INTRODUCTION

Replacing this filter can help reduce the abnormal noise and improve the smell of the vacuum.

Step 1 — HEPA Filter

- Press the latch below the HEPA filter on the bottom of the front body of the vacuum and pull outwards with your hands.
- Pull the grey and blue plastic cover down and away with your hands.

Step 2

- Pull the HEPA filter out by the grey plastic tab in the middle of the grate with your hands.
- ⓘ Wiggle it around as you are pulling if the HEPA filter is not coming out easily.

To reassemble your device, follow these instructions in reverse order.
