

Do you have questions about Extra Grip Rubber or need advice on the best product to use on your floors? We can help! Contact the SlipDoctors team today.

### **BENEFITS OF USING EXTRA GRIP RUBBER**

Extra Grip Rubber can help increase traction on surfaces where an anti-slip paint application is needed for increased traction. It is a non-slip rubber additive that is easy to use, increases traction quickly and offers a long-lasting rubberized finish. Mixing Extra Grip Rubber into your paint is a cost-effective way to reduce the risks of slip-and-fall accidents on slippery floors.

### **INSTRUCTIONS FOR USE**

**Step 1:** Follow the paint or coating manufacturer's instructions to prepare the surface.

**Step 2:** Using a separate container, mix Extra Grip Rubber anti-slip additive into your paint or coating.

**Step 3:** Mix thoroughly. Stir the mixture frequently to ensure that particles are well distributed throughout the mixture.

**Step 4:** For optimal results, mix into the last coat being applied to surface. Apply using brush or roller following the paint manufacturer's instructions.

### **STORAGE**

Store Extra Grip Rubber in its original container in a cool, dry area away from direct sunlight.

### **SAFETY PRECAUTIONS**

If product comes in contact with eyes, flush with copious amounts of clean water for 15 minutes. If irritation persists, consult a physician. If inhaled, blow nose, rinse mouth, drink water to clear the throat and move to fresh air. KEEP OUT OF REACH OF CHILDREN.
