

WTIM WEEKLY PROGRAMMABLE ELECTRONIC TIMER

Description

- Standard 17.2mm wide, 35mm din rail mount.
- Original Functions: 10 (on/off) holiday settings in one year, Exit port(100mA).
- Combine 16 On/Off Settings, 32 Pulse Output and Count-down together.
- Suitable for electrical & industrial appliance.
- Superior quality, powerful function and high precision. With lithium battery inside, so it works if powered off.

Specifications

- Rated voltage: AC 220V, AC 110V 50/60Hz
- Voltage ranging: rated voltage (+10%)
- Hysteresis: >2 second(30°C)
- On/Off operation: 16 On/Off
- 32 times pulse output
- 10 times holiday settings
- Pulse: 1sec-99sec
- Count down: 1sec-99min99sec
- Display: LCD
- Power consumption: approx. 3VA
- Weight: 90g
- Service life: 105 rated loading
- Mechanical life: 10⁶
- Switching contact: 1 doublepole switch
- Load capacity: resistive load: cosφ=1
16A/250VAC
- Leaking load: max 0.6A
4A/250V
- Lamp load: 1000W
- Battery life: expectancy: 3 years (CR2032)
- Ambient temperature: -10~50°C (unforced)
- Ambient humidity: 15~85%

Connections

Attention

- Press "menu" & "ok" → "off" → Press "menu" & "ok" → "off".
- In the condition of "off", Ext won't play if no procedure is running. Only when procedures are running in the condition of Auto on or Auto off, that is, with Ext on set in the condition of Auto on or Auto off, can Ext play.
- When count down is running and Ext on is set, and then Count-down can also be externally controlled.
- When setting Ext off, Ext input won't work and the timer runs according to previous procedure or pulse. When setting Ext on, Ext input works(Auto on/off). If Ext switch is off, all the procedures or pulse won't work; if Ext switch is on, vice versa.
- Press "Menu" & "ok" for 3 sec, the procedure will turn off. And no setting will be saved. Press "Res", all the procedures will be cleared.

After all the settings are done, press "menu" to exit, the LCD will show the current time.

Report the above operations.
It means the ending of the first holiday.

After all the settings are done, press "menu" to exit, the LCD will show the current time.

Report the above operations.
It means the ending of the first work.

After all the settings are done, press "menu" to exit, the LCD will show the current time.

Report the above operations.

After all the settings are done, press "menu" to exit, the LCD will show the current time.
