SAFETY INFORMATION

To reduce the risk of fire, electric shock, or other injury, follow all instructions and safety guidelines.

GENERAL SAFETY

- Only use your air purifier as described in this manual.
- Always place the air purifier on a firm, leveled surface.
- Do not use without removing the plastic wrap from the filter. The purifier will not filter air, and may overheat, causing a fire hazard.

**IF THE POWER CORD OR UNIT DOES NOT WORK,
CONTACT OUR CUSTOMER SERVICE IMMEDIATELY.**

- Do not use your air purifier outdoors.
- Keep your air purifier away from water, and wet or damp areas. Never place in water or liquid.
- Do not use in excessively humid areas.
- Keep your air purifier away from heat sources.
- Do not use where combustible gases, vapors, metallic dust, aerosol (spray) products, or fumes from industrial oil are present.
- Keep 5ft /1.5m away from where oxygen is being administered.
- Supervise children when they are near the air purifier.
- Do not place anything into any opening on the air purifier.
- Do not sit or place heavy objects on the air purifier.
- Keep the inside of the air purifier dry. To prevent moisture buildup, avoid placing in rooms with major temperature changes or underneath air conditioners.
- Always unplug your air purifier before servicing (such as changing the filter).

POWER & CORD

- Keep the air purifier near the outlet it is plugged into.
- Never place the cord near any heat source.
- Do not cover the cord with a rug, carpet, or other covering. Do not place the cord under furniture or appliances.
- Keep the cord out of areas where people walk often.
Place the cord where it will not be tripped over.
- Check your air purifier cord and plug connections. Faulty wall outlet connections or loose plugs can cause the outlet or plug to overheat. Be sure the plug fits tightly in the outlet.

WARNING

- If the power adapter is damaged, please contact our customer service directly to replace with new replacement.
- This appliance is not intended for use by persons (including children) with reduced physical, sensory or mental capabilities, or lack of experience and knowledge, unless they have been given supervision or instruction concerning use of the appliance by a person responsible for their safety.
- Cleaning and user maintenance shall not be made by children without supervision.
- If the product needs to be shut down during use, please shut down normally and then unplug the power supply. Abnormal power failure may cause product failure!
- Children should be supervised to ensure that children do not play with electrical appliances.
- This air purifier has a polarized plug (one blade is wider than the other). To reduce the risk of electric shock, this plug is intended to fit in a polarized outlet only one way. If the plug does not fit fully in the outlet, reverse the plug. If it still does not fit, contact a qualified electrician. Do not attempt to defeat this safety feature.

SAVE THESE IMPORTANT INSTRUCTIONS FOR EASY REFERENCE.

PACKAGE CONTENTS

- 1 x Air Purifier
- 1 x H13 True HEPA Filter (Pre-Installed)
- 1 x Power Adapter (Put inside filter)
- 1 x Remote Control
- 1 x User Manual

NOTE: power adapter put inside the air filter, please take air purifier out of box first, remove the clear plastic bag and open bottom filter cover to take filter out, then take the power adapter out. Finally put air filter back and lock filter cover.

SPECIFICATION & UNIQUE FEATURES

Power Supply	100-240V 50/60hz	Rated Power	48W
Operating Conditions	Temperature: 14°F– 104°F /- 10°C–40°C Humidity: < 85% RH	Noise Level	22–53dB

Air Quality Indicator Chart & DIGITAL DISPLAY

This indicator uses an automatic sensor to display the air quality.
This sensor uses an infrared light to detect airborne dust .

Indicator Color	Blue	Green	Yellow	Red
Air Quality	Very Good	Good	Moderate	Polluted
PM2.5 Level	0-35	36-75	76-115	>116

4 SPEEDS

Low; Medium; High; Turbo(Top)

Auto Mode

Auto Mode adjusts the fan speed automatically based on air quality. For example, if the air quality is polluted,the PM2.5 indicator will be red,and the fan will be set to turbo speed.

Quiet Sleep Mode

All indicators will automatically turn off in sleep mode,only sleep mode indicator on.

Timer

You can set a timer between 1-12 hours.

Replace Filter Indicator

Illuminates when it is time to replace the filter.

Remote Control

-  On / OFF Button
-  Child Lock Button
-  Speed Button
-  Sleep Mode Button
-  Filter Rest Button
-  Timer Button

Note: remote control comes without battery (2*AAA batteries needed).

How To Install Batteries For Remote Control?

Open battery cover and put 2*AAA batteries in correctly

Close battery cover

HOW TO USE

BEFORE TURNING THE UNIT ON

- Take the air purifier out of the box and remove the clear protective plastic bag. Open bottom filter cover to take filter out, then take the power adapter out. Finally put air filter back and lock filter cover.
- Place the air purifier on a firm, leveled surface.
- Check if the voltage indicated on the appliance corresponds to the local power voltage before you connect the appliance.
- Please insert the plug into the power socket firmly. After switching the power on, the indicator light will flash.
- Do not block the air inlet and outlet, e.g. by placing items on the air outlet or in front of the air inlets closer than 20cm.
- For best results, or to address a specific air quality issue such as smoke, run the air purifier at high speed for 15-20 minutes before using a lower speed or Auto Mode, and keep windows and doors closed while the air purifier is on.

TURN ON / OFF

- To turn the air purifier on, press the power  button.
- Press power button again to turn off the air purifier. The air purifier will take about 15-20 seconds to detect the air quality each time it is turned on. During this time, the air quality indicator color will switch automatically from red, blue, green, yellow. After 15-20 seconds, the air quality indicator color will change based on the detected air quality. And the air pollution value is displayed in the front panel display.

Note: air purifier is automatically in auto mode when turn on every time.

Switch Fan Speed

- This air purifier has 4 fan speed settings: low, medium, high and turbo(top). The higher the fan speed setting, the faster the air will be purified. To select

or change fan speed, press the fan speed button  until the desired setting is reached.

- The speed indicator will change to show the speed you choose currently.
Please check “LED Display” content for reference.

Auto Mode

- When at turbo speed, press fan speed button  again to switch to auto mode. The auto mode indicator will light on LED Display. Then air purifier speed will automatically adjust based on air quality. If air quality is moderate, the PM2.5 indicator will be yellow, and air purifier will run at high speed.
- Press  button again change to low speed, and auto mode turned off.

Note: air purifier is automatically in auto mode when turn on every time, not the speed you used last time.

Timer

- Press the timer button  until the desired timer setting is lit on the display. The timer button will cycle through the following settings: 1-2-3-4-5-6-7-8-9-10-11-12 hours and off. Once you choose a time, the timer will flash 3 times and start counting down. The air purifier will automatically power off once the timer is finished. If the timer indicator is off, it means the timer function is not turned on.
- To cancel the timer at any time, press the timer button and hold it for 2 seconds. If canceled successfully, there will be no countdown on the display.

Note: the air purifier will run continuously when the timer function is off.

SLEEP MODE

- Press button  to switch to sleep mode. All indicators will turn off automatically except the sleep mode indicator with only little light.

- Press sleep mode button again to turn off sleep mode, air purifier will run at low fan speed.
- Sleep Mode can also be turned off via fan speed button or timer button. But if you press timer button, the timer function will be activated.

Note: sleep mode indicator could not turn off.

Child & Pets Lock

- Press the child lock & Pets Lock button  and hold it for 2 seconds then all functional buttons will be locked. The child & pets lock indicator will light on led display.
- Press and hold again the child lock button for 2 seconds and all functional buttons will be unlocked.

Remote Control

Remote Control's functions are same as touch control panel.

Please check above usage guide for reference.

HOW TO REPLACE FILTER

FILTER REPLACE INDICATOR

- The smart replace filter indicator  illuminates when it is time to replace the True HEPA H13 filter based on the air purifier's hours of use.
- For optimal performance, replace every 3,000 hours under normal usage conditions.
- Once the filter has been replaced, press and hold the filter replace filter button  for 5 seconds to reset the indicator. If reset successfully, the filter replace indicator will turn off.

HOW TO REPLACE FILTER

NOTE: for safety consideration , please do unplug the power adapter before starting to replace filter.

Rotate the twist handle
counterclockwise to unlock

Take the old filter out

Remove the new filter protective
bag before installation. Place the
filter into the air purifier and install
the base cover properly

Tighten the filter buckle
clockwise until it clicks into place

CARE & MAINTENANCE

NOTE: For the best performance, vacuum the pre-filter once a month under normal usage.

Cleaning the Air Purifier

- Wipe the outside of the air purifier with a dry cloth. Do not clean with water or any other liquid to avoid risk of electric shock.
- Clean the white side of the filter with a brush or vacuum hose each month to prevent buildup of hair or dust. Do not clean the filter with water or other liquids.

Cleaning the Air Quality Sensor

If the air quality sensor is blocked by accumulated dust, the air quality indicator may not work correctly.

1. Unplug the air purifier.
2. Open the sensor cover.

3. Dry the sensor lens with a dry cotton swab.
4. Close the sensor cover.

Storage

If not using the air purifier for an extended period of time, wrap the filter in plastic packaging and store in a dry place to avoid moisture damage.

When Should I Replace the Filter?

- The filter should be replaced every 6-8 months (3000h). But you may need to replace your filter earlier or later depending on how often you use your air purifier. Using your air purifier in an environment with relatively high pollution may mean you will need to change the filter more often, even if the filter replace indicator not illuminates yet.

Disposal and Recycling

This air purifier should be recycled as electronic waste and the filter recycled as plastic.

Tips to Buy Air Purifier

You can buy the air purifier from the Walmart website or official website

TROUBLE SHOOTING

PROBLEM	POSSIBLE CAUSE	POSSIBLE SOLUTION
Air Purifier not operate	Unit is not plugged in	Plug the unit in
	Power button not pressed	Press the power button to turn the power on
	No power to unit	Check circuits, fuses, try a different outlet
Reduced airflow	The back grille may be blocked	Make sure side intakes are not blocked or the front outflow area
	Pre-filter needs vacuuming	Vacuum the pre-filter with the brush attachment of your vacuum cleaner
	The filter needs to be replaced	Replace the filter
Reduced odor removal	The filter needs to be replaced	Replace the filter
Excessive noise	The unit is not level	Place the unit on a flat and level surface
Replace filter light remains lit after filter replaced	The replace filter indicator needs to be reset	Press and hold the filter replace button for 5 seconds until the replace filter light turns off
Can't feel the effect	Filter failure-replace the filter.	Check if filter in correct location
	Use in inappropriate places (excessive area)	Use in bedroom, living room or other indoor places
