- 6. Timer Mode:** Include 3 default spectra and 3 customizable settings.
- 7. Spectrum Preview:** View spectrum parameters in timer mode.

Light Control Settings

Time Settings

1. Controller

Connect the light to a compatible power supply to power it on.
Press and hold the or button. The digits on the LED display will start flashing.
Press the or button to set the current clock time accordingly.
After finishing the setting, no further action is required to save the time.
The clock setting mode will automatically exit and save after a few seconds.

2. App

Connect the light to a compatible power supply to power it on.
After successfully connecting to the “Aquarium Light Controller” app via Bluetooth, the app will automatically sync with your phone’s system time.

Mode Selection

1. Controller

Users can select their preferred mode by pressing the corresponding button.
Pressing the , , or button will activate the corresponding timer mode.

2. App

After successfully connecting to the “Aquarium Light Controller” app via Bluetooth, you can select the Dutch Style, Jungle Style, or Japanese Style in timer mode.

Brightness Adjustment

1. Controller

Press the button to increase brightness and the button to decrease it.
When first turned on, the light is set to 100% brightness. The LED display on the controller shows the current brightness level during adjustment.

2. App

Use the brightness control in the app to adjust the brightness level.

Color Selection

1. Controller

Press the button to cycle through the available lighting options in sequence.
Press briefly to turn the light on, and press and hold to turn it off.

	S_01	Full Brightness
	S_02	Cool White
	S_03	Red
	S_04	Green
	S_05	Blue
	S_06	Cyan
	S_07	Pink
	S_08	Warm White
	S_09	Rainbow Fade

2. App

Use the color control in the app to customize the light color as desired.

Power-Off Memory & Time Recovery

All settings except the current time are retained after a power outage.
When power is restored, the current time can be reset manually on the controller or automatically restored by reconnecting the app via Bluetooth.

Important Safety Instructions

- Make sure your hands are dry before turning the power on/off or plugging/unplugging the power cord.
- Do not use any LED driver other than the one provided by the manufacturer to power the light.
- Ensure the operating voltage matches the voltage requirements of the LED driver.
- Do not look directly at the LED light to avoid eye injury.
- Ensure the light is securely installed before supplying power.
- Supervise children when they are near the device.
- Connect the LED driver to the side of the wired controller in a looped structure to prevent water from dripping along the cable into the power outlet.
- Note that the overall waterproof rating of the LED aquarium light is IP67, while the controller is rated IP20. The controller is not waterproof – keep it away from any water source.

FCC Warning

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator & your body.
