

SOUND ADVICE

MAGNAT MA 900 – CAPTIVATING TUBES

"Ultimately, the tubes create a finely-spun, balanced harmonic structure in the signal path of the preamplifier that warms the heart and gets you tapping your feet along to the music."

"This hybrid amplifier sounded neutral and open. The high degree of transparency in the colorful mids opened the door to musical journeys of discovery. Magnat's amp provided instruments and vocals with the necessary degree of spatiality and delivered a brilliant performance with high levels of fine dynamics and a joyful nature."

Exquisite sound from all sources

"The MA 900 was also compelling when it came to coarse dynamics. You could feel its impetuous power and transistor-like control in the bass range, which somehow felt more relaxed and fuller than is the case with many pure transistor amplifiers. The digital element was also impressive with a strong audio performance. The biggest surprise was the quality of wireless streaming via the Bluetooth interface. When supplied with this relatively lean transmission source, the MA 900 managed to deliver a broad-band, differentiated and lively music reproduction that came astonishingly close to the usual analog and digital hi-fi sources."

MC input

"Its balanced performance was compelling in combination with energetic fine dynamics and a hearty bass response."

Editor's conclusion:

"What impressed me the most wasn't the strong sound of the unconventional amplifier from the speaker experts. Surprisingly, it was the powerful phono input that also cut a fine figure with MC systems. The quality of Bluetooth audio generated by Magnat's fairly priced MA 900 was also something we really liked."

AUDIOGRAMM <small>09/2021</small>	
warmer, lebendiger, satter Klang, hohe Leistung, Top-Konnektivität	keine Quellen-Direktwahl
Klang	95
Ausstattung	sehr gut
Bedienung	gut
Verarbeitung	sehr gut
KLANGURTEIL	10 PUNKTE
PREIS/LEISTUNG	SEHR GUT
