SAUNA & SPA

MY WORLD OF WELL-BEING.

FROM SAUNA CONTROLS TO WELLNESS ACCESSORIES:

Wellness is a well-rounded affair. As a full-service supplier for every part of the spa area – from the sauna to infrared lighting and steam baths – we supply compelling solutions that satisfy individual expectations. We rely on in-house development and production to guarantee the highest standards of quality.

In these fast-paced times, it is increasingly important to take time off and relax. Our innovative products give you the chance to get back to the essentials – an all-round wellness experience that you can enjoy. You don't need to worry about the technology or how to implement it. That's the service we offer.

sentiotec together with its parent company Harvia, is the market leader for sauna, infrared and steam baths in Central Europe.

sentiotec stands for excellent product design and technological advance.

THE WELLNESS OF TOMORROW:

Starting with innovations in electronic control units for sauna cabins through to supplying the full range of products for spa areas – we have a clear commitment to research and development, exacting design standards, highly efficient production and a total focus on the customer. We are looking to the future with fresh energy and a clear mission – thanks to our unique range of services for a constantly growing market.

Our mission:

One-stop-shop: We supply our customers with EVERYTHING they need to successfully conclude their wellness projects.

Customer orientation: We engage with the needs of our customers and satisfy them completely with simple and flexible solutions.

Innovation: Our innovative and reliable products set trends on the market and thereby give our customers a competitive advantage.

International: It is our aim to supply the international market with our products optimally.

Partnership: We always look for mutual solutions with our customers – and also our suppliers. Working as partners creates trust and allows us to fully exploit our shared potential.

SENTIOTEC

World of well-being **sentiotec**

sentiotec provides innovative solutions that function at the touch of a button. Easy to operate and flexible to use – this is something you can count on from our products.

This catalogue includes the real heart of any SPA area: The latest generation in sauna control systems, infrared radiators and steam generators. Sauna heaters from sentiotec are functional and impress with their simple design.

To ensure you are able to offer the full range for your wellness projects, our programme also includes quality accessories: high-quality sauna doors, sensual fragrances, ergonomic head-rests and much more.

Our Sound & Light modules will make wellness a holistic experience. Gentle sounds and soothing colours inspire all your senses. Sit back and relax, welcome to the **sentiotec well-ness world**.

Heat has a noticeable effect on the body: ¹

- lowering blood pressure
- maintaining the flexibility of the blood vessels
- improving the function of the arteries
- reducing blood fats
- reducing inflammation

A VISIT TO THE SAUNA INCREASES THE HEART RATE AND IS COMPARABLE TO PLAYING SPORT. ¹

People who go to the sauna 4 to 7 times per week reduce: ¹

“Regular sauna use has been associated with a lower risk of heart disease, sudden cardiac death, high blood pressure and memory loss.”

JARI LAUKKANEN AND TANJANINNA LAUKKANEN:
“SAUNA, BODY AND MIND” (12/2020)

¹ Professor Hans Hägglund, Uppsala University, Lecturer, 16 December 2020.

Should doctors also prescribe saunas – alongside medication, therapies and physical activity – for the prevention and treatment of diseases?

PROFESSOR HANS HÄGGLUND

APPROX. **500** STUDIES HAVE BEEN PUBLISHED ON THE HEALTH EFFECTS OF SAUNAS. ¹

Saunas are good for the brain as well: ²

- warming up the body
- promoting blood circulation
- reducing inflammation
- releasing endorphins
- improving sleep
- providing social interaction

83% OF THE STUDY PARTICIPANTS SLEPT BETTER AFTER ONE SAUNA SESSION.

HUSSAIN, GREAVES & COHEN 2019

Heat releases endorphins, oxytocin and serotonin, improving mood and increasing well-being. ¹

“A visit to the sauna reduces anxiety and improves concentration.”

Kuusinen & Heinonen 1972

² Based on several studies (Laukkanen, Zaccardi and Knutsor).

Healing with heat

Heat can help us to feel healthier. Whether you choose a sauna, an infrared cabin or a steam bath. The soothing heat can boost your immune system, lift your spirits, relax your muscles, improve your skin's appearance and much more.

When you take a sauna, you are engaging in a primal and natural body experience: a shared experience of nature. This is in marked and obvious contrast to the digitalised world in which we live. The offline environment of a sauna is the perfect antidote to stress and information overload. It's essentially relaxation at a physical and mental level.

IMPORTANT:

For all heat treatments, the maximum session time is 15 minutes. As the body temperature rises sharply, you may experience circulatory problems. Treat your body to some rest and relaxation after a sauna session.

SAUNA

In the sauna, the temperature is high (up to 100 °C) and the humidity is low. The body is heated from the outside and you start to sweat. An infusion can also increase the heat for a short time to make you sweat even more.

There are different types of sauna:

- Smoke sauna (original form)
- Traditional Finnish sauna
- Electrically heated sauna
- Wood-fired sauna
- Bio sauna
- Hybrid sauna

STEAM BATH

Steam baths are also hot and cause you to sweat. One difference between steam baths and saunas is the temperature. In a steam bath, the temperature is lower (45–55 °C) but the humidity is higher, at almost 100%. A steam bath can have especially positive health benefits for rheumatic complaints and cold symptoms.

There are also different types of steam bath:

- Traditional steam bath
- Herbal / aromatherapy
- Salt mist applications
- Hammam

INFRARED

With an infrared full spectrum radiator, you can bring the sun into your home. The temperature in an infrared cabin is 30 – 45 °C (according to ÖNORM M6219-4). The body does not have to expend extra energy to warm up or cool down.

Due to the deep heat effect, the whole body heats up from the inside out. The blood is warmed via the skin and is then distributed throughout the body. The blood vessels dilate, promoting blood circulation and allowing muscle tension to be released.

Practical sauna heater design

The **sauna heaters** from **sentiotec** represent design and technology at the very highest level. The design's clear, straight lines conceal advanced features that will surpass by far your previous sauna experiences.

The heat sources from sentiotec combine the most advanced sauna heater technology in the world with an internationally prize-winning design. High-quality materials: Steel, wood and stone. Details that reach all the senses. Experience the power of the hot stones, feel the steam on your skin, inhale the invigorating vapours. Body and soul are re-energised. Experience true equilibrium of the senses.

DURABLE

The grilles on the heating elements protect them against excess water.

SAFE

The temperature of the outer shell of the Concept R sauna heater remains low thanks to threefold coating.

EASY MAINTENANCE

The sauna heater is easy to maintain. The stone chamber is separated from the heating elements, which means that the stones do not need to be removed when the heating elements are serviced.

AUTOMATIC SWITCH-OFF (OPTIONAL)

The integrated switch-off function provides the highest possible levels of safety without sacrificing attractive design. The rocker switch available as an accessory switches off the sauna heater if it is covered (e.g. by a towel).

Award-winning design

Our Concept R sauna heaters have won various prizes and awards in international design competitions. The clear, eye-catching design is the starting point for the functionality of the products.

The advanced design of the **Concept R sauna heater** and the market leading technology were awarded the **“Red Dot” prize**. The threefold coating of the sauna heater, the integrated safety switch and the attractive shape that allows the sauna heater to be integrated in any position in the sauna were singled out for special attention.

reddot winner

The advanced shape of the **Concept R mini combi** received the **“iF Design Award” 2018**. The specialist jury particularly praised the design and technology. The stylish base of the Concept R mini combi, which conceals the technology, wiring and connections, received special recognition.

Concept R

Practical sauna heater design.

The Concept R is a designer sauna heater for the modern, private sauna. Sauna technology of the highest level was used when planning the design of the coating. The temperature of the outer shell stays low due to the elaborate, threefold coating.

The Concept R embodies design and technology at the highest level. The smooth, straight-lined shape can be planned into any modern sauna cabin. The thoroughly stylish, black-painted Concept R can be integrated between benches without detracting from its appearance.

To round off the Concept R sauna heater, it has been fitted with a railing that runs seamlessly around the sauna heater. This advanced technology allows the heater to warm up quickly and ensures a long service life of the product. The stones and the heating elements are housed in separate chambers.

An integrated safety switch is offered as an accessory for the Concept R sauna heater. This ensures optimum safety for the sauna without needing to sacrifice the attractive design. It also enables a remote control to be connected to the sauna heater.

Innovative technology:

- Sauna heater capacity: 9 kW, 10.5 kW, 12 kW and 15 kW
- Exterior parts made of powder coated stainless steel
- Interior parts made of stainless steel
- Easy to service due to detachable connection box
- 3-coating technology
- Adjustable feet
- Optional:
 - “Emotion” wooden railing (linden or walnut) pre-fitted

Concept R combi

For fans of gentle infusions.

The Concept R combi evaporator heater combines advanced sauna technology and design. The combi sauna heaters are equipped with an evaporator offering an effortless, even more gentle sauna experience. The sauna heater features a separate ceramic fragrance and herb bowl.

The Concept R represents style at the very highest level. The smooth, straight-lined shape of the Concept R was used for the combination model and can be easily planned into a modern sauna cabin. The railing made of light or dark wood lends the robust sauna heater a softer edge.

The stones and the heating elements are housed in separate chambers. This advanced technology allows the heater to warm up quickly and ensures a long service life of the product.

An integrated safety shutdown device is available as an accessory for the Concept R sauna heater. This also allows the heater to be started remotely.

Datasheet

kW	Item no.
9	CP-RCB-090
10.5	CP-RCB-105

Innovative technology:

- Sauna heater capacity: 9 kW and 10.5 kW
- Exterior parts made of powder-coated stainless steel
- Evaporator output: 2.5 kW
- Connection for low water detection
- Interior parts made of stainless steel
- Dishwasher-proof cover basins
- Easy to service thanks to removable connection boxes
- 3-coating technology
- Adjustable feet
- Optional:
 - Fixed water connection
 - “Emotion” wooden railing (linden or walnut) pre-fitted

Concept R mini

Compact sauna heater

The latest sauna technology was used in the design of the Concept R mini series. Safety features such as the designer heater railing make the sauna heaters very popular for small saunas. The railing is made of wood and gives the black steel of the sauna heater a softer touch.

The Concept R mini was designed with lasting infusion experiences in mind. The stainless steel interior parts ensure that the heart of the sauna cabin has a long service life. One particular focus of the design phase was easy maintenance with the result that installation and servicing are both easy to perform. The heater can be installed on the wall, or be installed using an optional foot to save space.

Innovative technology:

- Sauna heater capacity: 3.5 kW, 4.5 kW, 6 kW and 7.5 kW
- Exterior parts made of brushed and powder-coated stainless steel
- Interior parts made of stainless steel
- Space-saving installation
- Easy to service due to easily removable terminal box cover
- Quick and easy wall mounting
- Optional:
 - Bracket set for heater railing
 - Wooden railing (linden or walnut)
 - Black, powder-coated stainless steel base
 - Foot cover (linden or walnut)

Concept R mini combi

The source of gentle infusions in small saunas

The Concept R mini combi is suitable for fans of gentle infusions. An evaporator is integrated in the inside of the combination heater. This creates gentle infusions that give off long-lasting warmth. The combi heater is the perfect choice for fans of scented infusions.

The Concept R mini combi is equipped with a separate ceramic fragrance and herb bowl. The sauna fragrances further improve the mood.

The Concept R mini combi was designed with lasting and effortless infusion experiences in mind. The stainless steel internal parts ensure the durability of the heart of the sauna cabin. One particular focus of the design phase was easy maintenance with the result that installation and servicing are both easy to perform. The heater can be installed on the wall, or be installed using an optional foot to save space.

Innovative technology:

- Sauna heater capacity: 4.5 kW, 6 kW and 7.5 kW
- Evaporator output: 1 kW (at 7.5 kW – 1.5 kW)
- Connection for low water detection
- Interior parts made of stainless steel
- Space-saving installation
- Easy to service due to easily removable terminal box cover

Qube 90 / 150

For those with exclusive taste in sauna equipment

The Qube fulfils the wishes of those with the most exclusive tastes in sauna equipment. The clear lines and the modern black in combination with the stainless steel collar of the heater really draw the eye.

The carefully selected materials and the innovative collar construction make the Qube the perfect choice for public baths, hotels or large family saunas.

sentiotec creates a relaxing sauna experience and infusions that appeal to all the senses. The stone chamber of the stylish Qube heater consists of a graphite black bottom part and is framed by brushed steel.

The outer shape of the Qube means that it can be placed anywhere in the sauna furnishings as all sides of the Qube can face the user.

The optional, wooden safety railing gives the otherwise robust appearance of the Qube an air of lightness and also ensures safety in the sauna.

The stylish exterior of the Qube has a threefold coating, thanks to which the temperature of the exterior of the sauna heater remains low as the heater warms the sauna.

The Qube sauna heaters are easy to maintain as the stone chamber and heating elements are separated from each other. The separate stone chamber allows the heating elements to be maintained without the stones having to be removed. The construction also protects the heating elements against excess water and the weight of the stones, thereby prolonging the service life of the heating elements. The detachable connection box makes it possible to conduct assembly and maintenance work quickly and simply.

Innovative technology:

- Sauna heater capacity: 9 kW, 10.5 kW, 12 kW and 15 kW
- Exterior parts made of brushed and powder-coated stainless steel
- Interior parts made of stainless steel
- Easy to service due to detachable connection box
- 3-coating technology
- Adjustable feet
- Optional:
 - Bracket set for railing
 - Wooden ring (linden or walnut)

Datasheet

Qube 240 / 360

For professional infusion experiences

The Qube is a sauna heater designed for commercial and continuous operation and provides gentle infusions. It stands out thanks to its stylish design and long service life. The carefully selected materials and the innovative collar construction make the Qube the reliable choice for public baths and hotels.

The stone chamber of the stylish Qube heater consists of a graphite black coat and is framed by brushed steel. As all sides of the Qube can face the user, it can be placed anywhere in the sauna. We recommend rounding off the sauna heater with the wooden railing.

This gives the otherwise robust appearance of the Qube an air of lightness and also ensures safety in the sauna.

The stylish exterior has a threefold coating, thanks to which the temperature of the exterior of the sauna heater remains low as the heater warms the sauna.

Innovative technology:

- Sauna heater capacity: 18 kW / 21 kW / 24 kW and 30 kW / 33 kW / 36 kW
- Exterior parts in brushed and powder-coated stainless steel
- Interior parts made of stainless steel
- Easy to service due to detachable connection box

Auxiliary evaporator R

The perfect complement to Concept R

The additional evaporator R creates steam in your sauna as a standalone device or as an expansion module for the Concept R heater series.

Retrofitting the additional evaporator R in existing sauna cabins with infusion heaters is simple.

The additional evaporator R stands out due to its intelligent product design with high-quality materials such as porcelain and stainless steel. The evaporator, which has an output of 2.5 kW works underneath the porcelain storage compartment for fragrant oils and herbs and thereby creates an optimum wellness climate in the sauna cabin.

100 E

230/400 V 3.6 – 9 kW 3 – 14 m³ 20 kg

Datasheet

The 100 E represents outstanding value for money.
A compact heater with a clear design.

Innovative technology:

- Sauna heater capacity:
3.6 kW, 4.5 kW, 6 kW and 9 kW
- External control unit
- Quick and easy assembly
- Suitable for monophase connection
- Corner mounting easily possible (3.6 kW)

kW	Item no.
3.6	ST136400BE
4.5	ST145400BE
6	ST160400BE
9	ST190400BE

200 E

230/400 V 6 – 9 kW 3 – 14 m³ 20 kg

Datasheet

The 200 E makes an impression with its high-quality design.
A solid heater with a heater cover made of elegant cast aluminium.

Innovative technology:

- Sauna heater capacity: 6 kW and 9 kW
- External control unit
- Quick and easy assembly
- Suitable for monophase connection

kW	Item no.
6	ST260400BE
9	ST290400BE

Viking

Datasheet

sentiotec sauna heaters with integrated control unit
The Viking impresses with its slim and simple design.
The convenient height of the knobs makes it very
user-friendly. The stainless steel outer case makes
it very easy to care for, and very durable.

Innovative technology:

- Sauna heater capacity: 4.5 kW, 6 kW, 8 kW and 9 kW
- Integrated control unit
- Quick and easy assembly
- Suitable for monophase connection
- Free choice of the side on which the knob is installed

kW	Item no.
4.5	ST345400
6	ST360400
8	ST380400
9	ST390400

Viking E

Datasheet

The Viking E impresses with its slim and simple design.
The stainless steel outer case makes it very easy to care for,
and very durable.

Innovative technology:

- Sauna heater capacity: 4.5 kW, 6 kW, 8 kW and 9 kW
- External control unit
- Quick and easy assembly
- Suitable for monophase connection

kW	Item no.
4.5	ST345400E
6	ST360400E
8	ST380400E
9	ST390400E

Viking combi

Datasheet

The Viking combi creates a perfect steam sauna
experience with its additional evaporator.

Innovative technology:

- Sauna heater capacity: 6 kW and 9 kW
- Evaporator output: 2 kW
- Connection for low water detection
- External control unit
- Quick and easy assembly

kW	Item no.
6	ST360400S
9	ST390400S

Rear-wall heater

The rear-wall heater – its intelligent design
guarantees a one-of-a-kind sauna experience.

Innovative technology:

- Sauna heater capacity: 9.0 kW and 10.5 kW
- External control unit
- Stainless steel inner and outer casing
- Rust and scale-free heating rods
- Service friendly
- Patented rear-wall maintenance system
- 100 % stainless steel, integrated drip tray, removable stone basket, detachable connection box
- Detachable infusion channel
- Hose (1.5 m) and infusion bowl included in delivery

kW	Item no.
9	HW0-090NS-P
10.5	HW0-105NS-P

Datasheet

IKI Monolith

Nordic design meets traditional Finnish craftsmanship,
making it simply different from everything else.
The IKI Monolith not only stands out with its design
and craftsmanship from Finland but also guarantees
you a special sauna and infusion experience.

Innovative technology:

- Sauna heater output: 9.0 kW
- Exterior parts in brushed stainless steel
- Interior parts made of stainless steel
- After infusion, steam is released in all directions, providing long-lasting and even heat distribution
- By controlled addition of water in the lower or upper area of the heater, the steam burst can be mild or strong
- Easy loading with stones by opening of one of the side parts
- Optional:
 - Stainless steel edging

The large volume of stones allows for perfect infusion, but whilst also extending the warm-up time.

kW	Item no.
9	MLT-090NS

Datasheet

Tower Heater

SAWOTEC sauna heaters
The trendsetter for your sauna!

Innovative technology:

- Sauna heater capacity: 9 kW, 10.5 kW and 12 kW
- Only available with an external control unit
- Even distribution of heat in all directions
- Mild or strong steam burst by controlled addition of water
- Screw-on feet for perfect alignment
- Easy loading with stones by opening the centre stone basket
- Air duct installed on the inside

Stones must be ordered separately.

The large volume of stones allows for perfect infusion, but whilst also extending the warm-up time.

kW	Item no.
9	TH6-090NS
10.5	TH6-105NS
12	TH6-120NS

Datasheet

Wall Tower Heater

SAWOTEC wall model
The sauna heater is also available as a space-saving wall model.

Innovative technology:

- Sauna heater capacity: 9 kW
- Only available with an external control unit
- Space-saving through wall mounting
- Even heat distribution
- By controlled addition of water in the lower or upper area of the heater, the steam burst can be mild or strong
- Screw-on feet for perfect alignment
- Easy loading with stones by opening of the centre stone basket
- Air duct installed on the inside

Stones must be ordered separately.

The large volume of stones allows for perfect infusion, but whilst also extending the warm-up time.

kW	Item no.
9	TH5-90NS-WL

Datasheet

Corner Tower Heater

The tower heater is also available
as a space-saving corner model.

Innovative technology:

- Sauna heater capacity: 9 kW
- Only available with an external control unit
- Even distribution of heat in all directions
- By controlled addition of water in the lower or upper area of the heater, a mild or strong burst of steam can be produced
- Screw-on feet for perfect alignment
- Easy loading with stones by opening of the centre stone basket
- Air duct installed on the inside

Stones must be ordered separately.

The large volume of stones allows for perfect infusion, but whilst also extending the warm-up time.

Scandia NEXT

SAWOTEC sauna heater
The Scandia NEXT is suitable for small to medium-sized sauna and stands out thanks to its large container for stones.

Innovative technology:

- Sauna heater capacity: 4.5 kW, 6 kW, 8 kW and 9 kW
- Available with an external or integrated control unit
- Flexible control unit installation (right or left – NB model)
- Cover frame and heat shield made of stainless steel
- Brushed stainless steel outer casing
- Inner casing and rock grate made of aluzinc
- Rust and scale-free heating rods
- Also available as a single-phase heater
- Optional:
 - Drip tray HP02-016

No preset time for models with built-in control unit.

Scandia NEXT combi

SAWOTEC sauna heater
Steam sauna experience in a more compact and attractive design.

Innovative technology:

- Sauna heater output 6 kW, 8 kW and 9 kW
- Evaporator output: up to 2 kW
- External control unit
- Cover frame and heat shield made of stainless steel
- Brushed stainless steel outer casing
- Inner casing and rock grate made of aluzinc
- Rust and scale-free heating rods
- Connection for low water detection
- Quick and easy assembly
- Heating element for the evaporator is under the tank and does not come into contact with water
- Includes soapstone bowls for fragrant essences
- Steam outlet grille for herbs
- Optional:
 - Drip tray HP02-016

kW	Item no.

Cut-off rocker switch

For your safety: a modular shut-off rocker switch for sauna heaters.

Innovative technology:

- Safety shut-off for sauna heaters
- Shut-off when load is placed on the rocker switch (e.g. towel)
- Suitable for installation on the wall above the sauna heater
- Fulfils the requirements for remote operation as per DIN EN 60335-2-53
- In a round and rectangular version and in different dimensions:
 - Rectangular: 220 x 400 mm or 350 x 400 mm or 500 x 500 mm

Door sensor Home

For the home.com4 RS485 and PRO series control units (from 2023)

The door sensor allows the sauna heater to be switched on remotely in accordance with standards.

Innovative technology:

- Small and space-saving
- Easy installation
- High ease of use

Item no.

SAB00102

Door sensor system

For all control units with a remote start function: PRO series, wave.com4 11 kW, home.com4

The door sensor allows the sauna heater to be switched on remotely in accordance with standards. The sauna door must be closed for the remote start to be activated via the control panel.

Scope of delivery:

- Door monitoring control unit
- Illuminated button with 2 m connection cable
- Door sensor with 2 m connection cable
- Magnet

Modern sauna technology

home.com4 is a control unit with Bluetooth technology that enables the control of sauna functions with a mobile device. home.com4 controls all types of saunas: biosaunas, conventional saunas, infrared saunas or combinations of the two – hybrid saunas. You can also control the lighting and music playback in your sauna.

The functions can also be controlled using the stylish operating unit. The selection menu is clear and self-explanatory. home.com4 is the perfect solution for family and public saunas and can be secured with an access code.

home.com4 turns your intelligent device into the sauna control panel:

- User-friendly Bluetooth control with your mobile device.
- The program for mobile devices can be downloaded from the App Store and Google Play. It also contains a demo version.
- All control functions of the sauna in one device
- Control of max. for 10.5 kW sauna heaters
- Connection of an additional power unit (required for electric sauna heaters over 10.5 kW)
- Control of the infrared radiator (3.5 kW or max. 500 W with dimmer)
- Control of the evaporator max. 3.5 kW
- Control of the coloured LED lighting (max. 4 units RGBW coloured light groups to be controlled by DMX)
- Control of a light source of max. 100 W
- Control of the fan (max. 100 W)
- Available in black and white
- Automatic post-drying program
- User profiles

For WiFi use:

Item no.	Item no.

with RS485 interface for bus connection to the house bus system as well as for MySento in combination with S-WIFI01

PRO B2, PRO B3

For commercial sauna use

Great demands are placed on control systems for commercial use. sentiotec has risen to this challenge with the versatile PRO series, designed for demanding objectives.

The PRO B control unit is mostly used in saunas in public baths and hotels. The sauna cabin can be easily controlled, in particular if the PRO Net control unit is connected to the Internet.

Only high-quality and durable materials are used in the devices. They provide convenient user-friendliness with a clear selection menu.

The lighting and the ventilation of the sauna can also be controlled with the control unit.

Clear display to control conventional sauna PRO B2:

- Very user-friendly
- Digital temperature display
- Control of the electric heater (max. 10.5 kW)
- Connection of an additional power unit (required for electric heaters over 10.5 kW)
- Can be remotely controlled (PRO Net/standard RS485 interface)
- Connection for safety devices of the electric heater
- Potential-free remote start
- Heating time limit can be extended (6/12/18/24)
- One or two-sensor system

PRO B3 (in addition to PRO B2):

- Digital humidity display
- Automatic post-drying program
- Control of the evaporator (max. 3.5 kW)
- Lighting & ventilation (not controllable)

PRO C2, PRO C3

For new sauna experiences

The combination of electric heaters and infrared radiators gives rise to a new type of sauna experience. Sauna heaters and infrared radiators can be easily and conveniently controlled with the aid of the PRO C control unit.

The PRO C control unit has been designed for commercial use and for controlling sauna heaters with a high output. The lighting and the ventilation of the sauna can also be controlled with the control unit.

The PRO Net allows the device to be controlled remotely.

Clear display for controlling the hybrid sauna PRO C2:

- Easy user access
- Saving user profiles
- Digital temperature display
- Control of the electric heater (max. 10.5 kW)
- Connection of an additional power unit (required for electric heaters over 10.5 kW)
- Control of the lighting and ventilation with dimmer
- Control of the infrared radiators (switchable 3.5 kW or max. 500 W, dimmable)
- Can be remotely controlled (PRO Net/standard RS485 interface)
- Connection for the safety device of the electric heater
- Timer function and setting of the operating time
- Potential-free remote start
- One or two-sensor system
- Eco mode

PRO C3 (in addition to PRO C2):

- Digital humidity display
- Automatic post-drying program
- Control of the evaporator (max. 3.5 kW)

Experience the sauna with all your senses.
With the PRO D series from sentiotec.

The **PRO D family** from **sentiotec** impresses with its modern and timeless design and can be installed either outside or inside the sauna. In other words, directly in the sauna, right next to you.

The **PRO D2** allows you to easily and conveniently bring your sauna heater to the desired temperature. And if you would like it to be a few degrees warmer, you do not have to get up to make changes. With the **PRO D series**, you can adjust all settings from the bench.

With the **PRO D2i**, you also have the option to place and operate an infrared radiator in your sauna. An additional operating unit can be placed right next to the radiator to control the intensity.

In addition to the functions of the **PRO D2**, the **PRO D3** gives you the option of operating a combi heater and creating a pleasant humidity in your sauna.

PRO D Bluetooth

Sound:
You want to listen to your favourite music, or maybe even make a phone call in the sauna, or communicate with your voice assistant? **PRO D Bluetooth** allows you to connect your mobile phone easily and conveniently and adjust the volume of the music without getting up from the bench.

More on page 90

PRO D DMX

Light:
And if you would like to experience a sunset in the sauna and glow in the reddish light, the **PRO D DMX** puts the full spectrum of colour at your fingertips. This operating unit can also be mounted directly next to you on your favourite side and blends in perfectly with the cabin.

PRO D2, PRO D2i

Innovative technology in the PRO D2:

- 2-part sauna control unit (up to 4 sauna operating units can be used)
- Patented technology
- Installation of the operating unit possible inside and outside the sauna
- Maximum switching load of the heating system: 10.5 kW
- Light and fan switchable and dimmable (max. 100 W)
- Heating time limit can be raised for commercial use (6/12/18/24 h)
- Energy-efficient electronics
- Connection for safety devices or door monitoring
- Single or dual sensor system
- Digital and precise-to-the-minute time preset
- Digital temperature preset and temperature display
- Remote start via potential-free contact
- Eco mode
- Status output
- Connection of an additional power booster (required for electric heaters with outputs of more than 10.5 kW)
- User profiles

Innovative technology in the PRO D2i (in addition to the PRO D2):

- Additional output switchable up to 3.5 kW or 500 W dimmable (for infrared heater, for example, or infrared heater panels)
- Optional: Additional output control panel

Optional:

- WiFi capable in connection with the “BUS-CON-D” and “S-WIFI01” as well as door sensor system (page 41) or switch-off rocker (page 40) capable for WiFi use
- PRO D BUS converter for RS 485 connection for house bus systems
- Power unit featuring a protection class IP65 housing (protection against jets of water)

Optional: PRO D power unit
Can also be installed inside the sauna. Power unit featuring a protection class IP65 housing. The desired operating unit must be ordered separately.

PRO D3, PRO D3i

Innovative technology in the PRO D3 (in addition to the PRO D2):

- Maximum evaporator performance: 3.5 kW
- Operation with a real humidity sensor or clocked (Sensor must be ordered separately)
- Post-drying programme
- Digital humidity preset
- Humidity indicator (only with humidity sensor)

Innovative technology in the PRO D3i (in addition to the PRO D3):

- Additional output switchable up to 3.5 kW or 500 W dimmable (for infrared heater, for example, or infrared heater panels)
- Optional: Additional output control panel

Optional:

- WiFi capable in connection with the “BUS-CON-D” and “S-WIFI01” as well as door sensor (page 41) or switch-off rocker (page 40) capable for WiFi use
- PRO D BUS converter for RS 485 connection for house bus systems
- Power unit featuring a protection class IP65 housing (protection against jets of water)

Optional: PRO D power unit
Can also be installed inside the sauna. Power unit featuring a protection class IP65 housing. The desired operating unit must be ordered separately.

MySentio

Your **sentiotec** sauna experience is ready when you are.

With the new **MySentio app**, all the sauna functions are in the palm of your hand! The simple control panel allows you to easily set your sauna as required using a mobile device, wherever and whenever you want.

The **MySentio app** controls all types of sauna: conventional saunas, infrared saunas or combinations of the two – hybrid saunas. You can also control the coloured lighting in your sauna.

Many **sentiotec** control units can be easily upgraded to the new technology using **MySentio WiFi** or **MySentio Remote**.

MySentio WiFi

For home.com4 RS485 and PRO series

With **MySentio WiFi**, almost all functions can be comfortably and conveniently used via the MySentio app. To ensure safe operation, appropriate safety precautions must be taken (e.g. Shut-off rocker or door sensor, page 40).

MySentio WiFi
For more information, see page 53

MySentio Remote

For wave.com4 11 kw and sentiotec steam generator (p. 88)

With **MySentio Remote**, you can switch on your sauna with the presets selected via the control unit while you are out of the house. For safe operation, you need the following accessories: Shut-off rocker or door sensor system, page 40.

MySentio Remote
For more information, see page 54

MySentio WiFi

The most convenient way to operate your sauna when away from home. All functions in one app.

Innovative technology:

- Plug & Play
- WiFi dongle*
- User-friendly control with a mobile device
- The app can be downloaded for mobile devices in the Apple App Store or Google Play Store. (Demo version included)
- All functions of the connected sauna control unit**
- Control of temperature and humidity
- Control of infrared radiators
- Control of the coloured LED lighting
- Control of a light source
- Control of the fan
- Multiple user programs
- Low power technology

*The WiFi dongle is connected to the control unit by means of a network cable and must be within range of your network (WLAN).
For the **PRO D series**, an additional **BUS converter** is necessary.

MySentio WiFi
Item no. S-WIFI01 / 1-053-313

Can also be retrofitted for existing controllers (downward compatible).
More detailed information can be found here:

Datasheet

**Compatible devices / functions:

	Sauna temperature	Humidity	Infrared (additional output)	Coloured light	Light switchable	Light dimmable	Fan switchable	Fan variable	Operating time	User program

PRO D3i	X	X	X		X	X	X	X	X	X

MySentio Remote

Start your sauna and steam bath while out and about.

Innovative technology:

- Mobile use and cloud technology
- WiFi connected (easy connection and setup)
- Status functions available (switched on)
- For all control units with potential-free remote start input (sauna, infrared and steam bath control units)

Operating a sauna heater using a remote start function requires appropriate safety precautions to be taken (e.g. safety shutdown or door monitoring)

Datasheet

Installation box

Relay box

To generate extended functions (e.g. switching on an external device), the relay box must be connected between the sauna control unit and the WiFi dongle.

Installation box

Dongle

App

Configurable switching functions

- External device on when heater is on
- External device on when light is on
- External device on when there is a lack of water
- External device on when there is an error

Connectivity overview home.com4 & PRO Series

wave.com4 11 kW

Operating unit for basic & humidity module
The patented interior & exterior operating unit
in the innovative wave design.

Innovative technology:

- Patented technology – installation possible inside and outside the sauna
- Flat mounting in the cabin (only 10 mm visible)
- Temperature resistant up to 120 °C
- Moisture-proof
- Easy-view display (large 7-segment display)
- Several operating units (up to four) can be connected to the same power supply unit
- Easy mounting with standard core drill
- Various colour and material variations available
- Digital temperature readout on the operating unit
- Ideal for outdoor saunas

Item no.

WC4-B-D

WC4-B-S

Datasheet

Basic & humidity module

The wave.com4 leaves nothing to be desired. The modular power supply unit offers all conventional functions. You decide how your sauna is equipped – wave.com4 makes it possible!

Innovative technology (basic module):

- Protection class: IP65
- Remote start with optional door monitoring
- Modular, expandable control system
- Temperature setting from 30 to 110 °C (in 1 °C increments)
- Programmable special functions
- Dimmable lighting, phase control
- Several operating units can be connected to the same power supply unit (wave.com4 operating units must be ordered separately)
- Separate heating and lighting circuit (EN 60335-2-53 & EN 60335-1)
- Safety temperature limitation
- Heating time limit from 1 to 12 hours can be selected
- Preset time from 1 to 24 h
- Automatic fault detection (damaged sensor, sensor short-circuit, etc.)
- Menu in several languages
- Eco mode

Basic module:

Item no.

WC4-B-11

Humidity module:

Item no.

WC4-H-PCB

NOTE: Heater sensor F1, bench sensor F2 and humidity-temperature sensor (FTS2) must be ordered separately. (See page 55)

K1-NEXT

Datasheet

Top quality at a great price.
The first step to sauna enjoyment.

Innovative technology:

- One-piece housing with integrated control unit
- Temperature progressively adjustable from 40 °C to 125 °C
- Temperature and safety sensor for the heater
- Switches off on sensor interruption and short circuit
- Heating time limit 6 hours
- Light connection
- One-sensor system

Item no.

K1-9-N

K2-NEXT

Datasheet

Digital display. Despite full functionality with timer and digital display at a low price.

Innovative technology (in addition to K1-NEXT):

- Digital display: Enter the preset time (in 15 minute intervals)

Item no.

K2-9-N

K3-NEXT

Datasheet

With humidity module

This control unit combines sauna and humidity operation at a high level of quality at a low price.

Innovative technology (in addition to K2-NEXT):

- Humidity operation, selectable temperature from 40 °C to 65 °C
- Evaporator output: 3 kW
- Low-water display
- Acoustic signal
- Temperature and humidity mode display, as well as preset time in 15-minute increments
- Two-sensor system

Item no.

K3-9-N

K4-NEXT

With temperature display
Even with full functionality including timer and digital temperature display, this comes at a low price.

Innovative technology (in addition to K1-NEXT):

- Digital temperature display
- Digital display: Entering the preset time (up to 24 hours, accurate to the minute)
- Optical fault display

Datasheet

Item no.

K4-9-N

Power booster

Additional power unit for expanding the output range of the control units.

- 0-S2-18 can also control 9 kW
- 0-S2-18S in addition to S2-18: low-noise
- 0-S2-30 can also control 21 kW

Item no.

Infrabox basic S / Infrabox

3.5 kW

The Infrabox is a versatile, modern, digital control unit for infrared saunas and infrared radiators. The stylish, unobtrusive yet clear control panel can be easily mounted where it is needed.

It is particularly user-friendly thanks to the LED displays on the control panel. The Infrabox allows you to control the duration, the infrared radiators and the lighting.

Innovative technology of the Infrabox basic S:

- Suitable for infrared heating systems with an IR radiator, IR foils, or IR plate technology
- One heating output: dimmable in five levels (max. 1300 W) or switchable to max. 3500 W
- Foil temperature monitoring (sensor optional)
- Remote start / enabling input
- A variety of individual setting options using dip switches
- Heating time limit (duration) can be extended (6 h standard, extendable to 12 or 24 h)
- Optional: Safety temperature limiter
- Available in black and white
- Optional seat sensor: switches on the heating device when approached

Innovative technology of the Infrabox (in addition to Infrabox basic S):

- Dimmable light output (max. 100 W)

Pro D infra

3 kW

The all-rounder among the infrared control units!

Innovative technology:

- Suitable for infrared heating systems with IR radiators, IR foils or IR plate technology
- Control in power levels (also for full-spectrum radiators, such as Vitae)
- Two separately controllable heating circuits each with two outputs of 1500 W (max. 3000 W)
- Bench sensor included
- Operating unit in PRO D design (must be ordered separately)
- Digital display of heating time, intensity levels or temperature
- Predefined user programs (relaxation, warming, short and long endurance)
- Cascadable power supply units up to 12 kW, option of connecting multiple radiators
- Multiple operating units can be connected to a power supply unit
- Heating time limit can be extended (6 h standard, extendable to 12 or 24 h)
- Two switchable additional outputs
- Can be operated from inside and outside
- Heat and moisture-proof product
- Power unit also available as a dimmable version only

Vitae full spectrum radiator

Maximum power immediately.
The effective use of the radiant heat is made possible by the Vitae infrared radiators.

Innovative technology:

- No pre-heating, the maximum output is immediately available
- Intrinsically safe due to overtemperature protection
- Heat-resistant glass ceramic cover
- Very good, uniform heat distribution due to built-in reflector
- Optional: decorative panel in black or stainless steel (see Fig.) or wooden lattice to 500 Watt
- Offers the degree of protection IPX4 (suitable for saunas) in the installed state in combination with the front panels or wooden backrests
- Available in 350, 500, 750 and 1300 W
- Infrared radiator: A 24%, B 55%, C 21%

* Front panels and wooden lattice are not included in the scope of delivery and must be ordered separately. (see page 85)

DIR-750-R
DIR-1300-R

Radiation transmissible dark glass

Datasheet

Nextrema full spectrum radiator, white

Mild infrared radiator.
The white filter glass made of three-fold fired glass ceramics reduces the spectral components which, due to interaction with water molecules in the skin, would otherwise place an undesirable thermal load on the uppermost layer of skin.

Innovative technology:

- Infrared A filter
- Mild infrared emission for the body and gentle heat due to filtering out of the microwave radiation
- No pre-heating, the maximum output is immediately available
- Intrinsically safe due to overtemperature protection
- Heatproof glass ceramic covering
- Very good, uniform heat distribution due to built-in reflector
- Optional: dark or stainless steel decorative panel (see Fig.) or wooden lattice to 500 Watt
- Offers the degree of protection IPX4 (suitable for saunas) in the installed state in combination with the front panels or wooden backrests
- Available in 350, 500 and 750 W
- Infrared radiator: A 9%, B 57%, C 34%

* Front panels and wooden lattice are not included in the scope of delivery and must be ordered separately. (see page 85)

ECO full-spectrum radiators

350 – 750 W

Maximum power without pre-heating
ECO full-spectrum radiator – effective in price and performance

Innovative technology:

- No pre-heating, the maximum output is immediately available
- Intrinsically safe due to overtemperature protection
- Very good, uniform heat distribution due to built-in reflector
- As installed, in combination with front panels or wooden backrests, the glass version offers IPX4 protection (suitable for saunas), the lattice version IPX2 protection (suitable for infrared cabins)
- Optional: Decorative panel in brushed stainless steel or black, painted stainless steel, wooden grilles can be used for radiators up to 500 W
- Infrared radiation with glass: A 24%, B 55%, C 21%
- Infrared radiation with lattice: A 14%, B 40%, C 46%

Infrared heating plates

100 – 510 W

Panel heating
Infrared heating plates ensure an all-round pleasant, relaxing sensation of warmth.

Innovative technology:

- Available from 100 W to 510 W
- Panel heating for infrared and sauna cabins
- Emits in the long-wave infrared range
- Can be combined with full spectrum radiators
- Easy assembly
- Suitable for all sentiotec infrared control units
- Heating plates available in two versions (with or without wooden lattice)
- Insulated rear side ensures energy-efficient heat emission towards the front
- Requires no ventilation
- Optional: plate module, suitable as lower-leg-level radiator

SAWOTEC steam generators

The latest steam generators – extremely powerful and reliable steam units with connections for light (dimmable), ventilation and aroma pump.

Innovative technology:

- Evaporator output 3.5 kW, 6 kW, 7.5 kW, 9 kW, 12 kW, 15 kW
- Stainless steel inner and outer casing
- More steam at the press of a button:
The button (accessory) installed in the steam cabin can be used to trigger a steam burst, thereby increasing the amount of steam.
- Fast cleaning: With the Auto-Drain function, an automatic water rinse is triggered after operation of the steam generator to rinse away lime deposits and dirt particles.
- Comprehensive range of accessories available:
Aroma pump, pushbutton for steam, etc.

PROD-BT-B

PROD-BT-W

Exciters

Datasheet

Structure-borne sound transducers:

An “invisible” music experience.

Innovative technology:

- Two 25 W electromagnetic exciters / structure-borne sound transducers
- Vibrations are transferred to the sauna wall/ceiling
- “Invisible” loudspeakers – no negative influence on the design
- Easy installation on the rear wall of the sauna or sauna ceiling with wood screws
- Temperature range: -25 °C to 70 °C
- Acoustics strongly dependent on the material, dimensions, and shape of the surface to be excited

Item no.

WC4-BT-EXC

Loudspeakers

Datasheet

Loudspeakers

Innovative technology:

- Two 20 W loudspeakers for ceiling mounting
- Heat and moisture-proof product
- Cut-out dimension: Ø 110 mm
- Suitable for the sauna interior
- Temperature range: -40 °C to 110 °C
- White-painted metal cover
- Easy installation with spring clips

Item no.

WC4-BT-SPK

PRO D DMX

The new PRO D DMX colour light control is an innovation for all the senses. Total relaxation through the latest technology!

Innovative technology:

- Suitable for RGBW LED tubes and spotlights via DMX driver
- Two colour light groups which can be operated separately or together
- Seven brightness levels
- Seven colours to choose from: white, purple, blue, turquoise, green, yellow, red
- Seven-speed colour changer
- Suitable for the sauna interior

Item no.

RGBW-DMX driver

- 2 versions:
 - > DMX CV 2 x 4-channel for 12 V/24 V RGBW tubes, power output 2 x 75 W
 - > DMX CC 2 x 4-channel for 350 mA RGBW spotlight, power output 2 x 25 W
- Universal DMX512 protocol, 8-bit RGBW
- 2 separately controlled outputs
- Straightforward setting of DMX addresses using rotary button
- Integrated, modifiable test programmes with colour change and much more
- Compatible with home.com4 sauna control unit

RGBW range of lighting

The RGBW lighting range allows you to create your own individual coloured light experience and gives you unlimited options to design your sauna.

RGBW spotlight:

- LED 18 W, square 174 x 174 x 95 mm
- LED 5 W, round 90 x 90 mm (DxH) RGBW
- red / green / blue / warm-white (3000 K)
- Activated using 4 x 350 mA constant current, CC DMX driver
- High-quality aluminium and tempered glass
- Can be positioned directly above the sauna heater
- Suitable for steam baths and steam showers, IP65
- 2 m temperature-resistant connection cable
- Quick and easy assembly

Item no.

Affordable product

Warranty conditions

sentiotec GmbH is convinced of the quality of its products, and we want you to benefit from them in the future!

Warranty conditions for technology

We provide a 2-year manufacturer's warranty on all of our control units in the sentiotec sauna, sentiotec infra and sentiotec light&media product lines. We provide a 2-year manufacturer's warranty for infrared radiators and additionally 5000 operating hours for DIR radiators. The warranty period for all sauna heaters is generally 2 years.

Requirement for this warranty:

- The control units have been installed by an authorised specialist company;
- the devices are operated according to the sentiotec operating manuals;
- the warranty claim is received by sentiotec within the warranty period.

Excluded from the warranty are:

- Deficiencies or damage caused by non-intended use;
- all consumable materials and consumable objects, such as heating elements, etc.

Warranty conditions for cabins:

We provide a five-year warranty on all of our solid wood and element cabins of the line sentiotec sauna and sentiotec infra for private usage. For commercial usage, the warranty is two years.

Requirement for this warranty:

- The corresponding invoice is presented,
- a detailed description of the defect is enclosed,
- the cabins were installed in accordance with the sentiotec installation and operating instructions,
- the warranty claim is received by sentiotec within the warranty period.
- In the case of outdoor cabins, care must be taken by the consumer to protect the wood by painting it or leaving it in with a wood protection paint.

Excluded from the warranty are:

- Deficiencies or damage caused by non-intended use,
- cabins that were modified without the explicit approval of the manufacturer,
- pitch pockets and pitch that has emerged,
- damage and discolouration of the wood due to inadequate ventilation or a non-intended installation site,
- natural changes in the wood such as discolouration, crack formation, shrinkage, swelling or similar changes due to the properties of the wood.

Pitch pockets are not grounds for return, since they can always appear in spruce wood and the depth at which they lie cannot be detected during the sorting out process. Pitch pockets are not grounds for return, if these are just under the surface, heat can cause them to soften and "bleed". Remove leaking pitch with a rag soaked in acetone. If only droplets of pitch occur, allow these to harden and then carefully scrape them off with a knife.

The warranty period starts from the date of invoice of the cabin manufacturer. A requirement is the presentation of the original invoice. If no original invoice is available, the month of manufacture, noted on the type plate of the product, is used as the basis for the start of the warranty period. The warranty period is neither extended nor renewed by warranty services.
