Product Overview

3

Connection Method

- 1 Plug the HDMI port(4) of receiver into the input source on the TV/Monitor, and plug the USB A port(5) of receiver into the TV/Monitor or connect a charger adapter.
- 2 Plug the HDMI port(2) of the transmitter into a laptop or other device with HD video output function, and use our included USB-C to USB-A cable to connect a power supply and the PD3.0 port(3) to power the transmitter. After the indicator light enters the fast flash state, wait for 10 seconds to complete casting.

The OnlyQuestion We Can't Fix Is The One We Don't Know

Please make sure that the power of the laptop is sufficient. The PD3.0 port on the transmitter of this product cannot power the laptop, it only powers the transmitter via our USB-C to USB-A cable.

Pairing Instructions

The product has finished paired out of the factory. In case of pairing failure due to improper operation or other circumstances during use, it is necessary to restore and repair the device as follows:

- 1 Connect the receiver to a TV/monitor, and use a paper clip to prod the reset hole of the receiver for 2 seconds until the TV/Monitor shows the text "Release the button to pair with Mate"

5

- 2 Connect the transmitter to the computer, When the TV/monitor shows "Ready to pair", press the button of the transmitter for 5 seconds and wait until the indicator is off, Pairing is complete.

Troubleshooting

Q: Why can't get connected?

A: 1. Ensure that the connection is by following the instructions. Do not press the button on the sending end during the connection.
2. If the issue is not fixed, remove the TX and insert it again.

Q: Can a computer without an HDMI interface be used?

A: Yes, please use an HDMI interface converter to connect to your computer.

Q: Is transmission affected by long distances and walls?

A: Yes, signal reception can be disrupted by distance and obstacles. The product's maximum transmission distance is 98 feet/30 meters, with a latency of less than 0.1 seconds.

7

Troubleshooting

Q: Incompatibility with my smartphone?

A: This product only supports usage with computers, laptops, PCs, TV boxes, cameras, and other devices with HDMI interfaces, it does not support smartphones or iPads.

Q: Only transmit images, no sound.

A: Please enter laptop audio settings and select "HDMI" as sound source output.

Q: Why can't I transfer the video after the connection is successful.

A: If the HDMI output device defaults to outputting 4K, the transmitter cannot normally transmit the picture. Please modify the HDMI output device resolution to 1920X1080P.

*Note: if the above QA does not solve your problem, please contact our customer support.
