Under Desk Drawer Instruction Manual

The under desk drawer screws into your desk top with self tapping screws supplied. If you don't have a drill and are purchasing with a new desk from us, please get in touch once you place your order and we can pre drill for a small fee. To fix this to your desk, its easiest done with the desk top upside down. It can also be done right way up however we recommend having a second set of hands to help.

Place the draw in its desired location, insert screws through the 4 mounting holes and drive in with an electric drill. Ensure it doesn't interfere with the movement of your sit stand leg.
