-ES. The surround back channel added to the surround-left and surround-right channels by a matrix encoder at software recording time is decoded by this unit’s matrix decoder and played from each channel (surround left, surround right, surround back).
DTS 96/24	This mode can be selected when playing sources recorded in DTS 96/24.
DTS-HD	This mode can be selected when playing sources recorded in DTS-HD.
DTS Express	This mode can be selected when playing sources recorded in DTS Express.

\*1 This mode cannot be selected when DSD signals are input.

\*2 This mode can be selected when only one surround back speaker is used and no front height speaker or front wide speaker is used.

\*3 This can be selected when “Speaker Config.” – “Surr. Back” ([page 142](#)) is not set to “None”.

### PCM/DSD multi-channel listening mode

Listening mode type	Description
MULTI CH IN	This mode can be selected when playing multi-channel PCM/DSD sources .

## Audyssey DSX® listening mode

Listening mode type	Description
Audyssey DSX® (A-DSX)*	This mode creates playback for the new channels (front wide or front height) in 5.1-channel systems. By adding front wide or front high channels, the surround sound effects sound more three dimensional and realistic.

\* This mode is displayed when “Audyssey DSX®” (🔧 [page 126](#)) is set to “Wides/Heights”, “Heights” or “Wides”.

## Original listening mode

Listening mode type	Description
MULTI CH STEREO	This mode is for enjoying stereo sound from all speakers. The same sound as that from the front speakers (L/R) is played back at the same level from the surround speakers (L/R) and surround back speakers (L/R).
WIDE SCREEN	This mode is for enjoying the atmosphere of viewing a movie on a large screen.
SUPER STADIUM	This mode is suited for viewing sports programs.
ROCK ARENA	This mode is for enjoying the atmosphere of a live concert in an arena.
JAZZ CLUB	This mode is for enjoying the atmosphere of a live concert in a jazz club.
CLASSIC CONCERT	This mode is for appreciating classical concert programs.
MONO MOVIE	This mode is for playing monaural movie sources with surround sound. When playing sources recorded in monaural in the “MONO MOVIE” mode, the sound will be off balance with a single channel (left or right), so input to both channels.
VIDEO GAME	This mode is suited for achieving surround sound with video games.
MATRIX	This mode lets you add a spacious feel to stereo music sources.
VIRTUAL	This mode is for enjoying surround effects using only the front speakers or headphones.

## STEREO listening mode

Listening mode type	Description
STEREO	This is the mode for playing in stereo. The tone can be adjusted. <ul style="list-style-type: none"> <li>• Sound is output from the front left and right speakers and subwoofer.</li> <li>• If multichannel signals are input, they are mixed down to 2-channel audio and are played.</li> </ul>

## Direct listening mode

Listening mode type	Description
DIRECT/DSD DIRECT	Sound recorded in source is played as is.
PURE DIRECT	This mode is for playback in higher sound quality than in DIRECT mode. This suppresses the source of noise that affects sound quality. The following circuits that affect sound quality are set to off. <ul style="list-style-type: none"> <li>• Main unit's display circuit (The display is turned off.)</li> <li>• Analog video input/output circuit</li> </ul>

## Advanced version

---

Here, we explain functions and operations that let you make better use of this unit.

- Installation/connection/setup of speakers (Advanced)  [page 91](#)
- Playback (Advanced operation)  [page 102](#)
- Playback in ZONE2/ZONE3/ZONE4 (Separate room)  [page 111](#)
- How to make detailed settings  [page 114](#)
- Operating external devices with the remote control  [page 157](#)

# Installation/connection/setup of speakers (Advanced)

## Procedure for speaker settings

**Speaker installation**

**Speaker connection** ([page 93](#))

**Set up speakers** ([page 99](#))

## Speaker installation

- Determine the speaker system depending on the number of speakers you are using and install each speaker and subwoofer in the room. Here, we explain how to install the speakers using a typical example.
- The speaker impedance should be from 4 to 16  $\Omega$ .

This unit is compatible with Audyssey DSX® ([page 193](#)), Dolby Pro Logic IIz ([page 194](#)) and DTS Neo:X ([page 194](#)) which offers an even wider and deeper surround sensation. When using Audyssey DSX®, install front wide speakers or front height speakers. When using Dolby Pro Logic IIz, install front height speakers.

Use the illustration below as a guide for how high each speaker should be installed. The height does not need to be exactly the same.

**[Viewed from the side]**

\*1 Recommended for Dolby Pro Logic IIz

\*2 Recommended for Audyssey DSX®

### NOTE

Depending on the "Amp Assign" ([page 141](#)) setting, audio cannot be output simultaneously from the surround back, front height, and front wide speakers.

## Typical speaker layout

When using Audyssey DSX<sup>®</sup>, install front wide speakers or front height speakers.

When using Dolby Pro Logic IIz, install front height speakers.

- \*1 22° – 30°    \*2 22° – 45°    \*3 55° – 60°  
 \*4 90° – 110°    \*5 135° – 150°

### [Speaker abbreviations]

- |                                 |                                      |
|---------------------------------|--------------------------------------|
| <b>FL</b> Front speaker (L)     | <b>SBL</b> Surround back speaker (L) |
| <b>FR</b> Front speaker (R)     | <b>SBR</b> Surround back speaker (R) |
| <b>C</b> Center speaker         | <b>FHL</b> Front height speaker (L)  |
| <b>SW</b> Subwoofer             | <b>FHR</b> Front height speaker (R)  |
| <b>SL</b> Surround speaker (L)  | <b>FWL</b> Front wide speaker (L)    |
| <b>SR</b> Surround speaker (R)  | <b>FWR</b> Front wide speaker (R)    |
| <b>SB</b> Surround back speaker |                                      |

## When 6.1ch speakers are installed

## When 5.1ch speakers are installed

## Speaker connection

Here, we connect the speakers in the room to this unit.  
This section explains how to connect them using a typical example.

- ❑ **Normal connection** (🔗 [page 94](#))
- ❑ **Bi-amp connection** (🔗 [page 95](#))
- ❑ **Multi-channel + 2-channel connection** (🔗 [page 96](#))
- ❑ **11.1-channel connection** (🔗 [page 97](#))
- ❑ **External power amplifier connection** (🔗 [page 98](#))

### NOTE

- Disconnect this unit's power plug from the power outlet before connecting the speakers. Also, turn off the subwoofer.
- Connect so that the speaker cable core wires do not protrude from the speaker terminal. The protection circuit may be activated if the core wires touch the rear panel or if the + and – sides touch each other (🔗 [page 195](#) "Protection Circuit").
- Never touch the speaker terminals while the power supply is connected. Doing so could result in electric shock. When the "Setup Assistant" is running, follow the instructions in the "Setup Assistant" screen for making connections. (Power is not supplied to the speaker terminals while the "Setup Assistant" is running.)
- Use speakers with the speaker impedances shown below.

Speaker terminals	Speaker impedance
FRONT	4 – 16 Ω
CENTER	
SURROUND	
SURROUND BACK	
FRONT HEIGHT	
FRONT WIDE	

- Use speakers where one speaker has an impedance of 4 to 16 Ω. When using a speaker with impedance of 4 Ω or 6 Ω, make sure to set the "Impedance" in the menu (🔗 [page 145](#)) to "6 Ω/ohms" or "4 Ω/ohms".
- On this unit, you can change how the power amplifiers within this unit are used according to your environment. For details see "Relationship between the Amp Assign mode settings and audio output" (🔗 [page 177](#)).

## Connecting the speaker cables

Carefully check the left (L) and right (R) channels and + (red) and – (black) polarities on the speakers being connected to this unit, and be sure to connect the channels and polarities correctly.

- 1 Peel off about 10 mm of sheathing from the tip of the speaker cable, then either twist the core wire tightly or terminate it.

- 2 Turn the speaker terminal counterclockwise to loosen it.

- 3 Insert the speaker cable's core wire to the hilt into the speaker terminal.

- 4 Turn the speaker terminal clockwise to tighten it.

## Cables used for connections

### Audio cable (sold separately)

Speaker cable

Subwoofer cable

## Connecting the subwoofer

Use a subwoofer cable to connect the subwoofer.

## Normal connection

The diagram on the right shows a typical connection method.

Connect your speakers so that they correspond to the speaker names indicated on the rear panel.

- If you connect the surround back, front height, and front wide speakers before you start playback, the audio is played back by automatically switching the speakers in accordance with the surround mode or input signals.
- If using only one surround back speaker, connect to the “L” side of the SURROUND BACK terminal. Also use the “Speaker Config.” setting ([page 142](#)) to set “Surr. Back” to “1spkr”. For speaker settings in this case, see “When 6.1ch speakers are installed” ([page 92](#)).

### NOTE

- For speaker cable connections, see [page 93](#).
- For speaker impedance, see [page 93](#).

### For connecting two subwoofers

Two subwoofers can be connected to this unit.

To use two subwoofers, set “Subwoofer” to “2 spkr” using the “Speaker Config.” setting ([page 142](#)).

The level and distance can be set separately for Subwoofer 1 and Subwoofer 2.

## Bi-amp connection

A bi-amp connection is to connect separate amplifiers to the tweeter terminals and woofer terminals of speakers compatible with the bi-amp function. This prevents the back electromotive force (returned force without output) of the woofer sent to the tweeter, which affects the sound quality of the tweeter, and you can enjoy playback with higher-quality sound.

In this case, set "Assign Mode" to "7.1ch(Bi-Amp)" or "5.1ch(Bi-Amp) + ZONE2" in steps 3 to 5 for "Set up "Amp Assign"" ([page 99](#)).

### NOTE

- For speaker cable connections, see [page 93](#).
- For speaker impedance, see [page 93](#).
- When making bi-amp connections, be sure to remove the short-circuiting plate or wire between the speaker's woofer and tweeter terminals.

When using a front wide speaker, you can use the connectors on the      part in the connection diagram to make a bi-amplifier connection. To make connections for these connectors, set "Main Speakers" ([page 100](#)).

## Multi-channel + 2-channel connection

You can connect the other front speakers for 2-channel playback using the DIRECT mode or STEREO mode.

The speakers used exclusively for multichannel playback and the speakers used exclusively for 2-channel playback are automatically switched for playback in accordance with the surround mode.

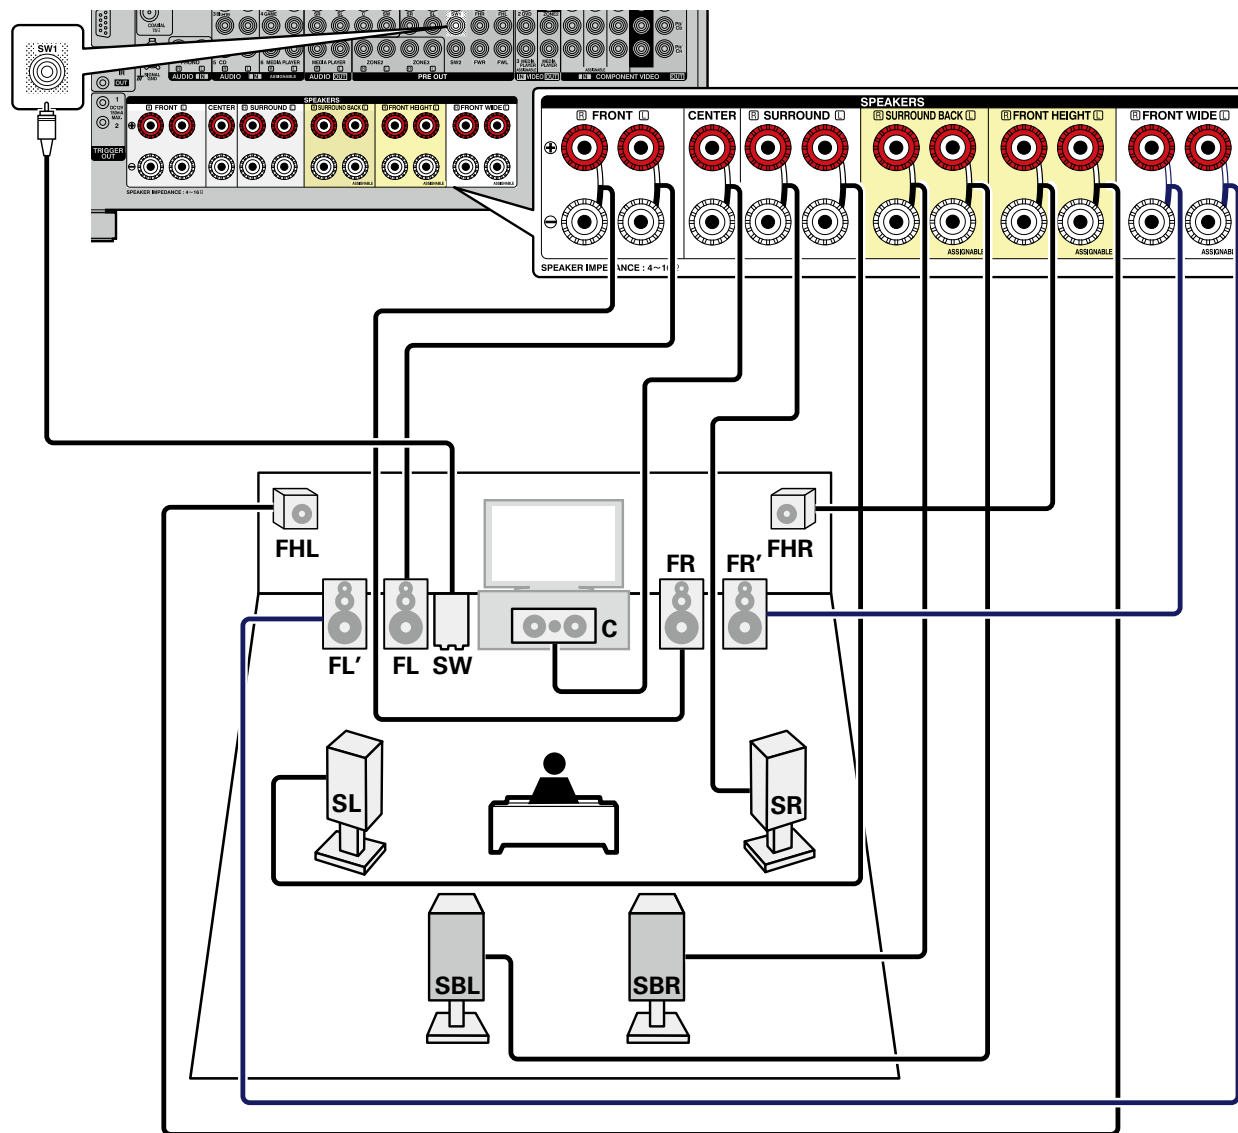

In this case, set "Assign Mode" to "9.1ch/2ch Front" in steps 3 to 5 for "Set up "Amp Assign"" ([page 99](#)).

Front speakers can be used separately, depending on the speaker's specifications or playback source such as front speakers (FL/FR) for multichannel playback and front speakers (FL'/FR') for 2-channel playback ([page 145](#) "Front Speaker").

### NOTE

- For speaker cable connections, see [page 93](#).
- For speaker impedance, see [page 93](#).

When using a front wide speaker, you can connect a second front speaker to the connectors on the   part in the connection diagram. To make connections for these connectors, set "Main Speakers" ([page 100](#)).

## 11.1-channel connection

You can perform playback using up to 11.1 channels using a combination of the built-in power amplifier for 9-channel and an external power amplifier for 2-channel. Connect the external amplifier to the PRE OUT connector.

- To perform 11.1-channel playback, select "Amp Assign" and set "Assign Mode" to "Discrete 11.1ch" using steps 3 and 5 of "Set up "Amp Assign"" ([page 99](#)).
- You can also follow step 7 in "Set up "Amp Assign"" ([page 99](#)) to change the PRE OUT connector connected to the power amplifier to the front channel.

### NOTE

- For speaker cable connections, see [page 93](#).
- For speaker impedance, see [page 93](#).

## External power amplifier connection

You can connect all speakers to an external power amplifier and use this unit as a preamplifier.

Using this unit as a preamplifier, you can perform up to 11.1-channel playback.

When the preamplifier mode is used, the built-in power amplifier operation of this unit is stopped, and interference to the preamplifier from the power amplifier can be reduced.

To use this unit as a preamplifier, select "Amp Assign" and set "Assign Mode" to "Pre Amplifier" using steps 3 and 5 of "Set up "Amp Assign"" ([page 99](#)).

For connecting power amplifier and speaker systems, refer to the instruction manual supplied with the power amplifier to be used.

### NOTE

- For speaker cable connections, see [page 93](#).
- For speaker impedance, see [page 93](#).

# Set up speakers

 around items indicate the settings.

This section describes detailed settings for Audyssey® Setup.

First install and connect the speakers to this unit.

Before Audyssey® Setup measurement, the settings shown below can be made.

- Changing the amplifier assignment (Amp Assign)  
The signal output from the SURROUND BACK, FRONT HEIGHT and FRONT WIDE speaker terminal of this unit can be switched to match your speaker environment ([page 99](#) “Set up “Amp Assign””).
- Setting the channels to be used (Channel Select)  
If channels that are not to be used are set in advance, measurement for the set channels is skipped, and measuring time can be reduced. You can also change the number of surround back speakers ([page 101](#) “Set up “Channel Select””).

## 1 Set up the zone mode

Press **ZONE SELECT** to switch the zone mode.  
The **[M]** indicator lights.

**Press ZONE SELECT**

**NOTE**  
When using a remote control with preset codes registered ([page 160](#)), press **AVR** to set the remote control to the AVR-operation mode before operation.

## 2 Connect the setup microphone.

When the setup microphone is connected, the following screen is displayed.

## 3 Set up “Amp Assign”

Use  $\Delta$ / $\nabla$  to select “Amp Assign”, and then press **ENTER**.

## 4 Select “Assign Mode”, and then press **ENTER**.

## 5 Use ◀▶ to select the configuration of the connected speakers, and then press ENTER.

<b>9.1ch (SB/FH/FW)</b>	Assigns all power amplifiers within this unit for MAIN ZONE. Up to 9.1ch playback is available. In this case, go to step 6.
<b>7.1ch + ZONE2</b>	Assigns power amplifiers within this unit as follows: 7.1ch for MAIN ZONE and 2ch for ZONE2. In this case, go to step 6.
<b>5.1ch + ZONE2/3</b>	Assigns power amplifiers within this unit as follows: 5.1ch for MAIN ZONE and 2ch for ZONE2 and ZONE3 each. In this case, go to step 11.
<b>7.1ch + ZONE2/3-MONO</b>	Assigns power amplifiers within this unit as follows: 7.1ch for MAIN ZONE and 1ch for ZONE2 and ZONE3 each. In this case, go to step 6.
<b>7.1ch(Bi-Amp)</b>	Assigns power amplifiers within this unit as follows: 7.1ch for MAIN ZONE and 2ch for the front speaker bi-amplifier connection. In this case, go to step 6.
<b>5.1ch(Bi-Amp) + ZONE2</b>	Assigns power amplifiers within this unit as follows: 5.1ch for MAIN ZONE, 2ch for the front speaker bi-amplifier connection, and 2ch for ZONE2. In this case, go to step 11.
<b>9.1ch/ 2ch Front</b>	Assigns all power amplifiers within this unit for MAIN ZONE. Up to 9.1ch playback is available. You can also use a front speaker that is different from the one used during multi-channel playback for playback by switching the internal power amplifier during 2ch playback. In this case, go to step 6.
<b>7.1ch/2ch Front(Bi-Amp)</b>	Assigns power amplifiers within this unit as follows: 7.1ch for the MAIN ZONE multi-channel playback. You can also use a front speaker that is different from the one used during multi-channel playback for playback under the bi-amplifier connection by switching the internal power amplifier during 2ch playback. In this case, go to step 11.

<b>7.1ch + Front B</b>	Assigns power amplifiers within this unit as follows: 7.1ch for MAIN ZONE and 2ch for the second front speaker connection. In this case, go to step 6.
<b>Discrete 11.1ch</b>	Assigns 9.1ch for power amplifiers within this unit and 2ch (front/front height) for the external power amplifier connection. Up to 11.1ch playback is available. In this case, go to step 7.
<b>Pre Amplifier</b>	Connects all speakers by using an external power amplifier and uses this unit as a preamplifier. In this case, go to step 8.
<b>Custom</b>	Assigns power amplifiers within this unit as you prefer. In this case, go to step 10.

## 6 Use △▽ to select “Main Speakers” and use ◀▶ to select the speakers that output audio in MAIN ZONE.

<b>S.Back/F.Height</b>	Outputs audio from the surround back and front height speakers.
<b>S.Back/F.Wide</b>	Outputs audio from the surround back and front wide speakers.
<b>F.Height/F.Wide</b>	Outputs audio from the front height and front wide speakers. When the setting is completed, go to step 11.

## 7 Use △▽ to select “Main Pre-amps” and use ◀▶ to select the PRE OUT connectors that connect the external power amplifier.

<b>Front</b>	Connects the front channel PRE OUT connectors to the external power amplifier.
<b>Front Height</b>	Connects the front height channel PRE OUT connectors to the external power amplifier. When the setting is completed, go to step 11.

## 8 Use △▽ to select “Pre-amp Assign” and use ◀▶ to select how to use the PRE OUT connectors.

<b>All</b>	Select this to use the PRE OUT connectors without using power amplifiers within this unit and use this unit as a preamplifier.
<b>Custom</b>	Sets whether to use each channel as a preamplifier or use speakers. When the setting is completed, go to step 9.

## 9 Use △▽ to select a channel to set and use ◀▶ to make the setting.

<b>Speaker</b>	Select this to use speakers.
<b>Pre-amp out</b>	Select this to output audio only from the PRE OUT connectors. When the setting is completed, go to step 11.

## 10 Use △▽ to select a speaker and use ◀▶ to set audio output from each speaker connector as you prefer.

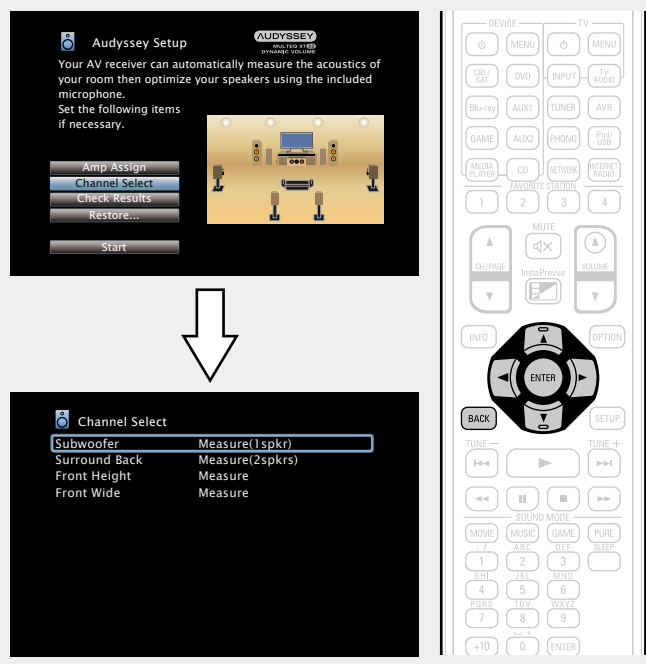

• For details, see “Assign Mode” ([page 141](#)).

## 11 Press ENTER.

## 12 Press ◀ or BACK to exit the “Amp Assign” setting.

## 13 Set up "Channel Select"

Use  $\Delta \nabla$  to select "Channel Select", and then press **ENTER**.

## 14 Use $\Delta \nabla$ to select a channel, and then press **ENTER**.

Front / Subwoofer / Surround Back / Front Height / Front Wide

## 15 Use $\triangleleft \triangleright$ to select a front speaker, and then press **ENTER**.

- A** Select this to use front speaker A.
- B** Select this to use front speaker B.
- A+B** Select this to use front speakers A and B simultaneously.

## 16 Use $\triangleleft \triangleright$ to set whether or not a subwoofer channel is measured, and then press **ENTER**.

- Measure (2 spkr)** Set for measuring two subwoofers (Audyssey Sub EQ HT™).
- Measure (1 spkr)** Set for measuring a subwoofer.
- Skip** Set for no measuring of a subwoofer.

## 17 Use $\triangleleft \triangleright$ to set whether or not a surround back channel is measured, and then press **ENTER**.

- Measure (2 spkr)** Set for measuring two surround back speakers.
- Measure (1 spkr)** Set for measuring a surround back speaker.
- Skip** Set for no measuring of a surround back speaker.

## 18 Use $\triangleleft \triangleright$ to set whether or not a front height channel is measured, and then press **ENTER**.

- Measure** Set to measure the front height speakers.
- Skip** Set when you do not want to measure the front height speakers.

## 19 Use $\triangleleft \triangleright$ to set whether or not a front wide channel is measured, and then press **ENTER**.

- Measure** Set to measure the front wide speakers.
- Skip** Set when you do not want to measure the front wide speakers.

## 20 Press $\triangleleft$ or **BACK**. Proceed to [page 35](#) **Preparation** step 5.

### NOTE

After performing Audyssey® Setup, do not change the speaker connections or subwoofer volume. In event of a change, perform Audyssey® Setup again.

# Playback (Advanced operation)

Setup (🔗 page 33)

Playback (Basic operation) (🔗 page 41)

Selecting a listening mode (Sound Mode)  
(🔗 page 84)

- ☐ HDMI control function (🔗 page 102)
- ☐ InstaPrevue function (🔗 page 104)
- ☐ Sleep timer function (🔗 page 105)
- ☐ Quick select function (🔗 page 106)
- ☐ REC OUT mode (🔗 page 107)
- ☐ Web control function (🔗 page 108)
- ☐ Various memory functions (🔗 page 110)

## HDMI control function

If you connect the unit and an HDMI control function compatible TV or player with an HDMI cable and then enable the HDMI control function setting on each device, the devices will be able to control each other.

### ☐ Operations possible by HDMI control

- **This unit power off can be linked to the TV power off step.**
- **You can switch audio output devices with a TV operation.**  
When you set “Output audio from amp” in the TV audio output setup operation, you can switch the amp power on.
- **You can adjust this unit volume in the TV volume adjustment operation.**
- **You can switch this unit input sources through linkage to TV input switching.**
- **When playing the player, this unit input source switches to the source for that player.**
- **If you switch the input source of the unit to “TV AUDIO”, you can play TV audio with this unit (🔗 page 10 “About ARC (Audio Return Channel) function”).**
- **When “HDMI Control” (🔗 page 130) in the menu is set to “On”, signals input to the HDMI input connector are output to the television or other device connected to the HDMI output connector, even if the power of this unit is in standby (pass-through function).**

To use this unit to play the audio of a TV that does not support the ARC function, connect the TV with an optical-digital or analog connection (🔗 page 10).

### ☐ Setting procedure

- 1 Set the HDMI output connector corresponding with the HDMI control function.**  
Set “HDMI Control” (🔗 page 130) to “On”.
- 2 Turn the power on for all the devices connected by HDMI cable.**
- 3 Set the HDMI control function for all devices connected by HDMI cable.**
  - Please consult the operating instructions for the connected devices to check the settings.
  - Carry out steps 2 and 3 should any of the devices be unplugged.
- 4 Switch the television input to the HDMI input connected to this unit.**
- 5 Switch this unit input to the HDMI input source and check if the picture from the player is ok.**
- 6 When you turn the TV’s power to standby, check that the power of this unit also goes to standby.**

If the HDMI control function does not operate properly, check the following points.

- Is the TV or player compatible with the HDMI control function?
- Is "HDMI Control" ([page 130](#)) set to "On"?
- Is "Power Off Control" ([page 131](#)) set to "All" or "Video"?
- Is "Control Monitor" ([page 130](#)) set for the monitor output connected to television?
- Is "Control Monitor" ([page 130](#)) set to the TV that uses the HDMI control function when this unit is connected to two TVs that support HDMI connectors?
- Are the HDMI control function settings of all devices correct?

### NOTE

- **When "HDMI Control" is set to "On", it consumes more standby power.**
- The HDMI control function controls operations of a TV that is compatible with the HDMI control function. Make sure that the TV and HDMI are connected when you perform HDMI control.
- Some functions may not operate depending on the connected TV or player. Check the owner's manual of each device for details beforehand.
- When "Power Off Control" on the menu is set to "Off" ([page 131](#)), this unit is not set to standby even if the connected device is in the standby mode.
- When connection changes are implemented, such as adding connections to HDMI devices, linked operations may be initialized. In this case, you will need to reconfigure the settings.
- When "HDMI Control" is set to "On", it is not possible to assign an HDMI connector to "TV AUDIO" at "Input Assign" ([page 135](#)).
- Should any of the operations below be performed, the interlocking function may be reset, in which case, repeat steps 2 and 3.
  - "Input Assign" – "HDMI" ([page 135](#)) setting has changed.
  - "Video Output" ([page 130](#)) setting is changed.
  - There is a change to the connection between the devices and the HDMI, or an increase in devices.
- The HDMI ZONE4 function is compatible with the HDMI control function.
- The ARC function, Power Off Control function, and Volume Control function is not compatible with the HDMI ZONE4 control function.
- When the HDMI ZONE4 function is used with "HDMI Control" in the menu set to "On", the HDMI ZONE4 control function may not fully work.
- When the power in ZONE4 is on with "HDMI Control" ([page 130](#)) set to "On" and "Control Monitor" set to "Monitor 1" or "Monitor 2" ([page 130](#)), the following operations occur (Some example behaviors are listed below.).
  - When the power of the TV used for MAIN ZONE is off and the player selected for ZONE4 starts playback, the TV used for MAIN ZONE is turned on. In this case, the input source selected for MAIN ZONE changes to the input source selected for ZONE4.
  - When playing back a TV used for MAIN ZONE and ZONE4 with an HDMI connection, turning off the TV used for MAIN ZONE also turns off this unit and the player.
  - When a same input source is selected for MAIN ZONE and ZONE4, stopping playback of the player on the TV stops the playback on the player and the video being played back in ZONE4 as well.

- When the power in ZONE4 is on with "HDMI Control" ([page 130](#)) set to "On" and "Control Monitor" set to "ZONE4" ([page 130](#)), the following operations occur.
- When the power of the TV used for ZONE4 is off and the player selected for MAIN ZONE starts playback, the TV used for ZONE4 is turned on. In this case, the input source selected for ZONE4 changes to the input source selected for MAIN ZONE.
- When playing back a TV used for ZONE4 and MAIN ZONE with an HDMI connection, turning off the TV used for ZONE4 also turns off the player.
- When a same input source is selected for ZONE4 and MAIN ZONE, stopping playback of the player on the TV stops the playback on the player and the video being played back in MAIN ZONE as well.

## InstaPrevue function

You can display sub screens on the main screen to preview playback video of the HDMI input connected to this unit. You can also display various video inputs in a single screen to switch input sources such as Blu-ray, DVD, and GAME while viewing them on sub screens.

The InstaPrevue function is compatible with the HDMI1–6 connectors. It is not supported for the HDMI7 / MHL connectors.

## Switching input sources

Switch to the desired input source on this unit while viewing sub screens.

**1 Press ZONE SELECT to switch the zone mode.**

The **[M]** indicator lights.

**2 Press InstaPrevue.**

The main screen (current input video) and sub screens (other input video) are displayed.

**3 Use  $\Delta \nabla \triangleleft \triangleright$  to select the desired input source from the sub screen, and press ENTER.**

When you have registered preset codes ([page 157](#)) for external devices to the remote control unit, you can operate these preset external devices.

Press the input source select button (**CBL/SAT**, **Blu-ray**, **GAME**, **MEDIA PLAYER**, **DVD**, **AUX1**, **AUX2** or **CD**) for the device you want to operate to switch the operation mode of the remote control unit.

## Setting how to display sub screens

You can select to display five sub screens or only one sub screen.

**1 While sub screens are displayed, press OPTION.**

The InstaPrevue setting screen is displayed.

**2 Press  $\triangleleft \triangleright$  in “HDMI Inputs” to select how to display sub screens.**

**All** Displays five sub screens.

**One at time** Displays only one sub screen.

**3 Press OPTION to enter the setting.**

## Changing the display location of sub screens

You can change the display location of sub screens to a desired location.

**1 While sub screens are displayed, press OPTION.**

The InstaPrevue setting screen is displayed.

**2 Press  $\nabla$  to select “Location” and use  $\triangleleft \triangleright$  to select the location where you want to display sub screens.**

- The locations where sub screens can be displayed differ according to the “HDMI Inputs” setting.

☐ When “HDMI Inputs” is set to “All”

- The default setting is “Bottom”.

☐ When “HDMI Inputs” is set to “One at time”

- The default setting is “Bottom Left”.

**3 Press OPTION to enter the setting.**

### NOTE

- The InstaPrevue function is available when HDMI signals are input to the main screen. However, it is not available while computer's resolution (e.g. VGA) or 3D video contents is being played back.
- The InstaPrevue function is not available for the ZONE4 HDMI monitor output. It is also not available when the power in ZONE4 is on.

## Sleep timer function

- You can have the power automatically switched to standby once a set time has elapsed. This is convenient for viewing and listening while going to sleep.
- The sleep timer function can be set for each zone ([page 113](#) “Sleep timer function”). (The MAIN ZONE setting method is explained here.)

### 1 Press **ZONE SELECT** to switch the zone mode.

The **[M]** indicator lights.

### 2 Press **SLEEP** and display the time you want to set.

The **[S]** indicator on the display lights.

- The time switches as shown below each time **SLEEP** is pressed.

### To confirm the countdown time before putting the unit to sleep

Press **SLEEP**.

“Sleep : \*min” appears on the display.

\* Countdown time

### To cancel the sleep timer

Press **SLEEP** to set “Off”.

The **[S]** indicator on the display turns off.

- The sleep timer setting is canceled if this unit’s power is set to standby.
- The sleep timer function can be set separately for the different zones ([page 113](#) “Sleep timer function”).

#### NOTE

The sleep timer function cannot turn off the power of devices connected to this unit. To turn off the power of those connected devices, set up sleep timers on the connected devices themselves.

# Quick select function

You can save settings such as the input source selection, volume level, and sound mode at the **QUICK SELECT 1 – 4** buttons.

You can simply press one of the set **QUICK SELECT** buttons for subsequent playback to switch to various saved settings all at once.

- By saving frequently used settings at the **QUICK SELECT 1 – 4** buttons, you will always be able to easily call up the same playback environment.

## Press QUICK SELECT.

The Quick Select settings for the button you pressed are called up.

• The default settings of each Quick Select function are as shown below.

Button	Input source	Volume	Sound Mode
QUICK SELECT 1	CBL/SAT	40	STEREO
QUICK SELECT 2	Blu-ray	40	STEREO
QUICK SELECT 3	GAME	40	STEREO
QUICK SELECT 4	NETWORK	40	STEREO

## Changing the Quick Select Name

On this unit, you can change the Quick Select Name displayed on the menu to the name that you prefer.

For the name change method, see “Quick Select Names” ([page 152](#)).

## Changing the settings

- 1 Set the items below to the settings you want to save.**
- ① Input source\* ([page 41](#))
  - ② Volume ([page 42](#))
  - ③ Sound Mode ([page 84](#))
  - ④ Audyssey  
(Audyssey MultEQ® XT 32, Audyssey Dynamic EQ®, Audyssey Dynamic Volume®) ([page 125](#))

- 2 Press and hold the desired QUICK SELECT until “Quick\* Memory” appears on the display.**
- The current settings will be memorized.

\* The number for the **QUICK SELECT** button you pressed is displayed.

## REC OUT mode

- When using the audio/video recording connectors (MEDIA PLAYER outputs), you can record the audio or video from a different program source while listening to the currently played track.
- For the connection method, see “Connecting a media player” ([page 22](#)).

### 1 Press **ZONE/REC SELECT** until “RECOUT Source” is displayed.

### 2 Press **ZONE/REC SELECT** to choose the input source to be recorded.

### 3 Start recording.

- For operating instructions, refer to the respective device's operating instructions.

- To cancel, press **ZONE/REC SELECT** until “ZONE2 Source” is displayed.
- Make a test recording before starting the actual recording.
- Sources selected with the REC OUT mode are output from ZONE2 as well.
- The operable buttons on the remote control unit in REC OUT mode while it is in the operating mode for ZONE2 are as follows:
  - **ZONE SELECT** button
  - **MUTE** button (MUTE)
  - **VOLUME** button (VOLUME)

#### NOTE

- Recordings you make are for your personal enjoyment and should not be used for other purposes without permission of the copyright holder.
- Input sources for which “Hide” is selected at “Hide Sources” ([page 137](#)) cannot be selected.
- To record video signals through this unit, use the video cable for connection between this unit and the player.
- Make an analog connection for audio signals.

## Web control function

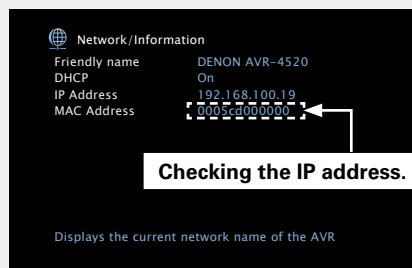

You can control this unit from a web control screen on a web browser.

- This unit and the PC need to be connected to the network properly (page 31 “Connecting to a home network (LAN)”) in order to use the web control function.
- Depending on the settings of your security-related software, you may not be able to access this unit from your PC. If this is the case, then change the settings of the security-related software.

**1** Switch the “Network” setting to “Always On” (page 147).

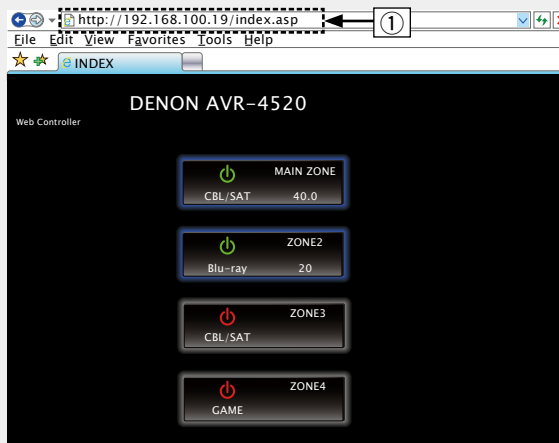

**2** Check the IP address of this unit with “Information” (page 147).

**3** Start up the web browser.

**4** Enter the IP address of this unit in browser’s address box.

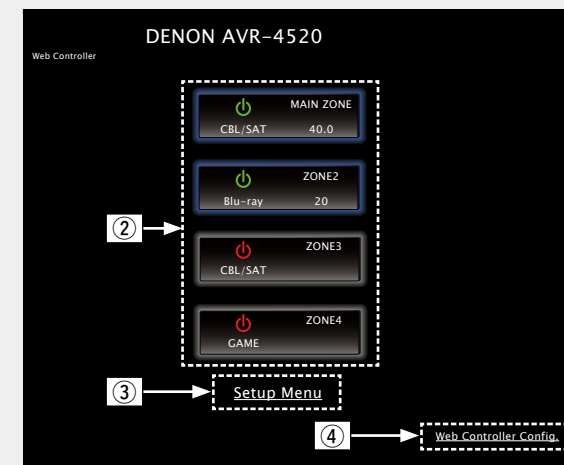

For example, if the IP address of this unit is “192.168.100.19”, enter “http://192.168.100.19/”.

① Entering the IP address.

- By adding this unit’s IP address to the browser’s bookmark, you can display the web control screen using the bookmark function the next time you use the browser. If you are using a DHCP server and “Network” (page 147) is set to “Off In Standby”, turning the power on/off changes the IP address.

**5** When the top menu is displayed, click on the menu item you want to operate.

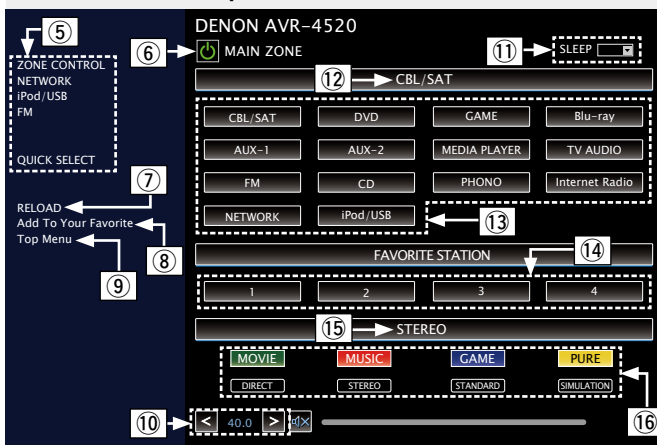

② Click when you select the zone to operate. (Example 1)

③ Click when you operate the setup menu. (Example 2)

④ Click to change the Web control screen setting. (Example 3)

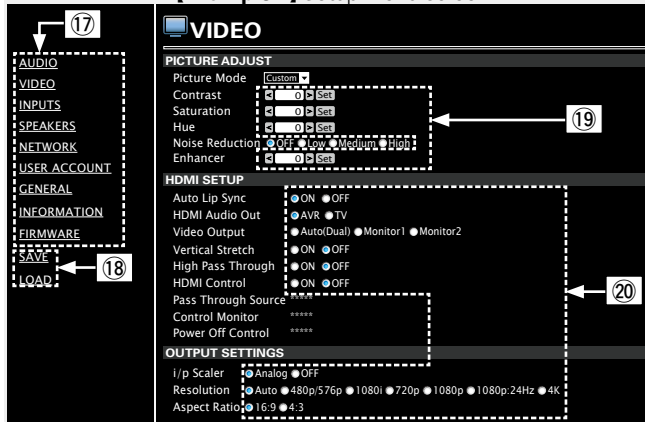

## 6 Operate.

**[Example 1]** MAIN ZONE control screen

- ⑤ Click the menu item from which you want to make settings.  
The display on the right becomes the individual setting screens.  
(Example 4)
- ⑥ Click when you perform a power operation of the unit.
- ⑦ Click when you update to the latest information.  
Normally, there is a change to the latest information each time you operate. When operating from the main unit, click this or else the screen will not be updated.
- ⑧ Click to add a setting to "Favorites" in your browser.  
We recommend registering the setting screens for the different zones in the browser's favorites so as not to accidentally perform menu operations for zones you do not intend to operate.
- ⑨ Click to return to the top menu.  
Displayed when setting "Top Menu Link Setup" to "ON" in **[Example 3]**
- ⑩ To adjust the main volume, click "<", ">", or the volume display.
- ⑪ Click "v" to set the sleep timer function.
- ⑫ Displays the name of the selected input source.
- ⑬ Click a button to change the input source.
- ⑭ Register your favorite content.
- ⑮ Displays the sound mode.
- ⑯ The sound mode switches you click the button.

**[Example 2]** Setup menu screen

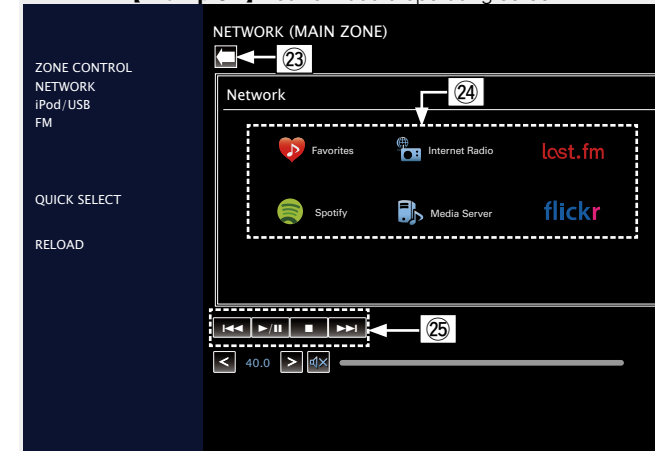

- ⑰ Click the menu item from which you want to make settings.  
The display on the right becomes the individual setting screens.
- ⑱ Click "SAVE" when you want to save settings, and click "LOAD" when you want to call settings.
- ⑲ Enter figures or click "<" or ">" to make the setting, and then click "Set".
- ⑳ Click an item to make a setting.

**[Example 3]** Web configuration screen

- ㉑ Click "ON" when performing Top Menu Link Setup.  
When set up, return to the top menu from each operation screen.  
(Default setting : "OFF")
- ㉒ Click this item to return to the top menu.

**[Example 4]** Network audio operating screen

- ㉓ Click to return to the previous screen.
- ㉔ Click the content you want to operate.
- ㉕ Use to operate content.

## Various memory functions

### Personal memory plus function

---

This function sets the settings (input mode, sound mode, HDMI output mode, MultEQ® XT 32, Dynamic EQ, audio delay etc.) last selected for the individual input sources.

The surround parameters, tone settings and the volumes of the different speakers are stored for the individual sound modes.

### Last function memory

---

This function stores the settings which were made before going into the standby mode. When the power is turned back on, the settings are restored.

# Playback in ZONE2/ZONE3/ZONE4 (Separate room)

- You can operate this unit so as to enjoy audio in a room (ZONE2, ZONE3 and ZONE4) other than the MAIN ZONE (room where the unit is located).
- You can simultaneously play back the same source in both the MAIN ZONE, ZONE2, ZONE3 and ZONE4. You can also play back separate sources in the MAIN ZONE, ZONE2, ZONE3 and ZONE4.
- When a TV is connected to the HDMI ZONE4 OUT connector, you can play back a video or audio from the device connected to the HDMI 1 – 6 IN connector in ZONE4 (**HDMI ZONE4 function**).

The source selected for ZONE2 is also output from the recording output connectors (MEDIA PLAYER).

## NOTE

The following restrictions apply to the HDMI ZONE4 function.

- If you select a same input source for MAIN ZONE and ZONE4, audio playback may be restricted or video may be interrupted.
- Video may not be output depending on the resolution of the TV used for MAIN ZONE and ZONE4. In this case, use your player to set the resolution of the TV.
- When HDMI ZONE4 function is used, you cannot set the following.
  - Picture Adjust
  - Auto Lip Sync
  - Video Mode
  - Video Conversion
  - i/p Scaler
  - Progressive Mode
  - Aspect Ratio
  - Setup menu display

## Audio output

It is possible to play 2-channel audio in rooms other than the MAIN ZONE where multi-channel playback is done. Choose one of the methods.

- ① Zone playback by speaker output
- ② Zone playback by audio output (PRE OUT)  
Use an external amplifier.

### ① Zone playback by speaker output

- When “Assign Mode” ([page 141](#)) in the menu is set to any of the following, audio is output from speakers in ZONE2 or ZONE3.
  - 7.1ch + ZONE2
  - 7.1ch + ZONE2/3-MONO
  - 5.1ch + ZONE2/3
  - 5.1ch(Bi-Amp) + ZONE2

Also, connectors that ZONE2 or ZONE3 speakers are connected to differ according to the “Main Speakers” ([page 141](#)) setting.

### Connecting and setting the speakers

“Assign Mode” setting ( <a href="#">page 141</a> ) and audio signals output	Connecting the speakers
<div data-bbox="808 692 965 778"> <b>7.1ch + ZONE2</b>  <b>5.1ch(Bi-Amp) + ZONE2</b> </div> <div data-bbox="994 708 1137 762">                     Output signal :                      Stereo (L / R)                 </div>	
<div data-bbox="808 904 965 936"> <b>5.1ch + ZONE2/3</b> </div> <div data-bbox="994 895 1137 949">                     Output signal :                      Stereo (L / R)                 </div>	
<div data-bbox="808 1075 965 1134"> <b>7.1ch + ZONE2/3-MONO</b> </div> <div data-bbox="994 1082 1137 1136">                     Output signal :                      Monaural                 </div>	

## ② Zone playback by audio output (PRE OUT)

### □ Audio connections (ZONE2, ZONE3)

The audio signals of this unit's ZONE2 and ZONE3 audio output terminals are output to the ZONE2 and ZONE3 amplifiers and played on these amplifiers.

We recommend using high quality pin-plug cables for audio connections in order to prevent noise.

#### NOTE

In ZONE2 or ZONE3, the digital audio signals input from the HDMI, COAXIAL or OPTICAL connector cannot be played back. When playing back in ZONE2 or ZONE3, make an analog connection, network or iPod/USB.

## Video output

### Video Connection

The video signals of this unit's ZONE4 video output connector are played by the ZONE4 TV.

The video signals of this unit's ZONE2 video output connector are played by the ZONE2 TV.

- When "Analog Video Out" ([page 132](#)) in the menu is set to "ZONE3", you can use the COMPONENT VIDEO OUT and the VIDEO MONITOR OUT connectors in MAIN ZONE for ZONE3.
- To enable the HDMI control for the ZONE4 HDMI monitor, set "Control Monitor" ([page 130](#)) to "ZONE4".

## Playback

### 1 Press **ZONE SELECT** to switch the zone mode.

The [Z2], [Z3] or [Z4] indicator lights.

### 2 Press **POWER** to turn on the ZONE2, ZONE3 or ZONE4 power.

- Also press input source select button when in standby mode, the power turns on.
- When **POWER** is pressed, ZONE2, ZONE3 or ZONE4 turns off.
- Power in ZONE2, ZONE3 or ZONE4 can be turned on or off by pressing **ZONE2 ON/OFF**, **ZONE3 ON/OFF** or **ZONE4 ON/OFF** on the main unit.

### 3 Press the input source select button to select the input source to be played.

The audio and video signal of the selected source is output to ZONE2, ZONE3 or ZONE4.

- Turn **SOURCE SELECT** after pressing **ZONE/REC SELECT** on the main unit to select an input source.

When power for both MAIN ZONE and ZONE2 (ZONE3 or ZONE4) is set to ON, power of the MAIN ZONE only can be turned off. Select MAIN ZONE in step 1 then press **POWER**.

## Adjusting the volume

Use **VOLUME** to adjust the volume.

**[Adjustable range]** 0 – 40 – 98

(When the “Scale” (page 124) setting is “0 – 98”)

**[Adjustable range]** --- –79dB – –40dB – 18dB

(When the “Scale” (page 124) setting is “–79.5dB – 18.0dB”)

- At time of purchase, “Volume Limit” (page 151) is set to “70 (–10dB)”.

Turn **MASTER VOLUME** after pressing **ZONE/REC SELECT** on the main unit to adjust the sound volume.

### NOTE

For ZONE4, you cannot use **VOLUME** to adjust the volume level.

## Turning off the sound temporarily

Press **MUTE**.

The sound is reduced to the level set at “Mute Level” (page 151) in the menu.

- To cancel, either adjust the volume or press **MUTE** again.
- The setting can also be cancelled by turning off the ZONE2 or ZONE3 power.

- You can adjust the tone and volume for ZONE2 or ZONE3 in “ZONE2 Setup” or “ZONE3 Setup” (page 151) in the menu.

- The All Zone Stereo function allows you to simultaneously enjoy in multi-zones (ZONE2/ZONE3) the music that is played back in MAIN ZONE during home party, etc. (page 80 “All Zone Stereo function”).

## Sleep timer function

- This is convenient for viewing and listening while going to sleep in ZONE2, ZONE3 or ZONE4.
- The sleep timer function can be set by zone.

### 1 Press **ZONE SELECT** to switch the zone mode.

The [Z2], [Z3] or [Z4] indicator lights.

### 2 Press **SLEEP** and display the time you want to set.

- The time switches as shown below each time **SLEEP** is pressed.

## To confirm the countdown time before putting the unit to sleep

Press **SLEEP**.

“Z2 Sleep : \*min”, “Z3 Sleep : \*min” or “Z4 Sleep : \*min” appears on the display.

\* Countdown time

## To cancel the sleep timer

Press **SLEEP** to set “Off”.

The sleep timer is also cancelled when this unit is set to the standby mode or the ZONE2, ZONE3 or ZONE4 power is turned off.

### NOTE

The sleep timer function cannot turn off the power of devices connected to this unit. To turn off the power of those connected devices, set up sleep timers on the connected devices themselves.

# How to make detailed settings

## Menu map

For menu operation, connect a TV to this unit and display the menu on the TV screen. For menu operations, see the following page.  
By default, this unit has recommended settings defined. You can customize this unit based on your existing system and your preferences.

Setting items	Detailed items	Description	Page
 <b>Audio</b>	<b>Dialog Enhancer</b>	Adjusts and enhances the frequency band corresponding to the human voice at the center channel to make the voice clearer.	<a href="#">121</a>
	<b>Subwoofer Level</b>	This setting adjusts the volume level for the subwoofer.	<a href="#">121</a>
	<b>Surround Parameter</b>	Adjusts surround sound parameters.	<a href="#">121</a>
	<b>Tone</b>	Adjusts the tonal quality of the sound.	<a href="#">123</a>
	<b>Restorer</b>	Expands the low and high frequency components of compressed audio to enable richer audio playback.	<a href="#">124</a>
	<b>Audio Delay</b>	Compensates for incorrect timing between video and audio.	<a href="#">124</a>
	<b>Volume</b>	Set the MAIN ZONE (room where the unit is located) volume setting.	<a href="#">124</a>
	<b>Audyssey</b>	Makes Audyssey MultEQ® XT 32, Audyssey Dynamic EQ®, Audyssey Dynamic Volume®, Audyssey LFC™ and Audyssey DSX® settings.	<a href="#">125</a>
 <b>Video</b>	<b>Graphic EQ</b>	Uses the graphic equalizer to adjust the tone of each speaker.	<a href="#">127</a>
	<b>Picture Adjust</b>	Adjusts the video quality.	<a href="#">129</a>
	<b>HDMI Setup</b>	Makes settings for HDMI video/audio output.	<a href="#">129</a>
	<b>Output Settings</b>	Makes screen-related settings.	<a href="#">131</a>
	<b>Analog Video Out</b>	Assigns the zone that uses the VIDEO MONITOR OUT connectors.	<a href="#">132</a>
	<b>On Screen Display</b>	Select the on-screen display user interface preferences.	<a href="#">133</a>
	<b>TV Format</b>	Set the video signal format to be output for the TV you are using.	<a href="#">133</a>

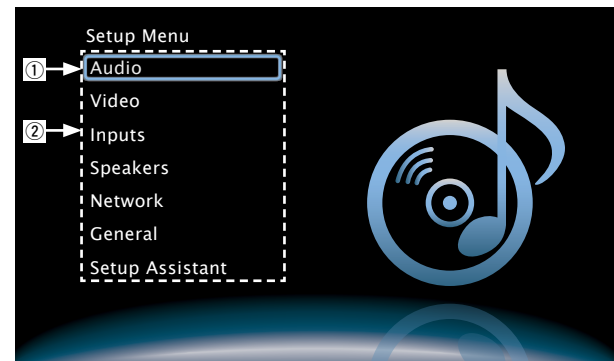

Setting items	Detailed items	Description	Page
 <b>Inputs</b>	<b>Input Assign</b>	Changes input connector assignment.	<a href="#">135</a>
	<b>Source Rename</b>	Changes the display name for this source.	<a href="#">137</a>
	<b>Hide Sources</b>	Remove from the display input sources that are not used.	<a href="#">137</a>
	<b>Source Level</b>	Adjusts the playback level of the audio input.	<a href="#">137</a>
	<b>Input Select</b>	Sets the audio input mode and decode mode.	<a href="#">138</a>
	<b>Video Source</b>	Video of another input source is played back combined with the playing audio.	<a href="#">138</a>

	Perform the installation, connection, and setup procedures to prepare the unit for operation following guidance.		 7

# Examples of menu screen displays

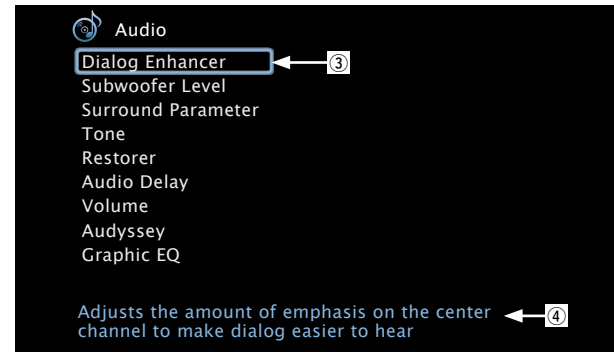

Typical examples are described below.

## [Example 1] Menu selection screen (Top menu)

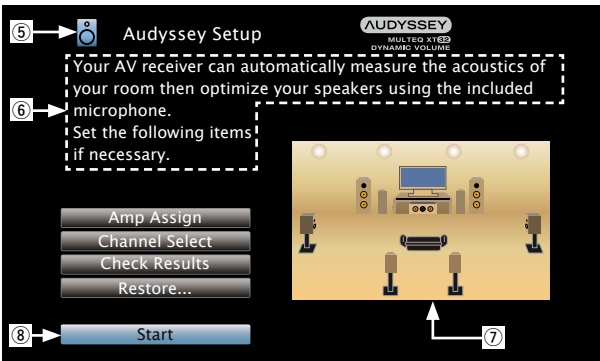

- ① Currently selected setup item
- ② List of GUI menu setup items

Use  $\Delta$ / $\nabla$  to select "Audio"  
and then press  $\triangleright$ .  
(Or press ENTER.)

- ③ Selected setup item
- ④ Guide text for the currently selected setup item

## [Example 2] Audyssey® Setup screen (with illustration)

- ⑤ Currently selected setup icon
- ⑥ Operation guidance text
- ⑦ Illustration
- ⑧ Selected setup item

**NOTE**  
When the menu is operated on a computer's resolution (e.g. VGA) or during playback of certain 3D video content, the playback image switches to the menu screen image.

## Examples of menu and front display

Below we describe typical examples of displays on the TV screen and on the set's display window.

	Menu display	Front display	Description
<b>Top menu display</b>			<ol style="list-style-type: none"> <li>Press <b>SETUP</b> to display the menu screen.</li> <li>TV screen: Displays the selected line. Display: Displays the selected item. <ul style="list-style-type: none"> <li>Use <math>\Delta</math>/<math>\nabla</math> to move to the item you want to set.</li> </ul> </li> </ol> 
<b>Display when changing settings</b>	 <p>Press <b>ENTER</b>.</p> 	 <p>Press <b>ENTER</b>.</p> 	<ol style="list-style-type: none"> <li>TV screen: Displays the selected line. Display: Displays the selected item. <ul style="list-style-type: none"> <li>Use <math>\Delta</math>/<math>\nabla</math> to move to the item you want to set.</li> </ul> </li> <li>Press <b>ENTER</b> to set to the mode in which the setting can be made.</li> </ol> <p>3 ◀ ▶ is displayed at the sides of items whose setting can be changed. Use ◀▶ to change to the desired setting.</p>
<b>Display when returning to the settings in effect at time of purchase</b>	 <p>Press <b>ENTER</b>.</p> 	 <p>Press <b>ENTER</b>.</p> 	<ol style="list-style-type: none"> <li>Press <math>\Delta</math> to select "Set Defaults" or "Default", then press <b>ENTER</b>.</li> <li>Press ◀ to select "Reset", then press <b>ENTER</b>.</li> </ol>

# Inputting characters

On this unit, you can change the name displayed on the following screens to the names that you prefer.

- Text Search (🔗 [page 76](#))
- Preset Name (🔗 [page 55](#))
- Source Rename (🔗 [page 137](#))
- Friendly Name (🔗 [page 147](#))
- Zone Rename (🔗 [page 152](#))
- Quick Select Names (🔗 [page 152](#))
- Character input for the network functions (🔗 [page 61](#), [69](#), [72](#), [74](#), [148](#))

## Method for inputting characters

Method	Operations
Using the keyboard screen	• Select a character on the TV screen to input characters.
Using the number buttons (10 Key input screen)	• Multiple characters are assigned to a button, and each time the button is pressed, a character is switched.
Using the cursor buttons (10 Key input screen)	• Use $\Delta \nabla \triangleleft \triangleright$ and <b>ENTER</b> to input characters.

## Keyboard screen

Select a character on the TV screen to input characters.

### Input method

**1** Display the screen for inputting characters (🔗 [page 114](#) “Menu map”).

**2** Select a character to be changed.

① Use  $\Delta \nabla \triangleleft \triangleright$  to select  or .

② Press **ENTER** to place the cursor at the character to be changed.

Each time **ENTER** is pressed, the cursor moves by one character.

**3** Select a character to be input with  $\Delta \nabla \triangleleft \triangleright$  then press **ENTER**.

• The types of characters that can be input are as shown below.

[Upper case characters/Numbers/Symbols]

ABCDEFGHIJKLMNOPQRSTUVWXYZ

0123456789

! " # \$ % & ' ( ) \* + , ; < = >

[Lower case characters/Numbers/Symbols]

abcdefghijklmnopqrstuvwxyz

0123456789

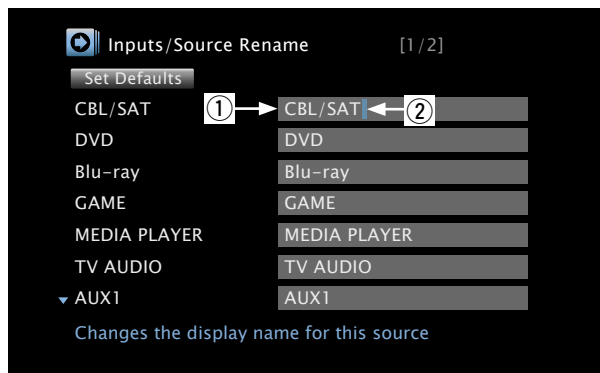

. @ - \_ / : ~ ? [ \ ] ^ ' { | }

**4** Repeat steps 2 and 3 to change the name.

**5** Use  $\Delta \nabla \triangleleft \triangleright$  to select , then press **ENTER**.

## 10 Key input screen

### Display of a 10 Key input screen

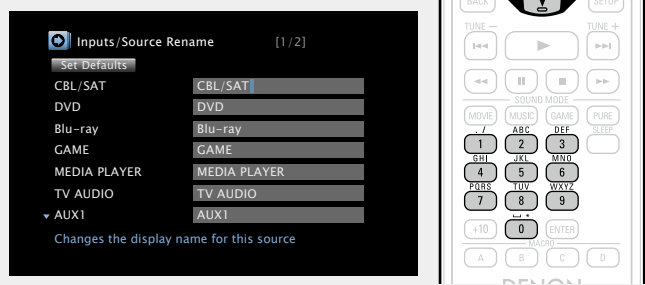

- ① Character input section
- ② Cursor

### Input method

#### Using the number buttons

- 1** When the keyboard screen is displayed, press **0 – 9**.  
The 10 key input screen is displayed.

- 2** Place the cursor at the character to be changed with  $\triangleleft \triangleright$  and press the number button (**0 – 9**) until the desired character is displayed.

- The types of characters that can be input are as shown below.

1 ABC	1. @ - _ / : ~	MNO	MNO m n o 6
2 DEF	A B C a b c 2	PQRS	P Q R S p q r s 7
3 GHI	D E F d e f 3	TUV	T U V t u v 8
4 JKL	G H I g h i 4	WXYZ	W X Y Z w x y z 9
5	J K L j k l 5	0	0 (Space) ! " # \$ % & ' ( ) * + , ; < = > ? [ \ ] ^ _ {   } }

- For entering the characters assigned to one number button continuously, press  $\triangleright$  to move the cursor to the right after entering a character then enter the next character.
- For entering characters assigned to separate buttons, press the number button continuously. The cursor automatically moves to the next position, and the entered character is registered.

- 3** Repeat step 2 to change the name then press **ENTER** to register it.

**Example:** For changing the input source from "DVD" to "D&M"

- ① Place the cursor at "V". D V D
- ② Press  $\overline{0}$  eight times.  
"V" changes to "&". D & D
- ③ Press  $\overline{6}$ .  
"&" is automatically registered, and "D" changes to "M". D & M
- ④ Press **ENTER** to register the input source name.

### Using the cursor buttons

- 1** When the keyboard screen is displayed, press **0 – 9**.

- 2** Use  $\triangleleft \triangleright$  to set the cursor to the character.

- 3** Use  $\triangle \nabla$  to change the character.

- The types of characters that can be input are as shown below.

[Upper case characters]  
ABCDEFGHIJKLMNOPQRSTUVWXYZ  
[Lower case characters]  
abcdefghijklmnopqrstuvwxyz  
[Symbols] ! " # \$ % & ' ( ) \* + , - . / : ; < = > ? @ [ \ ] ^ \_ { | } ~  
[Numbers] 0 1 2 3 4 5 6 7 8 9 (Space)

- 4** Repeat steps 2 and 3 to change the name then press **ENTER** to register it.

Make audio-related settings.

## Menu operation

- 1 Press ZONE SELECT to switch the zone mode.**  
The **[M]** indicator lights.
- 2 Press SETUP.**  
The menu is displayed on the TV screen.
- 3 Use  $\Delta$ / $\nabla$  to select the menu to be set or operated.**
- 4 Press ENTER or  $\triangleright$  to enter the setting.**
  - To return to the previous item, press  $\triangleleft$  or **BACK**.
  - Exiting the Menu, press **SETUP** while the menu is displayed.  
The menu display disappears.

## Items that can be set with the “Audio” procedure

Dialog Enhancer ([page 121](#))

Subwoofer Level ([page 121](#))

Surround Parameter ([page 121](#))

Tone ([page 123](#))

Restorer ([page 124](#))

Audio Delay ([page 124](#))

Volume ([page 124](#))

Audyssey ([page 125](#))

Graphic EQ ([page 127](#))

## Dialog Enhancer

Default settings are underlined.

Adjusts and enhances the frequency band corresponding to the human voice at the center channel to make the voice clearer.

Setting items	Setting details
<b>Enhancer</b>	<b>Low / Medium / High</b> : Enhances the human voice. <b>Off</b> : Does not enhance the human voice.

## Subwoofer Level

Default settings are underlined.

This setting adjusts the volume level for the subwoofer.

Setting items	Setting details
<b>Subwoofer</b> Turn subwoofer output on and off.	<b>On</b> : The subwoofer is used. <b>Off</b> : The subwoofer is not used.  <b>NOTE</b> This can be set when the sound mode is "DIRECT" and "PURE DIRECT" ( <a href="#">page 84</a> ) and the "Subwoofer Mode" ( <a href="#">page 144</a> ) is "LFE+Main".
<b>Subwoofer 1 Level</b> This setting adjusts the volume level for the subwoofer 1.	<b>-12dB – +12dB (0dB)</b>
<b>Subwoofer 2 Level</b> This setting adjusts the volume level for the subwoofer 2.	<b>-12dB – +12dB (0dB)</b>

## Surround Parameter

Default settings are underlined.

You can adjust the surround audio sound field effects to match your preferences.

The items (parameters) that can be adjusted depend on the signal being input and the currently set sound mode. For details on the adjustable parameters, see "Sound modes and surround parameters" ([page 184](#)).

### NOTE

- Some setting items cannot be set while playback is stopped. Make the settings during playback.
- When the sound mode is "PURE DIRECT", you cannot set the surround parameters.

Setting items	Setting details
<b>Cinema EQ</b> Softens the treble range of movie soundtracks for better understanding.	<b>On</b> : "Cinema EQ" is used. <b>Off</b> : "Cinema EQ" is not used.
<b>Loudness Management</b> This can be set in the Dolby TrueHD mode. This sets whether to output as specified in "Dynamic Compression" or output directly without compressing the dynamic range of audio recorded in the disc.	<b>On</b> : Outputs using the settings made in "Dynamic Compression" and "Dialogue normalization" ( <a href="#">page 153</a> ) are enabled. <b>Off</b> : "Dynamic Compression" settings and "Dialogue normalization" are disabled, and the signals on the disk are output as is.
<b>Dynamic Compression</b> Compress dynamic range (difference between loud and soft sounds).	<b>Auto</b> : Automatic dynamic range compression on/off control according to source. <b>Low / Medium / High</b> : These set the compression level. <b>Off</b> : Dynamic range compression always off.  You can set "Auto" only for the Dolby TrueHD source.
<b>Bass Sync</b> For contents recorded in multi-channel such as Blu-ray discs, the recorded low frequency effects (LFE) may be out of synch and delayed. This function corrects such a delay of low frequency effects (LFE).	<b>0ms – 16ms</b>  How low frequency effects (LFE) are delayed differ according to the disc. Set this to the desired value.

Setting items	Setting details
<b>Low Frequency Effects</b> Adjust the low-frequency effects level (LFE).	<p><input type="checkbox"/> When "Input Mode" (🔗 <a href="#">page 138</a>) is set other than to "EXTERNAL IN" <b>-10dB – 0dB</b></p> <p><input type="checkbox"/> When "Input Mode" (🔗 <a href="#">page 138</a>) is set to "EXTERNAL IN" <b>0dB / 5dB / 10dB / 15dB</b></p> <p>🔧 For proper playback of the different sources, we recommend setting to the values below.</p> <ul style="list-style-type: none"> <li>• Dolby Digital sources : 0dB</li> <li>• DTS movie sources : 0dB</li> <li>• DTS music sources : -10dB</li> </ul>
<b>Center Gain</b> Distributes the dialogue output from the center channel to the front left and right channels and widens the sound image in the front. You can set this when the sound mode is set to DTS NEO:X.	<b>0.0 – 1.0</b>
<b>Panorama</b> Assign front L/R signal also to surround channels for wider sound. You can set this when the sound mode is Dolby PLII in the "Music" mode.	<b>On</b> : Set. <b>Off</b> : Do not set.
<b>Dimension</b> Shift sound image center to front or rear to adjust playback balance. You can set this when the sound mode is Dolby PLII in the "Music" mode.	<b>0 – 6 (3)</b> <p>🔧 As you set a smaller number, the surround sound field shifts backward; as you set a larger number, the surround sound field shifts forward.</p>

Setting items	Setting details
<b>Center Width</b> Distributes the dialogue output from the center channel to left and right channels and widens the sound image in the front. You can set this when the sound mode is Dolby PLIIx in the "Music" mode.	<b>0 – 7 (3)</b> <p>🔧 The smaller the value, the more dialogue is concentrated on the center channel. The larger the value, the more dialogue is distributed to front left and right channels, and the more the sound image widens in the front.</p>
<b>Delay Time</b> Adjust the audio delay time against video to extend the sound field image. You can set this when the sound mode is "MATRIX".	<b>0ms – 300ms (30ms)</b>
<b>Effect Level</b> Adjust the sound effect level. You can set this when the sound mode is original listening mode.	<b>1 – 15 (10)</b> <p>🔧 Set to a lower level if the positioning and sense of phase of the surround signals seems unnatural.</p>
<b>Room Size</b> Determine size of acoustic environment. You can set this when the sound mode is original listening mode.	<p><b>Small</b> : Simulate acoustics of a small room.  <b>Medium small</b> : Simulate acoustics of a medium-small room.  <b>Medium</b> : Simulate acoustics of a medium room.  <b>Medium large</b> : Simulate acoustics of a medium-large room.  <b>Large</b> : Simulate acoustics of a large room.</p> <p><b>NOTE</b></p> <p>"Room Size" does not indicate the size of the room in which sources are played.</p>

Setting items	Setting details
<b>Height Gain</b> Control the front height channel volume.	<p><b>Low</b> : Reduce the front height channel volume.</p> <p><b>Normal</b> : Front height channel sound is output with standard sound volume.</p> <p><b>High</b> : Increase the front height channel volume.</p> <p><b>NOTE</b></p> <p>"Height Gain" is displayed for the following settings.</p> <ul style="list-style-type: none"> <li>When the "Speaker Config." – "Front Height" setting (<a href="#">page 142</a>) is set other than to "None".</li> <li>When sound mode is "PLIIz" or the PLIIz decoder is used.</li> </ul>
<b>Speaker Select</b> Makes settings for the speakers outputting sound.	<p>❑ When "Assign Mode" (<a href="#">page 141</a>) is set to "7.1ch + ZONE2/3-MONO" and "7.1ch(Bi-Amp)"</p> <p><b>Surround Back</b> : Sound is output from the surround back speakers.</p> <p><b>Height</b> : Sound is output from the front height speakers.</p> <p><b>Wide</b> : Sound is output from the front wide speakers.</p> <p>❑ When "Assign Mode" (<a href="#">page 141</a>) is set to "9.1ch(SB/FH/FW)"</p> <p><b>Back/Height</b> : Sound is output from the surround back and front height speakers.</p> <p><b>Back/Wide</b> : Sound is output from the surround back and front wide speakers.</p> <p><b>Height/Wide</b> : Sound is output from the front height and front wide speakers.</p> <p><b>NOTE</b></p> <p>Only speakers that are set to something other than "None" in "Speaker Config." (<a href="#">page 142</a>) can be selected.</p>
<b>Set Defaults</b> The "Surround Parameter" settings are returned to the default settings.	<p><b>Reset</b> : Reset to the defaults.</p> <p><b>Cancel</b> : Do not reset to the defaults.</p> <p>✎ When you select "Set Defaults" and press <b>ENTER</b>, the "Reset all surround parameters to the factory defaults?" prompt is displayed. Select either "Reset" or "Cancel", and press <b>ENTER</b>.</p> 

## Tone

**Default settings are underlined.**

Adjust the tonal quality of the sound.

Setting items	Setting details
<b>Tone Control</b> Set the tone control function to "On" and "Off".	<p><b>On</b> : Allow tone adjustment (bass, treble).</p> <p><b>Off</b> : Playback without tone adjustment.</p> <p>✎ "Tone Control" can be set when "Dynamic EQ" (<a href="#">page 125</a>) is set to "Off".</p> <p><b>NOTE</b></p> <ul style="list-style-type: none"> <li>"Tone Control" settings are not reflected to ZONE2 and ZONE3.</li> <li>The tone cannot be adjusted in the "DIRECT" and "PURE DIRECT" mode.</li> </ul>
<b>Bass</b> Adjust bass.	<p><b>-6dB – +6dB (0dB)</b></p> <p>✎ "Bass" can be set when the menu "Tone Control" setting is "On".</p>
<b>Treble</b> Adjust treble.	<p><b>-6dB – +6dB (0dB)</b></p> <p>✎ "Treble" can be set when the menu "Tone Control" setting is "On".</p>

## Restorer

Compressed audio formats such as MP3, WMA (Windows Media Audio) and MPEG-4 AAC reduce the amount of data by eliminating signal components that are hard for the human ear to hear. The “Restorer” function generates the signals eliminated upon compression, restoring the sound to conditions near those of the original sound before compression. It also corrects the sense of volume of the bass to obtain richer sound with compressed audio signals.

Setting items	Setting details
<b>Mode</b> Set the mode for “Restorer”.	<p><b>Mode 1 (High)</b> : Optimized mode for compressed sources with very weak highs (64 kbps and under).</p> <p><b>Mode 2 (Middle)</b> : Apply suitable bass and treble boost for all compressed sources (96 kbps and under).</p> <p><b>Mode 3 (Low)</b> : Optimized mode for compressed sources with normal highs (96 kbps and over).</p> <p><b>Off</b> : Do not use “Restorer”.</p> <p></p> <ul style="list-style-type: none"> <li>• This item can be set with analog signals or PCM signal (Sample Rate = 44.1/48 kHz) is input.</li> <li>• “Restorer” settings are stored for each input source.</li> <li>• This item default setting for “NETWORK” and “iPod/USB” is “Mode 3 (Low)”. All others are set to “Off”.</li> <li>• This cannot be set when the sound mode is set to “DIRECT” or “PURE DIRECT”.</li> </ul>

## Audio Delay

**Default settings are underlined.**

While viewing video, manually adjust the time to delay audio output.

Setting details
<b><u>0ms</u> – 200ms</b>  <ul style="list-style-type: none"> <li>• This item can be set within the range of 0 to 100 ms when “Auto Lip Sync” (<a href="#">page 129</a>) is set to “On” and when a TV compatible with Auto Lip Sync is connected.</li> <li>• Store “Audio Delay” for each input source.</li> <li>• Audio Delay for game mode can be set when “Video Mode” (<a href="#">page 131</a>) is set to “Auto” or “Game”.</li> </ul>

## Volume

**Default settings are underlined.**

Set the MAIN ZONE (room where the unit is located) volume setting.

Setting items	Setting details
<b>Scale</b> Set how volume is displayed.	<p><b><u>0 – 98</u></b> : Display in the range 0 (Min) to 98.</p> <p><b><u>–79.5dB – 18.0dB</u></b> : Display –dB (Min), in the range –79.5 dB to 18.0 dB.</p> <p></p> <ul style="list-style-type: none"> <li>• The “Scale” setting is applied also to the “Limit” and “Power On Level” display method.</li> <li>• The “Scale” setting applies to all zones.</li> </ul>
<b>Limit</b> Make a setting for maximum volume.	<p><b><u>60 (–20dB) / 70 (–10dB) / 80 (0dB)</u></b></p> <p><b><u>Off</u></b> : Do not set a maximum volume.</p>
<b>Power On Level</b> Define the volume setting that is active when the power is turned on.	<p><b><u>Last</u></b> : Use the memorized setting from the last session.</p> <p><b><u>Mute</u></b> : Always use the muting on condition when power is turned on.</p> <p><b><u>1 – 98 (–79dB – 18dB)</u></b> : The volume is adjusted to the set level.</p>
<b>Mute Level</b> Set the amount of attenuation when muting is on.	<p><b><u>Full</u></b> : The sound is muted entirely.</p> <p><b><u>–40dB</u></b> : The sound is attenuated by 40 dB down.</p> <p><b><u>–20dB</u></b> : The sound is attenuated by 20 dB down.</p>

## Audyssey

Default settings are underlined.

Set Audyssey MultEQ® XT 32, Audyssey Dynamic EQ®, Audyssey Dynamic Volume®, Audyssey LFC™ and Audyssey DSX®. These can be selected after Audyssey® Setup has been performed. For additional information on Audyssey technology, please see [page 193](#).

### NOTE

If you have not performed Audyssey® Setup, or if you change the speaker settings after performing Audyssey® Setup, you may not be able to select Dynamic EQ/Dynamic Volume. In this case, either perform Audyssey® Setup over again or perform “Restore...” ([page 40](#)) to return to the settings after Audyssey® Setup was run.

Setting items	Setting details
<b>MultEQ® XT 32</b> MultEQ® XT 32 compensates for both time and frequency characteristics of the listening area based on Audyssey® Setup measurement results. Selection is done from three types of compensation curves. We recommend the “Audyssey” setting. MultEQ® XT 32 is the prerequisite function for Dynamic EQ, Dynamic Volume and Audyssey LFC™.	<p><b>Audyssey</b> : Optimize the frequency response of all speakers.</p> <p><b>Audyssey Byp. L/R</b> : Optimize frequency response of speakers except front L and R speakers.</p> <p><b>Audyssey Flat</b> : Optimize frequency response of all speakers to flat response.</p> <p><b>Graphic EQ</b> : Apply frequency response set with “Graphic EQ” (<a href="#">page 127</a>).</p> <p><b>Off</b> : Turn “MultEQ® XT 32” equalizer off.</p> <p></p> <ul style="list-style-type: none"> <li>• “Audyssey”, “Audyssey Byp. L/R” and “Audyssey Flat” can be selected after Audyssey® Setup has been performed. “Audyssey” is automatically selected after performing Audyssey® Setup. When “Audyssey”, “Audyssey Byp. L/R” or “Audyssey Flat” is selected, <b>AUDYSSEY</b> illuminates.</li> <li>• After running Audyssey® Setup, if the Speaker Configuration, Distance, Channel Level, and Crossover Frequency have changed without increasing the number of speakers measured, only <b>AUDYSSEY</b> illuminates.</li> </ul> <p><b>NOTE</b></p> <p>When using headphones, “MultEQ® XT 32” is automatically set to “Off”.</p>

“MultEQ® XT 32”, “Dynamic EQ” and “Dynamic Volume” settings are stored for each input source.

Setting items	Setting details
<b>Dynamic EQ</b> Solve the problem of deteriorating sound quality as volume is decreased by taking into account human perception and room acoustics. Works with MultEQ® XT 32.	<p><b>On</b> : Use Dynamic EQ.</p> <p><b>Off</b> : Do not use Dynamic EQ.</p> <p> <b>AUDYSSEY</b> is displayed when set to “On”.</p> <p><b>NOTE</b></p> <p>When the menu “Dynamic EQ” setting is “On”, it is not possible to do “Tone Control” (<a href="#">page 123</a>) adjustment.</p>
<b>Reference Level Offset</b> Audyssey Dynamic EQ® is referenced to the standard film mix level. It makes adjustments to maintain the reference response and surround envelopment when the volume is turned down from 0 dB. However, film reference level is not always used in music or other non-film content. Dynamic EQ Reference Level Offset provides three offsets from the film level reference (5 dB, 10 dB, and 15 dB) that can be selected when the mix level of the content is not within the standard. Recommended setting levels are shown at right.	<p><b>0dB</b> (Film Ref) : This is the default setting and should be used when listening to movies.</p> <p><b>5dB</b> : Select this setting for content that has a very wide dynamic range, such as classical music.</p> <p><b>10dB</b> : Select this setting for jazz or other music that has a wider dynamic range. This setting should also be selected for TV content as that is usually mixed at 10 dB below film reference.</p> <p><b>15dB</b> : Select this setting for pop/rock music or other program material that is mixed at very high listening levels and has a compressed dynamic range.</p> <p> Setting is enabled when “Dynamic EQ” is “On” (<a href="#">page 125</a>).</p>

Setting items	Setting details
<b>Dynamic Volume</b> Solve the problem of large variations in volume level between TV, movies and other content (between quiet passages and loud passages, etc.) by automatically adjusting to the user's preferred volume setting.	<b>Heavy</b> : Most adjustment to softest and loudest sounds. <b>Medium</b> : Medium adjustment to loudest and softest sound. <b>Light</b> : Least adjustment to loudest and softest sounds. <b>Off</b> : Do not use "Dynamic Volume".  <ul style="list-style-type: none"> <li>• <b>AUDYSSEY</b> is displayed when set to "Heavy", "Medium" or "Light".</li> <li>• If "Dynamic Volume" is set to "Yes" in "Audyssey® Setup" (see page 37), the setting is automatically changed to "Medium".</li> </ul>
<b>Audyssey LFC™</b> Adjusts the low frequency band to prevent bass and vibration from being conveyed to neighboring rooms.	<b>On</b> : Use "Audyssey LFC™". <b>Off</b> : Do not use "Audyssey LFC™".  "Audyssey LFC™" cannot be set up if "Audyssey® Setup" is not completed. <div> <b>About Audyssey LFC™ (Low Frequency Containment)</b>            Audyssey LFC™ solves the problem of low frequency sounds disturbing people in neighboring rooms or apartments. Audyssey LFC™ dynamically monitors the audio content and removes the low frequencies that pass through walls, floors and ceilings. It then applies psychoacoustic processing to restore the perception of low bass for listeners in the room. The result is great sound that no longer disturbs the neighbors.         </div>
<b>Containment Amount</b> Adjusts the amount of low frequency containment. Use higher settings if you have close neighbors.	<b>1 – 7 (4)</b>
<b>Audyssey DSX®</b> Provides more immersive surround sound by adding the new channels.	<b>Wides/Heights</b> : Turns on Audyssey DSX® processing for wide and height expansion. <b>Wides</b> : Turn on Audyssey DSX® processing for wide expansion. <b>Heights</b> : Turn on Audyssey DSX® processing for height expansion. <b>Off</b> : Do not set Audyssey DSX®. <div> <b>NOTE</b>            "Audyssey DSX®" cannot be configured if the HD Audio source being played includes Front height and Front wide channels. In this case, the respective channels are played back using the input signals.         </div>

Setting items	Setting details
<b>Stage Width</b> Adjust sound stage width when using front wide speakers.	<b>-10 – +10 (0)</b>
<b>Stage Height</b> Adjust sound stage height when using front height speakers.	<b>-10 – +10 (0)</b>  <ul style="list-style-type: none"> <li>• "Audyssey DSX®" can be set when you are using front height speakers or front wide speakers.</li> <li>• "Audyssey DSX®" is only valid when using a center speaker.</li> <li>• "Audyssey DSX®" is valid when surround mode is DOLBY listening mode or DTS listening mode other than PLIIz Height.</li> </ul> <div> <b>About Audyssey Dynamic Surround Expansion (A-DSX)</b>            Audyssey DSX® is a scalable system that adds new speakers to improve surround impression. Starting with a 5.1 system Audyssey DSX® first adds Wide channels for the biggest impact on envelopment. Research in human hearing has proven that information from the Wide channels is much more critical in the presentation of a realistic soundstage than the Back Surround channels found in traditional 7.1 systems. Audyssey DSX® then creates a pair of Height channels to reproduce the next most important acoustical and perceptual cues. In addition to these new Wide and Height channels, Audyssey DSX® applies Surround Envelopment Processing to enhance the blend between the front and surround channels.         </div>

## Graphic EQ

**Default settings are underlined.**

Use the graphic equalizer to adjust the tone of each speaker.

“Graphic EQ” can be set when “MultEQ® XT 32” setting (page 125) is “Graphic EQ”.

Setting items	Setting details
<b>Speaker Selection</b> Select whether to adjust tones for individual speakers or for all speakers.	<b>All</b> : Adjust the tone of all speakers together. <b>Left/Right</b> : Adjust the tone of left and right speakers together. <b>Each</b> : Adjust the tone of each speaker.
<b>Adjust EQ</b> Adjust tones for each frequency band. Adjust the speaker selected in “Speaker Selection”.	① Select the speaker. ② Select the adjustment frequency band. <b>63Hz / 125Hz / 250Hz / 500Hz / 1kHz / 2kHz / 4kHz / 8kHz / 16kHz</b> • Select the speakers you want to adjust when “Left/Right” or “Each” is selected. ③ Adjust the level. <b>-20.0dB – +6.0dB (0.0dB)</b>
<b>Curve Copy</b> Copy “Audyssey Flat” (page 125) curve from MultEQ® XT 32.	<b>Yes</b> : Copy. <b>No</b> : Do not copy.  <ul style="list-style-type: none"> <li>• “Curve Copy” is displayed after Audyssey® Setup has been performed.</li> <li>• When you select “Curve Copy” and press <b>ENTER</b>, the “Copy “Audyssey Flat?”” prompt is displayed. Select either “Yes” or “No”, and press <b>ENTER</b>.</li> </ul>
<b>Set Defaults</b> The “Graphic EQ” settings are returned to the default settings.	<b>Reset</b> : Reset to the defaults. <b>Cancel</b> : Do not reset to the defaults.  When you select “Set Defaults” and press <b>ENTER</b> , the “Reset to the default values?” prompt is displayed. Select either “Reset” or “Cancel”, and press <b>ENTER</b> . 

Make video-related settings.

## NOTE

When HDMI ZONE4 function is used, these settings are not available (except for “HDMI Control” and “Control Monitor”).

## Menu operation

- 1 Press ZONE SELECT to switch the zone mode.**  
The **[M]** indicator lights.
- 2 Press SETUP.**  
The menu is displayed on the TV screen.
- 3 Use  $\Delta$ / $\nabla$  to select the menu to be set or operated.**
- 4 Press ENTER or  $\triangleright$  to enter the setting.**
  - To return to the previous item, press  $\triangleleft$  or **BACK**.
  - Exiting the Menu, press **SETUP** while the menu is displayed.  
The menu display disappears.

## Items that can be set with the “Video” procedure

**Picture Adjust** ([page 129](#))

**HDMI Setup** ([page 129](#))

**Output Settings** ([page 131](#))

**Analog Video Out** ([page 132](#))

**On Screen Display** ([page 133](#))

**TV Format** ([page 133](#))

## Picture Adjust

Default settings are underlined.

Picture quality can be adjusted.

We recommend leaving the settings unchanged from the default settings. First adjust the display image quality on your TV, and use this menu only when you want to make fine adjustments.

- This item can be set when the input source is **CBL/SAT** **DVD** **Blu-ray** **GAME** **AUX1** **AUX2** **MEDIA PLAYER** **iPod/USB** **NETWORK**.
- With input sources other than the ones above, this item can be set when "Video Select" is selected. In this case, the original input source settings are called out.
- Can be set when the "Video Conversion" setting ([page 131](#)) is "On".
- "TV AUDIO" or "CD" can be set when "HDMI", "COMP" or "VIDEO" ([page 135, 136](#)) has been assigned.

Setting items	Setting details
<b>Picture Mode</b> Select the desired picture mode according to the video signals and your viewing environment.	<b>Standard</b> : The standard mode suited for most living room viewing environments. <b>Movie</b> : A mode suited for watching movies in a dark room such as a theater room. <b>Vivid</b> : A mode that makes graphic images for games, etc. brighter and more vivid. <b>Streaming</b> : A mode suited for low bit rate video sources. <b>Custom</b> : Adjusts the picture quality manually. <b>Off</b> : No picture quality adjustment is done with this unit.  <ul style="list-style-type: none"> <li>• You can also press <b>OPTION</b> to make these settings from "Picture Mode" (<a href="#">page 80</a>) in the option menu.</li> <li>• The default settings are as follows.               <ul style="list-style-type: none"> <li>• For "Network" and "iPod/USB" input sources : Streaming</li> <li>• For input sources other than "Network" and "iPod/USB" : Off</li> </ul> </li> </ul>
<b>Contrast</b> Adjust picture contrast.	<b>-6 - +6 (0)</b>  "Contrast" can be set when "Picture mode" is set to "Custom".
<b>Brightness</b> Adjust picture brightness.	<b>0 - +12</b>  "Brightness" can be set when "Picture mode" is set to "Custom".
<b>Saturation</b> Adjust picture chroma level (saturation).	<b>-6 - +6 (0)</b>  "Saturation" can be set when "Picture mode" is set to "Custom".
<b>Hue</b> Adjust green and red balance.	<b>-6 - +6 (0)</b>  "Hue" can be set when "Picture mode" is set to "Custom".

Setting items	Setting details
<b>Noise Reduction</b> Reduce overall video noise.	<b>Low / Medium / High / Off</b>  "Noise Reduction" can be set when "Picture mode" is set to "Custom".
<b>Enhancer</b> Emphasize picture contours.	<b>0 - +12</b>  "Enhancer" can be set when "Picture mode" is set to "Custom".

- "Picture Adjust" can not be set when 4K signals are input.
- When TVs are simultaneously connected to HDMI MONITOR OUT 1, HDMI MONITOR OUT 2, COMPONENT VIDEO OUT and VIDEO MONITOR OUT connector for inputting video or component video signals, the "Picture Mode" – "Streaming", "Noise Reduction" and "Enhancer" settings are only valid for the TV that is connected via HDMI.

## HDMI Setup

Default settings are underlined.

Make settings for HDMI video/audio output.

Setting items	Setting details
<b>Auto Lip Sync</b> Make automatic compensation for timing shift in audio and video output.	<b>On</b> : Compensated. <b>Off</b> : Not compensated.
<b>HDMI Audio Out</b> Select HDMI audio output device.	<b>AVR</b> : Play back through speakers connected to the unit. <b>TV</b> : Play back through TV connected to the unit.  <ul style="list-style-type: none"> <li>• The audio signal input from the HDMI input connector can be output as an output signal from the HDMI output connector by setting the HDMI audio output destination to TV. Audio signals input via the Analog/Coaxial/Optical/EXTERNAL IN input connectors cannot be output from the HDMI output connector.</li> <li>• When the HDMI control function is activated, priority is given to the TV audio setting (<a href="#">page 102</a> "HDMI control function").</li> </ul>

Setting items	Setting details
<b>Video Output</b> Make settings for HDMI monitor output.	<p><b>Auto(Dual)</b> : The presence of a TV connected to the HDMI MONITOR 1 or HDMI MONITOR 2 connector is detected automatically, and that TV connection is used.</p> <p><b>Monitor 1</b> : A TV connected to the HDMI MONITOR 1 connector is always used. Video is not output from the TV connected to the HDMI MONITOR 2 connector.</p> <p><b>Monitor 2</b> : A TV connected to the HDMI MONITOR 2 connector is always used. Video is not output from the TV connected to the HDMI MONITOR 1 connector.</p> <p></p> <ul style="list-style-type: none"> <li>• If both the HDMI MONITOR 1 and HDMI MONITOR 2 connectors are connected and "Resolution" (<a href="#">page 132</a>) is set to "Auto", the signals are output with a resolution compatible with both TV.</li> <li>• With "Resolution" (<a href="#">page 132</a>) not set to "Auto", check whether the TV you are using is compatible with the resolution under "Video" – "HDMI Monitor 1" or "HDMI Monitor 2" (<a href="#">page 153</a>).</li> </ul> <p><b>NOTE</b></p> <p>Depending on the monitor you have connected, the display may not be correct when you set to "Auto(Dual)". In such a case, set to either "Monitor 1" or "Monitor 2".</p>
<b>Vertical Stretch</b> Sets whether video signals are vertically stretched or not.	<p><b>On</b> : Stretches video signals vertically.</p> <p><b>Off</b> : Does not stretch video signals vertically.</p> <p> "Vertical Stretch" can work when "i/p Scaler" is set to anything other than "Off".</p>
<b>HDMI Pass Through</b> Selects how the AVR will pass HDMI signals to the HDMI output in standby power mode.	<p><b>On</b> : Passes the selected HDMI input through the AV receiver's HDMI output when the AV receiver is in standby power mode.</p> <p><b>Off</b> : No HDMI signals are passed through the AV receiver's HDMI output in standby power mode.</p> <p><b>NOTE</b></p> <p><b>When "HDMI Pass Through" is set to "On", it consumes more standby power.</b> If you are not using this unit for an extended period, it is recommended that you unplug the power cord from the power outlet.</p>

Setting items	Setting details
<b>HDMI Control</b> You can link operations with devices connected to HDMI and compatible with HDMI Control.	<p><b>On</b> : Use HDMI control function.</p> <p><b>Off</b> : Do not use HDMI control function.</p> <p></p> <ul style="list-style-type: none"> <li>• When a device that is not compatible with the HDMI control function is connected, set "HDMI Control" to "Off".</li> <li>• Please consult the operating instructions for each connected device to check the settings.</li> <li>• Refer to "HDMI control function" (<a href="#">page 102</a>) for more information about the HDMI control function.</li> </ul> <p><b>NOTE</b></p> <ul style="list-style-type: none"> <li>• <b>When "HDMI Control" is set to "On", it consumes more standby power.</b> If you are not using this unit for an extended period, it is recommended that you unplug the power cord from the power outlet.</li> <li>• The HDMI control function controls operations of a TV that is compatible with the HDMI control function. Make sure that the TV and HDMI are connected when you perform HDMI control.</li> <li>• If the "HDMI Control" settings have been changed, always reset the power to connected devices after the change.</li> </ul>
<b>Pass Through Source</b> The AV receiver will "pass through" the sources HDMI signal when in standby.	<p><b>Last</b> : Choose this option to "pass through" the last used HDMI input video source.</p> <p><b>CBL/SAT / DVD / Blu-ray / GAME / AUX1 / AUX2 / MEDIA PLAYER / CD / TV AUDIO</b> : Choose one of these HDMI sources to be passed through when the AV receiver is in standby.</p> <p> "Pass Through Source" can be set when "HDMI Control" is set to "On" or "HDMI Pass Through" is set to "On".</p>
<b>Control Monitor</b> Selects the HDMI monitor for which you want to enable the HDMI control function.	<p><b>Monitor 1</b> : Uses the HDMI Monitor 1 for HDMI control.</p> <p><b>Monitor 2</b> : Uses the HDMI Monitor 2 for HDMI control.</p> <p><b>ZONE4</b> : Uses the HDMI monitor in ZONE4 for HDMI control.</p> <p></p> <ul style="list-style-type: none"> <li>• "Control Monitor" can be set when "HDMI Control" is set to "On".</li> <li>• The ARC function only works for either the HDMI Monitor 1 or HDMI Monitor 2 connector that is specified in "Control Monitor".</li> </ul>

Setting items	Setting details
<b>Power Off Control</b> Links the power standby of this unit to external devices.	<p><b>All</b> : If power to a connected TV is turned off independently of the input source, power to this unit is automatically set to standby.</p> <p><b>Video</b> : When the TV is turned off with one of "HDMI", "COMP" or "VIDEO" (<a href="#">page 135, 136</a>) assigned for the CBL/SAT / DVD / Blu-ray / GAME / AUX1 / AUX2 / MEDIA PLAYER / CD / TV AUDIO input source on this unit, power to this unit is automatically set to standby.</p> <p><b>Off</b> : This unit does not link with power to a TV.</p> <p> "Power Off Control" can be set when "HDMI Control" is set to "On".</p> <p><b>NOTE</b></p> <p>"Power Off Control" cannot be set when "Control Monitor" is set to "ZONE4".</p>

## Output Settings

Default settings are underlined.

Makes screen-related settings.

\* "CBL/SAT", "DVD", "Blu-ray", "GAME", "AUX1", "AUX2", "MEDIA PLAYER", "CD" or "TV AUDIO" can be set when "HDMI", "COMP" or "VIDEO" ([page 135, 136](#)) has been assigned.

"Output Settings" can not be set when 4K signals are input.

Setting items	Setting details
<b>Video Mode</b> Make settings for video processing.	<p><b>Auto</b> : Process video automatically based on the HDMI content information.</p> <p><b>Game</b> : Always process video for game content.</p> <p><b>Movie</b> : Always process video for movie content.</p> <p></p> <ul style="list-style-type: none"> <li>If "Video Mode" is set to "Auto", the mode is switched according to the input contents.</li> <li>If a source is played in both MAIN ZONE (audio and video) and ZONE2 (audio only) modes in the same room, audio in MAIN ZONE and ZONE2 modes may sound out of synchronization, but this is not malfunction. In this case, setting to "Game" mode may improve audio synchronization.</li> </ul>

### i/p Scaler

Convert the input source resolution to the resolution set.

CBL/SAT *	DVD *
Blu-ray *	GAME *
AUX1 *	AUX2 *
MEDIA PLAYER *	
iPod/USB *	CD *
NETWORK *	TV AUDIO *

**Analog** : Use i/p scaler function for analog video signal.

**Analog & HDMI** : Use i/p scaler function for analog and HDMI video signal.

**HDMI** : Use i/p scaler function for HDMI video signal.

**Off** : Do not use i/p scaler function.

- "Analog & HDMI" can be set for input sources for which an HDMI input connector is assigned.
- Which items can be set depend on the input source assigned to each input connector.
- This function is not effective when the input signal is "x.v.Color", 3D, sYCC 601 color, Adobe RGB color, Adobe YCC 601 color or computer resolution.

Setting items	Setting details																									
<b>Resolution</b> Set the output resolution. You can set “Resolution” separately for HDMI output of the analog video input and HDMI input.	<b>Auto</b> : The number of pixels the TV connected to the HDMI MONITOR OUT connector supports is detected automatically and the appropriate output resolution is set. <b>480p/576p / 1080i / 720p / 1080p / 1080p:24Hz / 4K</b> : Set the output resolution.

* “CBL/SAT”, “DVD”, “Blu-ray”, “GAME”, “AUX1”, “AUX2”, “MEDIA PLAYER”, “CD” or “TV AUDIO” can be set when “HDMI”, “COMP” or “VIDEO” ( <a href="#">page 135, 136</a> ) has been assigned.													

## Analog Video Out

Default settings are underlined.

Assigns the zone that uses the COMPONENT VIDEO MONITOR OUT and the VIDEO MONITOR OUT connectors.

Setting items	Setting details
<b>ZONE</b>	<b>MAIN ZONE</b> : Uses the COMPONENT VIDEO MONITOR OUT and the VIDEO MONITOR OUT connectors for MAIN ZONE. <b>ZONE3</b> : Uses the COMPONENT VIDEO MONITOR OUT and the VIDEO MONITOR OUT connectors for ZONE3.

## On Screen Display

Default settings are underlined.

Select the on-screen display user interface preferences.

Setting items	Setting details
<b>Volume</b> Sets where to display the master volume level.	<u>Bottom</u> : Display at the bottom. <b>Top</b> : Display at the top. <b>Off</b> : Turn display off.  When the master volume display is hard to see when superimposed on movie subtitles, set to "Top".
<b>Info</b> Displays status of operation temporarily when the sound mode is changed, or input source is switched. You can set whether or not to show each of these status displays.	<u>On</u> : Turn display on. <b>Off</b> : Turn display off.
<b>Now Playing</b> Sets how long each menu is displayed when the input source is "NETWORK", "iPod/USB", or "FM".	<u>Always On</u> : Show display continuously. <b>Auto Off</b> : Show display for 30 seconds after operation.

## TV Format

Default settings are underlined.

Set the video signal format to be output for the TV you are using.

Setting items	Setting details
<b>Format</b>	<b>NTSC</b> : Select NTSC output. <u>PAL</u> : Select PAL output.  "Format" can also be set by the following procedure. However, the menu screen is not displayed. <ol style="list-style-type: none"> <li>1. Press and hold the main unit's ◀▶ for at least 3 seconds.  "*Video Format &lt; PAL &gt;" appears on the display.</li> <li>2. Use the main unit's ◀▶ and set the video signal format.</li> <li>3. Press the main unit's <b>ENTER</b> to complete the setting.</li> </ol> <div style="background-color: #e91e63; color: white; padding: 2px 5px; display: inline-block;"><b>NOTE</b></div> When a format other than the video format of the connected TV is set, the picture will not be displayed properly.

Perform settings related to input source playback.

- You do not have to change the settings to use the unit. Make settings when needed.

## Menu operation

- 1 Press ZONE SELECT to switch the zone mode.**  
The **[M]** indicator lights.
- 2 Press SETUP.**  
The menu is displayed on the TV screen.
- 3 Use  $\Delta$ / $\nabla$  to select the menu to be set or operated.**
- 4 Press ENTER or  $\triangleright$  to enter the setting.**
  - To return to the previous item, press  $\triangleleft$  or **BACK**.
  - Exiting the Menu, press **SETUP** while the menu is displayed.  
The menu display disappears.

## Important information

### □ About the display of input sources

In this section, the configurable input sources for each item are shown as follows.

### NOTE

Input sources that have been set to "Hide" at "Hide Sources" ([page 137](#)) cannot be selected.

## Items that can be set with the "Inputs" procedure

Input Assign ([page 135](#))

Source Rename ([page 137](#))

Hide Sources ([page 137](#))

Source Level ([page 137](#))

Input Select ([page 138](#))

Video Source ([page 138](#))

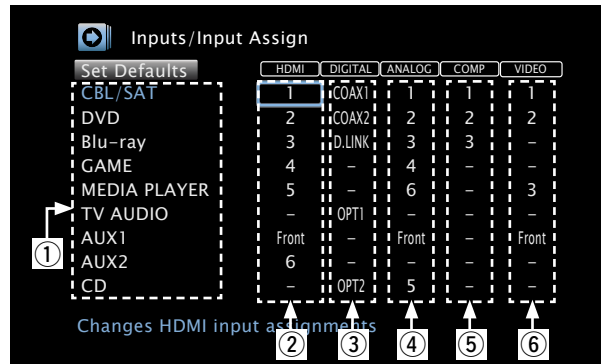

## Input Assign

This unit has certain input sources such as “CBL/SAT” assigned to audio and video connectors by default. By making the default connections, you can simply press an input source select button to play back audio or video from the connected device with ease.

When making connections other than the default settings, you must change settings in this section.

### Examples of “Input Assign” menu screen displays

This screen appears when the “Inputs” – “each input source” – “Input Assign” menu is selected. Use the “Input Assign” menu to change the ② HDMI input connectors, ③ Digital input connectors, ④ Analog input connectors, ⑤ Component input connectors, and ⑥ Video input connectors that are assigned to the ① input sources in default settings.

### Input assignments menu operations

- 1** Use  $\Delta \nabla \triangleleft \triangleright$  to move the cursor to the item you want to set, and then press **ENTER**.
- 2** Use  $\triangleleft \triangleright$  to select the input connector to be assigned.
- 3** Press **ENTER** to register the setting.

Setting items	Setting details																																
<b>HDMI</b> Set this to change the HDMI input connectors assigned to the input sources.	<b>1 / 2 / 3 / 4 / 5 / 6 / Front</b> : Assign an HDMI input connector to the selected input source. – : Do not assign an HDMI input connector to the selected input source.  • At time of purchase, the settings of the different input sources are as shown below.

	 <ul style="list-style-type: none"><li>• To play the video signal assigned at “HDMI” combined with the audio signal assigned at “Input Assign” – “DIGITAL”, select “Digital” at “Input Mode” (<a href="#">page 138</a>).</li><li>• Audio signals input from analog and digital connectors cannot be output to a TV that is connected via HDMI.</li><li>• When “HDMI Control” (<a href="#">page 130</a>) is set to “On”, HDMI input connector cannot be assigned to “TV AUDIO”.</li></ul>																																

## Source Rename

Change the display name of the selected input source.

This is convenient when the input source name of your device and the input source name of this unit are different. You can change the name to suit your needs. When the renaming is completed, the name is displayed on this unit's display and on the menu screen.

### Setting details

**CBL/SAT / DVD / Blu-ray / GAME / AUX1 / AUX2 / MEDIA PLAYER / CD / TV AUDIO / PHONO :**

Change the display name of the selected input source.

- Up to 12 characters can be input.
- For character input, see [page 118](#).

**Set Defaults :** The "Source Rename" settings are returned to the default settings.

- **Reset** : Reset to the defaults.
- **Cancel** : Do not reset to the defaults.

 If you select "Set Defaults" and press **ENTER**, the message "Reset all source names to the factory defaults?" is displayed. Select "Reset" or "Cancel", and then press **ENTER**.

## Hide Sources

**Default settings are underlined.**

Remove from the display input sources that are not used.

### Setting details

**CBL/SAT / DVD / Blu-ray / GAME / AUX1 / AUX2 / MEDIA PLAYER / iPod/USB / CD / FM / Favorites / Internet Radio / Last.fm / Spotify / Flickr / TV AUDIO / PHONO :** Select input source that is not used.

- **Show** : Use this source.
- **Hide** : Do not use this source.

### NOTE

- Input sources being used in the various zones cannot be deleted.
- Input sources set to "Hide" cannot be selected using the input source select button.

## Source Level

**Default settings are underlined.**

- This function corrects the playback level of the selected input source's audio input.
- Make this setting if there are differences in the input volume levels between the different sources.

Setting items	Setting details
<b>Source Level</b> <div> <div>iPod/USB</div> <div>FM</div> </div> <div> <div>NETWORK</div> </div>	<b>-12dB – +12dB (0dB)</b>

## Video Source

Default settings are underlined.

Video of another input source is played back combined with the playing audio.

Setting items	Setting details
<b>Video Select</b>	<p><b>Default</b> : Play the picture and sound of the input source.  <b>CBL/SAT / DVD / Blu-ray / GAME / AUX1 / AUX2 / MEDIA PLAYER / CD / TV AUDIO</b> : Select video input source to view. The video of the selected input source is played along with the audio currently being played. This can be set for individual input sources.</p> <p> "CBL/SAT", "DVD", "Blu-ray", "GAME", "AUX1", "AUX2", "MEDIA PLAYER", "CD" or "TV AUDIO" can be selected only when "COMP" or "VIDEO" is assigned to the input source.</p> <p><b>NOTE</b></p> <ul style="list-style-type: none"> <li>• It is not possible to select HDMI input signals.</li> <li>• Input sources for which "Hide" is selected at "Hide Sources" (<a href="#">page 137</a>) cannot be selected.</li> </ul>

## Speakers

Set when changing Audyssey® Setup settings.

- If you change the speaker settings after performing Audyssey® Setup, it will not be possible to set Audyssey MultEQ® XT 32, Audyssey Dynamic EQ® and Audyssey Dynamic Volume® (page 125, 126).
- Can be used without changing the settings. Please set if necessary.

### Menu operation

- 1 Press ZONE SELECT to switch the zone mode.**  
The **[M]** indicator lights.
- 2 Press SETUP.**  
The menu is displayed on the TV screen.
- 3 Use  $\Delta$ / $\nabla$  to select the menu to be set or operated.**
- 4 Press ENTER or  $\triangleright$  to enter the setting.**
  - To return to the previous item, press  $\triangleleft$  or **BACK**.
  - Exiting the Menu, press **SETUP** while the menu is displayed.  
The menu display disappears.

### Items that can be set with the “Speakers” procedure

Audyssey® Setup (page 33, 99)

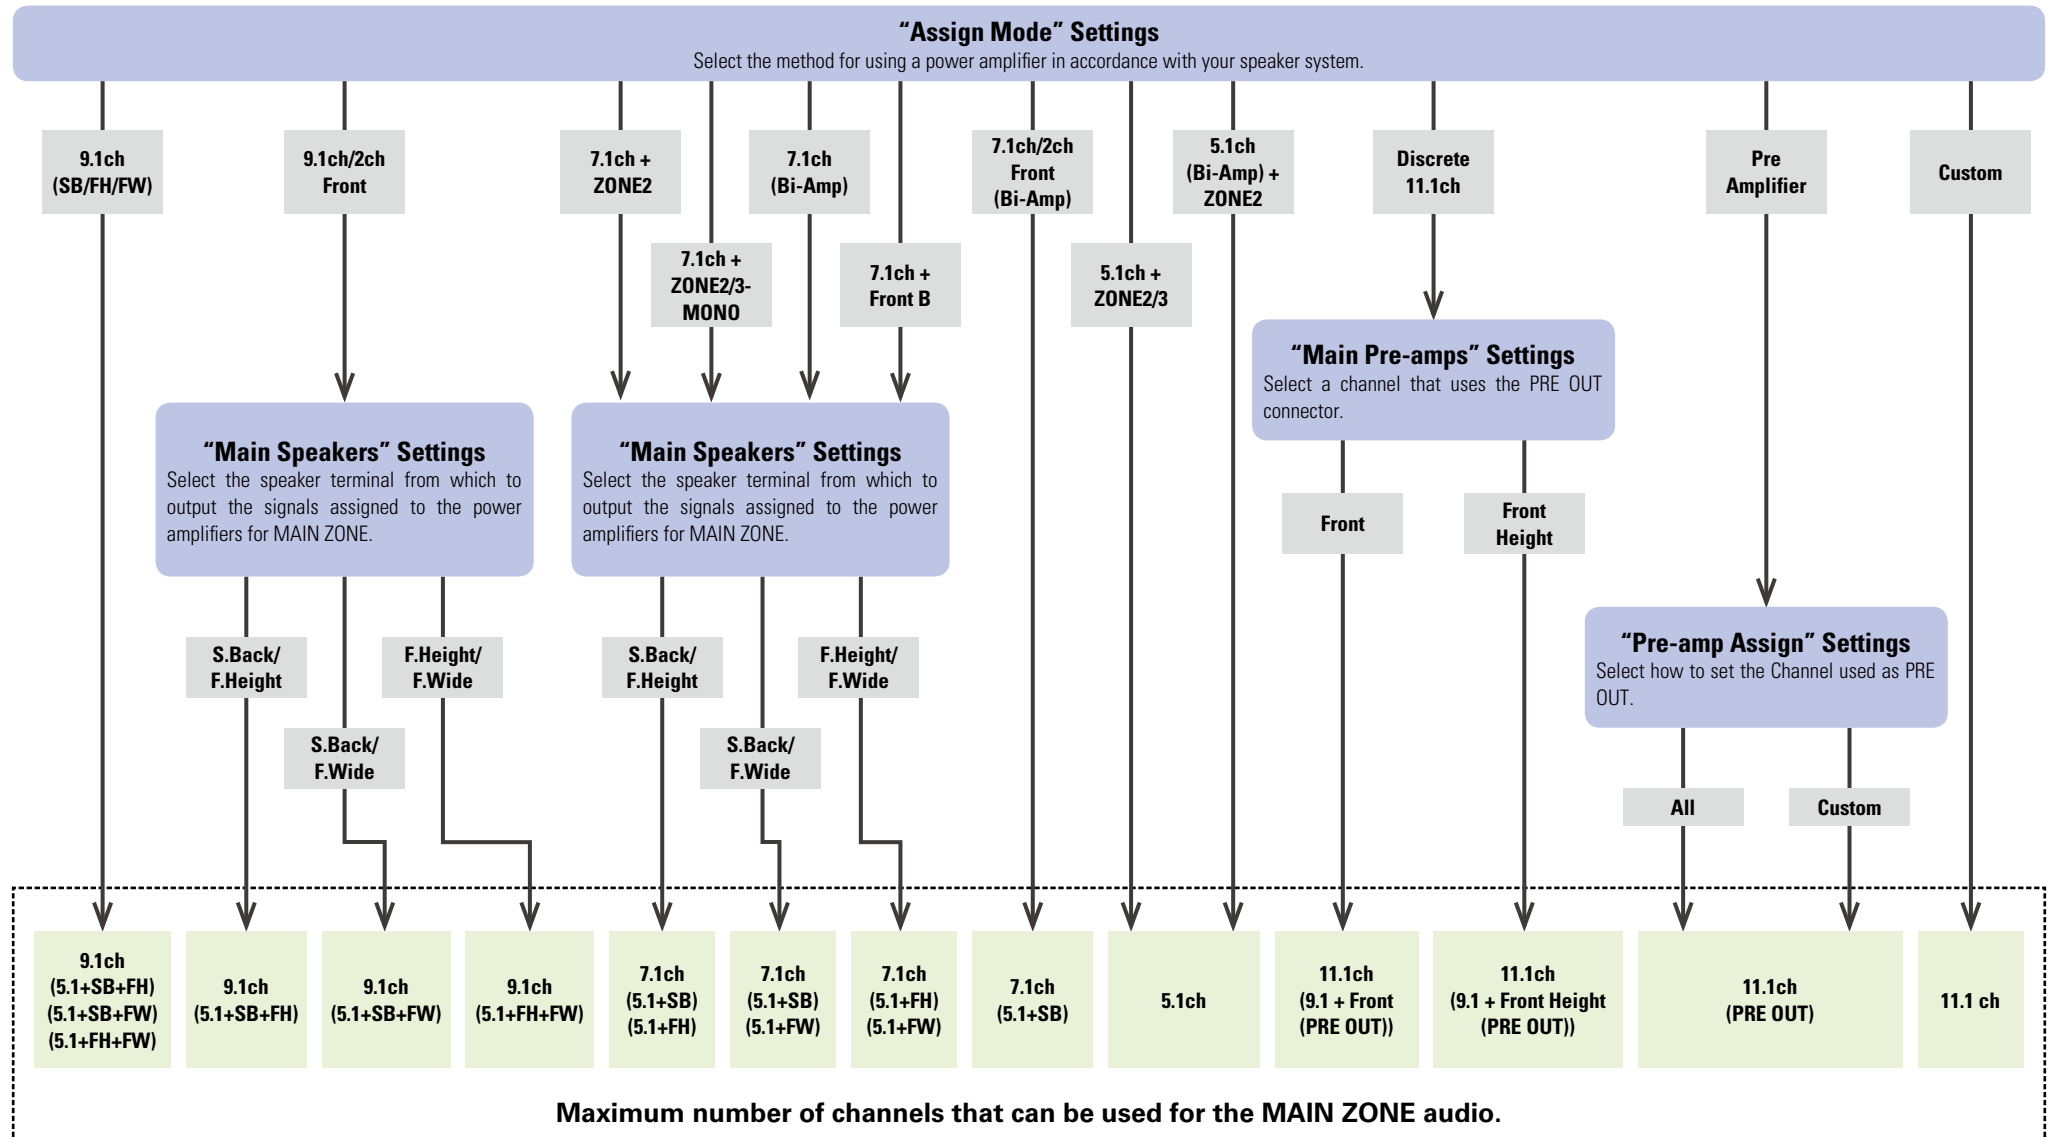

Manual Setup (page 141)

## Steps for setting “Amp Assign”

This unit is provided with 12 types of Assign Mode settings.

You can switch the channels assigned to a power amplifier in accordance with your speaker system or perform playback using up to 11.1 channels using a combination of the built-in power amplifier and an external power amplifier. You can also use this unit as a preamplifier.

Use the following flowchart to set the speaker system of this unit.

## Manual Setup

Default settings are underlined.

Perform when setting the speakers manually or when changing settings made in Audyssey® Setup.

- If you change the speaker settings after performing Audyssey® Setup, it will not be possible to select Audyssey MultEQ® XT 32, Audyssey Dynamic EQ® and Audyssey Dynamic Volume® ([page 125, 126](#)).
- “Manual Setup” can be used without changing the settings. Please set if necessary.

Setting items	Setting details
<b>Amp Assign</b> Select power amplifier usage method to match your speaker system.  For the flow to set “Amp Assign”, see <a href="#">page 140</a> .	<b>Assign Mode</b> : Set the assignment mode. <ul style="list-style-type: none"> <li>• <b>9.1ch(SB/FH/FW)</b> : Assigns all power amplifiers within this unit for MAIN ZONE.</li> <li>• <b>7.1ch + ZONE2</b> : Assigns power amplifiers within this unit as follows: 7.1ch for MAIN ZONE and 2ch for ZONE2.</li> <li>• <b>5.1ch + ZONE2/3</b> : Assigns power amplifiers within this unit as follows: 5.1ch for MAIN ZONE and 2ch for ZONE2 and ZONE3 each.</li> <li>• <b>7.1ch + ZONE2/3-MONO</b> : Assigns power amplifiers within this unit as follows: 7.1ch for MAIN ZONE and 1ch for ZONE2 and ZONE3 each.</li> <li>• <b>7.1ch(Bi-Amp)</b> : Assigns power amplifiers within this unit as follows: 7.1ch for MAIN ZONE and 2ch for the front speaker bi-amplifier connection.</li> <li>• <b>5.1ch(Bi-Amp) + ZONE2</b> : Assigns power amplifiers within this unit as follows: 5.1ch for MAIN ZONE, 2ch for the front speaker bi-amplifier connection, and 2ch for ZONE2.</li> <li>• <b>9.1ch/2ch Front</b> : Assigns all power amplifiers within this unit for MAIN ZONE. Up to 9.1ch playback is available. You can also use a front speaker that is different from the one used during multi-channel playback for playback by switching the internal power amplifier during 2ch playback.</li> <li>• <b>7.1ch/2ch Front(Bi-Amp)</b> : Assigns power amplifiers within this unit as follows: 7.1ch for the MAIN ZONE multi-channel playback. You can also use a front speaker that is different from the one used during multi-channel playback for playback under the bi-amplifier connection by switching the internal power amplifier during 2ch playback.</li> <li>• <b>7.1ch + Front B</b> : Assigns power amplifiers within this unit as follows: 7.1ch for MAIN ZONE and 2ch for the second front speaker connection.</li> <li>• <b>Discrete 11.1ch</b> : Assigns 9.1ch for power amplifiers within this unit and 2ch (front/front height) for the external power amplifier connection. Up to 11.1ch playback is available.</li> <li>• <b>Pre Amplifier</b> : Connects all speakers by using an external power amplifier and uses this unit as a preamplifier. Up to 9.1ch playback is available.</li> <li>• <b>Custom</b> : Assigns power amplifiers within this unit as you prefer.</li> </ul>

Setting items	Setting details
<b>Amp Assign</b> (Continued)	<p>The following setting items are displayed according to the setting specified for “Assign Mode” (<a href="#">page 141</a>).</p> <ul style="list-style-type: none"> <li>□ When “Assign Mode” (<a href="#">page 141</a>) is set to “9.1ch(SB/FH/FW)”, “7.1ch + ZONE2”, “7.1ch + ZONE2/3-MONO”, “7.1ch(Bi-Amp)”, “9.1ch/2ch Front”, “7.1ch/2ch Front(Bi-Amp)” or “7.1ch + Front B”             <p><b>Main Speakers</b> : Selects speakers used in MAIN ZONE.</p> <ul style="list-style-type: none"> <li>• <b>S.Back/F.Height</b> : Uses surround back and front height speakers.</li> <li>• <b>S.Back/F.Wide</b> : Uses surround back and front wide speakers.</li> <li>• <b>F.Height/F.Wide</b> : Uses front height and front wide speakers.</li> </ul> </li> <li>□ When “Assign Mode” (<a href="#">page 141</a>) is set to “Discrete 11.1ch”             <p><b>Main Pre-amps</b> : Selects the PRE OUT connector that is connected to the external power amplifier used in MAIN ZONE.</p> <ul style="list-style-type: none"> <li>• <b>Front</b> : Connects the PRE OUT connector for the front speaker.</li> <li>• <b>Front Height</b> : Connects the PRE OUT connector for the front height speaker.</li> </ul> </li> <li>□ When “Assign Mode” (<a href="#">page 141</a>) is set to “Pre Amplifier”             <p><b>Pre-Amp Assign</b> : Selects how to use the PRE OUT connector.</p> <ul style="list-style-type: none"> <li>• <b>All</b> : Uses this unit as a preamplifier by using only the PRE OUT connector without using the power amplifiers within this unit.</li> <li>• <b>Custom</b> : Sets whether to use each channel as a preamplifier or use speakers.</li> </ul> <p><b>Center / Surround / Surr. Back / Front Height / Front Wide</b></p> <ul style="list-style-type: none"> <li>• <b>Speaker</b> : Select to use speakers.</li> <li>• <b>Pre-amp out</b> : Select to output audio only from the PRE OUT connectors.</li> </ul> </li> <li>□ When “Assign Mode” (<a href="#">page 141</a>) is set to “Custom”             <p><b>Output Channel</b> : Selects signals output from the selected speaker connector.</p> <ul style="list-style-type: none"> <li>• <b>Front / Center / Surround / Surround Back / Front Height / Front Wide / ZONE2 / ZONE3 / ZONE2/3</b></li> <li>• <b>None</b> : Does not output audio from the selected speaker.</li> </ul> </li> </ul>

Setting items	Setting details
<b>Speaker Config.</b> Indicate speaker presence and select speaker size categories based on bass reproduction capability.	<p><b>Front</b> : Set the front speaker size.</p> <ul style="list-style-type: none"> <li>• <b>Large</b> : Use a large speaker that can adequately play back low frequencies.</li> <li>• <b>Small</b> : Use a small speaker that has inadequate playback capacity for low frequencies.</li> </ul> <p> When "Subwoofer" is set to "None", "Front" is automatically set to "Large".</p> <p>• When "Front" is set to "Small", "Center", "Surround", "Surr. Back", "Front Height" and "Front Wide" can not be set to "Large".</p> <hr/> <p><b>Center</b> : Set the presence and size of the center speaker.</p> <ul style="list-style-type: none"> <li>• <b>Large</b> : Use a large speaker that can adequately play back low frequencies.</li> <li>• <b>Small</b> : Use a small speaker that has inadequate playback capacity for low frequencies.</li> <li>• <b>None</b> : Select when a center speaker is not connected.</li> </ul> <p> "Large" is not displayed when "Front" is set to "Small".</p> <hr/> <p><b>Subwoofer</b> : Set the presence of a subwoofer.</p> <ul style="list-style-type: none"> <li>• <b>2spkrs</b> : Use two subwoofer.</li> <li>• <b>1spkr</b> : Use only one subwoofer.</li> <li>• <b>None</b> : Select when a subwoofer is not connected.</li> </ul> <p> When "Front" is set to "Small", "Subwoofer" is automatically set to "1spkr".</p> <hr/> <p><b>Surround</b> : Set the presence and size of the surround speakers.</p> <ul style="list-style-type: none"> <li>• <b>Large</b> : Use a large speaker that can adequately play back low frequencies.</li> <li>• <b>Small</b> : Use a small speaker that has inadequate playback capacity for low frequencies.</li> <li>• <b>None</b> : Select when the surround speakers are not connected.</li> </ul> <p> When "Surround" is set to "Large", "Surr. Back", "Front Height" and "Front Wide" can be set to "Large".</p> <p>• When "Surround" is set to "None", "Surr. Back", "Front Height" and "Front Wide" are automatically set to "None".</p>

Setting items	Setting details
<b>Speaker Config.</b> (Continued)	<p><b>Surr. Back</b> : Set the presence, size and number of surround back speakers.</p> <ul style="list-style-type: none"> <li>• <b>Large</b> : Use a large speaker that can adequately play back low frequencies.</li> <li>• <b>Small</b> : Use a small speaker that has inadequate playback capacity for low frequencies.</li> <li>• <b>None</b> : Select when the surround back speakers are not connected.</li> </ul> <p>• <b>2spkrs</b> : Use two surround back speakers.</p> <p>• <b>1spkr</b> : Use only one surround back speaker. When you select this setting, connect the surround back speaker to the left (L) channel.</p> <hr/> <p><b>Front Height</b> : Set the presence and size of the front height speakers.</p> <ul style="list-style-type: none"> <li>• <b>Large</b> : Use a large speaker that can adequately play back low frequencies.</li> <li>• <b>Small</b> : Use a small speaker that has inadequate playback capacity for low frequencies.</li> <li>• <b>None</b> : Select when the front height speakers are not connected.</li> </ul> <hr/> <p><b>Front Wide</b> : Set the presence and size of the front wide speakers.</p> <ul style="list-style-type: none"> <li>• <b>Large</b> : Use a large speaker that can adequately play back low frequencies.</li> <li>• <b>Small</b> : Use a small speaker that has inadequate playback capacity for low frequencies.</li> <li>• <b>None</b> : Select when the front height speakers are not connected.</li> </ul>

Setting items	Setting details
<b>Distances</b> Set distance from listening position to speakers. Measure beforehand the distance from the listening position to each speaker.	<p><b>Unit</b> : Set the unit of distance.</p> <ul style="list-style-type: none"> <li>• <b>Meters / Feet</b></li> </ul> <p><b>Step</b> : Set the minimum variable width of the distance.</p> <ul style="list-style-type: none"> <li>• <b>0.1m / 0.01m</b></li> <li>• <b>1ft / 0.1ft</b></li> </ul> <p><b>Set Defaults</b> : The “Distances” settings are returned to the default settings.</p> <ul style="list-style-type: none"> <li>• <b>Reset</b> : Reset to the defaults.</li> <li>• <b>Cancel</b> : Do not reset to the defaults.</li> </ul> <p> When you select “Set Defaults” and press <b>ENTER</b>, the “Resets all of the distance settings to the factory defaults?” prompt is displayed. Select either “Reset” or “Cancel”, and press <b>ENTER</b>.</p>  <p><b>Front L / Front R / F. Height L / F. Height R / F. Wide L / F. Wide R / Center / Subwoofer 1*1 / Subwoofer 2*1 / Surround L / Surround R / Surr. Back L*2 / Surr. Back R*2</b> : Select speaker for distance setting.</p> <p>*1 When the “Speaker Config.” – “Subwoofer” setting (<a href="#">page 142</a>) is set to “1spkr”, “Subwoofer” is displayed.</p> <p>*2 When the “Speaker Config.” – “Surr. Back” setting (<a href="#">page 142</a>) is set to “1spkr”, “Surr. Back” is displayed.</p> <ul style="list-style-type: none"> <li>• <b>0.00m – 18.00m / 0.0ft – 60.0ft</b> : Set the distance.</li> </ul> <p> The speakers that can be selected differ depending on the “Amp Assign” (<a href="#">page 141</a>) and “Speaker Config.” (<a href="#">page 142</a>) settings.</p> <p>Default settings :</p> <p>Front L / Front R / F. Height L / F. Height R / Front Wide L / Front Wide R / Center / Subwoofer 1 / Subwoofer 2 : 3.60 m (12.0 ft)</p> <p>Surround L / Surround R / Surr. Back L / Surr. Back R : 3.00 m (10.0 ft)</p> <p>Set the difference in the distance between the speakers to less than 6.00 m (20.0 ft).</p> <p><b>NOTE</b></p> <p>Speakers set to “None” in “Speaker Config.” (<a href="#">page 142</a>) are not displayed.</p>

Setting items	Setting details
<b>Levels</b> Set the volume of the test tone to be the same when it is output from each speaker.	<p><b>Test Tone Start</b> : Output test tone.</p> <ul style="list-style-type: none"> <li>• <b>Front L / F. Height L / Center / F. Height R / Front R / F. Wide R / Surround R / Surr. Back R*1 / Surr. Back L*1 / Surround L / F. Wide L / Subwoofer 1*2 / Subwoofer 2*2 / Subwoofer 1+2*3</b> : A test tone is output from the selected speaker. While listening to the test tone, adjust the volume output from the selected speaker.</li> </ul> <p>*1 When the “Speaker Config.” – “Surr. Back” setting (<a href="#">page 142</a>) is set to “1spkr”, “Surr. Back” is displayed.</p> <p>*2 When the “Speaker Config.” – “Subwoofer” setting (<a href="#">page 142</a>) is set to “1spkr”, “Subwoofer” is displayed.</p> <p>*3 When “Subwoofer 1+2” is selected, you can adjust the volume of Subwoofer 1 and Subwoofer 2 at the same time.</p> <ul style="list-style-type: none"> <li>• <b>-12.0dB – +12.0dB (0.0dB)</b> : Adjust the volume.</li> </ul> <p> When “Levels” is adjusted, the adjusted values are set for all the sound modes.</p> <p><b>NOTE</b></p> <ul style="list-style-type: none"> <li>• Speakers set to “None” in the “Speaker Config.” (<a href="#">page 142</a>) settings are not displayed.</li> <li>• When a headphones jack is inserted in the PHONES jack of this unit, the “Levels” is not displayed.</li> </ul> <p><b>Set Defaults</b> : The “Levels” settings are returned to the default settings.</p> <ul style="list-style-type: none"> <li>• <b>Reset</b> : Reset to the defaults.</li> <li>• <b>Cancel</b> : Do not reset to the defaults.</li> </ul> <p> When you select “Set Defaults” and press <b>ENTER</b>, the “Reset all of the channel level settings to the factory defaults?” prompt is displayed. Select either “Reset” or “Cancel”, and press <b>ENTER</b>.</p> 

Setting items	Setting details
<b>Crossovers</b> Set the maximum frequency of the bass signal output from each channel to the subwoofer. Set the Crossover Frequency to suit the bass reproduction capability of the speaker being used.	<p><b>Speaker Selection</b> : Selects how to set the crossover frequency. See the speaker manual for information concerning speaker crossover frequency.</p> <ul style="list-style-type: none"> <li>• <b>All</b> : Selects the crossover point of all speakers at the same time.</li> <li>• <b>Individual</b> : Selects the crossover points for each speaker individually.</li> </ul> <p>The following settings can be set when the "Speaker Selection" setting is set to "Individual".</p> <ul style="list-style-type: none"> <li>• <b>All / Front / Center / Subwoofer / Surround / Surr. Back / Front Height / Front Wide</b> : Select speaker for setting of crossover frequency.</li> <li>• <b>40Hz / 60Hz / 80Hz / 90Hz / 100Hz / 110Hz / 120Hz / 150Hz / 200Hz / 250Hz</b> : Set the crossover frequency.</li> </ul> <p></p> <ul style="list-style-type: none"> <li>• "Crossovers" can be set when the "Bass" – "Subwoofer Mode" (<a href="#">page 144</a>) setting is "LFE+Main", or when you have a speaker that is set to "Small".</li> <li>• Always set the crossover frequency to "80Hz". When using small speakers, however, we recommend setting the crossover frequency to a higher frequency.</li> <li>• For speakers set to "Small", sound below the crossover frequency is cut from the sound output. The cut bass sound is output from the subwoofer or front speakers.</li> <li>• The speakers that can be set when "Individual" is selected differ depending on to the "Subwoofer Mode" setting (<a href="#">page 144</a>). <ul style="list-style-type: none"> <li>• When "LFE" is selected, speakers set to "Small" at "Speaker Config." can be set. If the speakers are set to "Large", "Full Band" is displayed and the setting cannot be made.</li> <li>• If set to "LFE+Main", this setting can be made regardless of the speaker size.</li> </ul> </li> </ul>

Setting items	Setting details
<b>Bass</b> Set subwoofer and LFE signal range playback.	<p><b>Subwoofer Mode</b> : Select low range signals to be reproduced by subwoofer.</p> <ul style="list-style-type: none"> <li>• <b>LFE</b> : The low range signal of the channel set to "Small" speaker size is added to the LFE signal output from the subwoofer.</li> <li>• <b>LFE+Main</b> : The low range signal of all channels is added to the LFE signal output from the subwoofer.</li> </ul> <p></p> <ul style="list-style-type: none"> <li>• "Subwoofer Mode" can be set when "Speaker Config." – "Subwoofer" (<a href="#">page 142</a>) is set to other than "None".</li> <li>• Play music or a movie source and select the mode offering the strongest bass.</li> <li>• Select "LFE+Main" if you want the bass signals to always be produced from the subwoofer.</li> </ul> <p><b>NOTE</b></p> <p>If "Front" and "Center" for "Speaker Config." are set to "Large", and "Subwoofer Mode" is set to "LFE", no sound may be output from the subwoofers, depending on the input signal or selected sound mode.</p> <p><b>LPF for LFE</b> : Set LFE signal playback range. Set this when you want to change the playback frequency of the subwoofer.</p> <ul style="list-style-type: none"> <li>• <b>80Hz / 90Hz / 100Hz / 110Hz / 120Hz / 150Hz / 200Hz / 250Hz</b></li> </ul>

Setting items	Setting details
<b>Impedance</b> Set the impedance of connected speakers.	<p><b>8Ω/ohms</b> : Select when the impedance per speaker for all the connected speakers is 8Ω or larger.</p> <p><b>6Ω/ohms</b> : Select when the impedance for any of the connected speakers is between 6Ω and 8Ω.</p> <p><b>4Ω/ohms</b> : Select when the impedance for any of the connected speakers is between 4Ω and 8Ω.</p> <p> Check the speaker impedance (Ω) shown on the back of your speakers or in the instruction manual beforehand.</p>
<b>Front Speaker</b> Set the front speakers to use for every sound mode.	<p><b>2ch Playback</b> : The front speakers used in direct play (2 channel), stereo play and pure direct play (2 channel) are set in advance.</p> <ul style="list-style-type: none"> <li>• <b>A</b> : Front speaker A is used.</li> <li>• <b>B</b> : Front speaker B is used.</li> <li>• <b>A+B</b> : Both front speakers A and B are used.</li> </ul> <p><b>Multi ch Playback</b> : The front speakers used in play modes other than direct play (2 channel), stereo play and pure direct play (2 channel) are set in advance.</p> <ul style="list-style-type: none"> <li>• <b>A</b> : Front speaker A is used.</li> <li>• <b>B</b> : Front speaker B is used.</li> <li>• <b>A+B</b> : Both front speakers A and B are used.</li> </ul> <p> This can be set when "Assign Mode" (<a href="#">page 141</a>) is set to "7.1ch + Front B".</p>
<b>2ch Playback</b> Select the method for setting the speakers used in the 2-channel direct and stereo playback modes.	<p><b>Setting</b> : Select the method for setting the speakers used in the 2-channel direct and stereo playback modes.</p> <ul style="list-style-type: none"> <li>• <b>Auto</b> : The settings at "Speakers" (<a href="#">page 139</a>) are applied.</li> <li>• <b>Manual</b> : Make separate settings for 2-channel. Make the following settings:</li> </ul> <p><b>Front</b> : Set the front speaker size.</p> <ul style="list-style-type: none"> <li>• <b>Large</b> : Use a large speaker that can adequately play back low frequencies.</li> <li>• <b>Small</b> : Use a small speaker that has inadequate playback capacity for low frequencies.</li> </ul> <p> If "Speaker Config." – "Subwoofer" (<a href="#">page 142</a>) is set to "None", the setting is automatically set to "Large".</p>

Setting items	Setting details
<b>2ch Playback</b> (Continued)	<p><b>Subwoofer</b> : Set the presence of a subwoofer.</p> <ul style="list-style-type: none"> <li>• <b>Yes</b> : Use a subwoofer.</li> <li>• <b>No</b> : Select when a subwoofer is not connected.</li> </ul> <p> If "Speaker Config." – "Subwoofer" (<a href="#">page 142</a>) is set to "None", the setting is automatically set to "No". If the "Front" setting is "Small", the setting is automatically "Yes".</p> <p><b>SW Mode</b> : Select low range signals to be reproduced by subwoofer.</p> <ul style="list-style-type: none"> <li>• <b>LFE</b> : When the "2ch Playback" – "Front" setting is set to "Large", the LFE signal alone is output from the subwoofer. Also, when the "2ch Playback" – "Front" setting is set to "Small", the front channel low range signal is added to the LFE signal output from the subwoofer.</li> <li>• <b>LFE+Main</b> : The front channel low range signal is added to the LFE signal output from the subwoofer.</li> </ul> <p> This setting can be set made "2ch Playback" – "Subwoofer" is set to "Yes".</p> <p><b>Crossover</b> : Set the maximum frequency of the bass signal output from each channel to the subwoofer.</p> <p>• <b>40Hz / 60Hz / 80Hz / 90Hz / 100Hz / 110Hz / 120Hz / 150Hz / 200Hz / 250Hz</b></p> <p> This setting can be set made "2ch Playback" – "Subwoofer" is set to "Yes".</p> <ul style="list-style-type: none"> <li>• If the "2ch Playback" – "Front" setting is "Large" and the "SW Mode" setting is "LFE", "Full Band" is displayed and the setting cannot be made.</li> </ul> <p><b>Distance FL / Distance FR</b> : Select speaker for distance setting.</p> <p>• <b>0.00m – 18.00m (3.60m) / 0.0ft – 60.0ft (12.0ft)</b> : Set distance from main listening point to speaker.</p> <p> Set the difference in the distance between the speakers to less than 6.00 m (20.0 ft).</p> <p><b>Level FL / Level FR</b> : Select speaker for level adjustment.</p> <p>• <b>-12dB – +12dB (0dB)</b> : Adjust the level of each channel.</p>

## Network

To use this unit by connecting it to a home network (LAN), you must configure network settings. If you set up your home network (LAN) via DHCP, set "DHCP" to "On" (use the default setting). This allows this unit to use your home network (LAN).

If you assign an IP address for each device, you must use the "IP Address" setting to assign an IP address to this unit and enter the information about your home network (LAN) such as the gateway address and subnet mask.

### Menu operation

- 1 Press ZONE SELECT to switch the zone mode.**  
The **[M]** indicator lights.
- 2 Press SETUP.**  
The menu is displayed on the TV screen.
- 3 Use  $\Delta$ / $\nabla$  to select the menu to be set or operated.**
- 4 Press ENTER or  $\triangleright$  to enter the setting.**

- To return to the previous item, press  $\triangleleft$  or **BACK**.
- Exiting the Menu, press **SETUP** while the menu is displayed.  
The menu display disappears.

### Items that can be set with the "Network" procedure

Information ([page 147](#))

Network ([page 147](#))

Friendly Name ([page 147](#))

Settings ([page 148](#))

Diagnostics ([page 149](#))

Maintenance Mode ([page 149](#))

## Information

Display network information.

### Setting details

**Friendly Name / DHCP On or Off / IP Address / MAC Address**

 MAC Address is required to make a vTuner account.

## Network

**Default settings are underlined.**

Enables network communication in standby power mode.

### Setting details

**Off In Standby** : Suspend network function during standby.

**Always On** : Network is on during standby. Main unit operable with a network compatible controller.

- Set to “Always On” when using the web control function.
- With the “Always On” setting, you can use each NETWORK connector as the hub even while power to this unit is set to standby.

### NOTE

**When “Network” is set to “Always On”, it consumes more standby power.**

## Friendly Name

The Friendly Name is the name of this unit displayed on the network. You can change the Friendly Name according to your preferences.

### Setting items

#### Edit Name

Edits Friendly Name.

#### Set Defaults

Restores Friendly Name, which you had changed, to the default setting.

### Setting details

- The default Friendly Name on first use is “DENON AVR-4520”.
- Up to 63 characters can be input.
- For character input, see [page 118](#).

**Reset** : Reset to the defaults.

**Cancel** : Do not reset to the defaults.

When you select “Set Defaults” and press **ENTER**, the “Reset the friendly name back to the factory default?” prompt is displayed. Select either “Reset” or “Cancel”, and press **ENTER**.

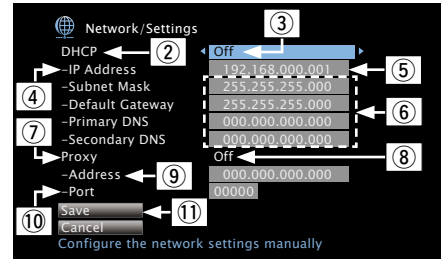

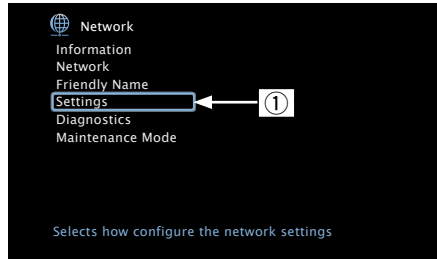

## Settings

Default settings are underlined.

Make settings for wired LAN.

Only set "Settings" when connecting to a network without a DHCP function.

### Setting details

① On the menu, select "Network" – "Settings" and press **ENTER**.

② Use  $\Delta \nabla$  to select "DHCP", then press **ENTER**.

③ Use  $\triangleleft \triangleright$  to select "Off", then press **ENTER**.

④ Use  $\Delta \nabla$  to select "IP Address", then press **ENTER**.

• **IP Address** : Set the IP address within the ranges shown below.

The Network Audio function cannot be used if other IP addresses are set.

CLASS A: 10.0.0.1 – 10.255.255.254

CLASS B: 172.16.0.1 – 172.31.255.254

CLASS C: 192.168.0.1 – 192.168.255.254

⑤ Use  $\Delta \nabla \triangleleft \triangleright$  or **0 – 9** to input the address and press **ENTER**.

⑥ Use  $\Delta \nabla$  to select setting item, then press **ENTER**.

• **Subnet Mask** : When connecting an xDSL modem or terminal adapter directly to this unit, input the subnet mask indicated in the documentation supplied by your provider. Normally input 255.255.255.0.

• **Default Gateway** : When connected to a gateway (router), input its IP address.

• **Primary DNS, Secondary DNS** : If there is only one DNS address indicated in the documentation supplied by your provider, input it at "Primary DNS". If two or more DNS are provided by your provider, enter both "Primary DNS" and "Secondary DNS".

### Setting details

⑦ Use  $\Delta \nabla$  to select "Proxy" and press **ENTER**.

• **Proxy** : Make this setting when connecting to the Internet via a proxy server.

Make the proxy settings only when you connect to the Internet via a proxy server that is on your internal network or provided by your provider, etc.

⑧ Use  $\triangleleft \triangleright$  to select "On(Address)" or "On(Name)", and then press **ENTER**.

**On(Address)** : Select when inputting by address.

**On(Name)** : Select when inputting by domain name. Up to 38 characters can be input.

⑨ Press  $\nabla$  to select "Address" or "Name", then press **ENTER**.

When "Address" is selected in step ⑧ : Use  $\Delta \nabla \triangleleft \triangleright$  or **0 – 9** to enter the proxy server address, and press **ENTER**.

When "Name" is selected in step ⑧ : Use the software keyboard ([page 118](#)) to enter the domain name, and select **OK**.

• For character input, see [page 118](#).

⑩ Press  $\nabla$  to select "Port", then press **ENTER**. Use  $\Delta \nabla \triangleleft \triangleright$  or **0 – 9** to input the proxy server port number and press **ENTER**.

Setup is complete.

⑪ Press  $\nabla$  to select "Save", then press **ENTER**.

The display returns to the original screen.

• If you are using a broadband router (DHCP function), there is no need to make the settings at "IP Address" and "Proxy", since the DHCP function is set to "On" in this unit's default settings.

• If this unit is being used connected to a network without the DHCP function, the network settings must be made. In this case, some knowledge of networks is required. For details, consult a network administrator.

• If you cannot connect to the Internet, recheck the connections and settings ([page 31](#)).

• If you do not understand about Internet connection, contact your ISP (Internet Service Provider) or the store from which you purchased your computer.

• When you want to cancel the setting during IP address input, select "Cancel", then press **ENTER**.

## Diagnostics

Used to check the network connection.

Setting items	Setting details
<b>Physical Connection</b> Checks the physical LAN port connection.	<b>OK</b> : Connected. <b>Error</b> : The LAN cable is not connected. Check the connection.
<b>Router Access</b> Checks the connection from this unit to the router.	<b>OK</b> : Accessed. <b>Error</b> : Failed to communicate with the router. Check the router settings.
<b>Internet Access</b> Checks whether this unit has access to the Internet (WAN).	<b>OK</b> : Connected. <b>Error</b> : Failed to connect to the Internet. Check the Internet connection environment or router settings.

## Maintenance Mode

Use when receiving maintenance from a DENON service engineer or custom installer.

### Setting details

#### NOTE

Only use this function if so instructed by a DENON serviceperson or installer.

Make various other settings.

## Menu operation

- 1** Press **ZONE SELECT** to switch the zone mode.  
The **[M]** indicator lights.
- 2** Press **SETUP**.  
The menu is displayed on the TV screen.
- 3** Use  $\Delta$   $\nabla$  to select the menu to be set or operated.
- 4** Press **ENTER** or  $\triangleright$  to enter the setting.
  - To return to the previous item, press  $\triangleleft$  or **BACK**.
  - Exiting the Menu, press **SETUP** while the menu is displayed.  
The menu display disappears.

## Items that can be set with the “General” procedure

Language ([page 151](#))

ZONE2 Setup / ZONE3 Setup ([page 151](#))

Zone Rename ([page 152](#))

Quick Select Names ([page 152](#))

Remote ID ([page 152](#))

Trigger Out 1 / Trigger Out 2 ([page 152](#))

Auto Standby ([page 153](#))

Front Display ([page 153](#))

Information ([page 153](#))

Firmware ([page 154](#))

Setup Lock ([page 156](#))

## Language

Default settings are underlined.

Set the language for display on the menu screen.

### Setting details

**English / Deutsch / Français / Italiano / Español / Nederlands / Svenska / Русский / Polski**

"Language" can also be set by the following procedure. However, the menu screen is not displayed. Following the display content to make the setting.

1. Press and hold the main unit's  $\triangleleft \triangleright$  for at least 3 seconds.  
" \*Video Format < PAL > " appears on the display.
2. Press the main unit's  $\nabla$  and set " \*GUI Language < ENGLISH > ".
3. Use the main unit's  $\triangleleft \triangleright$  and set the language.
4. Press the main unit's **ENTER** to complete the setting.

## ZONE2 Setup / ZONE3 Setup

Default settings are underlined.

Set the audio to play back with multi-zone (ZONE2, ZONE3).

Setting items	Setting details
<b>Bass</b> Adjust bass tones.	<b>-10dB – +10dB (0dB)</b>
<b>Treble</b> Adjust treble tones.	<b>-10dB – +10dB (0dB)</b>
<b>High Pass Filter</b> Make settings for cutting the low range to reduce distortion in the bass.	<b>On</b> : The low range is attenuated. <b>Off</b> : The low range is not attenuated.
<b>Lch Level</b> Adjust the left channel output level.	<b>-12dB – +12dB (0dB)</b>
<b>Rch Level</b> Adjust the right channel output level.	<b>-12dB – +12dB (0dB)</b>

Setting items	Setting details
<b>Channel</b> Set the signal output from multi-zone.	<b>Stereo</b> : Select stereo output. <b>Mono</b> : Select monaural output. When "Assign Mode" ( <a href="#">page 141</a> ) is set to "7.1ch + ZONE2/3-MONO", the "Channel" setting is automatically set to "Mono".
<b>Volume Level</b> Set the volume output level.	<b>Variable</b> : Volume adjustment is enabled by main unit and remote control unit. <b>40 (-40dB)</b> : Fix volume at 40 (-40 dB). Set when adjusting volume by external amplifier. <b>80 (0dB)</b> : Fix volume at 80 (0 dB). Set when adjusting volume by external amplifier. When "Assign Mode" ( <a href="#">page 141</a> ) is set to "7.1ch + ZONE2", "5.1ch + ZONE2/3", "7.1ch + ZONE2/3-MONO" or "5.1ch(Bi-Amp) + ZONE2", the "Volume Level" setting is automatically set to "Variable".
<b>Volume Limit</b> Make a setting for maximum volume.	<b>60 (-20dB) / 70 (-10dB) / 80 (0dB)</b> <b>Off</b> : Do not set a maximum volume. This is displayed from -79 dB to 18 dB when "Scale" ( <a href="#">page 124</a> ) is set to "-79.5dB – 18.0dB".
<b>Power On Volume</b> Define the volume setting that is active when the power is turned on.	<b>Last</b> : Use the memorized setting from the last session. <b>Mute</b> : Always mute when power is turned on. <b>1 – 98 (-79dB – 18dB)</b> : The volume is adjusted to the set level. This is displayed from -79 dB to 18 dB when "Scale" ( <a href="#">page 124</a> ) is set to "-79.5dB – 18.0dB".
<b>Mute Level</b> Set the amount of attenuation when muting is on.	<b>Full</b> : The sound is muted entirely. <b>-40dB</b> : The sound is attenuated by 40 dB down. <b>-20dB</b> : The sound is attenuated by 20 dB down.

## Zone Rename

Change the display title of each zone to one you prefer.

### Setting details

#### MAIN ZONE / ZONE2 / ZONE3 / ZONE4

- Up to 10 characters can be input.
- For character input, see [page 118](#).

**Set Defaults** : The input source name is returned to the default setting.

- **Reset** : Reset to the defaults.
- **Cancel** : Do not reset to the defaults.

 If you select “Set Defaults” and press **ENTER**, the message “Reset to the default values?” is displayed. Select “Reset” or “Cancel”, and then press **ENTER**.

## Quick Select Names

Change the “Quick Select” display title to one you prefer.

### Setting details

#### Quick Select 1 / Quick Select 2 / Quick Select 3 / Quick Select 4

- Up to 16 characters can be input.
- For character input, see [page 118](#).

**Set Defaults** : The input source name is returned to the default setting.

- **Reset** : Reset to the defaults.
- **Cancel** : Do not reset to the defaults.

 If you select “Set Defaults” and press **ENTER**, the message “Reset to the default values?” is displayed. Select “Reset” or “Cancel”, and then press **ENTER**.

## Remote ID

Set when you operate another DENON AV amplifier with the remote control unit of this unit. Match the remote control unit you are using with the remote ID of this unit.

### Setting details

#### How to set the remote ID

1. Press **ZONE SELECT** to switch the zone mode.  
The **[M]** indicator lights.
2. Press **SETUP**.  
The menu is displayed on the TV screen.
3. Use  $\Delta \nabla$  to select “General” then press **ENTER**.
4. Use  $\Delta \nabla$  to select “Remote ID” then press **ENTER**.
5. Change the ID for the remote control unit([page 167](#)).
6. Press **ENTER**.

The Remote ID for this unit is set to the same ID as the one for the remote control unit.

## Trigger Out 1 / Trigger Out 2

Selects when to activate trigger out.

For details about how to connect the TRIGGER OUT jacks, see “TRIGGER OUT jacks” ([page 30](#)).

### Setting details

#### When setting for zone (MAIN ZONE / ZONE2 / ZONE3 / ZONE4)

Trigger out is activated through linkage to the power of the zone set to “On”.

#### When setting for input source

Activate trigger out when the input source set to “On” is selected.

 Active for the zone set to “On” with “When setting for zone”.

#### When setting for HDMI monitor

Activate trigger out when the HDMI monitor set to “On” is selected.

 Activate trigger out when the HDMI monitor set to “On” is selected. Active when the “MAIN ZONE” set to “On” with “When setting for zone” is selected, and when the input source set to “On” with “When setting for input source” is selected.

• **On** : Activate trigger on this mode.

• **---** : Do not activate trigger on this mode.

## Auto Standby

Default settings are underlined.

When you do not perform any operation on this unit with no audio or video input for a specified time, this unit automatically enters the standby mode. Before it enters the standby mode, "Auto Standby" is displayed on the display of this unit and the menu screen.

### Setting details

**60min** : The unit goes into standby after 60 minutes.

**30min** : The unit goes into standby after 30 minutes.

**Off** : The unit does not go into standby automatically.

## Front Display

Default settings are underlined.

Makes settings related to the display on this unit.

Setting items	Setting details
<b>Dimmer</b> Adjust the display brightness of this unit.	<p><b>Bright</b> : Normal display brightness.  <b>Dim</b> : Reduced display brightness.  <b>Dark</b> : Very low display brightness.  <b>Off</b> : Turns the display off.</p> <p> Buttons on the main unit can be used for operations. Each time <b>DIMMER</b> is pressed, the setting is changed as shown below.</p> <div style="text-align: center;">  </div> <p><b>NOTE</b></p> <p>When "Dimmer" is set to "Off", the display turns off and appears as if there is no electricity.</p>
<b>Channel Indicators</b> Sets whether to use the input signal display or output signal display for the channel indication on the display.	<p><b>Input</b> : Uses the input signal display for the channel indication on the display.  <b>Output</b> : Uses the output signal display for the channel indication on the display.</p>

## Information

Show information about receiver settings, input signals, etc.

### NOTE

This item is not compatible with the HDMI ZONE4 function.

Items	Setting details
<b>Audio</b> Show information about audio input signals.	<p><b>Sound Mode</b> : The currently set surround mode.  <b>Input Signal</b> : The input signal type.  <b>Format</b> : The number of input signal channels (presence of front, surround, LFE).  <b>Sample Rate</b> : The input signal's sampling frequency.  <b>Offset</b> : The dialogue normalization correction value.  <b>Flag</b> : This is displayed when inputting signals including a surround back channel. "MATRIX" is displayed with Dolby Digital EX and DTS-ES Matrix signals, "DISCRETE" with DTS-ES Discrete signals.</p> <div style="border: 1px solid black; padding: 5px; margin: 10px 0;"> <p style="text-align: center;"><b>Dialogue normalization function</b></p> <p>This function is automatically activated when playing Dolby Digital, Dolby Digital Plus, Dolby TrueHD, DTS and DTS-HD sources. It automatically corrects the standard signal level for individual program sources. The correction value can be checked using the <b>STATUS</b> on the main unit.</p> <div style="border: 1px solid black; padding: 5px; text-align: center; margin: 10px 0;">           Dial.Norm            Offset - 4dB         </div> <p>The figure is the corrected value. This cannot be changed.</p> </div>
<b>Video</b> Show information about HDMI input/output signals and HDMI monitors.	<p><b>HDMI Signal Info.</b></p> <ul style="list-style-type: none"> <li>• Resolution / Color Space / Pixel Depth</li> </ul> <p><b>HDMI Monitor 1 / HDMI Monitor 2</b></p> <ul style="list-style-type: none"> <li>• Interface / Resolutions</li> </ul>

Items	Setting details
<b>ZONE</b> Show information about current settings.	<p><b>MAIN ZONE</b> : This item shows information about settings for MAIN ZONE. The information displayed differs according to the input source.</p> <p>• <b>ZONE Name / Select Source / Name / Sound Mode / Input Mode / Decode Mode / HDMI / Digital / Analog / Component / Video / Rec Select / Video Select / Video Mode / Content Type / Video Conversion / i/p Scaler / Resolution / Progressive Mode / Aspect Ratio</b> etc.</p> <p><b>ZONE2/3/4</b> : This item shows information about settings for ZONE2, ZONE3 or ZONE4.</p> <p>• <b>ZONE Name / Power / Select Source / Volume Level</b></p> <p><b>NOTE</b></p> <p>For ZONE4, “Volume Level” is not displayed.</p>
<b>Firmware</b>	<b>Version</b> : Displays information for the current firmware.

Press **INFO** to display current source name, volume, sound mode name, and other information at the bottom of the screen.

### Examples of screen display

- Status display screen

When the input source is switched.

When the volume is adjusted.

Status display: The operating status appears briefly on the screen when the input source is switched or the volume is changed.

### NOTE

The status display screen cannot be displayed at a computer's resolution (e.g. VGA) or while certain 3D video contents is being played.

## Firmware

Default settings are underlined.

Set whether or not to check for firmware update, update the firmware, and display update and upgrade notifications.

Setting items	Setting details												
<p><b>Update</b></p> <p>Update the firmware of the receiver.</p> <p><b>NOTE</b></p> <p>In cases where it is not possible to connect to the network after doing a firmware update, connect to the network again using “Network” (<a href="#">page 146</a>).</p>	<p><b>Check for Update</b> : Check for firmware updates. You can also check approximately how long it will take to complete an update.</p> <p><b>Update Start</b> : Execute the update process.</p> <p>When updating starts, the power indicator becomes red and the menu screen is shut down. The amount of update time which has elapsed is displayed.</p> <p>When updating is complete, the power indicator becomes green and normal status is resumed.</p> <ul style="list-style-type: none"> <li>• If updating fails, the set automatically retries, but if updating is still not possible, one of the messages shown below is displayed. If the display reads as shown below, check the settings and network environment, then update again.</li> </ul> <table border="1"> <thead> <tr> <th>Display</th><th>Description</th></tr> </thead> <tbody> <tr> <td><b>Updating fail</b></td><td>Updating failed.</td></tr> <tr> <td><b>Login failed</b></td><td>Failure to log into server.</td></tr> <tr> <td><b>Server is busy</b></td><td>Server is busy. Display	Description												
<b>Updating fail</b>	Updating failed.												
<b>Login failed</b>	Failure to log into server.												
<b>Server is busy</b>	Server is busy. Wait a while then try again.												
<b>Connection fail</b>	Failure in connecting to server.												
<b>Download fail</b>	Downloading of the firmware has failed.												

Setting items	Setting details
<b>Notifications</b> Displays a notification message on this unit's menu screen when the latest firmware is released with "Update". Display a notification message on this unit's menu screen when downloadable firmware is released with "Add New Feature".	<p><b>Update</b> : The notification message is displayed for about 20 seconds when the power is turned on. Connect to broadband Internet (<a href="#">page 31</a>) when using this function.</p> <ul style="list-style-type: none"> <li>• <b>On</b> : Display update message.</li> <li>• <b>Off</b> : Do not display update message.</li> </ul>  <ul style="list-style-type: none"> <li>• Select "Go Update" while the notification message is displayed and press <b>ENTER</b> to display the "Check for Update" screen (Refer to <a href="#">page 154</a> for more information on "Update").</li> <li>• To close the notification message, select "Close" and press <b>ENTER</b>.</li> </ul> <p><b>Upgrade</b> : The notification message is displayed for about 20 seconds when the power is turned on. Connect to broadband Internet (<a href="#">page 31</a>) when using this function.</p> <ul style="list-style-type: none"> <li>• <b>On</b> : Display upgrade message.</li> <li>• <b>Off</b> : Do not display upgrade message.</li> </ul>  <ul style="list-style-type: none"> <li>• Select "Go Upgrade" while the notification message is displayed and press <b>ENTER</b> to display the "Add New Feature" screen (Refer to <a href="#">page 155</a> for more information on "Add New Feature").</li> <li>• To close the notification message, select "Close" and press <b>ENTER</b>.</li> </ul>

Setting items	Setting details
<b>Add New Feature</b> Display new features that can be downloaded to this unit and perform an upgrade.	<p><b>Upgrade Package</b> : Display the items to be upgraded.</p> <p><b>Upgrade Status</b> : Display a list of the additional functions provided by the upgrade.</p> <p><b>Upgrade Start</b> : Execute the upgrade process.</p> <p>When the upgrade starts, the power indicator becomes red and the menu screen is shut down. During the upgrade, the amount of upgrade time which has elapsed is displayed.</p> <p>When upgrading is complete, the power indicator becomes green and normal status is resumed.</p> <ul style="list-style-type: none"> <li>• If the upgrade is not successful, an error message identical to those in "Update" will appear on the display. Check the settings and network environment and then perform the upgrade again.</li> </ul>  See the DENON website for details about upgrades. When the procedure is complete, "Registered" is displayed in this menu and upgrades can be carried out. If the procedure has not been carried out, "Not Registered" is displayed. The ID number shown on this screen is needed when carrying out the procedure. The ID number can also be displayed by pressing and holding the main unit's <b>Δ</b> and <b>INFO</b> for at least 3 seconds.

Notes concerning use of "Update" and "Add New Feature"
<ul style="list-style-type: none"> <li>• In order to use these functions, you must have the correct system requirements and settings for a broadband Internet connection (<a href="#">page 31</a>).</li> <li>• Do not turn off the power until updating or upgrading is completed.</li> <li>• Even with a broadband connection to the Internet, approximately 1 hour is required for the updating/upgrading procedure to be completed.</li> <li>• Once updating/upgrade starts, normal operations on this unit cannot be performed until updating/upgrading is completed. Furthermore, there may be cases where backup data is reset for the parameters, etc., set on this unit.</li> <li>• If the update or upgrade fails, press and hold the <b>⏻</b> on the main unit for more than 5 seconds, or remove and re-insert the power cord. "Update retry" appears on the display and update restarts from the point at which update failed. If the error continues despite this, check the network environment.</li> </ul>

- Information regarding the "Update" function and "Add New Feature" will be announced on the DENON web site each time related plans are defined.
- When usable new firmware is released with "Update" or "Add New Feature", a notification message is displayed on the menu screen. When you do not want to be notified, set "Notifications" – "Update" ([page 155](#)) and "Notifications" – "Upgrade" ([page 155](#)) to "Off".

## Setup Lock

Default settings are underlined.

Protect settings from inadvertent change.

Setting items	Setting details
Lock	<p><b>On</b> : Turn protection on. <b><u>Off</u></b> : Turn protection off.</p> <p> When canceling the setting, set "Lock" to "Off".</p> <p><b>NOTE</b></p> <p>When "Lock" is set to "On", the settings listed below can no longer be changed. Also, "Setup Locked!" is displayed if you attempt to operate related settings.</p> <ul style="list-style-type: none"><li>• Setup menu operations</li></ul>

# Operating external devices with the remote control

By registering preset codes for external devices to the provided remote control, you can operate your TV and playback devices (such as Blu-ray Disc player and DVD player) with the remote control.

## Registering preset codes

When preset codes are registered in the included remote control unit, it can then be used to operate any devices you have, such as DVD players or TVs made by different manufacturers.

### □ Buttons used for operating the devices

- ① **DEVICE**
- ② **△▽◀▶, ENTER, BACK**  
For menu operation of each device.
- ③ **MENU, INFO, OPTION, SETUP**  
For displaying the menu of each device.
- ④ **◀◀, ▶▶, ▶, ◀, ▶▶, II, ■**
- ⑤ Number button (0 – 9, +10)
- ⑥ **CH/PAGE ▲▼**
- ⑦ **TV , TV INPUT**  
For operating a TV  
This button is enabled in any mode.

For details on operation with the remote control unit, see pages [46](#), [49](#), [60](#), [63](#), [67](#), [71](#), [73](#), [75](#), [161](#), [162](#).

### NOTE

The preset code cannot be registered to **TUNER, PHONO, iPod/USB, NETWORK** and **INTERNET RADIO**.

## Registering preset codes

- 1** Press and hold **RC SETUP** for at least 3 seconds.  
“SETUP” and indicator flashes twice on the remote control unit.
- 2** When “PRSET” appears on the remote control unit, press **ENTER**.
- 3** When “DEVIC” appears on the remote control unit, press the input source select button of the AV equipment (**CBL/SAT, Blu-ray, GAME, MEDIA PLAYER, DVD, AUX1, AUX2 or CD**) that you want to program for the preset setting.

### NOTE

Note that the group numbers that can be registered are predefined for each input source select button ([page 158](#)).

- 4** When “-----” appears on the remote control unit, press the number buttons **0 – 9** to enter a 5-digit code ([page 205](#) “List of preset codes”).

Press the buttons with an interval less than 30 seconds.

- When the code is registered  
→ “OK” flashes four times on the remote control unit.
- When the code is not registered correctly  
→ “FAIL” or “CANCL” flashes four times on the remote control unit.  
Perform from step 1 again.

Some manufacturers use more than one type of remote control code. Preset codes to change the number and verify correct operation.

### NOTE

Depending on the model and year of manufacture of your device, some buttons may not operate.

## Remote control operation modes

By default, the input source select buttons on the remote control perform only the input source select operation. To operate an external device with this remote control, set the preset code in "List of preset codes" ([page 205](#)) for the device you want to register to each input source select button. For how to set preset codes to buttons, see "Registering preset codes" ([page 157](#)).

If you register preset codes on this remote control, the input source select buttons on the remote control can perform the following two functions.

- ① The function to switch input sources on this unit (AVR operation mode)
- ② The function to make this remote control switch to the mode in which you can operate the device registered to the button (External device operation mode)

## How to switch operation modes

\*1 The mode in which you can operate this unit.

\*2 If you press one of these buttons, the input source on this unit changes and the remote control switches to the mode in which you can operate the external device registered to that button.

## Devices that can be registered to input source select buttons on the remote control

The types of devices that can be registered to each input source select button on this remote control are assigned as shown in the following table. Register the preset code under the desired device name in "List of preset codes" ([page 205](#)).

### Preset codes that can be registered to CBL/SAT, Blu-ray, GAME, MEDIA PLAYER, DVD, AUX1, AUX2, and CD buttons

Button	Default preset mode	Available change to preset
CBL/SAT	AVR	CBL/SAT group
Blu-ray		VCR/PVR group BD/DVD group
GAME		CBL/SAT group VCR/PVR group BD/DVD group Audio group
MEDIA PLAYER		CBL/SAT group
DVD		VCR/PVR group BD/DVD group
AUX1		CBL/SAT group VCR/PVR group BD/DVD group Audio group
AUX2		CBL/SAT group VCR/PVR group BD/DVD group Audio group
CD		Audio group

- When you press an input source select button for which a preset code has been registered, its button name appears on the display of the remote control unit.
- To unregister the device from a button and reset to the default setting, set the AVR code "73347" to the button.

# Preset codes that can be registered to TV buttons

Button	Default preset mode	Available change to preset
	AVR	TV group

- When you press TV AUDIO that has a preset code registered to it, the “TV” indication on the remote control lights.

To perform menu operations of this unit, press **AVR** to have the remote control enter the AVR operation mode.

## Operating external devices

Press the input source select button (🔍 [page 41](#)).

- The operation mode of the remote control unit is switched as shown in the table.

Input source select button	Input source of this unit	Operation mode
		Devices controllable with the remote control unit
AVR	—	This unit (AVR-operation) *2
CBL/SAT *1	CBL/SAT	Device registered on the <b>CBL/SAT</b> button
Blu-ray *1	Blu-ray	Device registered on the <b>Blu-ray</b> button
GAME *1	GAME	Device registered on the <b>GAME</b> button
MEDIA PLAYER *1	MEDIA PLAYER	Device registered on the <b>MEDIA PLAYER</b> button
DVD *1	DVD	Device registered on the <b>DVD</b> button
AUX1 *1	AUX1	Device registered on the <b>AUX1</b> button
AUX2 *1	AUX2	Device registered on the <b>AUX2</b> button
CD *1	CD	Device registered on the <b>CD</b> button
TV AUDIO *1	TV AUDIO	Device registered on the <b>TV AUDIO</b> button

\*1 If a preset code is registered for this button, the remote control unit of this unit can control another devices.

\*2 With this mode, you can operate: FM, iPod, USB memory device, record player and network function.

When the **FAVORITE STATION** and **InstaPrevue** are pressed, the AVR-operation mode starts automatically.

### NOTE

If the mode of the remote control unit is set to other than AVR-operation mode, press **AVR** to switch the remote control unit to the AVR-operation mode to perform the following operations:

- For menu operation by pressing **SETUP**.

# Operating devices

The supplied remote control unit can control a device other than this unit.

**1** Press the input source select button to which the preset code for the device you want to operate has been registered (page 160).

**2** Operate the device.

• For details, refer to the device's operating instructions.

## Operating learning function

If the AV device is not a DENON device, or if the device does not operate even when the preset code is registered, use the learning function. Remote codes for different devices can be remembered for use by the DENON remote control included with this device.

### Remembering remote control codes from other devices

#### 1 Press and hold RC SETUP for at least 3 seconds.

"SETUP" and  indicator flashes twice on the remote control unit.

#### 2 Use $\Delta$ / $\nabla$ to display "LEARN" on the remote control unit and press ENTER.

#### 3 When "DEVIC" appears on the remote control unit, press the input source select button of the AV equipment that you want to store.

- You cannot store the remote control code in the **AVR** button.
- Before using the learning function, register a preset code ([page 157](#) "Registering preset codes") for a mode other than AVR preset ([page 158](#)) to each input source switch button.

#### 4 When "KEY" appears on the remote control unit, press the button that you want to store.

- You cannot store the remote control code in the **ZONE SELECT**, **RC SETUP**, **POWER** , **FAVORITE STATION 1 – 4**, **InstaPrevue**, **SOUND MODE**, **SLEEP**, **MACRO A – D** and input source select button.

#### 5 When "READY" appears on the remote control unit, place the remote control unit of the AV equipment face to face with main remote control unit (of this unit). Next, press and hold down the desired button (that you want to store) of the remote control unit of the AV equipment.

- When the button is correctly stored, "OK" flashes four times on the remote control unit.
- If the button is not correctly stored, "FAIL" flashes four times on the remote control unit. If this happens, perform step 4 again.

#### 6 To store another button, repeat steps 4 and 5.

#### 7 When you have finished storing the remote control codes, press RC SETUP.

"OK" flashes four times on the remote control unit and the normal operation mode is restored.

- There are some remote control units that cannot be programmed, or even if they can be programmed, they may not operate correctly. If this happens, use the remote control unit supplied with the AV equipment to operate it.
- The operations of the programmed buttons override the preset memory. If you do not require the programmed buttons, erase the stored remote control codes to return to the initial settings ([page 164](#) "Erasing stored remote control codes").
- The number of buttons that can be stored varies depending on the remote control unit used. If you have stored the maximum number of buttons allowed for the remote control unit, "FAIL" appears on its display.

## Erasing stored remote control codes

### Erasing the code by each button

- 1** Press and hold **RC SETUP** for at least 3 seconds.  
"SETUP" and  indicator flashes twice on the remote control unit.
- 2** Use  $\Delta \nabla$  to display "RESET" on the remote control unit and press **ENTER**.
- 3** When "LEARN" appears on the remote control unit, press **ENTER**.
- 4** When "DEVIC" appears on the remote control unit, press the input source select button of the AV equipment that you want to erase.
- 5** Use  $\Delta \nabla$  to display "ONE" on the remote control unit and press **ENTER**.
- 6** When "KEY" appears on the remote control unit, press the button that you want to erase.  
"RESET" flashes four times on the remote control unit and the normal operation mode is restored.

### Erasing the code by each equipment input source

- 1** Press and hold **RC SETUP** for at least 3 seconds.  
"SETUP" and  indicator flashes twice on the remote control unit.
- 2** Use  $\Delta \nabla$  to display "RESET" on the remote control unit and press **ENTER**.
- 3** When "LEARN" appears on the remote control unit, press **ENTER**.
- 4** When "DEVIC" appears on the remote control unit, press the input source select button of the AV equipment that you want to erase.
- 5** When "ALL" appears, press **ENTER**.  
"RESET" flashes four times on the remote control unit and the normal operation mode is restored.

## Operating macro function

- When the macro function is used, operations that usually require a complicated series of multiple button operations can be performed easily just by pressing the **MACRO** button.
- This device can remember up to 4 macro functions.
- Each macro can record a maximum of 18 steps.

### [Example]

When the following set of operations has been registered to the **MACRO** button, you can simply press the **MACRO** button to turn on the TV and this unit and start playing back Blu-ray.

- ① Turn the TV's power on  
↓
- ② Turn this unit's power on  
↓
- ③ Switch this unit's input source to "Blu-ray"  
↓
- ④ Turn the Blu-ray Disc player's power on  
↓
- ⑤ Play the Blu-ray Disc player

## Recording automatic macro operations

You can automatically set the macro for your scene:

- (1) Watch movies (MOVIE)
- (2) Listen to music (MUSIC)
- (3) Watch TV (CBL/SAT) (WATCH)
- (4) Turn on all devices (ON)
- (5) Turn off all devices (OFF)

### NOTE

- Register preset codes for the remote control unit before setting Auto macro ([page 157](#)).
- Depending on the type or model of your device, macro may not work properly even if it is set.

- 1 Press and hold RC SETUP for at least 3 seconds.**  
"SETUP" and indicator flashes twice on the remote control unit.
- 2 Use  $\Delta$ / $\nabla$  to display "MACRO" on the remote control unit and press ENTER.**
- 3 Use  $\Delta$ / $\nabla$  to display "AUTO" on the remote control unit and press ENTER.**
- 4 When "MCNo" appears on the remote control unit, press the MACRO A – D button that you want to set.**

## 5 Use $\Delta$ / $\nabla$ to set the auto macro operation and press ENTER.

"OK" flashes four times on the remote control unit and the normal operation mode is restored.

Remote control unit display	Auto MACRO
MOVIE	Automatically turns on the devices and starts playback when you watch movies. TV power ON Blu-ray power ON AVR Power ON Source Change Blu-ray Playback Blu-ray
MUSIC	Automatically turns on the devices and starts playback when you listen to music. CD power ON AVR Power ON Source Change CD Playback CD
WATCH	Automatically turns on the devices and starts playback when you watch TV (CBL/SAT). TV power ON CBL/SAT Power ON AVR Power ON Source change CBL/SAT
ON	Turns on all the devices set for PRESET. All DEVICE POWER ON
OFF	Turns off all the devices set for PRESET. All DEVICE POWER OFF

## Recording custom macro operations

**1** Press and hold **RC SETUP** for at least 3 seconds.

"SETUP" and  indicator flashes twice on the remote control unit.

**2** Use  $\Delta \nabla$  to display "MACRO" on the remote control unit and press **ENTER**.

**3** Use  $\Delta \nabla$  to display "MAN" on the remote control unit and press **ENTER**.

**4** When "MCNo" appears on the remote control unit, press the **MACRO A – D** button that you want to store.

**5** Press the buttons to be stored one by one.

• The step number for the storing procedure and mode are alternately displayed on the remote control unit.

### NOTE

You cannot store the macros for the **ZONE SELECT** button.

**6** Press **MACRO** to exit the macro function.

"OK" flashes four times on the remote control unit and the normal operation mode is restored.

## Adjusting the interval time of macro operations transmitting

The macro operation transmission interval can be adjusted.

• The factory setting is "0.5 sec".

**1** Press and hold **RC SETUP** for at least 3 seconds.

"SETUP" and  indicator flashes twice on the remote control unit.

**2** Use  $\Delta \nabla$  to display "MACRO" on the remote control unit and press **ENTER**.

**3** Use  $\Delta \nabla$  to display "MAN" on the remote control unit and press **ENTER**.

**4** When "MCNo" appears on the remote control unit, press the **MACRO A – D** button that you want to set.

**5** Press **RC SETUP**.

**6** Use  $\Delta \nabla$  to set the macro operation transmission interval and press **ENTER**.

"OK" flashes four times on the remote control unit and the normal operation mode is restored.

Remote control unit display	Time values that you can set
0.25	0.25 sec
0.50	0.5 sec
0.75	0.75 sec
1.00	1 sec
1.25	1.25 sec

## Using the macro function

Press the **MACRO A – D** button you used to store the macro function.

## Resetting the macro function

**1** Press and hold **RC SETUP** for at least 3 seconds.

"SETUP" and  indicator flashes twice on the remote control unit.

**2** Use  $\Delta \nabla$  to display "RESET" on the remote control unit and press **ENTER**.

**3** Use  $\Delta \nabla$  to display "MACRO" on the remote control unit and press **ENTER**.

**4** When "MCNo" appears on the remote control unit, press the **MACRO A – D** button that you want to reset.

"RESET" flashes four times on the remote control unit and the normal operation mode is restored.

## Specifying the zone used with the remote control unit

When the **ZONE SELECT** button is pressed, only the set zone can be operated with the remote control unit.

- The factory setting is "M234".

### 1 Press and hold RC SETUP for at least 3 seconds.

"SETUP" and  indicator flashes twice on the remote control unit.

### 2 Use $\Delta$ / $\nabla$ to display "ZLOCK" on the remote control unit and press ENTER.

### 3 Use $\Delta$ / $\nabla$ to set the zone to be used and press ENTER.

"OK" flashes four times on the remote control unit and the normal operation mode is restored.

Remote control unit display	Zone to be used
M	MAIN ZONE only
M2	MAIN ZONE / ZONE2
M23	MAIN ZONE / ZONE2 / ZONE3
M234	MAIN ZONE / ZONE2 / ZONE3 / ZONE4

## Setting the Remote ID

When using multiple DENON AV receivers in the same room, make this setting so that only the desired AV receiver operates.

- The factory setting is "ID-1".

### 1 Press and hold RC SETUP for at least 3 seconds.

"SETUP" and  indicator flashes twice on the remote control unit.

### 2 Use $\Delta$ / $\nabla$ to display "RC-ID" on the remote control unit and press ENTER.

### 3 Use $\Delta$ / $\nabla$ to set the remote ID and press ENTER.

"OK" flashes four times on the remote control unit and the normal operation mode is restored.

Remote control unit display	Remote ID
ID-1	1
ID-2	2
ID-3	3
ID-4	4

### NOTE

When you change the remote ID, make sure that the remote control unit and the remote ID of the main unit are exactly the same ([page 152](#) "Remote ID").

## Setting the display time length of the remote control unit display

Use the following procedure to set the length of time for which to display data such as zone and mode on the display panel of the remote control unit.

### 1 Press and hold RC SETUP for at least 3 seconds.

"SETUP" and  indicator flashes twice on the remote control unit.

### 2 Use $\Delta$ / $\nabla$ to display "DISPL" on the remote control unit and press ENTER.

### 3 Use $\Delta$ / $\nabla$ to set the display time length and press ENTER.

"OK" flashes four times on the remote control unit and the normal operation mode is restored.

Remote control unit display	Display time
05SEC	5 sec
10SEC	10 sec
15SEC	15 sec

## Setting the back light

You can set the back light on the remote control unit to off to prolong the life of the dry cell batteries.

- 1 Press and hold RC SETUP for at least 3 seconds.**  
“SETUP” and  indicator flashes twice on the remote control unit.
- 2 Use  $\Delta$ / $\nabla$  to display “LIGHT” on the remote control unit and press ENTER.**
- 3 Use  $\Delta$ / $\nabla$  to set the back light and press ENTER.**

Remote control unit display	Back light
ON	Back light on
OFF	Back light off

## Restoring all settings of the remote control unit to default

Use the following procedure to restore all default settings of the remote control unit at the time of purchase.

- 1 Press and hold RC SETUP for at least 3 seconds.**  
“SETUP” and  indicator flashes twice on the remote control unit.
- 2 Use  $\Delta$ / $\nabla$  to display “RESET” on the remote control unit and press ENTER.**
- 3 Use  $\Delta$ / $\nabla$  to display “ALL” on the remote control unit and press ENTER.**
- 4 Use  $\Delta$ / $\nabla$  to display “YES” on the remote control unit and press ENTER.**  
“RESET” flashes four times on the remote control unit and the normal operation mode is restored.

## Informations

---

Here, we list various information related to this unit.  
Please refer to this information as needed.

- Part names and functions  [page 170](#)
- Other information  [page 176](#)
- Troubleshooting  [page 196](#)
- Specifications  [page 202](#)
- Index  [page 203](#)

# Part names and functions

## Front panel

For buttons not explained here, see the page indicated in parentheses ( ).

### 1 Power operation button (⏻)..... (41)

Turns power to this unit for MAIN ZONE on and off (standby).

### 2 Power indicator ..... (41)

#### [Power indicator status]

- Power on : Green
- Normal standby : Off
- When "HDMI Pass Through" or "HDMI Control" (page 130) is set to "On" : Red
- When "Network" (page 147) is set to "Always On" : Red
- When a mobile device that supports MHL is being charged : Red

### 3 Door

When you are using buttons and/or connectors behind the door, press the bottom of the door to open it. When not using buttons and/or connectors behind the door, close it. Be careful not to catch your fingers when closing the door.

### 4 MASTER VOLUME knob..... (42, 113)

### 5 Master volume indicator

### 6 Display ..... (172)

### 7 Remote control sensor ..... (175)

### 8 SOURCE SELECT knob ..... (41, 113)

## With the door open

For buttons not explained here, see the page indicated in parentheses ( ).

- ❶ **AUX1 HDMI 7 / MHL connector** ..... (12)
- ❷ **iPod/USB port** ..... (23)
- ❸ **Headphones jack (PHONES)**

When the headphones are plugged into this jack, audio will no longer be output from the connected speakers or from the PRE OUT connectors.

### NOTE

To prevent hearing loss, do not raise the volume level excessively when using headphones.

- ❹ **BACK button** ..... (48, 62, 66, 70, 72, 75, 201)
- ❺ **ENTER button** ..... (117, 120, 128, 134, 139, 146, 150)
- ❻ **SETUP button** ..... (117, 120, 128, 134, 139, 146, 150)
- ❼ **AUX1 INPUT connectors** ..... (21)
- ❽ **SETUP MIC jack** ..... (34, 99)
- ❾ **QUICK SELECT buttons** ..... (106)
- ❿ **DIMMER button** ..... (153)
- ⓫ **OPTION button** ..... (44, 48, 50, 62, 67, 72, 75, 104)

- ⓬ **Cursor buttons**  
(△▽◀▶) ..... (117, 120, 128, 134, 139, 146, 150)
- ⓭ **Information button (INFO)** ..... (154)
- ⓮ **STATUS button** ..... (45, 62, 66, 70, 75, 153)
- ⓯ **ZONE/REC SELECT button** ..... (107, 113)
- ⓰ **ZONE4 ON/OFF button** ..... (113)
- ⓱ **ZONE2 ON/OFF button** ..... (113)
- ⓲ **ZONE3 ON/OFF button** ..... (113)

## 1 Information display

The input source name, sound mode, setting values and other information are displayed here.

## 2 Front speaker indicator

This lights according to the setting of the front A and B speakers.

## 3 Output signal channel indicators

Lights when audio signals are being output from the speakers.

## 4 Master volume indicator

## 5 MUTE indicator

This lights when the mute mode is selected ([page 42](#)).

## 6 Sleep timer indicator

This lights when the sleep mode is selected ([page 105](#)).

## 7 MULTI ZONE indicators

This lights up when ZONE2, ZONE3 or ZONE4 (separate room) power is turned on ([page 113](#)).

## 8 Monitor output indicator

These light according to the HDMI monitor output setting. When set to "Auto(Dual)", the indicators light according to connection status.

## 9 Tuner reception mode indicators

These light according to the reception conditions when the input source is set to "FM".

**STEREO** : This lights up when receiving stereo broadcasts.

**TUNED** : Lights up when the broadcast is properly tuned in.

**RDS** : Lights up when receiving RDS broadcasts.

## 10 Audyssey® indicator

This indicator lights when the "MultEQ® XT 32" ([page 125](#)), "Dynamic EQ" ([page 125](#)), "Dynamic Volume" ([page 126](#)), "Audyssey DSX®" ([page 126](#)) or "Audyssey LFC™" ([page 126](#)) setting is set to other than "Off".

## 11 Decoder indicator

These light when Dolby or DTS signals are input or when the Dolby or DTS decoder is running.

## 12 Input mode indicators

Set the audio input modes for the different input sources ([page 138](#)).

## Rear panel

See the page indicated in parentheses ( ).

- ① USB port ..... (23)
- ② TRIGGER OUT jacks ..... (30)
- ③ REMOTE CONTROL jacks ..... (30)
- ④ Speaker terminals (SPEAKERS) ..... (94, 95, 96, 97, 111)
- ⑤ RS-232C connector ..... (30)
- ⑥ SIGNAL GND terminal ..... (26)
- ⑦ PRE OUT connectors ..... (29, 94, 95, 96, 97, 98, 112)
- ⑧ Video connectors (VIDEO) ..... (16, 17, 18, 22, 112)

- ⑨ AC inlet (AC IN) ..... (32)
- ⑩ Component video connectors (COMPONENT VIDEO) ..... (16, 17, 18, 19, 112)
- ⑪ HDMI connectors ..... (11, 12, 112)
- ⑫ EXTERNAL IN connectors ..... (28)
- ⑬ Analog audio connectors (AUDIO) ..... (17, 18, 19, 20, 22, 25, 26)
- ⑭ FM antenna terminal (ANTENNA) ..... (27)
- ⑮ Denon Link HD connector ..... (13)

- ⑯ Digital audio connectors (DIGITAL AUDIO) ..... (16, 17, 18, 25)
- ⑰ Network connectors (NETWORK) ..... (31)

### NOTE

Do not touch the inner pins of the connectors on the rear panel. Electrostatic discharge may cause permanent damage to the unit.

# Remote control unit

For buttons not explained here, see the page indicated in parentheses ( ).

- 1 ZONE SELECT button** ..... (34, 80, 99, 113, 167)
- 2 RC SETUP button** ..... (157, 163, 165, 167, 168)
- 3 Display**
  - ① Zone select indicators ..... (34, 99, 113, 167)
  - ② Operation mode indicator
- 4 Device operation buttons (DEVICE  $\phi$  / DEVICE MENU)** ..... (161, 162)
- 5 Input source select buttons** ..... (41, 113)
- 6 FAVORITE STATION buttons (1 – 4)** ..... (78)
- 7 Channel/page search buttons (CH/PAGE  $\blacktriangle$   $\blacktriangledown$ )** ..... (46, 49, 54, 60, 63, 67, 71, 73, 75, 161, 162)
- 8 InstaPrevue button** ..... (104)
- 9 Information button (INFO)** ..... (154)
- 10 Cursor buttons ( $\triangle$   $\nabla$   $\triangleleft$   $\triangleright$ )** ..... (117, 120, 128, 134, 139, 146, 150)
- 11 BACK button** ..... (48, 62, 66, 70, 72, 75)
- 12 System buttons** ..... (46, 49, 63, 67, 71, 73, 75, 161, 162)
  - Skip buttons ( $\blacktriangleleft$ ,  $\blacktriangleright$ )
  - Play button ( $\blacktriangleright$ )
  - Search buttons ( $\blacktriangleleft$ ,  $\blacktriangleright$ )
  - Pause button ( $\parallel$ )
  - Stop button ( $\blacksquare$ )
- Tuning up / Tuning down buttons (TUNE +, -)** ..... (50, 51)
- 13 Number buttons** ..... (52, 54, 119, 157)
- 14 Character buttons** ..... (119)
- 15 Remote control signal transmitter** ..... (175)
- 16 POWER button ( $\phi$ )** ..... (41, 113)
- 17  $\text{Wi-Fi}$  indicator** ..... (157, 163, 165, 167, 168)
- 18 TV operation buttons (TV  $\phi$  / TV MENU / TV INPUT)** ..... (60, 63, 67, 73, 161, 162)
- 19 AVR-operation mode button** ..... (158, 160)

  - MOVIE button
  - MUSIC button
  - GAME button
  - PURE button
- 26 SLEEP button** ..... (105, 113)
- 27 MACRO buttons (A – D)** ..... (165, 166)

The remote control unit for this unit is automatically lit when you touch it.

This is useful for operating the remote control unit in a dark room such as when watching movies in a theater room.

The time for which the backlight stays on can be changed (see page 168 “Setting the back light”).

## Inserting the batteries

- ① Slide the rear cover off the remote control unit in the arrow direction.
- ② Load the two batteries properly as indicated by the marks in the battery compartment.

- ③ Put the rear cover back on.

### NOTE

- Insert the specified batteries in the remote control unit.
- Replace the batteries with new ones if the set does not operate even when the remote control unit is operated close to the unit. (The supplied batteries are only for verifying operation. Replace them with new batteries at an early date.)
- When inserting the batteries, be sure to do so in the proper direction, following the  $\oplus$  and  $\ominus$  marks in the battery compartment.
- To prevent damage or leakage of battery fluid:
  - Do not use a new battery together with an old one.
  - Do not use two different types of batteries.
  - Do not attempt to charge dry batteries.
  - Do not short-circuit, disassemble, heat or dispose of batteries in flames.
  - Do not keep the battery in a place exposed to direct sunlight or in places with extremely high temperatures, such as near a heater.
- If the battery fluid should leak, carefully wipe the fluid off the inside of the battery compartment and insert new batteries.
- Remove the batteries from the remote control unit if it will not be in use for long periods.
- Used batteries should be disposed of in accordance with the local regulations regarding battery disposal.
- The remote control unit may function improperly if rechargeable batteries are used.

## Operating range of the remote control unit

Point the remote control unit at the remote sensor when operating it.

### NOTE

- The set may function improperly or the remote control unit may not operate if the remote control sensor is exposed to direct sunlight, strong artificial light from an inverter type fluorescent lamp or infrared light.
- When using 3D video devices that transmit radio communication signals (such as infrared signals etc) between the various units (such as the monitor, 3D glasses, 3D transmitter unit etc), the remote control unit may not operate due to interference from those radio communication signals. If this occurs, adjust the direction and distance of the 3D communication for each unit, and check that the remote control unit operation is not affected by these signals.

## Relationship between the Amp Assign mode settings and audio output

On this unit, you can change how the power amplifiers within this unit are used according to your environment.

This allows you to output audio to rooms other than the room where the surround is played back (MAIN ZONE) and to enjoy high-quality playback from the front speaker in MAIN ZONE.

- Set the Amp Assign mode by referring to “Assign Mode” ([page 141](#)).
- For speaker connection, see “Speaker connection” ([page 93](#)).

### NOTE

When making a bi-amplifier connection, use speakers that support the bi-amplifier connection. In this case, remove the short-circuit plate or short-circuit wire from the speaker connector.

### □ When “9.1ch(SB/FH/FW)” is selected for “Assign Mode”

Assigns all power amplifiers within this unit for MAIN ZONE. Up to 9.1ch playback is available.

	Speaker terminal										
	FL	FR	C	SL	SR	SBL	SBR	FHL	FHR	FWL	FWR
Output signal	FL	FR	C	SL	SR	SBL	SBR	FHL	FHR	FWL	FWR

	Pre out terminal																
	FL	FR	C	SL	SR	SBL	SBR	FHL	FHR	FWL	FWR	SW1	SW2	Z2L	Z2R	Z3L	Z3R
Output signal	FL	FR	C	SL	SR	SBL	SBR	FHL	FHR	FWL	FWR	SW1	SW2	Z2L	Z2R	Z3L	Z3R

□ Audio is output from the optimum speakers based on the selected sound mode.

### ❑ When “7.1ch + ZONE2” is selected for “Assign Mode”

Assigns power amplifiers within this unit as follows: 7.1ch for MAIN ZONE and 2ch for ZONE2.

Select the desired speakers used for MAIN ZONE from the “Main Speakers” settings.

		Speaker terminal										
		FL	FR	C	SL	SR	SBL	SBR	FHL	FHR	FWL	FWR
Output signal												
Main Speakers	S.Back/F.Height	FL	FR	C	SL	SR	SBL	SBR	FHL	FHR	Z2L	Z2R

Output signal																		
Main Speakers	S.Back/F.Height	FL	FR	C	SL	SR	SBL	SBR	FHL	FHR	—	—	SW1	SW2	Z2L	Z2R	Z3L	Z3R
	S.Back/F.Wide	FL	FR	C	SL	SR	SBL	SBR	—	—	FWL	FWR	SW1	SW2	Z2L	Z2R	Z3L	Z3R
	F.Height/F.Wide	FL	FR	C	SL	SR	—	—	FHL	FHR	FWL	FWR	SW1	SW2	Z2L	Z2R	Z3L	Z3R

 Audio is output from the optimum speakers based on the selected sound mode.

### ❑ When “5.1ch + ZONE2/3” is selected for “Assign Mode”

Assigns power amplifiers within this unit as follows: 5.1ch for MAIN ZONE and 2ch for ZONE2 and ZONE3 each.

	Speaker terminal										
	FL	FR	C	SL	SR	SBL	SBR	FHL	FHR	FWL	FWR
Output signal	FL	FR	C	SL	SR	Z2L	Z2R	—	—	Z3L	Z3R

	Pre out terminal																
	FL	FR	C	SL	SR	SBL	SBR	FHL	FHR	FWL	FWR	SW1	SW2	Z2L	Z2R	Z3L	Z3R
Output signal	FL	FR	C	SL	SR	—	—	—	—	—	—	SW1	SW2	Z2L	Z2R	Z3L	Z3R

### ❑ When “7.1ch + ZONE2/3-MONO” is selected for “Assign Mode”

Assigns power amplifiers within this unit as follows: 7.1ch for MAIN ZONE and 1ch for ZONE2 and ZONE3 each.

Select the desired speakers used for MAIN ZONE from the “Main Speakers” settings.

		Speaker terminal										
		FL	FR	C	SL	SR	SBL	SBR	FHL	FHR	FWL	FWR
Output signal												
Main Speakers	S.Back/F.Height	FL	FR	C	SL	SR	SBL	SBR	FHL	FHR	Z2 MONO	Z3 MONO
	S.Back/F.Wide	FL	FR	C	SL	SR	SBL	SBR	Z2 MONO	Z3 MONO	FWL	FWR
	F.Height/F.Wide	FL	FR	C	SL	SR	Z2 MONO	Z3 MONO	FHL	FHR	FWL	FWR

		Pre out terminal																
		FL	FR	C	SL	SR	SBL	SBR	FHL	FHR	FWL	FWR	SW1	SW2	Z2L	Z2R	Z3L	Z3R
Output signal																		
Main Speakers	S.Back/F.Height	FL	FR	C	SL	SR	SBL	SBR	FHL	FHR	—	—	SW1	SW2	Z2 MONO	Z2 MONO	Z3 MONO	Z3 MONO
	S.Back/F.Wide	FL	FR	C	SL	SR	SBL	SBR	—	—	FWL	FWR	SW1	SW2	Z2 MONO	Z2 MONO	Z3 MONO	Z3 MONO
	F.Height/F.Wide	FL	FR	C	SL	SR	—	—	FHL	FHR	FWL	FWR	SW1	SW2	Z2 MONO	Z2 MONO	Z3 MONO	Z3 MONO

 Audio is output from the optimum speakers based on the selected sound mode.

### ❑ When “7.1ch(Bi-Amp)” is selected for “Assign Mode”

Assigns power amplifiers within this unit as follows: 7.1ch for MAIN ZONE and 2ch for the front speaker bi-amplifier connection.

Select the desired speakers used for MAIN ZONE from the “Main Speakers” settings.

		Speaker terminal											
		FL	FR	C	SL	SR	SBL	SBR	FHL	FHR	FWL	FWR	
Output signal													
Main Speakers	S.Back/F.Height	FL	FR	C	SL	SR	SBL	SBR	FHL	FHR	FL (Bi-amp)	FR (Bi-amp)	
	S.Back/F.Wide	FL	FR	C	SL	SR	SBL	SBR	FL (Bi-amp)	FR (Bi-amp)	FWL	FWR	
	F.Height/F.Wide	FL	FR	C	SL	SR	FL (Bi-amp)	FR (Bi-amp)	FHL	FHR	FWL	FWR	

		Pre out terminal

Output signal																		
Main Speakers	S.Back/F.Height	FL	FR	C	SL	SR	SBL	SBR	FHL	FHR	—	—	SW1	SW2	Z2L	Z2R	Z3L	Z3R
	S.Back/F.Wide	FL	FR	C	SL	SR	SBL	SBR	—	—	FWL	FWR	SW1	SW2	Z2L	Z2R	Z3L	Z3R
	F.Height/F.Wide	FL	FR	C	SL	SR	—	—	FHL	FHR	FWL	FWR	SW1	SW2	Z2L	Z2R	Z3L	Z3R

### ❑ When “5.1ch(Bi-Amp) + ZONE2” is selected for “Assign Mode”

Assigns power amplifiers within this unit as follows: 5.1ch for MAIN ZONE, 2ch for the front speaker bi-amplifier connection, and 2ch for ZONE2.

	Speaker terminal										
	FL	FR	C	SL	SR	SBL	SBR	FHL	FHR	FWL	FWR
Output signal	FL	FR	C	SL	SR	FL (Bi-amp)	FR (Bi-amp)	Z2L	Z2R	—	—

	Pre out terminal																
	FL	FR	C	SL	SR	SBL	SBR	FHL	FHR	FWL	FWR	SW1	SW2	Z2L	Z2R	Z3L	Z3R
Output signal	FL	FR	C	SL	SR	—	—	—	—	—	—	SW1	SW2	Z2L	Z2R	Z3L	Z3R

### ❑ When “9.1ch/2ch Front” is selected for “Assign Mode”

Assigns all power amplifiers within this unit for MAIN ZONE. Up to 9.1ch playback is available. You can also use a front speaker that is different from the one used during multi-channel playback for playback by switching the internal power amplifier during 2ch playback.

Select the desired speakers used for MAIN ZONE from the “Main Speakers” settings.

		Speaker terminal										
		FL	FR	C	SL	SR	SBL	SBR	FHL	FHR	FWL	FWR
Output signal												
Main Speakers	S.Back/F.Height	FL	FR	C	SL	SR	SBL	SBR	FHL	FHR	FL for 2ch	FR for 2ch
	S.Back/F.Wide	FL	FR	C	SL	SR	SBL	SBR	FL for 2ch	FR for 2ch	FWL	FWR
	F.Height/F.Wide	FL	FR	C	SL	SR	FL for 2ch	FR for 2ch	FHL	FHR	FWL	FWR

		Pre out terminal																
		FL	FR	C	SL	SR	SBL	SBR	FHL	FHR	FWL	FWR	SW1	SW2	Z2L	Z2R	Z3L	Z3R
Output signal																		
Main Speakers	S.Back/F.Height	FL	FR	C	SL	SR	SBL	SBR	FHL	FHR	—	—	SW1	SW2	Z2L	Z2R	Z3L	Z3R
	S.Back/F.Wide	FL	FR	C	SL	SR	SBL	SBR	—	—	FWL	FWR	SW1	SW2	Z2L	Z2R	Z3L	Z3R
	F.Height/F.Wide	FL	FR	C	SL	SR	—	—	FHL	FHR	FWL	FWR	SW1	SW2	Z2L	Z2R	Z3L	Z3R

### ❑ When “7.1ch/2ch Front(Bi-Amp)” is selected for “Assign Mode”

Assigns power amplifiers within this unit as follows: 7.1ch for the MAIN ZONE multi-channel playback. You can also use a front speaker that is different from the one used during multi-channel playback for playback under the bi-amplifier connection by switching the internal power amplifier during 2ch playback.

	Speaker terminal										
	FL	FR	C	SL	SR	SBL	SBR	FHL	FHR	FWL	FWR
Output signal	FL	FR	C	SL	SR	SBL	SBR	FL (Bi-amp) for 2ch	FR (Bi-amp) for 2ch	FL (Bi-amp) for 2ch	FR (Bi-amp) for 2ch

	Pre out terminal																
	FL	FR	C	SL	SR	SBL	SBR	FHL	FHR	FWL	FWR	SW1	SW2	Z2L	Z2R	Z3L	Z3R
Output signal	FL	FR	C	SL	SR	SBL	SBR	—	—	—	—	SW1	SW2	Z2L	Z2R	Z3L	Z3R

### ❑ When “7.1ch + Front B” is selected for “Assign Mode”

Assigns power amplifiers within this unit as follows: 7.1ch for MAIN ZONE and 2ch for the second front speaker connection.

Select the desired speakers used for MAIN ZONE from the “Main Speakers” settings.

		Speaker terminal										
		FL	FR	C	SL	SR	SBL	SBR	FHL	FHR	FWL	FWR
Output signal												
Main Speakers	S.Back/F.Height	FL A	FR A	C	SL	SR	SBL	SBR	FHL	FHR	FL B	FR B
	S.Back/F.Wide	FL A	FR A	C	SL	SR	SBL	SBR	FL B	FR B	FWL	FWR
	F.Height/F.Wide	FL A	FR A	C	SL	SR	FL B	FR B	FHL	FHR	FWL	FWR

		Pre out terminal																
		FL	FR	C	SL	SR	SBL	SBR	FHL	FHR	FWL	FWR	SW1	SW2	Z2L	Z2R	Z3L	Z3R
Output signal																		
Main Speakers	S.Back/F.Height	FL	FR	C	SL	SR	SBL	SBR	FHL	FHR	—	—	SW1	SW2	Z2L	Z2R	Z3L	Z3R
	S.Back/F.Wide	FL	FR	C	SL	SR	SBL	SBR	—	—	FWL	FWR	SW1	SW2	Z2L	Z2R	Z3L	Z3R
	F.Height/F.Wide	FL	FR	C	SL	SR	—	—	FHL	FHR	FWL	FWR	SW1	SW2	Z2L	Z2R	Z3L	Z3R

Audio is output from the optimum speakers based on the selected sound mode.

### ☐ When “Discrete 11.1ch” is selected for “Assign Mode”

Assigns 9.1ch for power amplifiers within this unit and 2ch (front/front height) for the external power amplifier connection. Up to 11.1ch playback is available.

			Speaker terminal										
			FL	FR	C	SL	SR	SBL	SBR	FHL	FHR	FWL	FWR
Output signal													
Main Pre-amps	Front		—	—	C	SL	SR	SBL	SBR	FHL	FHR	FWL	FWR
	Front Height		FL	FR	C	SL	SR	SBL	SBR	—	—	FWL	FWR

			Pre out terminal																
			FL	FR	C	SL	SR	SBL	SBR	FHL	FHR	FWL	FWR	SW1	SW2	Z2L	Z2R	Z3L	Z3R
Output signal																			
Main Pre-amps	Front		FL	FR	C	SL	SR	SBL	SBR	FHL	FHR	FWL	FWR	SW1	SW2	Z2L	Z2R	Z3L	Z3R
	Front Height		FL	FR	C	SL	SR	SBL	SBR	FHL	FHR	FWL	FWR	SW1	SW2	Z2L	Z2R	Z3L	Z3R

### ☐ When “Pre Amplifier” is selected for “Assign Mode”

Connects all speakers by using an external power amplifier and uses this unit as a preamplifier.

You can select “Custom” for the “Pre-amp Assign” setting to change settings for each channel.

			Speaker terminal										
			FL	FR	C	SL	SR	SBL	SBR	FHL	FHR	FWL	FWR
Output signal													
Pre-amp Assign	All		—	—	—	—	—	—	—	—	—	—	—
	Custom		—	—	C	SL	SR	SBL	SBR	FHL	FHR	FWL	FWR

☐ You can set whether or not to output audio from speakers for each channel.

			Pre out terminal																
			FL	FR	C	SL	SR	SBL	SBR	FHL	FHR	FWL	FWR	SW1	SW2	Z2L	Z2R	Z3L	Z3R
Output signal																			
Pre-amp Assign	All		FL	FR	C	SL	SR	SBL	SBR	FHL	FHR	FWL	FWR	SW1	SW2	Z2L	Z2R	Z3L	Z3R
	Custom		FL	FR	C	SL	SR	SBL	SBR	FHL	FHR	FWL	FWR	SW1	SW2	Z2L	Z2R	Z3L	Z3R

### ❑ When “Custom” is selected for “Assign Mode”

Assigns power amplifiers within this unit as you prefer.

	Speaker terminal										
	FL	FR	C	SL	SR	SBL	SBR	FHL	FHR	FWL	FWR

# Surround

This unit is equipped with a digital signal processing circuit that lets you play program sources in the sound mode to achieve the same sense of presence as in a movie theater.

## Sound modes and surround parameters

This table shows the speakers that can be used in each sound mode and the surround parameters adjustable in each sound mode.

### Symbols in the table

- This indicates the audio output channels or surround parameters that can be set.
- ⦿ This indicates the audio output channels. The output channels depend on the settings of “Speaker Config.” (page 142).

Sound Mode (page 84)	Channel output							Dialog Enhancer (page 121)	Subwoofer Level (page 121)

- \*1 During playback in PURE DIRECT mode, the surround parameters are the same as in DIRECT mode.
- \*2 A signal for each channel contained in an input signal is output as audio.
- \*3 You can select speakers to output audio on the “Speaker Select” (page 123) setting in the menu.
- \*4 Audio is output from the front height speaker when the set sound mode name contains “+PLIIz”. For information on how to check the sound mode, see page 84.
- \*5 Audio is output from the front height speaker when “Audyssey DSX®” (page 126) in the menu is set to “Wides/Heights” or “Heights”.
- \*6 Audio is output from the front wide speaker when “Audyssey DSX®” (page 126) in the menu is set to “Wides/Heights” or “Wides”.
- \*7 Only when “Subwoofer Mode” is set to “LFE+Main” (page 144), sound is output from the subwoofer.

\*1 During playback in PURE DIRECT mode, the surround parameters are the same as in DIRECT mode.

\*14 This item cannot be set when "Dynamic EQ" (page 125) is set to "On".

\*15 In this sound mode, bass is +6 dB, and treble is 0 dB (Default).

\*16 In this sound mode, bass is +6 dB, and treble is +4 dB (Default).

\*17 This item cannot be set when "MultEQ® XT 32" (page 125) is set to "Off" or "Graphic EQ".

\*18 This item can be set when the input signal is analog, PCM 48 kHz or 44.1 kHz.

## Types of input signals, and corresponding sound modes

This table shows the input signal that can be played in each sound mode. Check the audio signal of the input source then select the sound mode.

### Symbols in the table

- This indicates the default sound mode.
- This indicates the selectable sound mode.

○	×	×	○ <HDMI>	×	×
○	×	○		○ <COMPONENT>	○ <VIDEO>
○	○	×			×
○	○	○			○ <VIDEO>

○ : Video signal input present

×

○ <>: The input signal between the < > marks is output.

×

The main zone video conversion function is compatible with the following formats: NTSC, PAL, SECAM, NTSC4.43, PAL-N, PAL-M and PAL-60.

#### NOTE

- The status display screen cannot be displayed at a computer's resolution (e.g. VGA) or while certain 3D video contents is being played.
- When the menu is operated on a computer's resolution (e.g. VGA) or during playback of certain 3D video content, the playback image switches to the menu screen image.

## Video signal resolution conversion table

When “Video Conversion” (page 131) is set to “On”, “i/p Scaler” (page 131) is set to “Analog”, “Analog & HDMI” or “HDMI” are set, the resolution of the input video signal can be converted to a different resolution for output (page 7 “Converting input video signals for output (Video conversion function)”).

The relationship between the resolution of the convertible video signal and HDMI output resolution is shown in the table below.

	Input resolution	Output resolution	HDMI Output					
			480i/576i *1	480p/576p	1080i	720p	1080p	1080p 24Hz
Video input	480i/576i		○	○	○	○	○	○
Component video input	480i/576i		○	○	○	○	○	○*5
	480p/576p		–	○	○	○	○	○*5
	1080i		–	–	○	○	○	○*5
	720p		–	–	○	○	○	○*5
	1080p		–	–	–	–	○	○*5
HDMI input	480i/576i		○	○	○	○	○	○
	480p/576p		–	○	○	○	○	○
	1080i		–	–	○	○	○	○
	720p		–	–	○	○	○	○
	1080p 24Hz		–	–	–	–	○*3	○*4
	1080p		–	–	–	–	○	○
	4K		–	–	–	–	–	○*6

○ The resolution set in “Resolution” (page 132) in the menu is output.

– Output at the same resolution as the input video signal resolution.

\*1 Only output when “i/p Scaler” in the menu is set to “Off”.

\*2 Output at a resolution of 3840 x 2160 (24/25/30Hz).

\*3 The resolution set in “Resolution” (page 132) in the menu is set to “Auto”, and a television that does not support 1080p 24Hz video signals is connected.

\*4 The resolution set in “Resolution” (page 132) in the menu is set to “Auto”, and a television that supports 1080p 24Hz video signals is connected.

\*5 While signals are being upscaled to 4K, the menu screen is only displayed on a TV that is connected to this unit via HDMI.

\*6 Output at the same resolution as the input video signal resolution.

### NOTE

- Component video and video output are output at the same resolution as the input video signal resolution.
- The 4K, 3D, Computer resolution, “x.v.Color”, sYCC601 color, Adobe RGB color or Adobe YCC601 color input to HDMI is output at the same resolution as the input video signal.
- When “Video Mode” in the menu is set to “Game” or “Auto” and game contents are played, the same resolution as the input video signal is output.
- When “Resolution” in the menu is set to “Auto”, the number of pixels in the television panel connected to the HDMI output connector is automatically detected, and the optimum resolution is output according to the table above.
- If 1080p 24Hz signals input from the HDMI terminal are converted into 1080p 60Hz/1080p 50Hz for output, they are output according to the specified “Format” (page 133) setting in the menu:
  - “NTSC” – Output as 1080p 60Hz.
  - “PAL” – Output as 1080p 50Hz.
- You can not convert 60Hz into 50Hz or vice versa.
- You can not convert 50Hz into 24Hz.
- This item does not support the HDMI ZONE4 function.

## Explanation of terms

### A

#### **Adobe RGB color, Adobe YCC601 color**

The color space defined by Adobe Systems Inc. Because it is a wider color space than RGB, it can produce more vivid and natural images.

#### **AirPlay**

AirPlay sends (plays) contents recorded in iTunes or on an iPhone/iPod touch/iPad to a compatible device via the network.

#### **AL32 Processing Multi Channel**

AL32 Processing for All Channels

DENON has further developed its proprietary AL32 Processing, an analog waveform reproduction technology, to support the 192 kHz sampling frequency. AL32 Processing, thoroughly suppresses quantization noise associated with D/A conversion to reproduce the low-level signals with optimum clarity that will bring out all the delicate nuances of the music.

#### **App Store**

App Store is a site that sells application software for such devices as the iPhone or iPod Touch, and is operated by Apple Inc.

#### **Audyssey Dynamic EQ®**

Dynamic EQ solves the problem of deteriorating sound quality as volume is decreased by taking into account human perception and room acoustics. Audyssey Dynamic EQ® works in tandem with Audyssey MultEQ® XT 32 to provide well-balanced sound for every listener at any volume level.

#### **Audyssey Dynamic Surround Expansion (A-DSX)**

Audyssey DSX® is a scalable system that adds new speakers to improve surround impression. Starting with a 5.1 system Audyssey DSX® first adds Wide channels for the biggest impact on envelopment. Research in human hearing has proven that information from the Wide channels is much more critical in the presentation of a realistic soundstage than the Back Surround channels found in traditional 7.1 systems. Audyssey DSX® then creates a pair of Height channels to reproduce the next most important acoustical and perceptual cues. In addition to these new Wide and Height channels, Audyssey DSX® applies Surround Envelopment Processing to enhance the blend between the front and surround channels.

#### **Audyssey Dynamic Volume®**

Dynamic Volume solves the problem of large variations in volume level between television programs, commercials, and between the soft and loud passages of movies. Audyssey Dynamic EQ® is integrated into Dynamic Volume so that as the playback volume is adjusted automatically, the perceived bass response, tonal balance, surround impression, and dialog clarity remain the same.

#### **Audyssey LFC™ (Low Frequency Containment)**

Audyssey LFC™ solves the problem of low frequency sounds disturbing people in neighboring rooms or apartments. Audyssey researchers found the range of frequencies that most readily penetrate wood and cement construction typical of homes and apartments and then created a technology to contain them. Audyssey LFC™ dynamically monitors the audio content and removes the low frequencies able to pass through walls, floors and ceilings. Audyssey LFC™ then applies psychoacoustic processing to restore the perception of low bass for listeners in the room. The result is great sound that no longer disturbs the neighbors.

#### **Audyssey MultEQ® XT 32**

MultEQ® XT 32 is a room equalization solution that calibrates any audio system so that it can achieve optimum performance for every listener in a large listening area. Based on several room measurements, MultEQ® XT 32 calculates an equalization solution that corrects for both time and frequency response problems in the listening area and also performs a fully automated surround system setup.

#### **Auto Lip Sync**

If you connect the unit to a TV that supports the Auto Lip Sync function, it can automatically correct delay between the audio and video.

### B

#### **Bass Sync**

Audio sources such as BD and DVD inherently have time delay between the bass components of the satellite channel and the LFE channel. This function adjusts such a delay for reproducing (replaying) richer bass sound during playback. This function is by default set to 0 msec. Since the delay varies according to the title, play back the audio source and adjust to the most effective value for playback. For some audio sources that are played back, this function may have little effect.

### D

#### **Deep Color**

An imaging technology supported by HDMI. Unlike RGB, which uses 8 bits (256 shades) per color, it can use 10 bits (1024 shades), 12 bits (4096 shades), or 16 bits (65536 shades) to produce colors in higher definition.

Both devices linked via HDMI must support Deep Color.

#### **Denon Link HD**

Denon Link HD uses the clock of the AV amplifier connected by Denon Link HD to achieve HDMI signal transfer with low jitter.

#### **DLNA**

DLNA and DLNA CERTIFIED are trademarks and/or service marks of Digital Living Network Alliance. Some contents may not be compatible with other DLNA CERTIFIED® products.

#### **Dolby Digital**

Dolby Digital is a multi-channel digital signal format developed by Dolby Laboratories.

A total of 5.1 channels are played: 3 front channels ("FL", "FR" and "C"), 2 surround channels ("SL" and "SR") and the "LFE" channel for low frequencies.

Because of this, there is no crosstalk between channels and a realistic sound field with a "three-dimensional" feeling (sense of distance, movement and positioning) is achieved.

A realistic, powerful sense of presence is achieved when playing movie sources in AV rooms as well.

#### **Dolby Digital EX**

Dolby Digital EX is a 6.1-channel surround format proposed by Dolby Laboratories that allows users to enjoy in their homes the "DOLBY DIGITAL SURROUND EX" audio format jointly developed by Dolby Laboratories and Lucas Films.

The 6.1 channels of sound, including surround back channels, provide improved sound positioning and expression of space.

#### **Dolby Digital Plus**

Dolby Digital Plus is an improved Dolby Digital signal format that is compatible with up to 7.1 channels of discrete digital sound and also improves sound quality thanks to extra data bit rate performance. It is upwardly compatible with conventional Dolby Digital, so it offers greater flexibility in response to the source signal and the conditions of the playback device.

#### **Dolby Pro Logic II**

Dolby Pro Logic II is a matrix decoding technology developed by Dolby Laboratories.

Regular music such as that on CDs is encoded into 5 channels to achieve an excellent surround effect. The surround channel signals are converted into stereo and full band signals (with a frequency response of 20 Hz to 20 kHz or greater) to create a "three-dimensional" sound image offering a rich sense of presence for all stereo sources.

#### **Dolby Pro Logic IIx**

Dolby Pro Logic IIx is a further improved version of the Dolby Pro Logic II matrix decoding technology. Audio signals recorded in 2 channels are decoded to achieve a natural sound with up to 7.1 channels. There are three modes: "Music" suited for playing music, "Cinema" suited for playing movies, and "Game" which is optimized for playing games.

**Dolby Pro Logic IIz**

Dolby Pro Logic IIz introduces a new dimension to Home Entertainment through the addition of a pair of front height channels. Compatible with stereo, 5.1-channel and 7.1-channel content, Dolby Pro Logic IIz provides enhanced spaciousness, depth and dimension to movies, concert video and video game playback while maintaining the full integrity of the source mix.

Dolby Pro Logic IIz identifies and decodes spatial cues that occur naturally in all content, directing this information to the front height channels, complementing the performance of left and right surround sound speakers. Content that is encoded with Dolby Pro Logic IIz height channel information can be even more revealing, with perceptually discrete height channel information bringing an exciting new dimension to home entertainment.

Dolby Pro Logic IIz, with front height channels is also an ideal alternative for households that cannot support the placement of back surround speakers of a typical 7.1-channel system but may have bookshelf space available to support the addition of height speakers.

**Dolby TrueHD**

Dolby TrueHD is a high definition audio technology developed by Dolby Laboratories, using lossless coding technology to faithfully reproduce the sound of the studio master.

This format provides the facility to support up to 8 audio channels with a sampling frequency of 96 kHz/24 bit resolution and up to 6 audio channels with a sampling frequency of 192 kHz/24 bit resolution. Dolby TrueHD is adopted for applications that put very high importance on sound quality.

**Downmix**

This function converts the number of channels of surround audio to less number of channels and plays back.

**DTS**

This is an abbreviation of Digital Theater System, which is a digital audio system developed by DTS. When playing back audio by connecting this system with a device such as DTS amplifier, accurate sound field position and realistic sound effect as if you are in a movie theater can be obtained.

**DTS 96/24**

DTS 96/24 is a digital audio format enabling high sound quality playback in 5.1 channels with a sampling frequency of 96 kHz and 24 bit quantization on DVD-Video.

**DTS Digital Surround**

DTS Digital Surround is the standard digital surround format of DTS, Inc., compatible with a sampling frequency of 44.1 or 48 kHz and up to 5.1 channels of digital discrete surround sound.

**DTS-ES™ Discrete 6.1**

DTS-ES™ Discrete 6.1 is a 6.1-channel discrete digital audio format adding a surround back (SB) channel to the DTS digital surround sound.

Decoding of conventional 5.1-channel audio signals is also possible according to the decoder.

**DTS-ES™ Matrix 6.1**

DTS-ES™ Matrix 6.1 is a 6.1-channel discrete digital audio format inserting a surround back (SB) channel to the DTS digital surround sound through matrix encoding. Decoding of conventional 5.1-channel audio signals is also possible according to the decoder.

**DTS Express**

DTS Express is an audio format supporting low bit rates (max. 5.1 channels, 24 to 256 kbps).

**DTS-HD**

This audio technology provides higher sound quality and enhanced functionality than the conventional DTS and is adopted as an optional audio for Blu-ray Disc. This technology supports multi-channel, high data transfer speed, high sampling frequency, and lossless audio playback. Maximum 7.1-channels are supported in Blu-ray Disc.

**DTS-HD High Resolution Audio**

DTS-HD High Resolution Audio is an improved version of the conventional DTS, DTS-ES and DTS 96/24 signals formats, compatible with sampling frequencies of 96 or 48 kHz and up to 7.1 channels of discrete digital sound. High data bit rate performance provides high quality sound. This format is fully compatible with conventional products, including conventional DTS digital surround 5.1-channel data.

**DTS-HD Master Audio**

DTS-HD Master Audio is a lossless audio format created by Digital Theater System (DTS). This format provides the facility to support up to 8 audio channels with a sampling frequency of 96 kHz/24 bit resolution and up to 6 audio channels with a sampling frequency of 192 kHz/24 bit resolution. It is fully compatible with conventional products, including conventional DTS digital surround 5.1-channel data.

**DTS Neo:X**

This matrix decoding technology uses the DTS NEO:X decoder to playback 2-channel source or 5.1/6.1/7.1 channel surround sources as a maximum of 11.1 channel surround sound. There are 3 modes: "Music" suited for playing music, "Cinema" suited for playing movies, and "Game" which is optimized for playing games.

**Dynamic range**

The difference between the maximum undistorted sound level and the minimum discernible level above the noise emitted by the device.

**F****FLAC**

FLAC stands for Free lossless Audio Codec, and is a lossless free audio file format. Lossless means that the audio is compressed without any loss in quality. The FLAC license is as shown below.

**H****HDCP**

When transmitting digital signals between devices, this copyright protection technology encrypts the signals to prevent content from being copied without authorization.

**HDMI**

This is an abbreviation of High-Definition Multimedia Interface, which is an AV digital interface that can be connected to a TV or amplifier. Video signal and audio signal can be connected using 1 cable.

**I****iTunes**

iTunes is the name of the multimedia player provided by Apple Inc. It enables management and playback of multimedia contents including music and movies. iTunes supports many main file formats including AAC, WAV, and MP3.

**L****LFE**

This is an abbreviation of Low Frequency Effect, which is an output channel that emphasizes low frequency effect sound. Surround audio is intensified by outputting 20 Hz to 120 Hz deep bass.

**M****MAIN ZONE**

The room where this unit is placed is called the MAIN ZONE.

**MP3 (MPEG Audio Layer-3)**

This is an internationally standardized audio data compression scheme, using the "MPEG-1" video compression standard. It compresses the data volume to about one eleventh its original size while maintaining sound quality equivalent to a music CD.

**MPEG (Moving Picture Experts Group),****MPEG-2, MPEG-4**

These are the names for digital compression format standards used for the encoding of video and audio. Video standards include "MPEG-1 Video", "MPEG-2 Video", "MPEG-4 Visual", "MPEG-4 AVC". Audio standards include "MPEG-1 Audio", "MPEG-2 Audio", "MPEG-4 AAC".

**P****Progressive (sequential scanning)**

This is a scanning system of video signal that displays 1 frame of video as one image. Compared to the interlace system, this system provides images with less flickering and bleeding.

**Protection Circuit**

This is a function to prevent damage to devices within the power supply when an abnormality such as an overload, excess voltage occurs or temperature for any reason.

In this unit, the power indicator blinks and the unit enters standby mode when an abnormality occurs.

**S****Sampling frequency**

Sampling involves taking a reading of a sound wave (analog signal) at regular intervals and expressing the height of the wave at each reading in digitized format (producing a digital signal).

The number of readings taken in one second is called the "sampling frequency". The larger the value, the closer the reproduced sound is to the original.

**Speaker impedance**

This is an AC resistance value, indicated in  $\Omega$  (ohms). Greater power can be obtained with this value smaller.

**sYCC601 color**

Like "x.v.Color", each of these color spaces defines a palette of available colors that is larger than the traditional RGB color model.

**V****vTuner**

This is a free online content server for Internet Radio. Note that usage fees are included in upgrade costs.

For inquiries about this service, visit the vTuner site below.

vTuner website: <http://www.radiodenon.com>

This product is protected by certain intellectual property rights of Nothing Else Matters Software and BridgeCo. Use or distribution of such technology outside of this product is prohibited without a license from Nothing Else Matters Software and BridgeCo or an authorized subsidiary.

**W****Windows Media DRM**

This is a copyright protection technology developed by Microsoft.

Content providers are using the digital rights management technology for Windows Media contained in this device (WM-DRM) to protect the integrity of their content (Secure Content) so that their intellectual property, including copyright, in such content is not misappropriated. This device uses WM-DRM software to play Secure Content (WM-DRM Software). If the security of the WM-DRM Software in this device has been compromised, owners of Secure Content (Secure Content Owners) may request that Microsoft revoke the WM-DRM Software's right to acquire new licenses to copy, display and/or play Secure Content. Revocation does not alter the WM-DRM Software's ability to play unprotected content. A list of revoked WM-DRM Software is sent to your device whenever you download a license for Secure Content from the Internet or from a PC. Microsoft may, in conjunction with such license, also download revocation list onto your device on behalf of Secure Content Owners.

**Windows Media Player Ver.11 or later**

This is a media player distributed free of charge by Microsoft Corporation.

It can play playlists created with Ver.11 or later of Windows Media Player, as well as WMA, DRM WMA, WAV, and other files.

**WMA (Windows Media Audio)**

This is audio compression technology developed by Microsoft Corporation.

WMA data can be encoded using Windows Media® Player Ver.7, 7.1, Windows Media® Player for Windows® XP and Windows Media® Player 9 Series.

To encode WMA files, only use applications authorized by Microsoft Corporation. If you use an unauthorized application, the file may not work properly.

**X****x.v.Color**

This function lets HDTVs display colors more accurately. It enables display with natural, vivid colors. "x.v.Color" is trademark of Sony Corporation.

**Z****ZONE2**

This unit can operate in a room other than the room where this unit is placed (MAIN ZONE) (ZONE2 playback). The room for ZONE2 playback is called ZONE2.

**ZONE3**

This unit can operate in a room other than the room where this unit is placed (MAIN ZONE) (ZONE3 playback). The room for ZONE3 playback is called ZONE3.

**ZONE4**

This unit can operate in a room other than the room where this unit is placed (MAIN ZONE) (ZONE4 playback). The room for ZONE4 playback is called ZONE4.

# Troubleshooting

If a problem should arise, first check the following:

1. Are the connections correct?

2. Is the set being operated as described in the owner's manual?

3. Are the other devices operating properly?

If this unit does not operate properly, check the items listed in the table below. Should the problem persist, there may be a malfunction.

In this case, disconnect the power immediately and contact your store of purchase.

## [General]

Symptom	Cause/Solution	Page
Power does not turn on.	<ul style="list-style-type: none"> <li>Check whether the power plug is correctly inserted into the power outlet.</li> <li>The protection circuit is active. Disconnect the power plug from the electric outlet, wait 5 to 10 seconds and then insert it back into the outlet.</li> </ul>	<a href="#">32</a> <a href="#">195</a>
Power automatically switches to standby mode.	<ul style="list-style-type: none"> <li>The sleep timer is set. Turn on the power again, or change the sleep timer settings.</li> <li>"Auto Standby" is triggered when there is no operation for a set amount of time. To disable "Auto Standby", set "Auto Standby" on the menu to "Off".</li> </ul>	<a href="#">105</a> , <a href="#">113</a> <a href="#">153</a>
Display is off.	<ul style="list-style-type: none"> <li>Set "Dimmer" on the menu to something other than "Off".</li> </ul>	<a href="#">153</a>
The power indicator is blinking red in intervals of approximately 2 seconds.	<ul style="list-style-type: none"> <li>Due to the temperature rise within this unit, the protection circuit is working. Please turn off power once, and re-apply the power after the temperature has fallen sufficiently.</li> <li>Please re-install this unit in a place having good ventilation.</li> </ul>	<a href="#">195</a> —
The power indicator is blinking red in intervals of approximately 0.5 seconds.	<ul style="list-style-type: none"> <li>Please use speakers which have the specified impedance.</li> <li>The protection circuit has been activated because the speaker cable core wires are touching, a core wire has come loose from the terminal, or a core wire is touching the rear panel of this unit. After unplugging the power cord, take corrective action such as firmly re-twisting the core wire or taking care of the terminal, and then reconnect the wire.</li> </ul>	<a href="#">93</a> <a href="#">93</a>
After turning on the power, the power indicator is blinking red in intervals of approximately 0.5 seconds.	<ul style="list-style-type: none"> <li>This unit amplifier circuit has failed. Turn off the power and please contact the DENON service adviser.</li> </ul>	—
Set does not operate properly.	<ul style="list-style-type: none"> <li>Reset the microprocessor.</li> </ul>	<a href="#">201</a>

## [HDMI]

Symptom	Cause/Solution	Page
No audio is output with HDMI connection.	<ul style="list-style-type: none"> <li>Check the connection of the HDMI connectors.</li> <li>When outputting HDMI audio from the speakers, set "HDMI Audio Out" on the menu to "AVR".</li> <li>When outputting HDMI audio from a TV, set "HDMI Audio Out" on the menu to "TV".</li> </ul>	<a href="#">11</a> , <a href="#">12</a> <a href="#">129</a> <a href="#">129</a>
No video is output with HDMI connection.	<ul style="list-style-type: none"> <li>Check the connection of the HDMI connectors.</li> <li>Set the input source to match the connected HDMI connector.</li> <li>Check whether the TV is compatible with copyright protection (HDCP). If connected to a device not compatible with HDCP, video will not be output correctly.</li> </ul>	<a href="#">11</a> , <a href="#">12</a> <a href="#">11</a> , <a href="#">12</a> , <a href="#">41</a> <a href="#">14</a>
When the following operations are performed on devices compatible with HDMI control, the same operations occur on this unit. <ul style="list-style-type: none"> <li>Power ON/OFF</li> <li>Switching audio output devices</li> <li>Adjust volume</li> <li>Switch input source</li> </ul>	<ul style="list-style-type: none"> <li>Set "HDMI Control" in the menu to "Off". Furthermore, if you do not want to link the power off operation with devices compatible with HDMI control, set "Power Off Control" in the menu to "Off".</li> </ul>	<a href="#">102</a> , <a href="#">130</a> , <a href="#">131</a>
When the HDMI ZONE4 function is used and an operation is performed in MAIN ZONE, the following operations occur. <ul style="list-style-type: none"> <li>The player is turned off or playback pauses.</li> <li>The input source on this unit automatically changes.</li> </ul>	<ul style="list-style-type: none"> <li>"HDMI Control" is set to "On" and "Control Monitor" is set to "Monitor 1" or "Monitor 2". In this case, the HDMI control function set for MAIN ZONE affects playback in ZONE4. When using the HDMI ZONE4 function, from the menu, set "HDMI Control" to "Off" or set "Control Monitor" to "ZONE4".</li> <li>When the input source for ZONE4 is "SOURCE", select an input source that is different from the one for MAIN ZONE.</li> </ul>	<a href="#">102</a> , <a href="#">130</a> —

Symptom	Cause/Solution	Page
When the HDMI ZONE4 function is used, Dolby TrueHD/ DTS HD Master Audio/Dolby Digital/ DTS cannot be played back in MAIN ZONE.	<ul style="list-style-type: none"> <li>Make sure that "HDMI Audio Out" in the menu is set to "AVR". When a same input source is selected for MAIN ZONE and ZONE4, set the <b>ZONE4 ON/OFF</b> button to "OFF", or change the input source for ZONE4 to an input source that is different from the one for MAIN ZONE.</li> </ul>	<a href="#">129</a>
When the HDMI ZONE4 function is used, no video or audio is output to TV in ZONE4.	<ul style="list-style-type: none"> <li>Make sure that the power is on for ZONE4.</li> <li>Check the input source for ZONE4.</li> <li>Check the output settings (resolution/audio format) for the input device.</li> <li>The HDMI 7 / MHL connector on the front panel does not support the HDMI ZONE4 function.</li> <li>For ZONE4, playback is only possible when the input signals are HDMI signals.</li> </ul>	<a href="#">113</a> <a href="#">113</a> – –
When playing back the input device just to use the HDMI ZONE4 function, the TV used for MAIN ZONE is turned on.	<ul style="list-style-type: none"> <li>"HDMI Control" in the menu is set to "On". When using the HDMI ZONE4 function, set "HDMI Control" in the menu to "Off".</li> </ul>	<a href="#">102</a> , <a href="#">130</a>

#### [Video]

Symptom	Cause/Solution	Page
No picture appears.	<ul style="list-style-type: none"> <li>Check the connection between the video output terminal of this unit and the input terminal of the TV.</li> <li>Match the input settings to the input terminal of the TV connected to this unit.</li> </ul>	<a href="#">11</a> , <a href="#">16</a> –

#### [Audio]

Symptom	Cause/Solution	Page
Audio is not output.	<ul style="list-style-type: none"> <li>Check the connections for all devices.</li> <li>Check the speaker connections and configurations.</li> <li>Check whether the audio device power is turned on.</li> <li>Adjust the master volume.</li> <li>Cancel the mute mode.</li> <li>Check the connection with the playback device and select the proper input source.</li> <li>Match the input mode and the terminal assigned to be the digital input terminal.</li> <li>Disconnect the headphones. No sound is output from the speakers when headphones are connected.</li> </ul>	<a href="#">11</a> , <a href="#">12</a> , <a href="#">13</a> , <a href="#">16</a> , <a href="#">17</a> , <a href="#">18</a> , <a href="#">19</a> , <a href="#">20</a> , <a href="#">21</a> , <a href="#">22</a> , <a href="#">23</a> , <a href="#">25</a> , <a href="#">26</a> , <a href="#">27</a> , <a href="#">28</a> , <a href="#">29</a> , <a href="#">30</a> , <a href="#">31</a> <a href="#">94</a> , <a href="#">95</a> , <a href="#">96</a> , <a href="#">97</a> , <a href="#">98</a> , <a href="#">111</a> – <a href="#">42</a> , <a href="#">113</a> <a href="#">42</a> , <a href="#">113</a> <a href="#">41</a> , <a href="#">113</a> <a href="#">138</a> <a href="#">171</a>
The volume does not increase.	<ul style="list-style-type: none"> <li>The maximum volume is set too low. Set the maximum volume using "Limit" on the menu.</li> <li>Power for external devices connected to the output connectors of the unit may not be turned on. Check the power of connected external devices.</li> </ul>	<a href="#">124</a> –
No sound is produced from surround speaker.	<ul style="list-style-type: none"> <li>Check if the surround speakers are connected to the SURROUND terminals.</li> </ul>	–
No sound is produced from surround back speaker.	<ul style="list-style-type: none"> <li>Check if "Assign Mode" is set appropriately in order to output audio from the surround back speakers.</li> <li>Set "Speaker Config." – "Surr. Back" on the menu to something other than "None".</li> <li>Set the sound mode to something other than "STEREO" and "VIRTUAL".</li> </ul>	<a href="#">141</a> <a href="#">142</a> <a href="#">84</a>
No sound is produced from front height speaker.	<ul style="list-style-type: none"> <li>Set "Speaker Config." – "Front Height" on the menu to something other than "None".</li> </ul>	<a href="#">142</a>
No sound is produced from front wide speaker.	<ul style="list-style-type: none"> <li>Set "Speaker Config." – "Front Wide" on the menu to something other than "None".</li> </ul>	<a href="#">142</a>

Symptom	Cause/Solution	Page
No sound is produced from subwoofer.	<ul style="list-style-type: none"> <li>• Check the subwoofer connections.</li> <li>• Turn on the subwoofer's power.</li> <li>• Set "Speaker Config." – "Subwoofer" on the menu to "2spkr" or "1spkr".</li> <li>• If "Front" and "Center" for "Speaker Config." are set to "Large", and "Subwoofer Mode" is set to "LFE", no sound may be output from the subwoofers, depending on the input signal or selected sound mode.</li> </ul>	<a href="#">94, 95, 96, 97, 98</a> – <a href="#">142</a> <a href="#">142, 144</a>
DTS sound is not output.	<ul style="list-style-type: none"> <li>• Set "Decode Mode" on the menu to "Auto" or "DTS".</li> </ul>	<a href="#">138</a>
Dolby TrueHD, DTS-HD, Dolby Digital Plus audio is not output.	<ul style="list-style-type: none"> <li>• Make HDMI connections.</li> </ul>	<a href="#">11, 12</a>
Dolby PLII mode or DTS NEO:X mode cannot be selected.	<ul style="list-style-type: none"> <li>• Check that "Speaker Config." – "Center" or "Surround" is set to other than "None". If the speaker system is 2.0/2.1ch, this sound mode cannot be selected.</li> <li>• When headphones are used, Dolby PLII or DTS NEO:X cannot be selected.</li> </ul>	<a href="#">142</a> –
Audyssey MultEQ® XT 32, Audyssey Dynamic EQ® and Audyssey Dynamic Volume® cannot be selected.	<ul style="list-style-type: none"> <li>• Switch the sound mode to other than "DIRECT" or "PURE DIRECT".</li> <li>• When headphones are used, Audyssey MultEQ® XT 32, Audyssey Dynamic EQ® and Audyssey Dynamic Volume® cannot be selected.</li> </ul>	<a href="#">84</a> –
Audyssey DSX® cannot be selected.	<ul style="list-style-type: none"> <li>• Check that "Speaker Config." – "Front Height" or "Front Wide" is set to other than "None".</li> <li>• Check that "Speaker Config." – "Center" is set to other than "None".</li> <li>• Switch the sound mode to DOLBY listening mode or DTS listening mode.</li> <li>• When headphones are used, Audyssey DSX® cannot be selected.</li> </ul>	<a href="#">142</a> <a href="#">142</a> <a href="#">84</a> –
Audyssey Dynamic EQ® and Audyssey Dynamic Volume® cannot be selected.	<ul style="list-style-type: none"> <li>• Run Audyssey® Setup.</li> </ul>	<a href="#">33, 99</a>

Symptom	Cause/Solution	Page
"Restorer" cannot be selected.	<ul style="list-style-type: none"> <li>• Check that an analog signal or PCM signal (Sample Rate=44.1/48 kHz) is input. For playback of multichannel signals such as Dolby Digital or DTS surround, "Restorer" cannot be used.</li> <li>• Switch the sound mode to other than "DIRECT" or "PURE DIRECT".</li> </ul>	<a href="#">124</a>  <a href="#">84</a>

#### [FM]

Symptom	Cause/Solution	Page
Reception fails, or there is a lot of noise or distortion.	<ul style="list-style-type: none"> <li>• Change the antenna orientation or position.</li> <li>• Use an FM outdoor antenna.</li> <li>• Separate the antenna from other connection cables.</li> </ul>	<a href="#">27</a> <a href="#">27</a> <a href="#">27</a>

**[iPod / USB memory device / Internet Radio / Media Server / Last.fm / Flickr / Spotify]**

Symptom	Cause/Solution	Page
iPod cannot be played.	<ul style="list-style-type: none"> <li>Some iPods do not support being used connected directly to the iPod/USB port.</li> </ul>	<a href="#">23</a>
The file names are not displayed properly ("...", etc.).	<ul style="list-style-type: none"> <li>Characters that cannot be displayed are used. This is not a malfunction. A list of broadcasting stations is not displayed.	<ul style="list-style-type: none"> <li>Connection to the network is unstable. Reconnect to the network or redo the "Network" setting in the menu.</li> </ul>	<a href="#">31</a> , <a href="#">146</a>
For some radio stations, "Radio station server full" or "Connection down" is displayed and station cannot be connected to.	<ul style="list-style-type: none"> <li>Station is congested or not currently broadcasting. Wait a while before trying again.</li> </ul>	–

Symptom	Cause/Solution	Page
Sound is broken during playback.	<ul style="list-style-type: none"> <li>Network or USB memory device's signal transfer speed is slow or communications lines or radio station is congested. This is not a malfunction. When playing broadcast data with a high bit rate, the sound may be broken, depending on the communications conditions.</li> </ul>	–
Sound quality is poor or noise is heard during play.	<ul style="list-style-type: none"> <li>File being played has a low bit rate. This is not a malfunction.</li> </ul>	–

#### [AirPlay]

Symptom	Cause/Solution	Page
The AirPlay icon  is not displayed in iTunes or on the iPhone/iPod touch/iPad.	<ul style="list-style-type: none"> <li>This unit and the computer or iPhone/iPod touch/iPad are not connected to the same network (LAN). Connect the computer or iPhone/iPod touch/iPad to the same network as this unit.</li> <li>iTunes or the iPhone/iPod touch/iPad do not have firmware that supports AirPlay installed. Update to the latest firmware.</li> </ul>	<a href="#">31</a> –
No sound.	<ul style="list-style-type: none"> <li>The volume in iTunes or on the iPhone/iPod touch/iPad is set to the minimum setting. Adjust the volume to the optimum level.</li> <li>This unit is not selected in the screen that is displayed when iTunes or the iPhone/iPod touch/iPad is started. Start iTunes or switch on the iPhone/iPod touch/iPad, click the AirPlay icon  in the displayed screen, and select this unit.</li> <li>AirPlay playback has not started. Click the ► button in iTunes or press the ► button on the iPhone/iPod touch/iPad.</li> </ul>	– <a href="#">82</a> –
When using AirPlay with the iPhone/iPod touch/iPad, the sound suffers from intermittent breaks or AirPlay does not function.	<ul style="list-style-type: none"> <li>Quit the application running in the background of the iPhone/iPod touch/iPad, and then play using AirPlay.</li> <li>When playing via a wireless connection, outside conditions may affect the unit. To remedy this, change the network environment, e.g. shorten the distance to the wireless LAN access point.</li> <li>Update the iPhone/iPod touch/iPad application or iTunes to the latest version.</li> </ul>	– – –

#### [Remote control unit]

Symptom	Cause/Solution	Page
The set cannot be operated with the remote control unit.	<ul style="list-style-type: none"> <li>Batteries are worn out. Replace with new batteries.</li> <li>Operate the remote control unit within a distance of about 7 m from this unit and at an angle of within 30°.</li> <li>Remove any obstacle between this unit and the remote control unit.</li> <li>Insert the batteries in the proper direction, checking the ⊕ and ⊖ marks.</li> <li>The set's remote control sensor is exposed to strong light (direct sunlight, inverter type fluorescent bulb light, etc.). Move the set to a place in which the remote control sensor will not be exposed to strong light.</li> <li>The setting of the zone to operate does not match. Press <b>ZONE SELECT</b> to select the zone to operate.</li> </ul>	<a href="#">175</a> <a href="#">175</a> <a href="#">175</a> <a href="#">175</a> <a href="#">175</a> <a href="#">34, 99, 113</a>

## Resetting the microprocessor

Perform this procedure if the display is abnormal or if operations cannot be performed.  
When the microprocessor is reset, all the settings are reset to their default values.

- 1** Turn off the power using ⏻.
- 2** Press ⏻ while simultaneously pressing **INFO** and **BACK**.
- 3** Once the display starts flashing at intervals of about 1 second, release the two buttons.

If in step 3 the display does not flash at intervals of about 1 second, start over from step 1.

# Specifications

## □ Audio section

### • Power amplifier

Rated output:	Front:
	150 W + 150 W (8 Ω, 20 Hz – 20 kHz with 0.05 % T.H.D.) 190 W + 190 W (6 Ω, 1 kHz with 0.7 % T.H.D.)
	Center:
	150 W (8 Ω, 20 Hz – 20 kHz with 0.05 % T.H.D.) 190 W (6 Ω, 1 kHz with 0.7 % T.H.D.)
	Surround:
	150 W + 150 W (8 Ω, 20 Hz – 20 kHz with 0.05 % T.H.D.) 190 W + 190 W (6 Ω, 1 kHz with 0.7 % T.H.D.)
	Surround back / Front height / Front wide:
	150 W + 150 W (8 Ω, 20 Hz – 20 kHz with 0.05 % T.H.D.) 190 W + 190 W (6 Ω, 1 kHz with 0.7 % T.H.D.)

Dynamic power:	170 W x 2ch (8 Ω)
	280 W x 2ch (4 Ω)

Output connectors:	4 – 16 Ω
--------------------	----------

### • Analog

Input sensitivity/Input impedance:	200 mV/47 kΩ
Frequency response:	10 Hz – 100 kHz — +1, –3 dB (DIRECT mode)
S/N:	102 dB (IHF–A weighted, DIRECT mode)
Distortion:	0.005 % (20 Hz – 20 kHz) (DIRECT mode)
Rated output:	1.2 V

### • Digital

D/A output:	Rated output — 2 V (at 0 dB playback) Total harmonic distortion — 0.008 % (1 kHz, at 0 dB) S/N ratio — 102 dB Dynamic range — 100 dB Format — Digital audio interface
-------------	---

### Digital input:

### • Phono equalizer (PHONO input — MEDIA PLAYER OUT)

Input sensitivity:	2.5 mV
RIAA deviation:	±1 dB (20 Hz – 20 kHz)
S/N:	74 dB (IHF–A weighted)
Rated output:	150 mV
Distortion factor:	0.03 % (1 kHz, 3 V)

## □ Video section

### • Standard video connectors

Input/output level and impedance:	1 Vp-p, 75 Ω
Frequency response:	5 Hz – 10 MHz — 0, –3 dB (when “Video Conversion” set to “Off”)
• Color component video connector	
	Input/output level and impedance:
	Y signal — 1 Vp-p, 75 Ω P <sub>B</sub> / C <sub>B</sub> signal — 0.7 Vp-p, 75 Ω P <sub>R</sub> / C <sub>R</sub> signal — 0.7 Vp-p, 75 Ω
Frequency response:	5 Hz – 60 MHz — 0, –3 dB (when “Video Conversion” set to “Off”)

## □ Tuner section

### (ANTENNA input – MEDIA PLAYER OUT)

	[FM]
	(Note: μV at 75 Ω, 0 dBf = 1 x 10 <sup>-15</sup> W)
Receiving Range:	87.5 MHz – 108.0 MHz
Usable Sensitivity:	1.2 μV (12.8 dBf)
50 dB Quieting Sensitivity:	MONO 2.8 μV (20.2 dBf)
S/N (IHF–A weighted):	MONO 70 dB STEREO 67 dB
Distortion (1 kHz):	MONO 0.7 % (1 kHz) STEREO 1.0 % (1 kHz)

## □ Switching hub

Standard	IEEE 802.3 (10 Base-T)-compliant IEEE 802.3u (100 Base-TX)-compliant
Number of ports	4 ports

## □ General

Power supply:	AC 230 V, 50/60 Hz
Power consumption:	780 W
Power consumption in standby mode:	0.1 W
Power consumption in CEC standby mode:	0.5 W
Power consumption in network standby mode:	5.1 W

For purposes of improvement, specifications and design are subject to change without notice.

## License

**This section describes software license used for this unit. To maintain the correct content, the original (English) is used.**

### □ Boost

<http://www.boost.org/>

Boost Software License - Version 1.0 - August 17th, 2003

Permission is hereby granted, free of charge, to any person or organization obtaining a copy of the software and accompanying documentation covered by this license (the "Software") to use, reproduce, display, distribute, execute, and transmit the Software, and to prepare derivative works of the Software, and to permit third-parties to whom the Software is furnished to do so, all subject to the following:

The copyright notices in the Software and this entire statement, including the above license grant, this restriction and the following disclaimer, must be included in all copies of the Software, in whole or in part, and all derivative works of the Software, unless such copies or derivative works are solely in the form of machine-executable object code generated by a source language processor.

THE SOFTWARE IS PROVIDED "AS IS", WITHOUT WARRANTY OF ANY KIND, EXPRESS OR IMPLIED, INCLUDING BUT NOT LIMITED TO THE WARRANTIES OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, TITLE AND NON-INFRINGEMENT. IN NO EVENT SHALL THE COPYRIGHT HOLDERS OR ANYONE DISTRIBUTING THE SOFTWARE BE LIABLE FOR ANY DAMAGES OR OTHER LIABILITY, WHETHER IN CONTRACT, TORT OR OTHERWISE, ARISING FROM, OUT OF OR IN CONNECTION WITH THE SOFTWARE OR THE USE OR OTHER DEALINGS IN THE SOFTWARE.

### □ Expat

<http://www.jclark.com/xml/expat.html>

Expat License. Copyright (c) 1998, 1999, 2000 Thai Open Source Software Center Ltd

Permission is hereby granted, free of charge, to any person obtaining a copy of this software and associated documentation files (the "Software"), to deal in the Software without restriction, including without limitation the rights to use, copy, modify, merge, publish, distribute, sublicense, and/or sell copies of the Software, and to permit persons to whom the Software is furnished to do so, subject to the following conditions:

The above copyright notice and this permission notice shall be included in all copies or substantial portions of the Software.

THE SOFTWARE IS PROVIDED "AS IS", WITHOUT WARRANTY OF ANY KIND, EXPRESS OR IMPLIED, INCLUDING BUT NOT LIMITED TO THE WARRANTIES OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE AND NONINFRINGEMENT. IN NO EVENT SHALL THE AUTHORS OR COPYRIGHT HOLDERS BE LIABLE FOR ANY CLAIM, DAMAGES OR OTHER LIABILITY, WHETHER IN AN ACTION OF CONTRACT, TORT OR OTHERWISE, ARISING FROM, OUT OF OR IN

CONNECTION WITH THE SOFTWARE OR THE USE OR OTHER DEALINGS IN THE SOFTWARE.

### □ FastDelegate

<http://www.codeproject.com/KB/cpp/FastDelegate.aspx>

THE WORK (AS DEFINED BELOW) IS PROVIDED UNDER THE TERMS OF THIS CODE PROJECT OPEN LICENSE ("LICENSE"). THE WORK IS PROTECTED BY COPYRIGHT AND/OR OTHER APPLICABLE LAW. ANY USE OF THE WORK OTHER THAN AS AUTHORIZED UNDER THIS LICENSE OR COPYRIGHT LAW IS PROHIBITED.

BY EXERCISING ANY RIGHTS TO THE WORK PROVIDED HEREIN, YOU ACCEPT AND AGREE TO BE BOUND BY THE TERMS OF THIS LICENSE. THE AUTHOR GRANTS YOU THE RIGHTS CONTAINED HEREIN IN CONSIDERATION OF YOUR ACCEPTANCE OF SUCH TERMS AND CONDITIONS. IF YOU DO NOT AGREE TO ACCEPT AND BE BOUND BY THE TERMS OF THIS LICENSE, YOU CANNOT MAKE ANY USE OF THE WORK.

#### 1. Definitions.

- a. "Articles" means, collectively, all articles written by Author which describes how the Source Code and Executable Files for the Work may be used by a user.
- b. "Author" means the individual or entity that offers the Work under the terms of this License.
- c. "Derivative Work" means a work based upon the Work or upon the Work and other pre-existing works.
- d. "Executable Files" refer to the executables, binary files, configuration and any required data files included in the Work.
- e. "Publisher" means the provider of the website, magazine, CD-ROM, DVD or other medium from or by which the Work is obtained by You.
- f. "Source Code" refers to the collection of source code and configuration files used to create the Executable Files.
- g. "Standard Version" refers to such a Work if it has not been modified, or has been modified in accordance with the consent of the Author, such consent being in the full discretion of the Author.
- h. "Work" refers to the collection of files distributed by the Publisher, including the Source Code, Executable Files, binaries, data files, documentation, whitepapers and the Articles.

- i. "You" is you, an individual or entity wishing to use the Work and exercise your rights under this License.
2. Fair Use/Fair Use Rights. Nothing in this License is intended to reduce, limit, or restrict any rights arising from fair use, fair dealing, first sale or other limitations on the exclusive rights of the copyright owner under copyright law or other applicable laws.

3. License Grant. Subject to the terms and conditions of this License, the Author hereby grants You a worldwide, royalty-free, non-exclusive, perpetual (for the duration of the applicable copyright) license to exercise the rights in the Work as stated below:

- a. You may use the standard version of the Source Code or Executable Files in Your own applications.
- b. You may apply bug fixes, portability fixes and other modifications obtained from the Public Domain or from the Author. A Work modified in such a way shall still be considered the standard version and will be subject to this License.

- c. You may otherwise modify Your copy of this Work (excluding the Articles) in any way to create a Derivative Work, provided that You insert a prominent notice in each changed file stating how, when and where You changed that file.

- d. You may distribute the standard version of the Executable Files and Source Code or Derivative Work in aggregate with other (possibly commercial) programs as part of a larger (possibly commercial) software distribution.

- e. The Articles discussing the Work published in any form by the author may not be distributed or republished without the Author's consent. The author retains copyright to any such Articles. You may use the Executable Files and Source Code pursuant to this License but you may not repost or republish or otherwise distribute or make available the Articles, without the prior written consent of the Author.

Any subroutines or modules supplied by You and linked into the Source Code or Executable Files this Work shall not be considered part of this Work and will not be subject to the terms of this License.

4. Patent License. Subject to the terms and conditions of this License, each Author hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, import, and otherwise transfer the Work.

5. Restrictions. The license granted in Section 3 above is expressly made subject to and limited by the following restrictions:

- a. You agree not to remove any of the original copyright, patent, trademark, and attribution notices and associated disclaimers that may appear in the Source Code or Executable Files.
- b. You agree not to advertise or in any way imply that this Work is a product of Your own.
- c. The name of the Author may not be used to endorse or promote products derived from the Work without the prior written consent of the Author.
- d. You agree not to sell, lease, or rent any part of the Work. This does not restrict you from including the Work or any part of the Work inside a larger software distribution that itself is being sold. The Work by itself, though, cannot be sold, leased or rented.

- e. You may distribute the Executable Files and Source Code only under the terms of this License, and You must include a copy of, or the Uniform Resource Identifier for, this License with every copy of the Executable Files or Source Code You distribute and ensure that anyone receiving such Executable Files and Source Code agrees that the terms of this License apply to such Executable Files and/or Source Code. You may not offer or impose any terms on the Work that alter or restrict the terms of this License or the recipients' exercise of the rights granted hereunder. You may not sublicense the Work. You must keep intact all notices that refer to this License and to the disclaimer of warranties. You may not distribute the Executable Files or Source Code with any technological measures that control access or use of the Work in a manner inconsistent with the terms of this License.

- f. You agree not to use the Work for illegal, immoral or improper purposes, or on pages containing illegal, immoral or improper material. The Work is subject to

applicable export laws. You agree to comply with all such laws and regulations that may apply to the Work after Your receipt of the Work.

6. Representations, Warranties and Disclaimer. THIS WORK IS PROVIDED "AS IS", "WHERE IS" AND "AS AVAILABLE", WITHOUT ANY EXPRESS OR IMPLIED WARRANTIES OR CONDITIONS OR GUARANTEES. YOU, THE USER, ASSUME ALL RISK IN ITS USE, INCLUDING COPYRIGHT INFRINGEMENT, PATENT INFRINGEMENT, SUITABILITY, ETC. AUTHOR EXPRESSLY DISCLAIMS ALL EXPRESS, IMPLIED OR STATUTORY WARRANTIES OR CONDITIONS, INCLUDING WITHOUT LIMITATION, WARRANTIES OR CONDITIONS OF MERCHANTABILITY, MERCHANTABLE QUALITY OR FITNESS FOR A PARTICULAR PURPOSE, OR ANY WARRANTY OF TITLE OR NON-INFRINGEMENT, OR THAT THE WORK (OR ANY PORTION THEREOF) IS CORRECT, USEFUL, BUG-FREE OR FREE OF VIRUSES. YOU MUST PASS THIS DISCLAIMER ON WHENEVER YOU DISTRIBUTE THE WORK OR DERIVATIVE WORKS.

7. Indemnity. You agree to defend, indemnify and hold harmless the Author and the Publisher from and against any claims, suits, losses, damages, liabilities, costs, and expenses (including reasonable legal or attorneys' fees) resulting from or relating to any use of the Work by You.

8. Limitation on Liability. EXCEPT TO THE EXTENT REQUIRED BY APPLICABLE LAW, IN NO EVENT WILL THE AUTHOR OR THE PUBLISHER BE LIABLE TO YOU ON ANY LEGAL THEORY FOR ANY SPECIAL, INCIDENTAL, CONSEQUENTIAL, PUNITIVE OR EXEMPLARY DAMAGES ARISING OUT OF THIS LICENSE OR THE USE OF THE WORK OR OTHERWISE, EVEN IF THE AUTHOR OR THE PUBLISHER HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

9. Termination.

- a. This License and the rights granted hereunder will terminate automatically upon any breach by You of any term of this License. Individuals or entities who have received Derivative Works from You under this License, however, will not have their licenses terminated provided such individuals or entities remain in full compliance with those licenses. Sections 1, 2, 6, 7, 8, 9, 10 and 11 will survive any termination of this License.
- b. If You bring a copyright, trademark, patent or any other infringement claim against any contributor over infringements You claim are made by the Work, your License from such contributor to the Work ends automatically.

- c. Subject to the above terms and conditions, this License is perpetual (for the duration of the applicable copyright in the Work). Notwithstanding the above, the Author reserves the right to release the Work under different license terms or to stop distributing the Work at any time; provided, however that any such election will not serve to withdraw this License (or any other license that has been, or is required to be, granted under the terms of this License), and this License will continue in full force and effect unless terminated as stated above.

10. Publisher. The parties hereby confirm that the Publisher shall not, under any circumstances, be responsible for and shall not have any liability in respect of the subject matter of this License. The Publisher makes no warranty

whatsoever in connection with the Work and shall not be liable to You or any party on any legal theory for any damages whatsoever, including without limitation any general, special, incidental or consequential damages arising in connection to this license. The Publisher reserves the right to cease making the Work available to You at any time without notice

#### 11. Miscellaneous

- a. This License shall be governed by the laws of the location of the head office of the Author or if the Author is an individual, the laws of location of the principal place of residence of the Author.
- b. If any provision of this License is invalid or unenforceable under applicable law, it shall not affect the validity or enforceability of the remainder of the terms of this License, and without further action by the parties to this License, such provision shall be reformed to the minimum extent necessary to make such provision valid and enforceable.
- c. No term or provision of this License shall be deemed waived and no breach consented to unless such waiver or consent shall be in writing and signed by the party to be charged with such waiver or consent.
- d. This License constitutes the entire agreement between the parties with respect to the Work licensed herein. There are no understandings, agreements or representations with respect to the Work not specified herein. The Author shall not be bound by any additional provisions that may appear in any communication from You. This License may not be modified without the mutual written agreement of the Author and You
