EXPERIENCE THE FUTURE

- › “Toshiba solutions wherever you are”

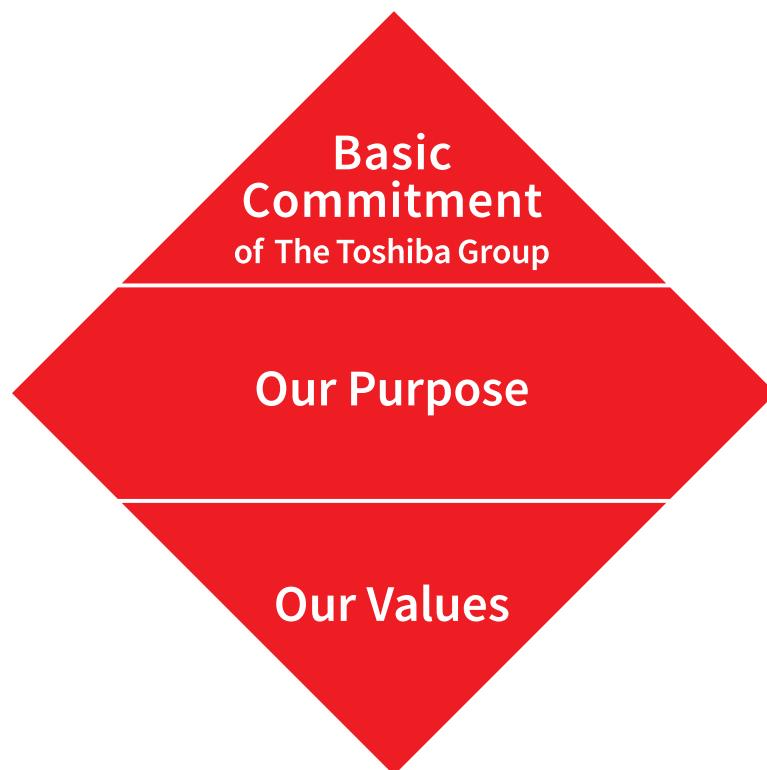

In 1961, Toshiba presented the first split air conditioning unit to the world – a system where the indoor and outdoor units are only connected by copper piping. Today, more than 50 years later, Toshiba still offers a wide range of top-quality products and services utilizing the best technologies.

> Our Purpose

We are Toshiba. We have an unwavering drive to make and do things that lead to a better world.

A planet that's safer and cleaner. A society that's both sustainable and dynamic. A life as comfortable as it is exciting. That's the future we believe. We see its possibilities, and work every day to deliver answers that will bring on a brilliant new day.

By combining the power of invention with our expertise and desire for a better world, we imagine things that have never been – and make them a reality.

That is our potential. Working together, we inspire a belief in each other and our customers that no challenge is too great, and there's no promise we can't fulfill.

We turn on the promise of a new day.

> Our Values

Do the right thing

We act with integrity, honesty and openness, doing what's right - not what's easy.

Look for a better way

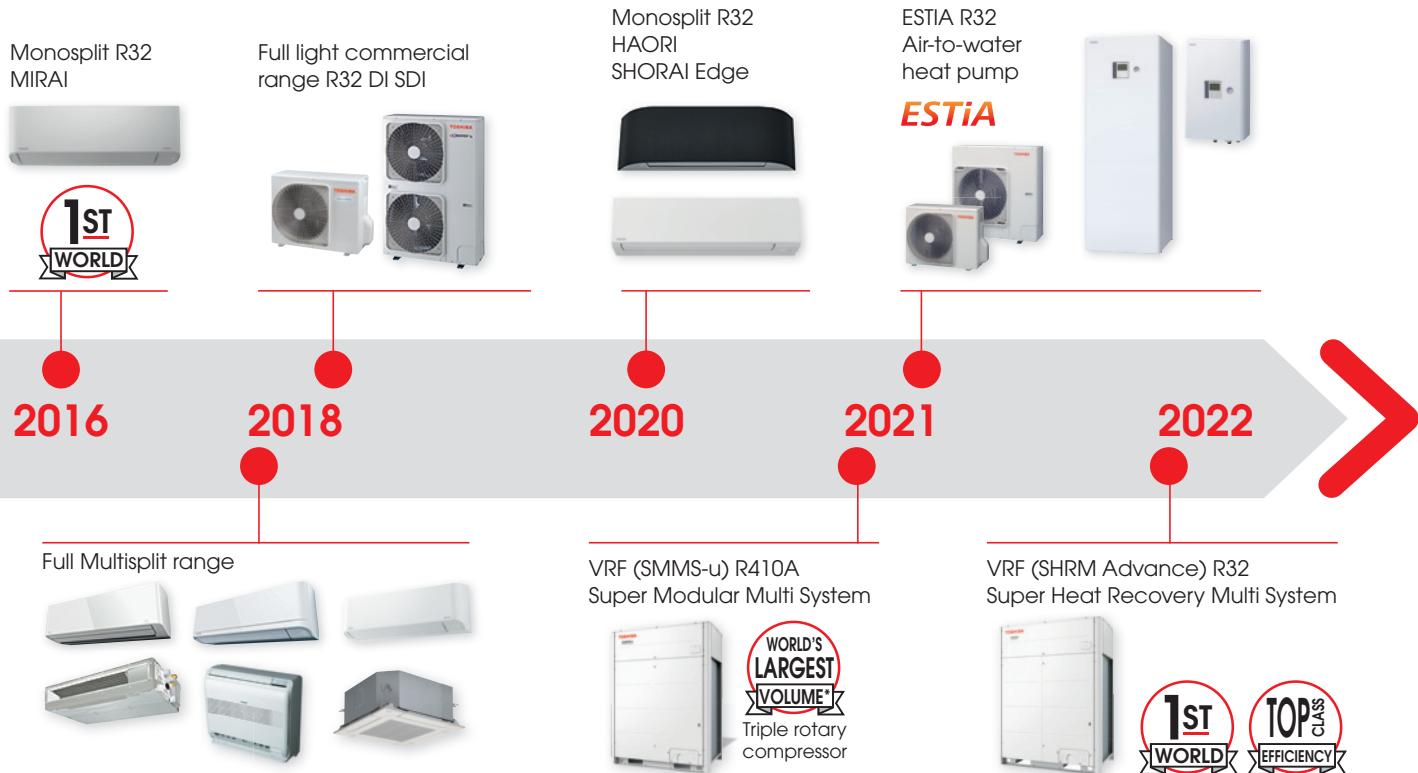

We continually strive to find new and better ways, embracing change as a means of progress.

Always consider the impact

We think about how what we do will change the world for the better, both today and for generations to come.

Create together

We collaborate with each other and our customers, so that we can grow together.

> TOSHIBA AIR CONDITIONING VISION

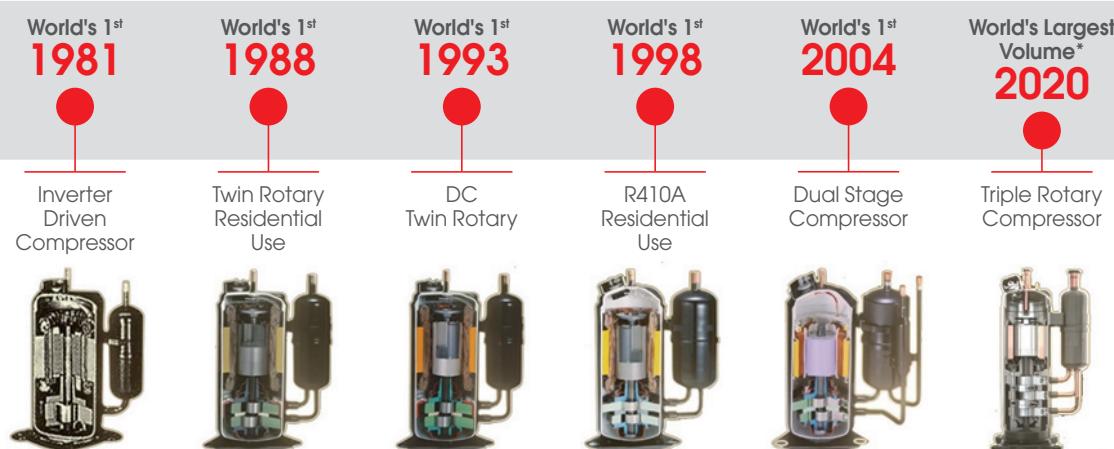

> CHOOSE THE EXPERT OF INSPIRED TECHNOLOGIES

Toshiba Air Conditioning's philosophy is based on profound respect for our global environment and the desire to improve our customers' quality of life worldwide.

In 1981, Toshiba developed the inverter technology for residential air conditioners which is nowadays employed by most air conditioning leading brands.

Inverter enables the unit to continuously regulate its cooling and heating capacity by altering the speed of the compressor using a variable-frequency drive to control the speed of the motor. This innovation ensures outstanding comfort and efficiency levels.

Our commitment to world-class **efficiency**, versatile **scalability** and leading **quality** means we create cutting-edge technologies to find the most forward-thinking solutions possible for your world. Toshiba Air Conditioning is an innovative provider of comprehensive air conditioning solutions with world-class reliability.

› Top-class energy efficiency

- The world's largest Triple rotary compressor⁽¹⁾
- Twin rotary compressors
- All climates from -30°C (Daiseikai 9) to 54°C (MiNi SMMS-e Middle East range)
- Top class A+++ air to water heating solutions with ESTIA R32
- Environmentally-friendly refrigerants
- Optimal temperature control solutions for increased precision

› Entirely scalable solutions

Toshiba Air Conditioning develops cutting-edge technologies and advances that benefit people everywhere by offering the ideal combination of comfort and ecologically-superior products for residential, light commercial and large building applications.

› Superior manufacturing quality

Toshiba Air Conditioning's innovations ensure comprehensive building air conditioning solutions which have been subject to strict evaluation testing to guarantee world-class reliability.

Third party institute certifications for quality, safety and performance, guaranteed ([TÜV](#), [Eurovent](#), [WEEE](#), [RoHS](#), [REACH](#), [Intertek](#), [Keymark](#)).

QUALITY RELIABILITY ENVIRONMENT PROFITABILITY SIMPLICITY

➤ “Committed to the Future”

Going further than just products and beyond their basic functions, to create reliable and safe solutions that can interact with each other and with users.

Incorporating Toshiba’s technical building management systems, the world is made simpler, clearer and more effective.

TAILORED TO MEET CHALLENGES

Toshiba Air Conditioning, with heat pump technology at its core, aims to be an environmentally creative company which contributes to society and the global environment. A commitment to growth on a global scale by offering the highest-quality products and services based on heat application solutions which respond to all of our customers' needs.

➤ LEADING THE WAY TO EXCELLENCE

Toshiba Air Conditioning's strengths centre on in-house research and development of advanced technologies and core components. They are accompanied by the production of air conditioners under the highest international standards, which incorporate quality control checks at each production stage for a wide variety of residential, commercial and business environments.

➤ A global innovation network

Toshiba Air Conditioning has R&D centres in Japan, Europe, Thailand and China. Its global research activities are managed and integrated to ensure all research sites collaborate to provide innovative solutions to customers across the world.

The Toshiba brand proudly holds more than 1200 patents in Japan and abroad, an outstanding number for any company.

Each year since 1994, Toshiba Air Conditioning has received a prestigious award for its significant achievements in air conditioning. This demonstrates Toshiba's innovative spirit, a relentless drive to improve its products and systems.

➤ Products designed to perform, engineered to perfection

In 1981 Toshiba Air Conditioning was the first company to incorporate inverter technology into air conditioning systems and has maintained its technological advantage over its competitors ever since. The development of the new and exclusive DC hybrid inverter system has reaffirmed this ability to innovate and maintain technological leadership in a fast-growing market. But for Toshiba Air Conditioning, innovation also means strong commitment to international institutions that carefully evaluate the impact of new technologies on the environment.

Toshiba Air Conditioning combines technological development with consideration for future generations: resulting in a range of extremely energy-efficient air conditioners, reducing greenhouse gas emissions at their source. Its continuous research into the development of inverter technology has provided remarkable results, both with regards to meeting the required comfort levels and continually reducing the system's energy consumption.

Outdoor units production

Indoor units production

> In line with European standards

To improve its environmental responsibility, Toshiba Air Conditioning offers products that meet the following European standards:

EN 14511

Air conditioners, liquid chilling packages and heat pumps with electrically-driven compressors for space heating and cooling. Test methods.

EN 14825

Air conditioners, liquid chilling packages and heat pumps, with electrically-driven compressors, for space heating and cooling. Testing and rating with part loads and calculation of seasonal performance.

EN 16147

Heat pumps with electrically-driven compressors. Testing, performance rating and requirements for marking domestic hot water units.

011-IW0341 → 0348

All products ensure high operating efficiency and are cost-effective solutions for heating and cooling, guaranteed by their participation in the Eurovent programme. This acts as a guarantee for customers and users that the products will operate in accordance with the design specifications and that the data published is realistic.

Toshiba participates in the Eurovent Certification Performance programme for AC1, AC2 & VRF.

The entire production process is certified by international quality assurance institutes. Toshiba's air conditioners gained ISO 9001 certification for quality control management and quality insurance.

> ENVIRONMENTAL RESPONSIBILITY

> Toshiba Carrier Group's Basic Policy for the Environment

Toshiba Carrier Group aims to provide environmentally conscious products into the worldwide society and contribute to the society through business operation considering the reduction environmental burden, as a corporate to develop the system, manufacture, sell and provide services on Air-conditioning systems, hot-water-supply systems, ventilation systems, refrigerators, and compressors.

Moreover, we hold environmental initiatives to be one of our top priority tasks in corporate management, guided by the "Essence of Toshiba." We will strive to create enriched value and ensure harmony with the earth for people around the world now and in the future. Through our environmental management that aims to achieve a decarbonized society, a resource circulating society, and a society in harmony with nature, we will contribute to the realization of a sustainable society and turn on the promise of a new day.

> Environmental Future Vision 2050

Toshiba Carrier Group has been making efforts to solve the three issues of "Mitigation of Climate Change", "Effective Use of Resources", and "Management of Chemicals" in the "Environment Vision 2050" which formulated in Toshiba group in 2007. With the goal of "contributing to the realization of a sustainable society through environmental management which aims to create enriched value and to ensure harmony with the earth," Environmental Future Vision 2050 which newly formulated in 2020 aims to realize a sustainable society—in other words, a decarbonized society, a resource-circulating society, and a society that is in harmony with nature. We will promote the implementation of initiatives in three areas: "response to climate change," "response to the circular economy," and "consideration of ecosystems" so as to realize the ideal situation in 2050.

> Toshiba's commitment to the future

We all want to play an active part in preserving our planet.

At Toshiba Air Conditioning, we believe we can make a difference. With a global vision for our evolving world, we are committed to advancing research and developing super-energy-efficient and cleaner technologies that not only use significantly less energy but help maintain air quality using state-of-the-art air purification systems for homes and businesses.

This commitment is in line with the 2030 European climate and energy package targets.

QUALITY RELIABILITY ENVIRONMENT PROFITABILITY SIMPLICITY

› “Committed to efficiency
and comfort”

Every field has its own requirements and specifics directly related to its business and the space it occupies, be it residential, shops, offices or hotels. Toshiba reinvigorates spaces, creates comfortable environments and encourages productivity.

> FOR A MORE INSPIRING WORLD

> A range in line with our environmental vision

Toshiba is offering a complete range of air-to-air products dedicated to cooling and heating in comfort applications. With individual system solutions from 2 to 28kW, we are able to address residential and light commercial markets requirements.

Residential

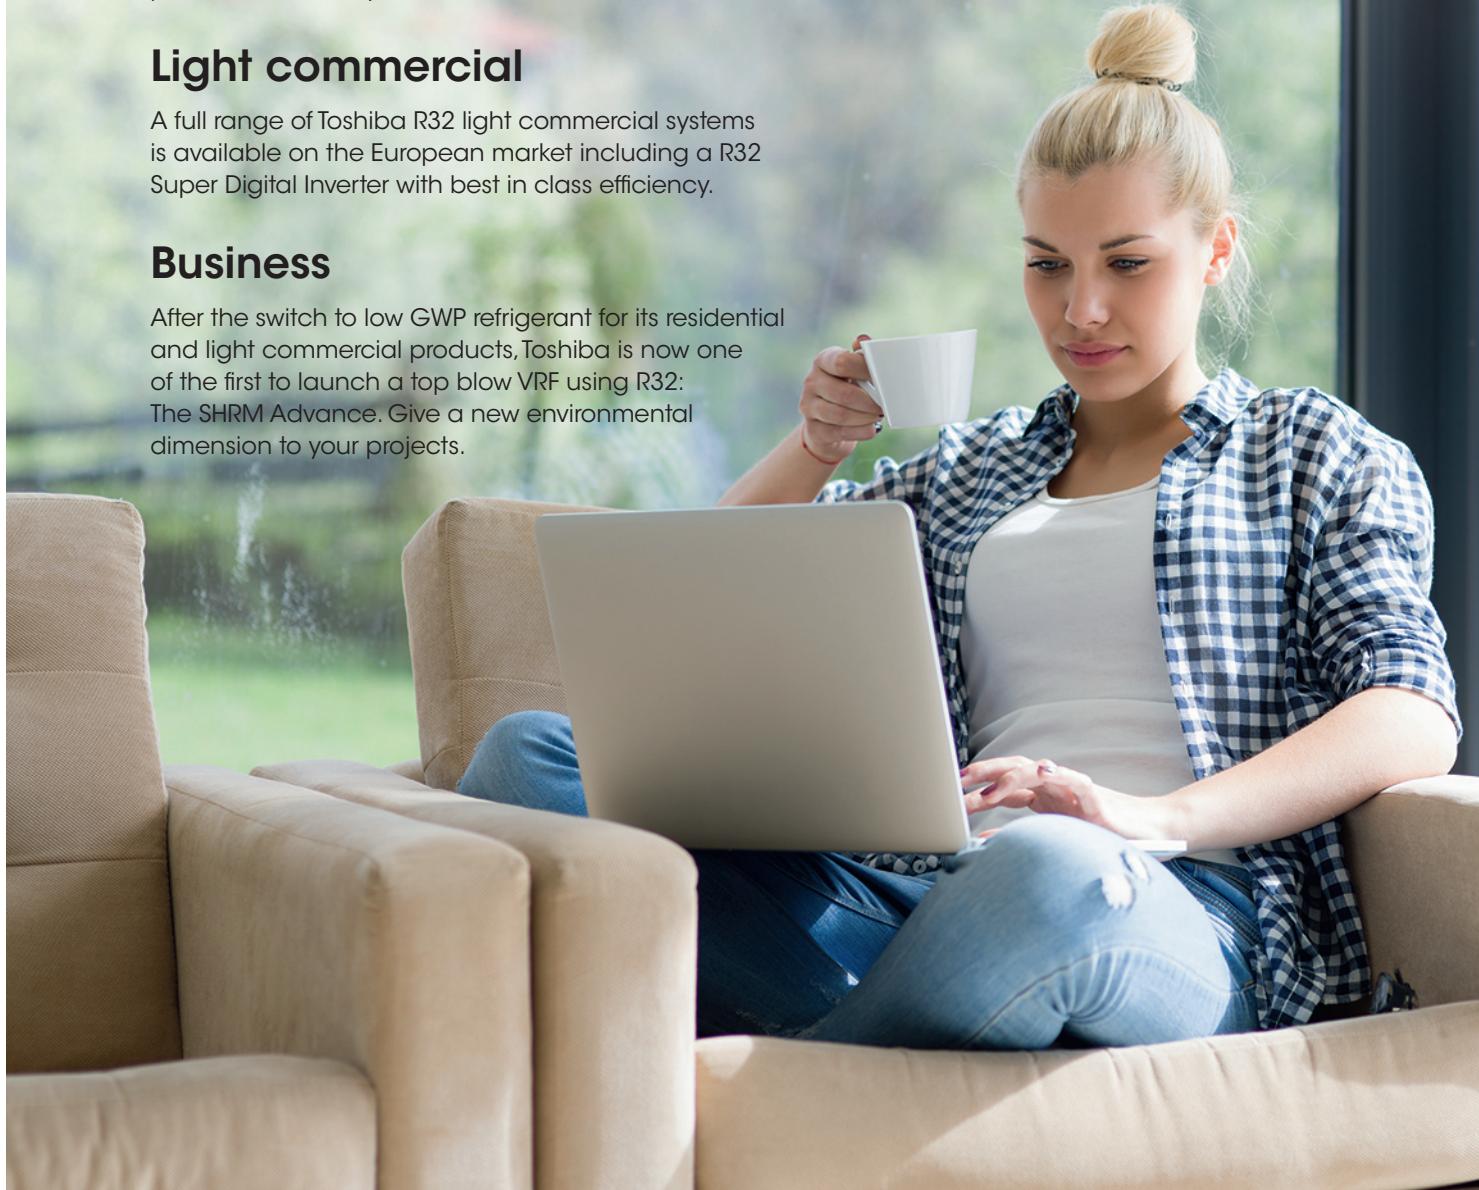

HAORI is a truly elegant air conditioner, featuring a stylish textile fabric cover that uses Toshiba inverter and compressor technology with R32, offering A+++ performance and year-round comfort.

Light commercial

A full range of Toshiba R32 light commercial systems is available on the European market including a R32 Super Digital Inverter with best in class efficiency.

Business

After the switch to low GWP refrigerant for its residential and light commercial products, Toshiba is now one of the first to launch a top blow VRF using R32: The SHRM Advance. Give a new environmental dimension to your projects.

> An easy change...

The fundamental design and control of Toshiba systems remains unchanged with the new R32 refrigerant.

Toshiba's unique combination of twin rotary compressors and all inverter driven control also contributes to guaranteed accuracy and expertise of flawless Japanese quality.

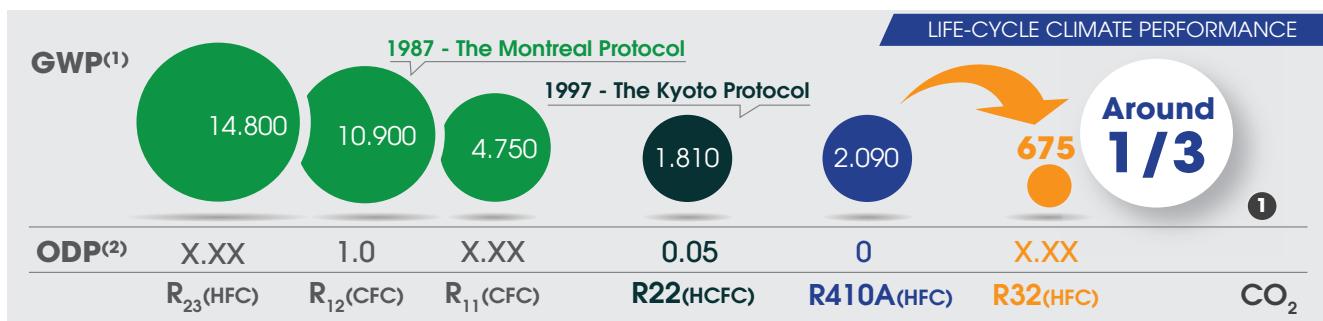

All these result in the high level of performance and efficiency Toshiba customers are used to.

> ...to the benefit of all

Environmental oriented

- The perfect balance between environment safety and your comfort
- Energy efficiency increased for greater savings

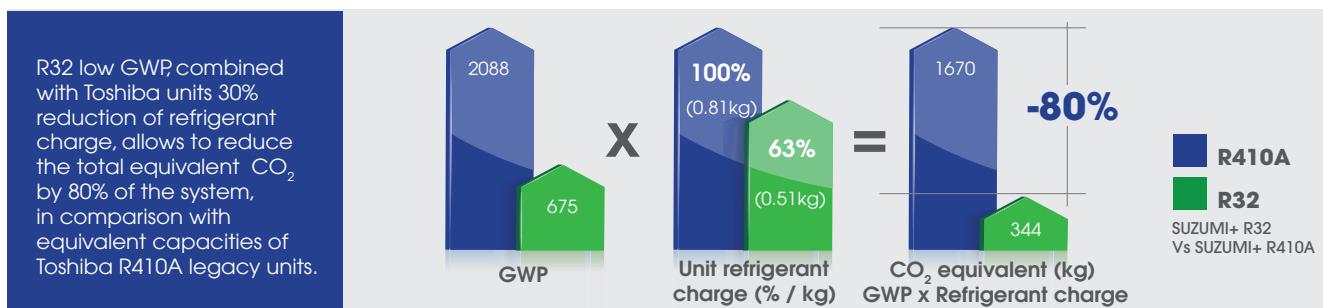

⁽¹⁾ Global Warming Potential

⁽²⁾ Ozone Depletion Potential

Installer friendly

- Working pressures for R410A and R32 refrigerant are similar
- R32 refrigerant can be easily charged in both liquid or gas state
- Safety commissioning instructions are similar to those for R410A
- R32 and R410A equipments is the same except for the refrigerant recovery pump and the reclaim cylinder
- Toshiba flare joints certified ISO14903

> The right choice to make

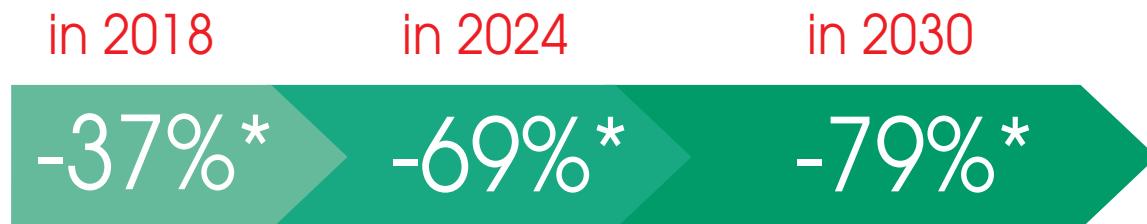

> F-GAS COMPLIANCE

> TOSHIBA AIR CONDITIONING RESPONDS TO REGULATORY EVOLUTIONS

The European F-gas regulation (517/2014) has been in force since 1 January 2015, it aims to protect the environment by reducing greenhouse gas emissions and progressively deploying new rules related to the use of HydroFluoroCarbons refrigerants (HFCs) in heating and cooling systems.

This regulation will ensure manufacturers turn to refrigerants with lower Global Warming Potential (GWP).

The phase down is a step-by-step approach, this regulation introduces an ambitious gradual reduction of HFC quantities that are put on the market in the EU by HFC producers and distributors (in equivalent tons of CO₂), with an initial reduction of 37% from 2018 and a final objective of cutting quantities by 79% by 2030.

*HFC consumption compared to equivalent tons of CO₂

> Your safety first and foremost

Based on the requirements of the F-gas regulation, only certified installers can carry out Dx system installations. The implementation of systems using HFC requires thus some specific precautions such as a strict control of the leakages and a periodic checking of the refrigerant charge.

For equipment containing			Leak checks without leak detection	Leak checks with leak detection
Between 5 and 50 tonnes CO ₂ equivalent	2.38 and 23.8kg R410A	7.41 and 74.1kg R32	Every 12 months	Every 24 months
Between 50 and 500 tonnes CO ₂ equivalent	23.8 and 238kg R32	74.1 and 740kg R32	Every 6 months	Every 12 months
More than 500 tonnes CO ₂ equivalent	More than 238kg R410A	More than 740kg R32	Every 3 months	Every 6 months

> Toshiba leak detection system

Residential

Increase console installation flexibility!

R32 leak detection sensor is available as an option for RAS Console. This accessory offers a total flexibility to install a Console with large R32 multisplit systems in average room surface (minimum room surface 7sqm in combination with RAS-5M34U2AVG according to IEC 60335-2-40).

Light Commercial

This is the first Toshiba product delivered with an embedded leak detection sensor.

To ease product integration in every type of light commercial applications, Toshiba floor standing unit is delivered with plug & play embedded R32 leak detection sensor. Its integrated remote controller will inform end user on sensor status and leakage risks with an alarm.

Business

Whatever your constraints, we have the leak detection solution for VRF applications.

• LEAK DETECTION

Each room is fitted with a leak detection sensor. When the refrigerant concentration level exceeds EN378 limits the sensor is activated, an audible and visual alarm is triggered and the affected FCU will also stop displaying a fault code. A contact can enable third party ventilation to dilute refrigerant spread into the room.

Audible and visual alarm when a leak is detected

• INDOOR UNIT ISOLATION

The indoor unit(s) can be isolated with valves on liquid and gas piping lines. This system ensures that only the indoor unit concerned is isolated, allowing the rest of the system to continue operating.

Audible and visual alarm including the isolation of concerned indoor units when a leak is detected

• PUMP DOWN

The refrigerant leak is indicated whereas mechanical isolation and pump back of refrigerant to the outdoor unit are set to decrease potential harm to occupants, reducing refrigerant loss and negative impacts on the environment. In this case entire system is stopped.

Audible-visual alarm and refrigerant pump down when a leak is detected

Toshiba Air Conditioning leak detection solutions are compliant with EN378 standard related to buildings open to the public and thus answer some of the safety constraints.

> ECODESIGN & ENERGY LABELLING

The European 2030 climate and energy framework for improving energy efficiency will have a significant impact on the heating, ventilation and air conditioning sectors.

Today, buildings are responsible for the largest energy consumption, with HVAC systems being the most energy-intensive of all. The HVAC sector is now committed to manufacturing energy-efficient products for its clients to ensure sustainable development.

> ECODESIGN

In the European Union, the Ecodesign Directive encourages HVAC manufacturers to design products taking into consideration their environmental impact throughout entire lifecycle.

It establishes a framework for the setting of mandatory energy efficiency requirements for all energy-related products (ERPs).

> Ecodesign and Energy Labelling for Air-to-Water heat pumps

Air-to-Water heat pumps have been subject by the Ecodesign (< 400kW) and Energy Labelling (< 70kW) regulations since 26 September 2015. Heat pumps launched before this date are not concerned and all must conform to display the CE mark.

For more information visit
www.ecodesign.toshiba-airconditioning.eu

> New energy efficiency metric: Seasonal efficiency (SEER and SCOP)

The Seasonal Coefficient of Performance, is a new European parameter to rate heat pumps in terms of energy efficiency. It is an update to the Coefficient of Performance, which previously recorded the power consumed to power produced ration in heating and cooling modes for one operating point.

Unlike the EER/COP, the SEER/SCOP take into account performances during cooler seasons because it includes temperature variations by including numerous realistic measurement points. When combined, this results in a more accurate energy classification.

SEER/SCOP compared to EER/COP

TEMPERATURE	CAPACITY (KW)	AUXILIARY MODES (KWH)	HOURS
EER COP One temperature requirement	SEER SCOP Numerous rating temperatures (range of average temperatures)	EER COP Auxiliary power modes are not considered	EER COP N/A SEER SCOP Number of hours at each air temperature (in hours)

SEASONAL COEFFICIENT OF PERFORMANCE CALCULATION

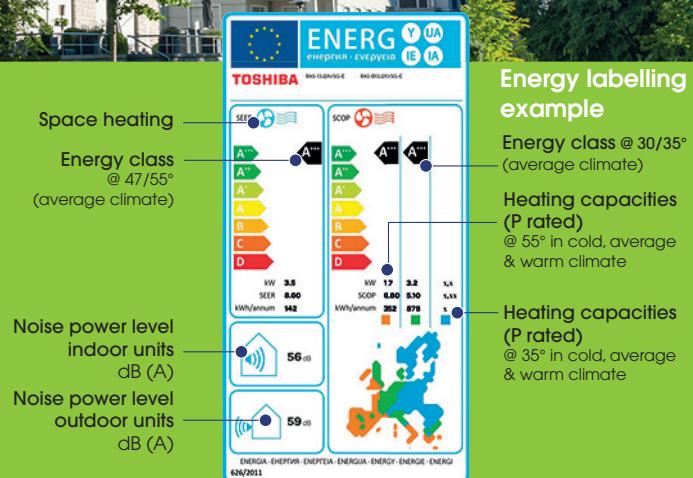

This is the ratio between annual heating/cooling demand and annual energy input over an entire heating/cooling season.

$$\text{SCOP} = \frac{\text{ANNUAL HEATING DEMAND}}{\text{ANNUAL ENERGY INPUT}}$$
$$\text{SEER} = \frac{\text{ANNUAL COOLING DEMAND}}{\text{ANNUAL ENERGY INPUT}}$$

ENERGY LABELLING

The Energy Labelling regulation was created to offer end users understandable information about a product's energy efficiency rating. European Energy Labelling regulations also assign ratings from G to A++ based on their energy efficiency; inciting better ratings in the sector and providing clients with clearer information.

> Designed for the future

Toshiba Air Conditioning is committed to designing products and solutions with increasingly lower environmental impacts. This subsequently reducing indirect CO₂ emissions generated by electricity consumption. Toshiba Air Conditioning's long-standing commitment to sustainable development is ahead of schedule for the European climate and energy package requirements for 2030.

All Toshiba Air Conditioning products sold today in Europe are fully compliant with the latest Ecodesign directives.

Lot 1: Air-to-Water heating systems up to 400kW including air-to-water heat pumps
 >>> ESTIA SPLIT.

Lot 2: Water heaters and hot water storage tanks. Including ESTIA DHW-HP.

Lot 6: Residential and non residential ventilation including air treatment VN units.

Lot 10: Air-to-Air heat pumps up to 12kW
 >>> SEYIA, SHORAI Edge, HAORI, DAISEIKAI 9, Console, Digital Inverter, Super Digital Inverter.

Lot 11: Electric motors from 125W to 500kW including ventilation fans.

Lot 21: Heat pumps above 12kW including residential, light commercial systems and VRF
 >>> DI, SDI, Big DI, MiNi SMMS-e, SMMS-e, SHRM-e, SMMS-u.

Toshiba Air Conditioning's dedicated public website provides energy labels with detailed performances for all systems.

The new DI Classic offers all of Toshiba expertise for a wide range of light commercial applications and at an affordable cost.

New design

Standard 4-Way Cassette

The Standard 4-Way Cassette panel has been revised to offer a flat design, PM2.5 filters compatibility and optional occupancy sensor.

NEW BUSINESS PRODUCTS

Unique R32 VRF concept

SHRM Advance

Push the boundaries of VRF systems featuring a more environmentally friendly profile, wide flexibility and top-class efficiency. SHRM Advance is launched with a complete set of accessories: FS box, R32 sensor & shut-off valve.

Smart

UT Smart Cassette

LC Smart Cassette is now compatible with all VRF outdoor units for dramatically boosted efficiencies.

More than ever committed to excellence

Louver for SSD

3DW

Enhance your Slim Duct installation with Toshiba's motorized 3DW louver for pleasant design and optimized air diffusion.

YHP Cassette

Increasing capacity with no compromise on advantages: 150mm height small chassis, low sound level, air purifier, motion sensor, white design and even more.

ON YOUR OWN AS A FAMILY IN A GROUP ON YOUR OWN

Surpassing well-being

Following European commitments to reduce emissions by 20% by 2020, energy waste from residential heating and domestic hot water has been identified as a possible reduction target. Air-to-water heat pumps are classed as a form of renewable energy technology, contrary to heating systems that rely on fossil fuels or inefficient electrical heating.

They are now considered to be ideal solutions for space heating and domestic hot water. Residential heat production using gas, oil or electricity increases atmospheric CO₂ emissions levels. In addition, these traditional heating systems are less efficient and therefore have higher running and maintenance costs. Toshiba Estia air-to-water heat pumps are the ideal solution for increasing energy efficiency, using air as its main source of energy. This all-in-one system is designed to ensure that the right temperature for space heating and domestic sanitary hot water is achieved quickly and efficiently, with the additional advantage of also functioning as a cooling source, in the warmer seasons.

ESTIA SPLIT R410A & R32 – WALL MOUNTED & ALL-IN-ONE

OUTDOOR UNITS

Toshiba has a long and successful experience in the production of air-to-air heat pumps. The same reliable and award-winning technology is also at the core of these new air-to-water heat pumps benefiting from the advanced inverter technology and the Toshiba DC twin-rotary compressor. ESTIA heat pumps operate with the reliable and safe R410A & R32 low GWP refrigerants.

HYDRO UNITS

Compact and silent outdoor units are associated with hydraulic modules on the indoor side: refrigeration connections to ease the installation.

ESTIA hydro modules are available in three versions:

- All-In-One with integrated DHW cylinder 1 zone:
Space heating & cooling, DHW production.
- All-In-One with integrated DHW cylinder 2 zones:
Dual-zone space heating & cooling, DHW production.
- Wall-mounted hydraulic module: Space heating & cooling provided with a compact module installed on the wall. DHW production possibility thanks to a remote tank.

HOT WATER TANK

The ESTIA tank is a compact stainless steel insulated tank producing domestic hot water for sanitary use.

The performance of the overall system is also maximised thanks to the integrated coaxial heat exchanger.

The internal electric heater is controlled to optimise the use of the system in the case of extreme outdoor air temperatures. This solution reduces running costs and guarantees a constant hot water temperature inside the tank.

CONTROLLER 2 zones with weekly timer

The large screen remote controller is designed to be simple, intuitive and easy to use.

The remote controller allows independent heating to a maximum of 2 zones and domestic hot water.

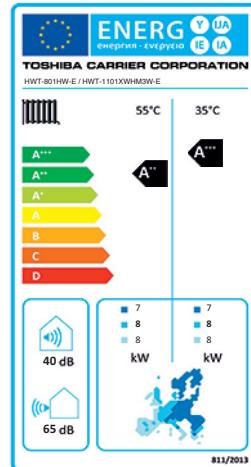

It regulates the water temperature and optimises the systems energy consumption. The anti-bacteria control and the hot water boost functions can easily be activated.

The remote controller can also be used to set weekly timers for the system and, when used as a second remote controller, can be used to control room air temperature.

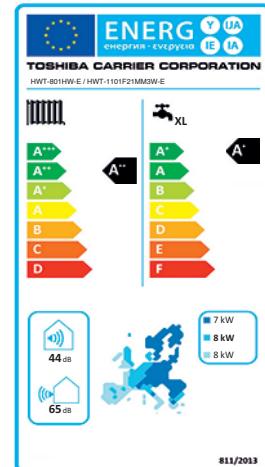

Leading energy efficiency A+++/A++ with COP up to 5.20 rated conditions.

With its best-in-class COP performance, the ESTIA air-to-water heat pump system delivers more heating power with less energy consumption. With the Toshiba advanced inverter, Estia air-to-water heat pump system only delivers the heating capacity required, thus reducing the amount of electricity used and the running costs of the heating system.

ESTIA Space Heating
Energy label

ESTIA combination & heater
(with Domestic Hot Water)
Energy label

ESTIA DOMESTIC HOT WATER HEAT PUMP

The best energy savings for sanitary hot water production throughout the year

Toshiba DHW-HP is providing best in class performances on the market with:

- A+ Energy Label Class
- High COP 3.69 according to EN16147
- Very low noise level and Silent function
- Variable air flow rate & high ESP fan up to 200 Pa
- Hot water production up to 65°C

The Toshiba DHW-HP provides 80% energy savings Vs traditional electric water heaters with best in class COP 3.69 (EN16147 LCIE certified).

Compatible with solar systems (photovoltaic panels ready or solar built-in extra coil), and smart grid ready, makes it the best solution for increased energy savings.

The innovative and adaptive controller is user friendly with 5 operational modes AUTO, ECO, BOOST, SILENT and HOLIDAY.

Toshiba DHW-HP offers flexible control solutions with low electricity tariff mode, energy consumption display, Smart grid ready, Modbus connectivity, Air Cooling function & Floor Heating function with extra coil.

Toshiba DHW-HP is particularly reliable thanks to its anti-corrosion enamelled steel tank with magnesium anode.

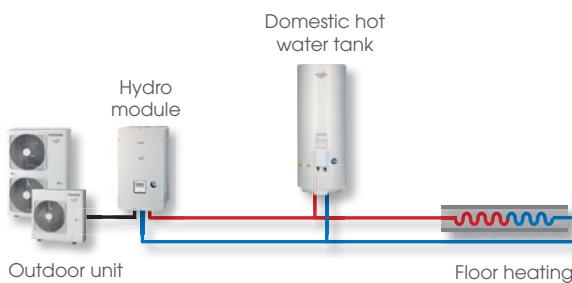

The electrical heater back-up provides hot water at any time.

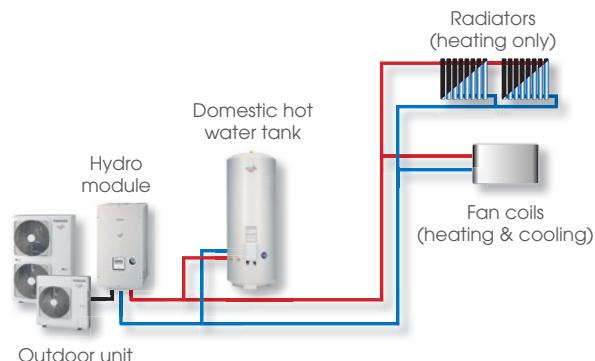

ONE SYSTEM,
FULL COMBINATIONS FLEXIBILITY

For new houses or refurbishment projects ESTIA heat pumps offer a variety of combinations. Some examples are shown below:

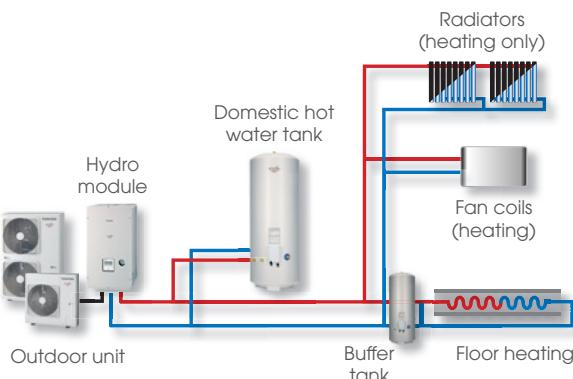

1 Space heating with domestic hot water

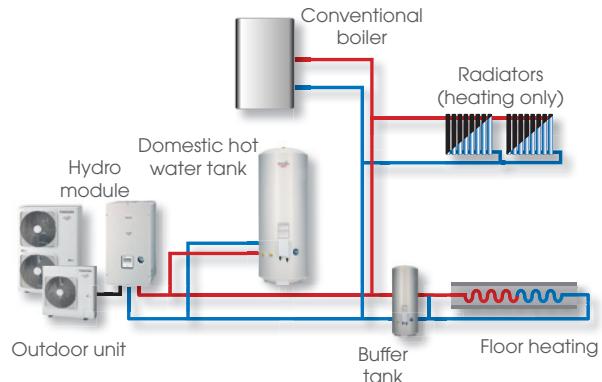

1 Space heating/cooling with domestic hot water

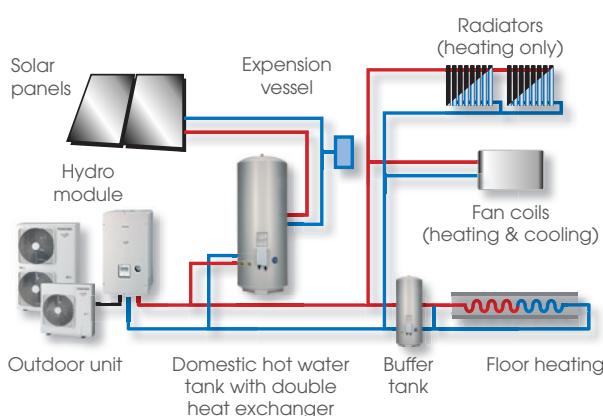

2 Space heating with domestic hot water

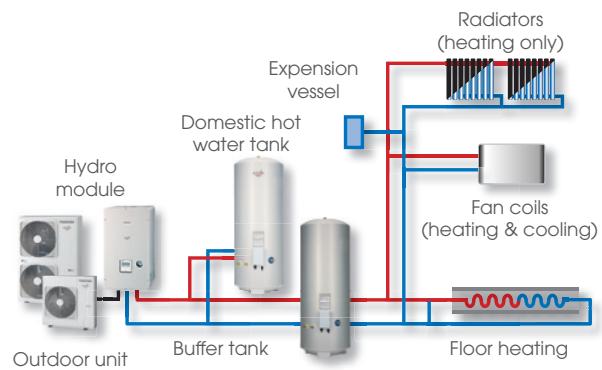

2 Space heating with domestic hot water & backup boiler

2 Space heating/cooling (multiple zones) with domestic hot water & solar panels

2 Space heating/cooling (multiple zones) with domestic hot water

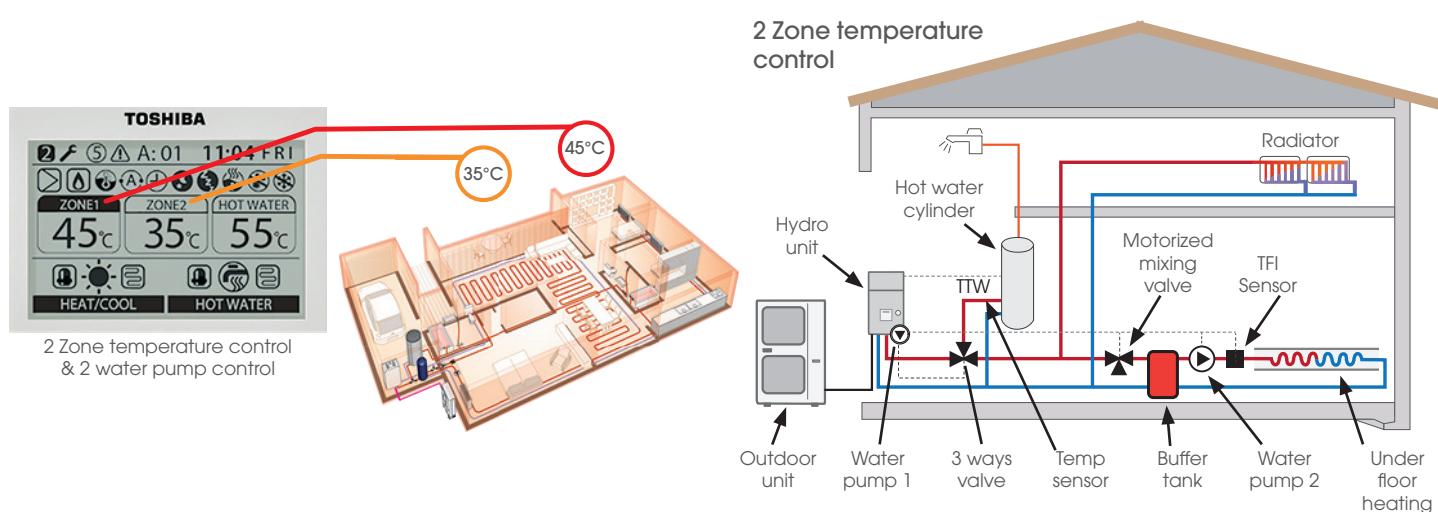

In existing dwellings already equipped with traditional gas or fuel boilers, the Toshiba ESTIA air-to-water heat pump system can be combined with the existing heating system to fully cover and optimise all heating needs, all year round. The boiler is then only used as a back-up source during some extreme weather days during the winter. The intelligent Toshiba control balances the energy source in the most efficient way.

Toshiba offers different control solutions to meet end users' and designers' expectations. From local individual control and settings to computer-based TCC-Link network, all indoor units can be programmed and set to suit the operational needs. Remote control systems offer a wide range of features including schedule timers, diagnostic functions, input/output signals, to name a few.

Toshiba offers a number of local control products that can be used to control a single indoor unit, or group of up to 8 indoor units, from a position adjacent to that indoor unit or group. It is possible to install these local controllers up to 500 m from the connected indoor unit which allows greater flexibility when designing the installation a site.

2 Zone & 2 water pump control

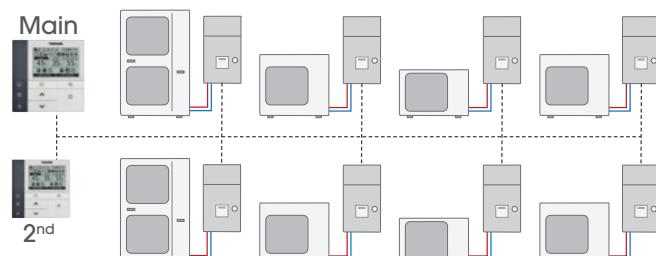

Space heating/cooling (multiple zones) with domestic hot water.

Control integration

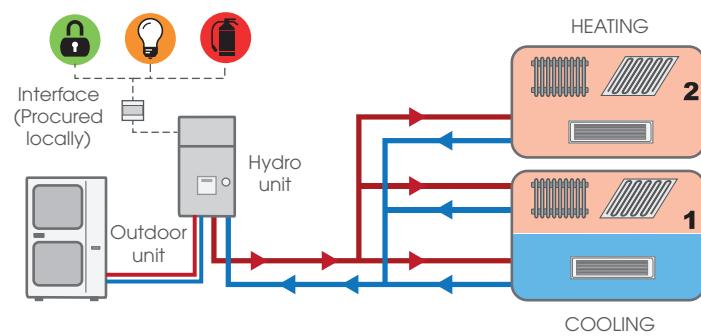

ESTIA Master/Slave group control function allows up to 2 remote controllers to operate simultaneously up to 8 systems
ESTIA Open protocol interfaces Modbus & KNX are available in Home Energy Management Systems.

Group control function

Note: Maximum connections configuration:
8 outdoors and 2 remote controllers

Open protocol interfaces

ESTIA SPLIT R32 – ALL-IN-ONE

ESTIA R32 All-In-One air-to-water reversible Heat Pumps provide space heating or comfort cooling throughout the year, with an integrated 210L Domestic Hot Water cylinder. They are ideal for new constructions and renovation.

High energy efficiency for superior energy savings

- A+++/A++ energy class in space heating low & medium temperature with part load efficiency η up to 183%.
- A+ energy class in domestic hot water production with part load efficiency η_{dhw} up to 136%.

Silent operation

- Silent outdoor unit down to 32dB(A) at 5m: No noise pollution for the neighborhoods.
- Silent indoor unit only 30 dB(A) at 1m.

Easy to install, easy to control

- Very compact outdoor unit (1 fan technology).
- Floor standing All-In-One hydro module 600x670mm footprint for easy integration.
- Second-zone kit factory fitted for easy management of two different leaving water temperatures (under floor heating & radiators).
- All components accessible on the facade: Simplified access for installation and maintenance.
- Large screen remote controller, intuitive and easy to use.
- Power consumption display.
- Compatible with the latest generations of connected thermostats.
- Remote control via smartphones: Wireless interface option compatible with the Toshiba Home AC Control App.

COP MAX	CAPACITY	OPERATION	HOT WATER

5.20 4kW > 11kW -25°C > +43°C +20°C > +65°C

Best in class performances:

- **Toshiba Twin Rotary compressors** & inverter technology, with injection technology on sizes 8 & 11kW
- **65°C maximum leaving water temperature** ideal for renovation and boiler replacement
- **COP Domestic Hot Water up to 3.21 (EN16147)**
- Heat pump operation for DHW production up to +43°C outside air temperature to maximize energy savings
- **Back-up heaters** 3kW or 6kW or 9kW

ESTIA SPLIT R32 – WALL MOUNTED

ESTIA R32 wall-mounted air-to-water reversible Heat Pumps provide space heating or comfort cooling throughout the year. They are ideal for new constructions and renovation. They can be combined with a separated tank for domestic hot water production (150, 200 and 300L).

High energy efficiency for superior energy savings

- A+++/A++ energy class in space heating low & medium temperature with part load efficiency η_s up to 183%.
- A+/A energy class in domestic hot water production with part load efficiency η_s dhw up to 122%.

Silent operation

- Silent outdoor unit down to 32dB(A) at 5m: No noise pollution for the neighborhoods.
- Silent indoor unit only 28 dB(A) at 1m.

Easy to install, easy to control

- Very compact outdoor unit (1 fan technology).
- The most compact wall-mounted hydro module on the market for easy integration.
- All components accessible on the facade: Simplified access for installation and maintenance.
- Possible management of a second water pump for 2 zones.
- Large screen remote controller, intuitive and easy to use.
- Power consumption display.
- Compatible with the latest generations of connected thermostats.
- Remote control via smartphones: Wireless interface option compatible with the Toshiba Home AC Control App.

HWS_XWH
ESTIA SPLIT S5

The Toshiba air to water heat pump split system is designed to deliver the right temperature for space heating and produce domestic sanitary hot water throughout the year. The ESTIA system has the additional advantage of providing cooling in the warmer seasons.

High Energy efficiency providing enhanced energy savings

A++ / A++ energy class in space heating & combination heater. Part Load efficiency η_s up to 163% according to EF14511 & EN14825.

The Toshiba Inverter uses the new vector controlled Intelligent Power Drive Unit, which enables a wider range of compressor frequencies resulting in better temperature control.

Easy to install, easy to control

Quick and easy to install, the ESTIA hydro module unit can be placed safely in the most suitable place within the house.

Its large screen remote controller is designed to be simple, intuitive and easy to use. ESTIA is compatible with latest generations of connected thermostat.

COP MAX	CAPACITY	OPERATION	HOT WATER
 4.90	 4.5kW > 16kW	 -20°C > +43°C	 +40°C > +75°C

Best in class performances:

- Max COP 4.90 @+7°C & 3.08 @-7°C air temperature
- Heating operation down to -20°C
- Domestic sanitary hot water +40°C to +75°C
- Master/Slave group control up to 8 units

ESTIA SPLIT S5 POWERFUL

The Toshiba air to water heat pump split system is designed to deliver the right temperature for space heating and produce domestic sanitary hot water throughout the year. The ESTIA system has the additional advantage of providing cooling in the warmer seasons.

High Energy efficiency providing enhanced energy savings

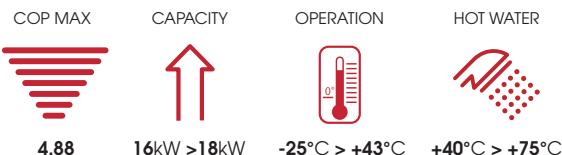

A++ / A++ energy class in space heating & combination heater. Part Load efficiency η s up to 175% according to EF14511 & EN14825.

The Toshiba Inverter uses the new vector controlled Intelligent Power Drive Unit, which enables a wider range of compressor frequencies resulting in better temperature control.

Easy to install, easy to control

Quick and easy to install, the ESTIA hydro module unit can be placed safely in the most suitable place within the house.

Its large screen remote controller is designed to be simple, intuitive and easy to use. ESTIA is also compatible with latest generations of connected thermostat.

Best in class performances:

- Max COP 4.88 @+7°C & COP 2.67 @-7°C air temperature
- Maintain rated capacity down to -15°C
- Heating operation down to -25°C
- Domestic sanitary hot water +40°C to +75°C
- Master/Slave group control up to 8 units

ESTIA DOMESTIC HOT WATER HEAT PUMP

The Toshiba DHW-HP is designed to provide the customer with best in class performance and energy savings, for sanitary hot water production, throughout the year. Thanks to its large operating range, high external static pressure fan and low noise operation the Toshiba DHW-HP is suitable for all types of installation.

Comfort & ease of installation

- Sanitary hot water can be produced throughout the year, using only the heat pump, thanks to the innovative design of the unit and the large operating temperature range (Air -7°C to +40°C). Installation is simplified due to the slimline chassis design (Ø603mm) and easy access to water pipe connections.

Highest efficiency for best energy savings

- The Toshiba DHW-HP provides 80% energy savings Vs traditional electric water heaters with best in class COP 3.69 (EN16147 LCIE certified). Compatible with solar systems (photovoltaic panels ready or solar built-in extra coil), and smart grid ready, makes it the best solution for increased energy savings.

Innovative & reliable

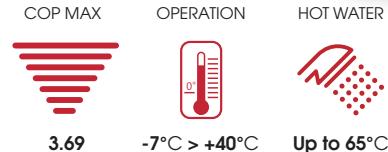

- Anti-corrosion protection with enamelled steel tank and magnesium anode. Back-up electrical heater to secure hot water production at any time.

Intuitive & adaptative control

- User friendly control with 5 operational modes AUTO, ECO, BOOST, SILENT and HOLIDAY. Flexible control solutions: Low electricity tariff mode, energy consumption display, Modbus connectivity, Air Cooling function & Floor Heating function with extra coil.

DHW-HP UNITS

HWS-G190
HWS-G260**Best in class performances:**

- Energy class A+ (ErP 2017)
- Heat pump hot water production from -7°C to +40°C outside air temperature
- Hot water temperature to 60°C without the use of electric heaters
- Adjustable airflow rate (0-800m³/h)
- Best in class fan external static pressure (up to 200Pa)
- Low noise operation
- Slimline chassis design (Ø603mm)
- Flexible control options including Modbus connectivity
- Compatible with other renewable technologies solar thermal and solar photovoltaic (advanced option only)
- Smart Grid Ready (advanced option only)

ESTIA DOMESTIC HOT WATER HEAT PUMP Product configurations

Description	Model name	Functions
190l cylinder + 180°C variant water connection position	HWS-G1901CNRR-E	Alternative water connection entry position for flexible installation
190l cylinder + deluxe PCB	HWS-G1901CNXR-E	Deluxe PCB option allowing connection of: - Solar Photovoltaic - Smart Grid Ready - Additional pump / ventilation damper
190l cylinder + deluxe PCB + heating coil	HWS-G1901ENXR-E	All of the features of the deluxe PCB option with the additional benefit of connection to a solar thermal system
260l cylinder + 180°C variant water connection position	HWS-G2601CNRR-E	Alternative water connection entry position for flexible installation
260l cylinder + deluxe PCB	HWS-G2601CNXR-E	Deluxe PCB option allowing connection of: - Solar Photovoltaic - Smart Grid Ready - Additional pump / ventilation damper
260l cylinder + deluxe PCB + heating coil	HWS-G2601ENXR-E	All of the features of the deluxe PCB option with the additional benefit of connection to a solar thermal system

ON YOUR OWN AS A FAMILY IN A GROUP ON YOUR OWN

In 1981, Toshiba was the first company to incorporate inverter technology into air conditioning systems. Ever since, it has retained its technological advantage over its competitors.

Its development of the new and exclusive DC hybrid inverter system has reaffirmed its ability to innovate and remain a technological leader, even in fast-growing markets. But for Toshiba, innovation also involves working alongside international institutions that carefully evaluate the impact of new technologies on our environment.

Toshiba combines technological development with concern for future generations, resulting in a range of extremely energy-efficient air conditioners, which reduce greenhouse gas emissions at the source. Toshiba's continuous research led to the development of PWM (Pulse Width Modulation) technology, which is used in combination with traditional PAM (Pulse Amplitude Modulation) control.

The application of these two distinct technologies enables total control of performance and energy use.

TOSHIBA

RESIDENTIAL AIR-TO-AIR

AS A FAMILY IN A GROUP ON YOUR OWN

AS A FAMILY

HIGH WALLS & CONSOLES

When technology meets comfort

> Innovation, efficiency, high reliability, energy savings, environmental respect ...

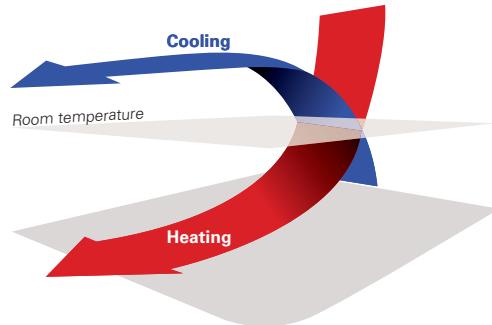

These are the powerful values at the heart of Toshiba's DNA.

For over 50 years Toshiba has been providing its clients with the guaranteed accuracy and expertise of flawless Japanese quality. Technological, stylish, highly efficient and environmentally-friendly, the Toshiba monosplit units proudly upholds the values rooted firmly in its name.

> The development of the new and exclusive DC hybrid inverter system

has reaffirmed this ability to innovate and maintain technological leadership in a fast-growing market. But for Toshiba, innovation also means a strong commitment to international institutions that carefully evaluate the impact of new technologies on our environment. Toshiba combines technological development with care for future generations: the result is a range of extremely energy-efficient air conditioners, reducing greenhouse gas emissions at source.

Toshiba continuous research into the development of PWM technology, which together with the traditional PAM control, allows total control of the systems performance and energy usage.

The new Hybrid Inverter features PAM (Pulse Amplitude Modulation) for the highest levels of power.

PWM (Pulse Width Modulation) for energy efficiency.

The Future Is Now

> Energy efficiency by design

Toshiba products are designed to optimise energy performance at any time of year. This in turn reduces the amount of indirect CO₂ emissions generated by the electricity consumption.

> Lowest level refrigerant charge

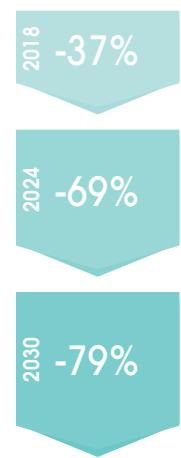

Toshiba is committed to minimising the refrigerant charge of its products and has made this a key performance indicator for all new product developments.

> European F-GAS regulation

R32 is today the right alternative to R410A. The European F-gas regulation (517/2014) has been in force since 1 January 2015 and will progressively phase down the use of hydrofluorocarbons (HFCs) in the heating and cooling systems of the future. Toshiba already offers new heating and cooling systems operating with R32, which will be the alternative to R410A in the years ahead. The new R32 refrigerant ensures an ideal balance between energy-efficiency and respect for the environment. The quantities of HFCs that are placed on the market will be gradually reduced in a step-by-step approach, until they finally reach a minimum level by 2030.

HFC consumption related to tons of CO₂ equivalent

HAORI

HAORI, the air conditioner that respects your universe with a truly elegant design, featuring a stylish textile fabric cover. Innovation, efficiency, high reliability, energy savings, respect for the environment: these powerful values are at the heart of everything we do at Toshiba. HAORI offers energy efficient A+++ cooling and heating performances, with R32 refrigerant.

Truly elegant design featuring a stylish textile fabric cover.

High energy class A+++ / A+++

- Heating and cooling modes ensure exceptional energy savings and unparalleled comfort levels.

Ultra-quiet system

- HAORI Silent function halves the sound level of the outdoor unit down to 37 dB(A), while its Quiet function reduces noise from the indoor unit to less than 19 dB(A) for a good night's sleep.

Indoor Air Quality

- The new Toshiba Ultra Pure Filter captures up to 94% of PM2.5 (particulate matters coming from atmospheric pollution), creating healthy living spaces at home.
- Toshiba Plasma Ionizer, catches & neutralizes the contaminated particles.
- HAORI is equipped with the Magic Coil® which helps prevent water and dust from sticking to the coil.

DAISEIKAI 9

The exclusive New Daiseikai 9 is the market benchmark for high efficiency solution. Its new elegant design and higher standards in efficiency and comfort, maximize energy savings, and offer exceptional indoor air quality thanks to its exclusive filtration system.

High Energy Class A+++ / A+++

- Very high energy efficiency class, both in cooling and heating.
- Very low energy consumption in all conditions.
- Wide operating range.

Extremely silent

- Less than 20dB(A) in silent mode.

Indoor air quality with double filtration system

- The Plasma Ion Charger filtration system associated with self-cleaning coil provides a pure and healthy environment.
- The Ionizer System provides pure air by absorbing smoke and bad odors, this function can be activated anytime by pushing the "PURE" button on remote controller.

User friendly wireless remote control with weekly timer

- One-Touch User Comfort parameter pre-set.
- 8°C button for anti-frost during holiday periods.
- Comfort Sleep for extra silence mode.
- 3D airflow control with vertical & horizontal motorized louvers: pre-set directions or automatic sweeping.
- Weekly timer with 4 freely programmable settings per day and 7 different programs per week.
- Capacity booster to reach comfort set point very fast.
- Outdoor unit noise reduction at night.
- Fire place mode with constant fan speed to improve comfort in all conditions.

RAS-J2KVSG-E **SHORAI EDGE**

SHORAI Edge, a fresh take on design and performance, benefits from Toshiba's latest innovative inverter and compressor technology. It is designed to deliver high performance, making everyday comfort a reality for all. SHORAI Edge offers energy efficient A+++ cooling and heating performances, with R32 refrigerant. Compatible with Monosplit & Multisplit outdoor units (B-codes).

High energy class A+++ / A++

- Heating and cooling modes ensure exceptional energy savings and unparalleled comfort levels.

Absolute silent operation

- SHORAI Edge's Silent function halves the sound level of the outdoor unit, while its Quiet function reduces noise from the indoor unit for a good night's sleep.

Indoor Air Quality

- The new Toshiba Ultra Pure Filter captures up to 94% of PM2.5 (particulate matters coming from atmospheric pollution), creating healthy living spaces at home.
- SHORAI Edge is equipped with the Magic Coil® which helps prevent water and dust from sticking to the coil. When the air conditioning is switched off to drain the contaminated coil, the fan continues to operate to keep the coil clean and dry whilst preserving the air conditioning high energy efficiency.

User friendly wireless remote control with weekly timer

- HADA-CARE to set louver position to generate indirect air flow for better air distribution to homogenize room temperature.
- Quiet mode for Comfort Sleep operating indoor at the lowest noise level
- Silent CDU is Toshiba's unique noise reduction function of outdoor unit for neighborhood comfort.
- Hi Power capacity booster to reach comfort set point very fast.
- OFF timer provides a very convenient automatic programmable stop function.
- On-demand Defrost for manual defrost at any time in extreme conditions.

SEIYA

SEIYA, "Silent night" in Japanese, is a silent solution that uses the new Toshiba Inverter and compressor technologies with R32 to offer A++ cooling and heating performances, leading to true energy savings and year-round comfort.

Compatible with Monosplit & Multisplit outdoor units (B-codes).

High Energy Class A++ / A++

- A unique performance/price ratio that allows optimal comfort and extra-low energy consumption in both cooling and heating mode.

Extremely silent operation

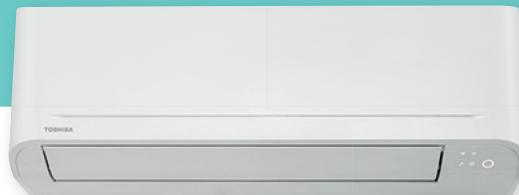

- SEIYA's Silent function halves the sound level of the outdoor unit, while its Quiet function reduces noise from the indoor unit for a good night's sleep.

Indoor Air Quality

- SEIYA is equipped with the Ultra Fresh filter® that captures up to 85% of PM2.5, protecting from atmospheric pollution and creating healthy living spaces at home.
- The Magic Coil® which helps prevent water and dust from sticking to the coil. When the air conditioning is switched off to drain the contaminated coil, the fan continues to operate to keep the coil clean and dry whilst preserving the air conditioning high energy efficiency.

User friendly remote control with weekly timer

- Quiet mode for Comfort Sleep operating indoor at the lowest noise level.
- Silent CDU is Toshiba's unique noise reduction function of outdoor unit for neighborhood comfort.
- High Power capacity booster to reach comfort set point very fast.
- ON-OFF timer provides a very convenient automatic programmable stop function.
- On-demand Defrost for manual defrost at any time in extreme conditions.

CONSOLE

This innovative and compact unit has been designed to be installed on the floor and in low wall applications, fitting perfectly under the window sills or in a low ceiling attic. The Console is compatible with Monosplit & Multisplit condensing units (B-code). Compact and modern design in all three dimensions (H600 x L700 x D220 cm).

Energy efficiency class A++ / A++

- High energy efficiency class in cooling.
- Low energy consumption in all conditions.

Bi-flow air diffusion system

- This feature enables users to select the favorable air flow outlet between the two available positions at the top and bottom front of the unit.
- The unique floor heating function, allows the unit to deliver a powerful flow at floor level for a uniform and comfortable room heating.

Toshiba Indoor Air Quality filtration system

- Toshiba IAQ's technology is able to seriously inhibit the reproductive ability of harmful elements. Its deodorizing power absorbs and decomposes, smoke, food smells and bad odors.
- Toshiba's new self-cleaning function is designed to reduce the humidity that causes mould to form inside an air-conditioning unit. This advanced, efficient system reduces moisture in the coils for healthier air to breathe.

User friendly wireless remote control with weekly timer

- Child-lock function on the unit display panel.
- Brightness level control of the display unit to reduce the led light glow.
- Automatic restart function in case of unexpected electricity supply line power cuts.
- Standard Toshiba functions: Weekly timer 24h, Power select, 8°C.

MAX EFFICIENCY	CAPACITY	OPERATION

RESIDENTIAL LIGHT COMMERCIAL BUSINESS RESIDENTIAL

Solutions for professionals, by professionals

Toshiba Digital and Super Digital Inverter systems provide exceptional operating savings and extremely compact units. With state-of-the-art technologies, flexible controls and improved installation, they ensure comfort and convenience for all business installations.

A complete range of indoor units to suit all commercial applications: ceiling, cassette, ducted, suspended and high-wall. The range has been expanded with maximum cooling capacities of up to 27kW to benefit additional commercial applications with larger volumes.

INVERTER SYSTEMS

WHEN THE INVERTER BECOMES DIGITAL

Toshiba technology recreates from power supply signal the ideal wave at the right frequency to perfectly drive the compressor.

ALLIANCE OF HIGH PERFORMANCES AND LOW POWER CONSUMPTION

Digital and Super Digital inverter are able to provide strong capacity, low power consumption, best comfort and reduced energy waste whatever the conditions.

EXTREMELY FLEXIBLE

Featuring the most compact chassis, Digital and Super Digital Inverter use advanced technologies such as DC hybrid control & Twin rotary compressor to operate smoothly from -27 to 52°C no matter the ambiance.

RAV SUPER DIGITAL INVERTER

Super Digital Inverter will maximize your energy savings and keep operating costs to a minimum thanks to Toshiba's legendary Twin Rotary compressors and Vector Controlled Inverter.

Benefit also from all the connectivity and flexibility you have ever dreamt of for guaranteed comfort and exceptional efficiency. Choosing Toshiba's light commercial advanced solutions is the right option for low environmental impact and outstanding durable investments

MAXIMUM EFFICIENCY

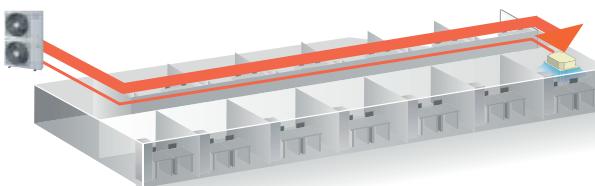

Very efficient energy consumption, keeps down operating costs : SEER of 9,40 and SCOP of 5,51 achived by Toshiba's unrivalled Super Digital Inverter technologies and newly developed components.

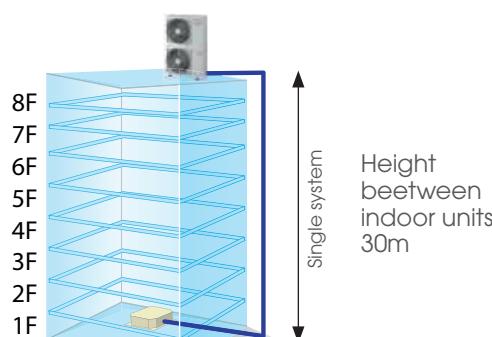

- Top class seasonal efficiency
- Lower stand-by power
- Energy monitoring
- Wider operating range

PIPING FLEXIBILITY

Super Digital Inverter leads the industry with support for height differences of up to 30 meters on a single system. That is enough height to cover an 8-storey building. Enable the outdoor unit to be installed out of sight increases installation flexibility (only 4 & 5HP).

Farthest equivalent length 75m

Calculated at 3.5 metres per floor

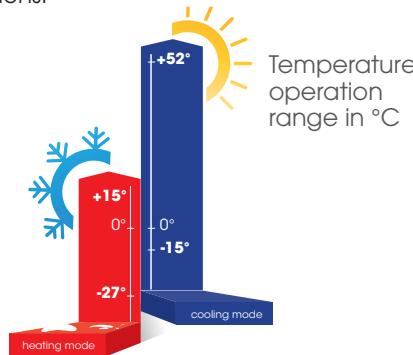

IDEAL COUPLE: DC TWIN ROTARY COMPRESSOR & VECTOR-CONTROLLED INVERTER

The benefits of inverter technology are further optimised in combination with Toshiba twin-rotary compressors. These allows excellent speed control in the capacity range from 20 to 100% capacity: this is an exclusive Toshiba benefit!

OPERATING TEMPERATURE RANGE

Heater operation is possible starting from an outdoor temperature of -27°C creates a comfortable space even during cold winters, while cooling operation is possible up to 52°C outdoor temperature. This enables wider applications and use of the system in colder regions.

RAV DIGITAL INVERTER

Digital Inverter combines compact chassis outdoor units, unrivalled capacity range and large indoor unit line-up for perfect adaptation to any situation. This is the ultimate high efficiency solution for light commercial applications in terms of product reliability and quality.

SMALL AND LIGHT CHASSIS

Less than 900mm up to 5 HP, the Digital inverter is extremely compact and can be installed in very small places. In addition, chassis under 5 HP are less than 70kg.

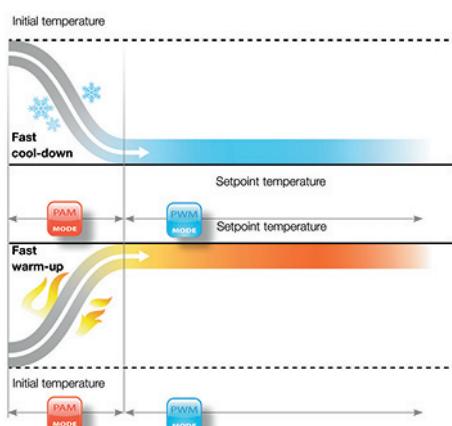

SMART INVERTER

Hybrid inverter control combines two intelligent controls mechanisms to reach the setpoint temperature as quickly as possible with maximum efficiency:

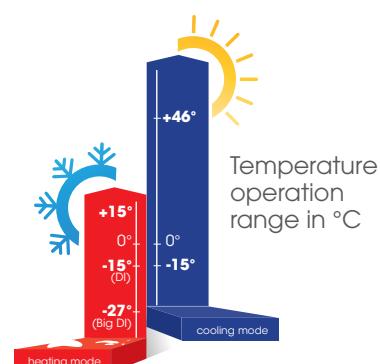

- the PAM mode, quickly achieves high capacity and desired comfort.
- the PWM mode minimises power input to maximise efficiency.

The result: high efficiency level.

OPERATING TEMPERATURE RANGE

Heater operation is possible starting from an outdoor temperature of -15°C (-27°C for Big DI), while cooling operation is possible at -15°C and up to 46°C outdoor temperature. This enables wider applications and usage of the system everywhere.

WIDE CAPACITY RANGE

9 sizes from 1 HP to 10HP with 1Ph or 3Ph electrical connections to cover every type of projects from the 15m² room to the 200m² shop in both new construction and refurbishment.

> RAV DIGITAL INVERTER CLASSIC

> NEW

Digital Inverter Classic offers all of Toshiba expertise at an affordable cost for a wide range of light commercial applications.

COMPACT CHASSIS

With a width of less than 900mm, the Digital Inverter Classic is extremely compact and can be installed in small places.

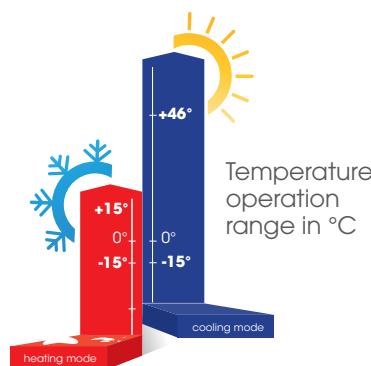

TOSHIBA EXPERTISE

Twin rotary compressor, heat exchanger or hybrid inverter demonstrate the innovative technology Toshiba has been developing since the 80's making the Digital Inverter Classic a brilliant solution.

OPERATING TEMPERATURE RANGE

Heater operation is possible starting from an outdoor temperature of -15°C, while cooling operation is possible at -15°C and up to 46°C outdoor temperature. This enables wider applications and usage of the system everywhere.

CLASSIC LINEUP

Most light commercial applications are covered thanks to a comprehensive lineup from 2 to 6HP and 1-phase or 3-phase electrical connections.

Capacity	2HP	3HP	4HP	5HP	6HP	Compatible with
Digital Inverter Classic	✓ (1Ph only)*	✓ (1Ph only)	✓ (1Ph & 3Ph)	✓ (1Ph & 3Ph)	✓ (1Ph & 3Ph)	4-way cassette, standard duct and high wall.

SUPER DIGITAL INVERTER

The Toshiba Super Digital Inverter 1 series is leading energy efficiency, operating range and piping length, to offer the best solution for the majority of commercial projects and large residential applications.

Top class efficiency

- High efficiency SCOP of up to 5.51, thanks to Toshiba inverter technology.

Wide adaptability

- Operating temperature limits from -27°C (Heating) to +52°C (Cooling) allow the system to operate across a wide temperature range.
- Quiet operation.

Flexible

- Can be utilised for single, twin or triple indoor applications.

Easy to maintain

- Removable corner panels for easy access.
- Self-diagnosis function.

GM_ATP(8)

DIGITAL INVERTER

Toshiba Digital Inverter brings state-of-the-art inverter technology for the commercial sector, offering considerable advantages in terms of capacity, energy savings, optimised control, lower refrigerant charge and utilising the smallest physical dimensions and lightest range of outdoor units in the industry.

Light and compact

- Up to 12.8 kW in only 890mm height and 69kg.

Wide adaptability

- Compatible with a wide choice of indoor units: 4-way cassette dB(A), 4-way compact cassette, slim duct, standard duct, high wall and ceiling.
- Night operation mode to minimize the outdoor unit sound as low as 33dB (A).

Efficiency & energy savings

- The Vector Intelligent Drive Unit (IPDU) technology ensures.
- Power limitation by 1% step between 50% and 100% load for optimal capacity control.
- Energy monitoring by using RBC-AMSU51E-ES/EN wired remote controller.

Easy to maintain

- Removable corner panels for easy access.
- Auto diagnostic function.
- Self-diagnosis function.

BIG DIGITAL INVERTER

Big DI combines very small footprint and all of Toshiba's expertise in terms of efficiency, reliability and connectivity to ensure energy savings as well as perfect comfort all year round.

High efficiency and energy savings

- Top class EER/COP thanks to exclusive Toshiba's inverter twin-rotary compressor.
- Wide capacity range down to 4.6kW to ensure continuous operation whatever the conditions and maximize efficiency.
- Compliance with ERP directive Lot21.

Wide adaptability

- Allows the connection of four indoor units (same type, same capacity).
- Compatible with a large choice of indoor units: 4-way cassette, 4-way compact cassette, slim duct, standard duct, high-wall & ceiling.

Safe and reliable

- Built-in leak detection system.

SCOP MAX

3.51

CAPACITY

19kW > 27kW

OPERATION

-27°C > +46°C

The installation can reach up to 100 m total piping length and 30 m in elevation without additional safety measures.

DIGITAL INVERTER CLASSIC

>NEW

The Digital Inverter Classic offers all of Toshiba expertise to provide efficient cooling and heating solutions to the commercial sector. Benefit from numerous advantages in terms of energy savings, optimised control, lower refrigerant charge, and reduced footprint.

Compact

- Full one-fan outdoor unit line-up for strong product positioning flexibility.

Wide adaptability

- Compatible with 3 types of indoor units: 4-way cassette, standard duct, and high wall.
- Available in both 1Ph and 3Ph versions, connectable to any power supply from 4HP model.

Efficient & environmental oriented

- Toshiba compressor and Toshiba Inverter for high operating efficiency.
- Optimized for R32 refrigerant.

SCOP MAX

4-WAY SMART CASSETTE

Dedicated for commercial application, the Toshiba Smart Cassette is the perfect mix between comfort, elegance and efficiency.

Efficiency

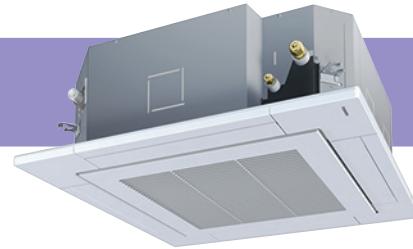

- Top class SEER and SCOP thanks to long slit heat exchanger with magic coil treatment, high efficiency fan motor and large opening air conditioning ventilation.
- Energy saving with the occupancy sensor which will automatically switch off the unit if nobody is in the room (TCB-SIR41U-E needed).

Comfort

- Unique flap design for optimal air distribution.
- Individual setting of louver position: 3 different swing modes: standard, diagonally, opposite or turn around.
- 5 fan steps to precisely control the air flow.

Design

- Simple & elegant design fits various rooms.

SCOP MAX

>NEW PANEL DESIGN

4-way Cassette is designed to provide uniform air distribution and total comfort; it is the ideal solution for small commercial application.

Comfort

- Two louver shape option: straight flow louver and wide flow louver; optimum air distribution.
- Individual setting of louver position: 3 different swing modes: standard, diagonally, opposite, turn around.
- Wide air flow in all directions.
- Optionnal PM2.5 filters.

Reliability

- Self-cleaning function for anti-mould in drain cap.
- Built-in high-lift drain pump.

Easy to install

- Compact chassis with only 256mm height (sizes 5 and 8).
- Light-weight unit, for easy and quick installation.

COMPACT 4-WAY CASSETTE

The compact 4 way cassette has been especially designed for small commercial application where a compact efficient unit is needed.

Design

- Elegant and Flat appearance
- Fit within the T-bar of grid ceiling : 620mm X 620mm.

Comfort

- Individual setting of louver position: 3 different swing mode: standard, diagonally, opposite, turn around.
- 5 steps air flow.

Easy to install

- Compact and thin chassis with only 256mm height
- Built-in high-lift drain pump
- Light-weight unit, for easy and quick installation.

SCOP MAX

4.70
A++

CAPACITY

2.5kW > 6kW

OPERATION

-27°C > +52°C

Occupancy sensor switches off automatically the unit if nobody is in the room to save energy.

HM_BTP

STANDARD DUCT

Compatible with
Digital Inverter Classic

Whatever the shape of the room, this flexible model ensures a uniform temperature and air distribution for optimal end user comfort.

Adaptability

- Up to 150Pa available pressure: thanks to DC fan motor.
- Flexible design, allows the inlet air configuration to be configured between the standard rear inlet design or as an alternative, from the underside of the unit. There is also a provision for a fresh air intake supply via a pre-punched knockout hole.
- Compact and thin chassis, measuring just 275mm in height.

Easy to install

- Built-in high-lift drain pump.
- PC board panel easily accessible from the side of the unit.
- Optional air discharge spigot.

SCOP MAX

RM_SDT

SLIM DUCT

Whether installed in a ceiling void or in a false ceiling, Toshiba's slim duct offers the ultimate technology, with exceptional energy savings, high performance and easy installation.

Adaptability

- Up to 50Pa available pressure with four steps set up.
- Easy to combine with different types of air diffusers.
- Flexible design, allows the inlet air configuration to be configured between the standard rear inlet design or as an alternative, from the underside of the unit.

There is also a provision for a fresh air intake supply via a pre-punched knockout hole.

Easy to install

- Slimline design, with a height of just 21cm and a weight of 22kg, gives increased flexibility when designing and installing the system.
- Natural drain discharge or built-in drain pump to manage condensates.

RM_DTP
HIGH STATIC DUCT

Toshiba's high static pressure ducts are specially designed to air-condition large open spaces thanks to their impressive air flow characteristics.

Comfort

- 3-speed DC fan to provide correct air flow and maximise energy savings.
- Compatible with metal or textile ducts.

Adaptability

- Lightweight design for quick and easy installation.
- With 7-step settings, the static pressure of the duct can range from 52 to 250 Pa.
- Up to 5,600 m³/h air flow to efficiently blow the air into large rooms.

Easy to install

- Electronic components accessible from the outside of the unit.
- Air filter and drain pump are available as an option.

SCOP MAX

3.78

CAPACITY

19kW > 27kW

OPERATION

-27°C > +46°C

The DTP high static pressure duct is compatible with textile duct diffusion system to blow the air smoothly throughout the room.

HM_CTP CEILING

The simple, yet elegant design helps to create a pleasant and relaxing environment, quickly conditioning the room air to the desired temperature.

Comfort

- Automatic louvre control for all year round comfort and efficiency.
- Low noise levels, thanks to high diameter fan and DC motor.

Reliability

- Self-cleaning function, enables the air flow to remain constant and fresh and reduces the frequency of service visits.

Easy to install and to maintain

- This design, represents the best possible solution, where there is a lack of space or absence of a ceiling void.

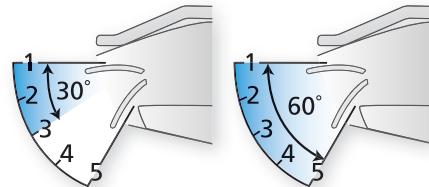

Adaptability

- Anti-bacterial drain point available as an option.
- Connecting kit available as an option for external I/O without local relay preparation.

SCOP MAX	CAPACITY	OPERATION
5.05	3.6kW > 16kW	-27°C > +52°C

The airflow angle is automatically set to the most suitable setting according to the cooling or heating needs.

**HM_KRTP
HIGH-WALL**

 Compatible with
Digital Inverter Classic

Compact, quiet with an attractive design, this high-wall is suitable for every kind of project in new construction or refurbishment.

Comfort

- Auto louver mode allows optimum and uniform air distribution.

Control

- Wireless remote control with pre-set functions accessible with dedicated buttons: hi-power mode, quiet mode, comfort sleep, eco-mode.

Healthy

- Self-cleaning feature to prevent mould formation on the heat exchanger coils.

SCOP MAX

4.42

HM_FT

FLOOR STANDING

Toshiba floor standing unit combines important air flow, wide air diffusion and simplified installation to cool and heat large rooms.

Wide adaptability

- Broad capacity lineup from 2 to 6HP
- Connectable in monosplit or twin mode.

Comfort

- Wide air flow to cool and heat large areas.
- Horizontal and vertical louvers for optimum air distribution.

Easy to install

- Directly positioned on the floor to simplify installation.
- Plug and play product with embedded link detector.

SCOP MAX

4.40
A+

CAPACITY

5kW > 16kW

OPERATION

-27°C > +52°C

Embedded leak detector linked to safety ventilation to facilitate the integration of the product in every kind of projects.

RAV-DXC

STANDARD DX KIT

Enables the connection of a third-party air handling unit (with DX coil) to Toshiba LC outdoor units.

Global

- Compatible with the majority of air handling units with a DX coil fitted inside (capacity ranges from 2.5 to 27kW).
- Can operate in both heating and cooling modes, depending on end user requirements.

Control

- Control achieved using a standard Toshiba remote controller.
- Algorithm based on air suction temperature.

Easy to install

- Capacity set by DN code adjustment during installation.
- Extended 5 meters sensor leads pre-fitted to improve installation time and flexibility.
- Relay isolated inputs to prevent accidental wiring errors, damaging the PCB.

MAX AIR FLOW

Up to 5000m³/h

CAPACITY

2.5kW > 27kW

OPERATION

-27°C > +52°C

Input/output signal available:

- Operation output,
- AC fan motor output,
- Alarm output,
- External On/Off input,
- Safety-cut output.

STANDARD DX KIT Physical Data

DX Controller unit	RAV-	DXC010
Dimensions (HxWxD)	mm	400 x 300 x 150
Weight	kg	8
Operating range - Cooling coil "Air on" temp	°C	15°CWB÷24°CWB
Operating range - Heating coil "Air on" temp	°C	5°CDB÷28°CDB
Power supply	V-ph-Hz	220/240-1-50

C: cooling mode
H: heating mode

Cooling and heating output figures are based on calculations and "general" test data. All figures are to be taken as approximations. The properties of the third party DX Coil will have an affect on the performance of the outdoor units.

All capacity data shown is based on the following Rated Conditions:

- Cooling (Rated): Indoor air temperature 27°C db / 19°C wb. Outdoor air temperature 35°C db
- Heating (Rated): Indoor air temperature 20°C db. Outdoor air temperature 7°C db / 6°C wb.

Notes:**Cooling Mode Coil "Air On" Temp: Minimum 15°CWB (18°CDB) / Maximum 24°CWB (32°CDB)**

Air temperatures flowing across the coil below this level, can in some circumstances, cause icing and freezing issues with the coil and eventually forcing the system to shut down and also be detrimental to the outdoor unit itself.

Heating Mode Coil "Air On" Temp: Minimum 15°CDB / Maximum 28°CDB

In the reserve cycle mode when the outdoor unit is producing hot gas, the coil in the AHU is effectively the condenser. Air temperatures flowing across the coil below this level, can cause over condensing of the refrigerant.

This can result in liquid being returned to the compressor which will cause a mechanical failure of the outdoor unit.

Low air temperatures will also cause the unit to use its defrost mode more often.

Fresh Air Intake

If you wish to use Fresh Air which is outside of these Coil "Air On" limits it has to either be pre-conditioned by other equipment, or mixed with return air (or a combination of both) so that it remains inside these limits, in order to ensure reliable operation.

Automatic Mode

Please be aware that frequent mode changes could occur when using Automatic mode.

TA sensor

The TA sensor should be positioned in the return air duct. In case, it's not representative enough of the occupants area temperature, remote temperature sensor TCB -TC21LE2 should be used in the room.

RAV-DXC 0/10V DX KIT

Enables connection and control of Toshiba LC outdoor units to a third-party air handling unit (with DX coil).

Global

- Compatible with the majority of air handling units with a DX coil fitted inside (capacity ranges from 2.5 to 27kW)

Control

- Capacity control and selection mode of the Toshiba outdoor unit directly from the AHU controller through a 0/10v signal.

Easy to install

- Capacity set by DN code during installation.
- Extended 5 meters sensor leads pre-fitted to improve installation time and flexibility.

MAX AIR FLOW

Up to
5.200m³/h

CAPACITY

2.5kW > 27kW

OPERATION

-27°C > +52°C

Compatible with both LC and VRF systems.
(made possible via simple switch change on PCB)

TWIN +

Connect 4 indoors units on the same system to satisfy the cooling and heating requirements of larger area.

Comfort

- Precise air flow control, accurately controls the distribution of the air regardless of the room size.

Adaptability

- Twin, triple or double twin configurations.
- Compatible with every type of LC indoor units: 4-way cassette, duct, high-wall ceiling and floor standing.

Control

- One user-friendly controller for all the indoor units to simplify the control.

SCOP MAX

5.05

CAPACITY

9.5kW > 27kW

OPERATION

-27°C > +52°C

Toshiba RAV simplistic piping design allows multiple indoor units to be connected via a simple branching methodology.

The business solutions

VRF technology is the perfect solution for large commercial and industrial buildings such as offices, hotels, hospitals, leisure and shops.

The variable refrigerant flow technology combined with inverter compressor guarantees high efficiency levels, operational flexibility with limited maintenance requirements.

More over, the diversity of solutions makes VRF system the most flexible choice to satisfy all requirements.

> BUSINESS

LIGHT COMMERCIAL BUSINESS RESIDENTIAL

LIGHT COMMERCIAL

EXCELLENCE IN SEASONAL EFFICIENCY

MiNi SMMS-e, SMMS-u, SHRM-e & SHRM-Advance

> CREATING BENEFITS AROUND COMFORT

> Benefits for the consultant

Our VRF offers unlimited possibilities in terms of capacity, connectivity, indoor unit lineup and control solutions, providing the correct solution for your customers needs. Toshiba selection tool will guide you through the selection process with minimal input from your side, ensuring troublefree installation and operation. All systems come with the Eurovent certification as standard.

> Benefits for the user

There is nothing like a comfortable place to enjoy the present moment. Full of Toshiba innovations, our VRF guarantee all year round comfort combined with superior energy management, advanced air filtration and full control solutions for maximized product usability.

> Benefits for the installer

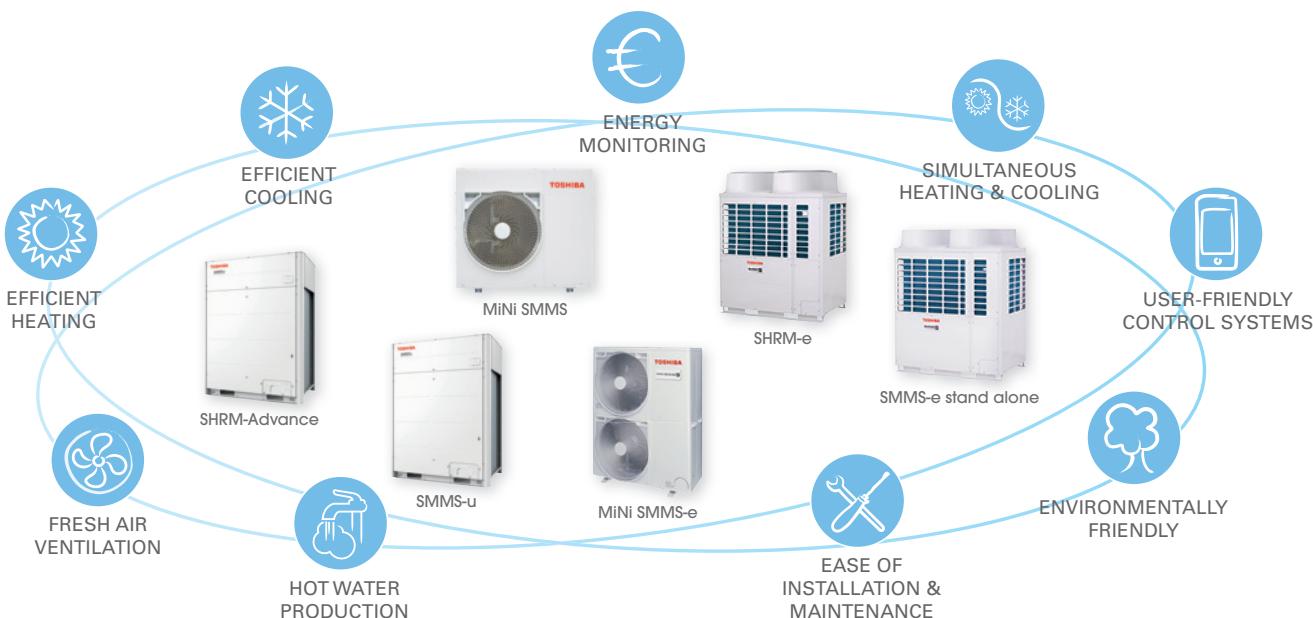

Designed to perform and engineered to perfection, Toshiba VRF excels in managing the heating, cooling, hot water and fresh air input into offices, shops, restaurants and domestic housing, with unrivalled connection flexibility. You can rely on Toshiba support, to assist you from the project phase to commissioning and troubleshooting.

> Benefits for the planet

Toshiba has an unwavering drive to make and do things that lead to a better world. After the switch to low GWP refrigerant for its residential and light commercial products, Toshiba is now one of the first to launch a top blow VRF using R32: The SHRM-Advance. Be prepared to a new green dimension in your projects and in your life.

> SHRM-Advance, the future is now

More environmental friendly and incorporating all of SMMS-u innovations, the new SHRM-Advance is the most advanced solution to provide cooling, heating and hot water for commercial applications. Be surprised by all the possibilities offered by this new solution benefiting from 40 years of inspired innovations!

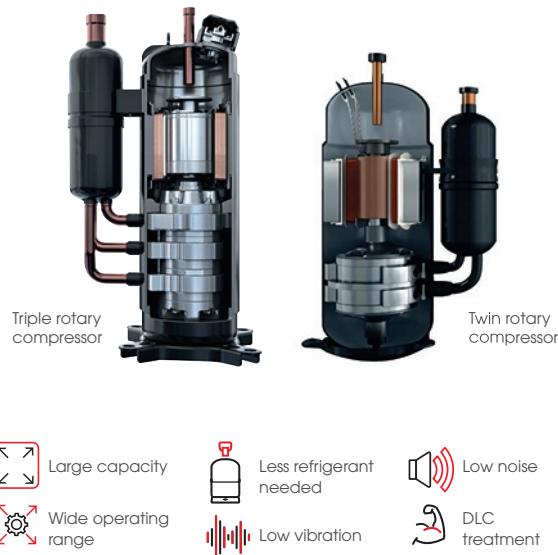

- 8 to 24HP
- 2-pipe and 3-pipe operations
- Wide indoor unit compatibility
- Ultra high efficiency up to 8.9 SEER
- EN378 compliant

> HIGH EFFICIENCY AND LOW OPERATION COSTS

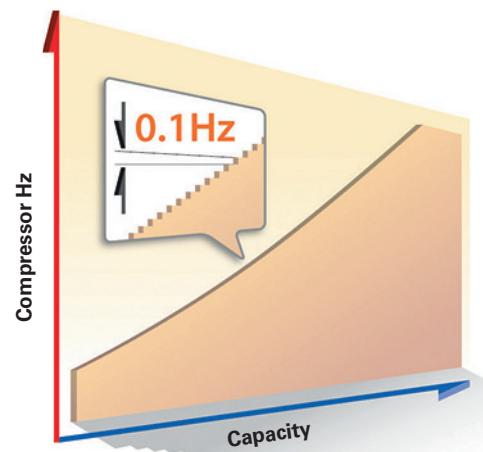

> Innovative compressor technology

Toshiba rotary compressor technology brings outstanding performances to all SMMS systems with no compromise on system reliability.

> Infinite variable control

Inverter control feature has been continually evolved and developed, since its inception by TOSHIBA engineers back in 2004 with the original SMMS system. The control has the ability to adjust the compressor rotational speed in a near seamless 0,1 Hz steps. This control when matched with TOSHIBA's newest and latest Twin Rotary compressors, allows the system to respond precisely to the capacity needs of the end user, whilst minimizing energy losses.

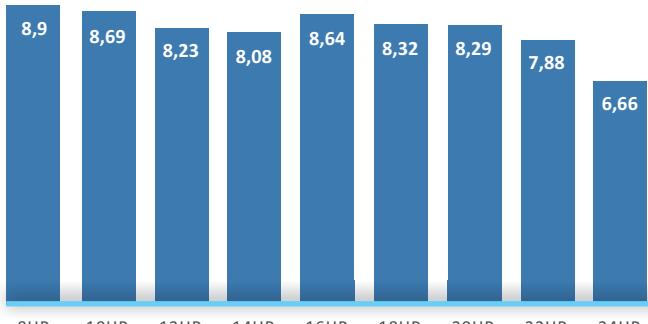

> Maximum part load and full load efficiencies

SMMS-u SEER*

SHRM-advance SEER*

*4-way cassette combinations

Thanks to Toshiba's unique twin rotary compressor, re-designed heat exchanger and "intelligent flow" technology, the Toshiba's VRF achieve a SEER of 9.68 (MiNi SMMS-e), one of the highest seasonal efficiency in the market.

Maximum efficiency is obtained under 50% part load conditions, under which VRF systems operate predominantly.

The expert use and evolution of Toshiba's core technologies have allowed the Toshiba VRF system to achieve the highest part load COP and EER in the industry.

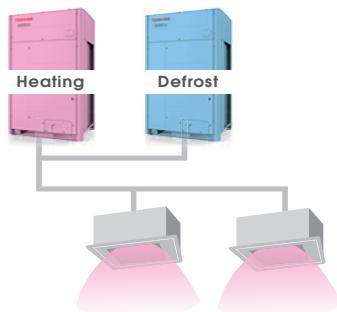

> MiNi SMMS-e, SMMS-u, SHRM-e & SHRM-Advance

> SUPERIOR AIR COMFORT

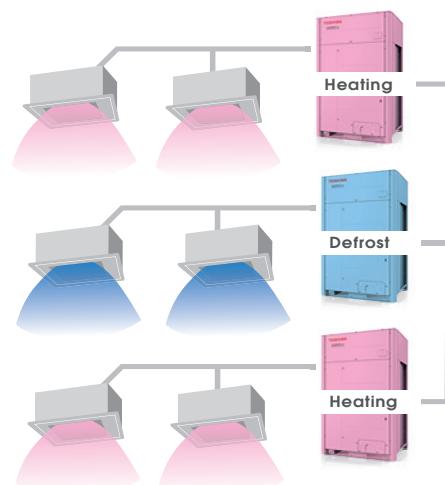

> Intelligent defrost

Individual defrost: continuous heating up to 5 hours

Kobetsu

No simultaneous defrost in combination configuration.
Heating operation never stopped.

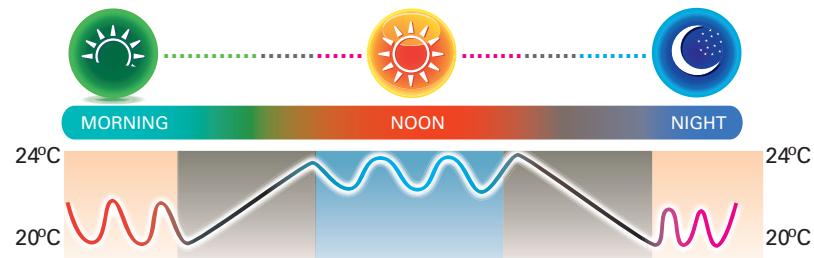

Renkey

No simultaneous defrost with multi system configuration.
Heating operation never stopped.

* Applicable on SMMS-u and SHRM-Advance

> Dual set point for more precision

The Dual Set Point increases the system's energy efficiency and reduces overall running costs, with longer periods of time in thermal off mode. Heating and cooling temperatures at which the indoor unit will begin to operate can now be individually selected giving maximum flexibility to the user.

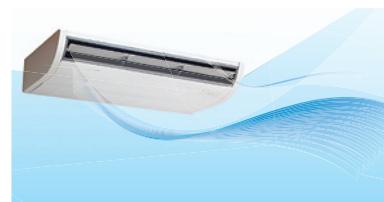

> Cool comfort with soft cooling mode

The development of the soft cooling mode provides a new level for cool comfort. You will have the freedom to personalize the air flow intensity, angle and direction directly from the remote control and enjoy the indoor environment at the right temperature without being directly exposed to the cold draft.

Standard operating mode

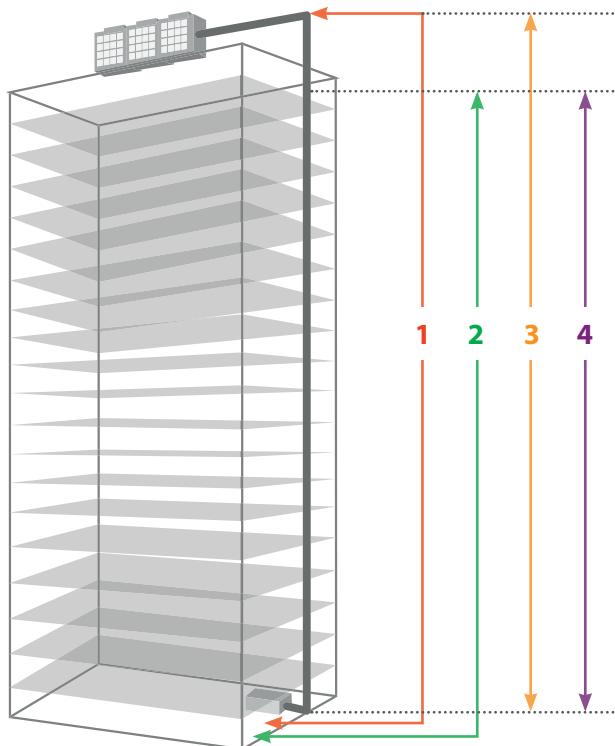

Soft cooling mode

> FLEXIBLE DESIGN AND QUICK INSTALLATION

> Piping design flexibility

Toshiba's piping technology makes them one of the industries leaders in system flexibility and ease of installation and with the e-series VRF system, the level of flexibility has increased further, giving more options to the contractor and installer alike.

For more details, please refer to installation manuals.

1 Total piping length

Applied with Toshiba's unique and greatly improved technology, Toshiba's VRF can reach up to 1,200 meters maximum piping length.

**Total piping length
1,200 m***

2 Farthest equivalent length

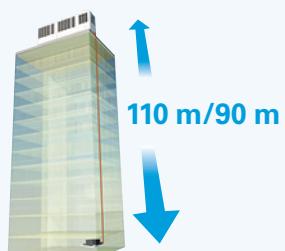

The maximum equivalent distance between the outdoor unit and the farthest indoor unit tops at 250 meters for SMMS-u and 190 meters for SHRM Advance, a best-in-class for the industry.

**Farthest equivalent length
250 m/190 m**

3 Height between outdoor unit and indoor unit

Another industry best-in-class feature is the maximum vertical distance between the outdoor and indoor units, which can extend up to 110 meters for SMMS-u & 90 meters for SHRM Advance. Toshiba's VRF enhanced piping capabilities result in more benefits for system design and installation flexibility, as well as lower installation costs.

110 m/90 m

4 Height difference FCU-FCU

Maximum vertical distance between indoor units can reach up to 40 meters, which is equal to an entire 11-storey Height difference between outdoor unit and indoor unit 40 m building.

**Height difference between outdoor unit and indoor unit
40 m**

SMMS-u/SHRM-Advance"

> Toshiba selection tool

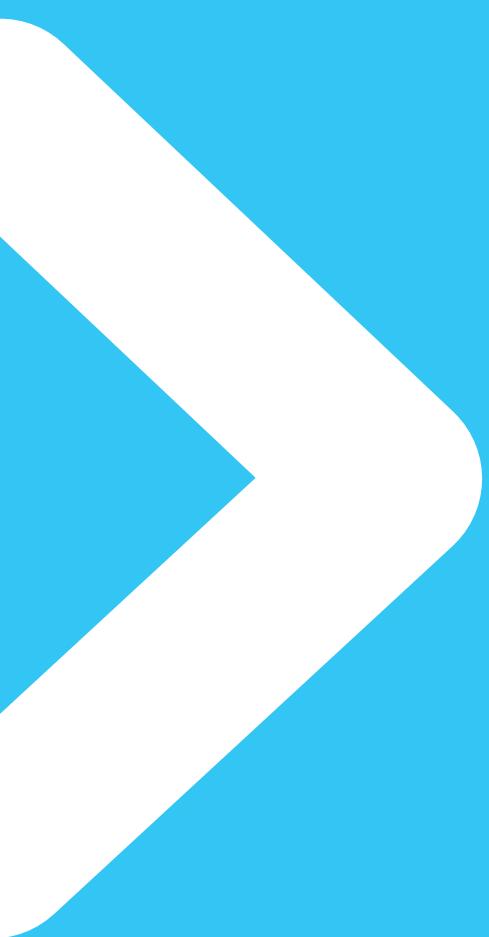

Designed for novice and expert users, Toshiba selection software creates simple, yet detailed VRF system schematics. It is highly versatile, allowing the level of detail to be tailored to suit customer requirements. Final detailed reports can be produced and sent to customers in PDF format or in more complex files, such as AutoCAD DXF, allowing simple integration into existing software packages.

> Easy commissioning and maintenance

Save time during commissioning and maintenance. Choose between the "Wave Tool Advance" using Smartphone NFC connection or the link adaptor connected to the outdoor or indoor unit.

SIDE BLOW

Compact, efficient, adaptable, energy saver, the sideblow VRF is the solution to cool and heat small/medium size buildings.

Efficiency

- Toshiba's in-house designed twin rotary inverter controlled compressor operates precisely to match the indoor demand, providing class leading levels of performance and system efficiency.

Adaptability

- Extensive indoor model range, with various styles of indoor unit designs, including small capacity 0.6Hp models.
- Possibility to merge different styles of indoor units.

Comfort

- One user-friendly controller for all the indoor units helps to simplify the unit control.

Outdoor unit height greatly reduced (>1m) for easier integration and installation.

MCY-MHP_HS

Mini SMMS-e 1Ph

Incorporating all of Toshiba's VRF experience and knowledge into a system that measures no more than 1.2m high, results in a perfect solution for all small to medium building heating and cooling requirements.

Technology

- Toshiba's in-house designed twin rotary inverter controlled compressor operates precisely to match the indoor demand, providing class leading levels of performance and system efficiency.
- Precise refrigerant control ensures each indoor unit receives the right amount of refrigerant.

Connectivity

- With 180m total (125m equivalent) piping length, ensures the MiNi SMMS-e system is adaptable for all types of projects.
- Extensive indoor model range, with various styles of indoor unit designs, including small capacity (0.6HP) and air-to-air heat exchanger models.

Toshiba's in-house designed twin rotary inverter controlled compressor operates precisely to match the indoor demand, providing class leading levels of performance and system efficiency.

MCY-MHP_HS8

Mini SMMS-e 3Ph

Incorporating all of Toshiba's VRF experience and knowledge into a system that measures no more than 1.2m high, results in a perfect solution for all small to medium building heating and cooling requirements.

Technology

- Toshiba's in-house designed twin rotary inverter controlled compressor operates precisely to match the indoor demand, providing class leading levels of performance and system efficiency.
- Precise refrigerant control ensures each indoor unit receives the right amount of refrigerant.

Connectivity

- With 180m total piping length, ensures the MiNi SMMS-e system is adaptable to all types of projects.
- Extensive indoor model range, with various styles of indoor unit designs, including small capacity (0.6Hp) and air-to-water heat exchanger models.
- 3Ph power supply.

SCOP MAX

4.38

CAPACITY

4HP > 10HP

OPERATION

-20°C > +46°C

With 30Pa available pressure, the MiNi SMMS-e can be installed indoor behind a transfer grid.

MMY-SAP-HT8P

SMMS-E STAND ALONE

Keep all benefits of Toshiba SMMS-e with 50% less pre-charge refrigerant: new intelligent and innovative features that maximise end user comfort and system efficiencies.

Excellence

- Toshiba's in-house designed DC twin rotary compressor offers outstanding capacity, efficiency and comfort even under part load conditions.
- Incorporating Toshiba's latest inverter control for compressor precise regulation, maximum performance and energy savings.
- Outstanding 4-side heat exchanger + sub cooling heat exchanger for optimized efficiency
- Precise refrigerant control to ensure that each indoor unit receives exactly the right amount of refrigerant.

Expansion

- A wide choice of indoor unit styles and capacity ranges to match customer needs and room configurations.

Enhancement

- With up to 235 m in equivalent length, 90 m from the first branch kit to the farthest indoor unit and 70 m height difference, the system is fully adaptable to all project types.

MAX EFFICIENCY

3.81

CAPACITY

8HP > 10HP

OPERATION

-25°C > +46°C

For maximum peace of mind should a compressor failure occur, backup operation is available.

The ALL inverter control can be adjusted to compensate for a failed compressor.

¹) Rated conditions

Cooling : Indoor 27 degC Dry Bulb / 19 degC Wet Bulb, Outdoor 35 degC Dry Bulb, Outdoor 7 degC Dry Bulb / 6 degC WetBulb. Based on equivalent piping length of 7.5m and piping height difference of 0m. ²) Indoor above condition:If the height difference between indoor units exceeds 3 m, set 30 m or less. Indoor below condition: If the height difference between indoor units exceeds 3 m, set 50 m or less. Also Extension up till 90m is possible. Be sure to refer the Engineering Databook for details of these conditions and requirements.

³) The unit operates down to an outdoor temperature of -10°C, however cooling performance may decline considerably when total operating capacity of indoor units is less than 4HP while ambient temperature is below -5°C. Consider installation location/surroundings and system design when expected to operate below -5°C. ⁴) Low ambient cooling (-5 deg C or less) is limited to application.

⁵) The unit operates down to an outdoor temperature of -25°C, however considerable performance decrease will be expected below -20°C. Consider installation location/surroundings and system design when expected to operate between -20°C and -25°C. ⁶) Low ambient heating (<20degC or less) for extended periods of time is not allowed.

C: cooling mode - H: heating mode

MMY-MUP_1HT8P**SMMS-u**

SMMS-u, the latest generation of Toshiba VRF engineered in Japan, integrates a totally new redesigned chassis, a new compressor and a new heat exchanger to achieve unrivalled efficiency, outstanding comfort level and low environmental footprint.

Unrivalled

- Space efficient chassis design to ease product integration with no compromise on efficiency.
- Exclusive Toshiba Triple rotary compressor offering high capacity, outstanding performances with less refrigerant.
- Super efficient heat exchanger covering full product height to maximize energy exchange.
- Intelligent VRF control ensures exact quantity of refrigerant to be delivered to the indoor units to avoid waste of energy.
- KO-BE-TSU and Renkey new defrost solution for constant comfort level.

Universal

- Up to 24HP in single module and max 120HP in combination, enter into a new dimension!
- Up to 1,200m piping length max to cover the full building without splitting systems.
- Less constraints with 128 indoor units maximum per system.
- -25 to +52°C operating range to cover all climates over Europe.

Usability

- Ease commissioning and maintenance with direct USB connection, Wave Tool advance and Link adaptor.
- Trust into the new TU2C link protocol offering faster and stronger data transfer.

SHRM Advance

>**NEW**

Using the same chassis as of SMMS-u, SHRM Advance is the latest generation of Toshiba VRF. It pushes the boundaries of VRF system featuring low environmental profile, wide flexibility and top-class efficiency as always.

Advanced concept

- Anticipate the future and move your projects to low GWP refrigerant VRF systems.
- Make your life easier with Toshiba's VRF packaged solutions!

One product two possibilities:

- 2-pipe heating or cooling.
- 3-pipe heating & cooling with heat recovery.

Advanced specification

- Up to 24HP in a single module, never experienced before with R32 refrigerant!
- Up to 54 indoor units per system for maximum flexibility.
- Up to 12 output flow selectors opening new piping design perspectives.
- Low footprint chassis that gives the possibility to install the outdoor unit either on the roof, on the ground or inside the building (80PA available pressure).

Advanced features

- Super efficient heat exchanger covering full product height to maximize energy exchange.
- Intelligent VRF control ensuring exact quantity of refrigerant to be delivered to the indoor units to avoid waste of energy.
- KO-BE-TSU and Renkey new defrost solution for constant comfort level.

Advanced service

- Easy commissioning and maintenance with direct USB connection, Wave Tool advance and Link adaptor.
- Trust the TU2C link protocol that offers faster and stronger data transfers.

SCOP MAX

4.67

CAPACITY

8HP > 24HP

OPERATION

-25°C > +52°C

Increased integration flexibility with the new generation of flow selectors 1, 4, 8 or 12 outputs, with embedded shut-off valves.

SHRM Advance Performances

- 1) Rated conditions
 Cooling : Indoor 27 degC Dry Bulb /19 degC Wet Bulb , Outdoor 35 degC Dry Bulb.
 Heating : Indoor 20 degC Dry Bulb, Outdoor 7 degC Dry Bulb / 6 degC WetBulb.
 Based on equivalent piping length of 7.5m and piping height difference of 0m.
- 2) The total amount of system refrigerant should be 63.8kg or less.
- 3) Indoor below condition:
 If the height difference between indoor units exceeds 3 m, set 50 m or less.
 Also Extension up till 90m is possible. Be sure to refer the Engineering Databook for details of these conditions and requirements.
- 4) The unit operates down to an outdoor temperature of -10°C, however cooling performance may decline considerably when total operating capacity of indoor units is less than 4HP while ambient temperature is below -5°C.
 Consider installation location/surroundings and system design when expected to operate below -5°C.
 On single outdoor unit only.
- 5) Low ambient cooling (-5 deg C or less) is limited to application.
- 6) The unit operates down to an outdoor temperature of -25°C, however considerable performance decrease will be expected below -20°C. Consider installation location/surroundings and system design when expected to operate between -20°C and -25°C.
- 7) Low ambient heating (-20degC or less) for extended periods of time is not allowed

MMY-MAP_FT8P

SHRM-e

The SHRM-e, full Inverter heat recovery 3-pipe VRF, is the ultimate simultaneous heating & cooling solution for business applications.

Excellence

- Toshiba's in-house designed DC twin rotary compressor with outstanding capacity under partial load driven to improve efficiency and comfort.
- Incorporating Toshiba's latest inverter control, enables the precise modulation of the compressor, ensuring maximum performance and energy savings.
- 2 heat exchangers: outstanding 4-side heat exchanger + sub cooling heat exchanger to optimized efficiency.
- Precise refrigerant control ensures each indoor unit receives the right amount of refrigerant.

Expansion

- A complete range of indoor unit styles and capacity ranges, meets the demands of the customer and the room configuration.
- 7 outdoor unit model line-up from 8 to 20HP that can be installed in a variety of combinations, of up to a capacity of 54HP.

Enhancement

- With up to 1km of total pipe work, an equivalent piping length of 200m, and a maximum height separation of up to 70m, results in a system that is fully adaptable for all types of projects.
- Revolutionary hands-free Wave Tool technology that allows contactless commissioning and diagnoses to be carried out using a smartphone application.

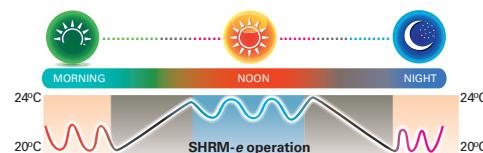

SCOP MAX	CAPACITY	OPERATION

3.71

8HP > 54HP

-25°C > +46°C

The Dual Set Point increases the system's energy efficiency and reduces overall running costs, with longer periods of time in thermal off mode. Heating and cooling temperatures at which the indoor unit will begin to operate can now be individually selected giving maximum flexibility to the user.

1) based on an indoor air temperature of 27°C db/19°C wb and an outdoor air temperature of 35°db. 2) based on an indoor air temperature of 20°C db and an outdoor air temperature of 7°db/6°C wb. 3) If outdoor units are combined, refer to the installation manual. 4) Allowable values for length equivalent to furthest pipe are shown following and they vary according to performance rank of outdoor unit. (22.4 to 56.0; 180m, 61.5 to 112.195m; 120.200m.). 5) Less than 34HP: 300m. Total charging refrigerant is 140 kg or less. 6) Indoor above condition: 40m is possible for a system that uses only the flow selector unit (single port long piping type and multi port type), whose all the indoor units are 3HP or higher, and working ambient temperature is 0°C or higher. Indoor below condition: If the height difference between indoor units exceed 3 m, set 50 m or less. Also Extension up till 90m is possible. Be sure to refer the Engineering Databook for details of these conditions and requirements. 7) Low ambient cooling (-5degC or less) 1. Not suitable for applications, which require precise room temperature control, due to increased risk of indoor ON/OFF control and potential low air off temperatures. 2. For areas that do demand a precise room temperature control, we would recommend the installation of a secondary system, which has been designed solely for the purpose of low ambient cooling. 8) The unit operates down to an outdoor temperature of -25°C, however considerable performance decrease will be expected below -20°C. Consider installation location/surroundings and system design when expected to operate between -20°C and -25°C.

MMY-MAP_FT8P

SHRM-e

The SHRM-e, full Inverter heat recovery 3-pipe VRF, is the ultimate simultaneous heating & cooling solution for business applications.

Excellence

- Toshiba's in-house designed DC twin rotary compressor with outstanding capacity under partial load driven to improve efficiency and comfort.
- Incorporating Toshiba's latest inverter control, enables the precise modulation of the compressor, ensuring maximum performance and energy savings.
- 2 heatexchangers: outstanding 4-side heat exchanger + sub cooling heat exchanger to optimized efficiency.
- Precise refrigerant control ensures each indoor unit receives precisely the right amount of refrigerant.

Expansion

- 7 outdoor unit model line-up from 8 to 20HP that can be installed in a variety of combinations, of up to a capacity of 42HP.
- A complete range of indoor unit styles and capacity ranges, meets the demands of the customer and the room configuration.

Enhancement

- Up to 1km total piping length; 200m in equivalent length and 70m of height difference.
- Revolutionary hands-free Wave Tool technology that allows contactless commissioning and diagnoses to be carried out using a smartphone application.

SCOP MAX

3.71

CAPACITY

8HP > 42HP

OPERATION

-25°C > +46°C

In addition to the existing 3 series and new 4 series single port flow selector, Toshiba is proud to release the all new 4 and 6 port multi box, that enables multiple indoor unit connection, increasing the design flexibility and ease of installation.

MMU-UP_MH
COMPACT 4-WAY CASSETTE

The compact 4-way cassette has been especially designed for business office applications, where a compact and efficient solution is required.

Design

- Smart flat-panel design with clean lines that will complement any decorative style.
- Fit within the T-bar of grid ceiling: 620mm X 620mm.

Comfort

- A user programmable 5-step flow with individual louvre swing control, plus a new "cycle-swing" harmonised louvre setting
- The occupancy motion sensor can be configured to switch the unit into standby mode or completely switched off, when no movement is detected, minimising the energy usage of the system.

Easy to install

- Only 256mm height, this compact chassis is perfectly suited to confined spaces.
- Built-in high-lift drain pump.
- Lightweight unit, for easy and quick installation.

4-WAY SMART CASSETTE

>NEW

The 4-way cassette is designed to provide uniform air distribution and total user comfort making this unit the ideal solution for small commercial applications. Combining all the expertise of Toshiba, the Smart Cassette is the perfect mix between comfort, elegance and efficiency.

Comfort

- Unique flap design for optimal air distribution.
- Louvre position individual setting: 3 different swing modes from standard, diagonally, opposite to turn around.
- 5-step fan to precisely control the air flow.
- Low noise level thanks to large air suction opening.

Reliability

- Built-in high-lift drain pump.

Savings

- Optional motion sensor for automatic operation.
- High efficiency DC fan motor to maximize heat exchange with limited power consumption.

CAPACITY

2.8kW > 18kW

> NEW PANEL DESIGN

The 4-way cassette is designed to provide uniform air distribution and total user comfort making this unit the ideal solution for small commercial applications.

Comfort

- Possibility to set three different swing modes providing individual control to maximise end user comfort.
- Wide air flow in all directions.
- Optimal air diffusion up to 4.6m ceiling height!
- Automatic operation by using optional motion sensor.
- PM2.5 filter available as an option (TCB-PLFC1UP80-PE & TCB-PLFC2UP120-PE).

Reliability

- Heat exchanger self-cleaning function.
- Built-in high-lift drain pump.

Easy to install

- Compact chassis with only 256mm height (up to size 30).
- Lightweight unit, for easy and quick installation.

MMU-UP_WH 2-WAY CASSETTE

Slim, compact and lightweight, the 2-way cassette has been designed to fit easily and discretely into any room interior.

Comfort

- Unique air flow control, provides a balanced flow of air in two opposite directions, maximising air flow distribution. This feature when combined with the units fresh air intake ability helps to provide a perfect solution all year round.
- Enhanced indoor air quality with standard long-life filters with a wide bended surface to effectively collect dust particles.

Design

- The elegant white decoration panel allows the unit to be installed seamlessly into any room.

Easy to install

- Minimal weight (19kg) for units up to 4.5kw.
- Compact dimensions (height 295mm).
- Built-in drain pump.

MMD-UP_BHP

STANDARD DUCT

Whatever the shape of the room, this flexible model ensures a uniform temperature and air distribution for optimal end user comfort.

Hidden

- Slimline design, with a depth of just 275mm helps to simplify the installation, even when space is limited.
- Superior low noise operation. Noise output at low fan equates to just 23 dB(A).

Customizable

- External static pressure can be raised up to 150 Pa for extensive ducting.
- Possible to connect a fresh air inlet duct to the unit, to maximise air quality and room air quality.
- Flexible design, allows the inlet air configuration to be configured between the standard rear inlet design or, from the underside of the unit.
- Built-in high-lift drain pump.
- Air discharge spigot available as an option (TCB-SF***C6BPE).

CAPACITY

MMD-UP_HP

HIGH STATIC PRESSURE DUCT

This is Toshiba's most powerful ducted unit delivering air flows up to 4800m³/h with an external static pressure up to 250 Pa.

Comfort

- This ultra-flexible, invisible and silent unit creates a pleasant and comfortable environment for a wide range of applications, such as hotels, offices and shops.
- Diffuser design flexibility to select the right layout for the room shape and end user requirements.

Adaptability

- Unobtrusive, flexible and compact (298mm depth), it can be installed easily and discretely into any interior, making it the ideal solution for both new and refurbishing projects.
- Static pressure can be set to 7 levels from 50 to 250Pa.

Healthy

- Renewal of indoor ambient air with the constant fresh air supply via the field installed fresh air intake connection.
- Long-life filter and air discharge spigot available as an option.
- Built-in high-lift drain pump (sizes 18 to 56).

MMD-UP_SPHY

SLIM DUCT

> NEW AIR DIFFUSION ACCESSORY

Whatever installed in a ceiling void or suspended ceiling, Toshiba slim duc offers the best compromise between sound level, air flow and chassis dimensions.

Flexibility

- Compact chassis with 210mm height and 450mm depth whatever the capacity, for integration in most projects.
- Capacity from 0.3HP for high efficiency buildings.
- Static pressure up to 50Pa set directly on the duct or by using a wired remote controller.

Comfort

- Quiet operation with a noise level down to 25 dB(A) perfect for bedrooms.
- 5-speed fan operation for perfect air flow adaptation.

Easy installation

- Built-in drain pump.
- Air suction from rear or bottom.

CAPACITY

0.9kW > 8kW

SLIM DUCT**3DW DIFFUSOR FOR SLIM DUCT**

> NEW ACCESSORY

Enhanced your Slim Duct installation with Toshiba's motorized 3DW diffusor for a nice design and an optimized air diffusion.

Increased comfort

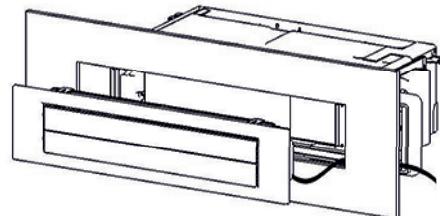

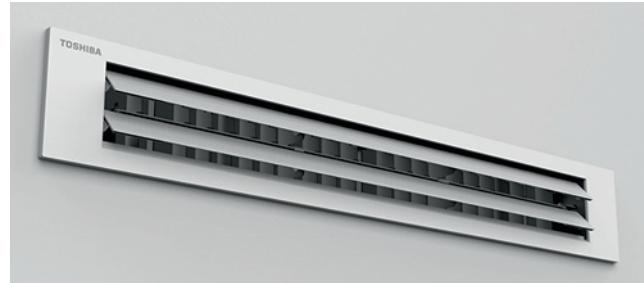

- Motorized horizontal and vertical louvers to perfectly orientate the air flow.
- Optimized air diffusion with swing mode.
- 5Pa pressure drop to not disturb the air flow.

Elegant

- A color that perfectly fits any type of interiors.
- A sleek design with 2 louvers for sophisticated interiors.

Adaptable

- 3 sizes to cover the full slim duct lineup.
- Maximum 1m duct between the louver and the unit for full adaption to every installation conditions.
- Directly wired to indoor units.

**3DW DIFFUSOR Physical data**

MMC-UP_HP UNDER CEILING

The simple, yet elegant design helps to create a pleasant and relaxing environment, quickly conditioning the room air to the desired temperature.

Comfort

- Optimum louver control: Air flow angle is automatically set to the most suitable setting according to your cooling or heating needs, and an automatic swing mode enables air flow to reach all areas in the room.
- High air flow distance up to 8m.
- Low noise levels, thanks to high diameter fan and DC motor.

Adaptability

- This design, represents the best possible solution, where there is a lack of space or absence of a ceiling void.
- The simplicity of the design and the installations of the unit, make it suited for a wide range of applications, but particularly refurbishment projects.

Reliability

- Self-cleaning function, enables the air flow to remain constant as well as fresh and reduces the frequency of service visits.
- Drain pump available as an option.

MML-AP_NH BI-FLOW CONSOLE

Innovative and compact unit to be installed on the floor and in low wall applications, fits perfectly under the window sills or in a low ceiling attic.

Comfort

- Unique floor heating function to deliver a powerful flow at floor level for a uniform and comfortable room heating
- Compact and modern design in all three dimensions (60x70x22cm); single size for all range capacities.
- Bi-flow. Two outlets for complete personalized flow: flow intensity and air direction control.

Healthy

- Toshiba IAQ filter filtration system, includes extremely powerful components and deodorizing effects.
- Ultra pure filter (818F0050) available as an option to ensure healthy and pleasant atmosphere.

Control

- Brightness level control of the display unit to reduce the led light glow.
- Wireless remote control with a pre-set function and a unique hi-power button for immediate and fast air delivery.

CAPACITY

2.2kW > 6.3kW

MML-UP_H

CONSOLE

The simple design of this unit represents the perfect choice, for refurbishment projects, where the available space is limited, or where neither the walls nor ceiling are able to house the unit.

Comfort

- The units have as standard the ability to flow air in a horizontal direction, however with a simple change during the installation process, the unit can be configured, so that the air flow goes in the upward direction, maximising the flexibility of the design.

Adaptability

- With just one single cabinet size, for all capacity models, allows a single model range to be installed within a building, giving the installation a uniform and clean look.
- Minimum space required for installation and servicing.
- Refrigerant and drain piping with four installation possibilities: top, rear, left or right hand of the unit.

MML-UP_BH

CONCEALED CONSOLE

This unit has been designed to be fitted easily into a compact space behind a decorative panel, allowing the unit to blend into any room interior. This chassis is compact and slim, it is very easy to install and to conceal behind a decorative panel to blend with any room interior.

Specialized

- Not only is this unit ideal for office and other commercial buildings, it fits perfectly for specialist applications such as a library or hospital building.

Easy to hidden

- Very compact design, which can be installed under a window sill, that is only 600mm in height.
- With its limited depth of only 200mm, the unit can be installed along the wall ensuring maximum space saving.

Accessibility

- Removable split front panel with immediate access to the main components.

MMF-UP_H

FLOOR STANDING

This system is particularly suitable to air condition large rooms like shops or showrooms or with low ceilings like restaurants or lofts.

Optimized air flow

- The unit has been designed to have particularly high air flow rates, which correspond into superior air throw values.
- The wide and automatic vertical and horizontal air distribution angles, allow the air flow distribution to reach all areas, even when installed into large rooms.
- High air flows: from 180 l/s to 600 l/s (660 m³/h to 2160 m³/h).
- Wide air distribution angle: up to 150°.

Wide range

- Large capacity range: cooling capacities from 4.5 kW to 16 kW and heating capacities from 5 kW to 18 kW.

Installation everywhere

- The unit can be installed in the corner of the room, in this case the automatic swing angle can be fixed to deliver the air only where it is needed.
- Very small footprint: 0.128 m² up to 8 kW and 0.243 m² up to 16 kW.

MMK-UP_HP(L)

HIGH-WALL (STD & WITHOUT PMV)

Particularly compact, this high-wall is perfect for limited spaces, such as offices or small shops.

Compact and design

- The unit is compact and lightweight, it is perfect for installation above the doors or in narrow corridors.
- New appearance, simple, elegant with nice led display.

Healthy

- Special fin coating for Healthy & Fresh air.
- Ultra pure filter (818F0050) available as an option to ensure healthy and pleasant atmosphere.

Easy to use

- Remote controller for easy access to the preferred setting.
- Filters for dust collection can be easily removed by lifting the front panel and can be cleaned easily washing them under running water.

VNH-HE

AIR-TO-AIR HEAT EXCHANGER

Toshiba's VN model uses exhaust air to pre-condition the incoming air, thus reducing the cooling or heating load on the system. This allows the overall capacity size of the system to be reduced.

Energy savings

- Recovers air suction heat and humidity up to 75% and transfers them to the outdoor fresh air.
- The unit has the ability to automatically change operation mode of the air flow between heat exchanger mode (energy recovery) to normal standard ventilation mode (free cooling), based on the outdoor temperatures.
- Free cooling - Provides fresh outdoor cool air to reduce the indoor air temperature, when the outdoor temperature is lower than the indoor air conditioned temperature.

Multi-application

- 9 models available with air flow ranges from 150 to 2000 m³/h.
- Air balance volume rate can be varied to suit the usage environment and location.
- Horizontal or upside down installations.

Fully integrated

- Air conditioners and heat exchangers are controlled with the same main bus system (TCC-LINK).

AIR FLOW

150m³/h > 2000m³/h

MMD-VN(K)

AIR-TO-AIR HEAT EXCHANGER WITH DX COIL

MMD-VN(K) ventilation products are using exhaust air + DX coil to pre-condition the incoming air, thus reducing the cooling or heating load and the overall size of the required air conditioning system.

Energy savings

- Recovers incoming heat and humidity up to 75% and transfers them to the outdoor fresh air.
- Up to 10kW coil capacity to reach intake air temperature close to ambient temperature: no extra load on the heating and cooling system
- Unit has the ability to automatically change operation mode of the air flow between heat exchanger mode (energy recovery) to normal standard ventilation mode (free cooling), based on the outdoor temperatures.
- Free cooling - Provides fresh outdoor cool air to reduce the indoor air temperature, when the outdoor temperature is lower than the indoor air conditioned temperature.

Multi-application

- 9 models available with air flow ranges from 150 to 2000 m³/h.
- Air balance volume rate can be varied to suit the usage environment and location.
- Version with humidifier is available for applications where humidity levels need to be controlled.

Fully integrated

- Air conditioners and heat exchangers are controlled with the same main bus system (TCC-LINK).

* Sound pressure level is measured 1.5m below the center of the unit. *** Sound pressure level, power consumption and external static pressure values at 230 V. Cooling and heating capacities are based on the following conditions: Cooling capacities are based on: indoor temperature: 27°CDB/19°CWB. Outdoor temperature: 35°CDB. Heating capacities are based on: indoor temperature: 20°CDB, Outdoor temperature: 7 °CDB/6°CWB. The figures in () indicate the heat reclaimed from the heat recovery ventilator.
EH/H/L = extra-high/high/low. C: cooling mode. H: heating mode

MMD-UP_HFP

FRESH AIR DUCT

This indoor unit manages and treats the fresh air intake before it will be distributed into the building.

AHU alternative

- Ideal solution for all buildings that require fresh air ventilation.
- Air flow up to 3,060m³/h.
- Up to 200Pa available pressure, enough to create long pipe work.

Comfort

- Constant 20°C fresh air delivery from -10 to +46°C air suction temperature.
- 5-speed fan operation for perfect air flow adaptation.
- Filters available as an option.

Integration flexibility

- Make your choice between VRF 1:1 connection or mix with other indoor unit types.

* The setting temperature is 13 - 25°C (standard FCU.. 18 - 30 °C).

* Height difference between Fresh Air Intake Indoor units must be within 5 m.

Note 1: Rated conditions. Cooling : Outdoor air temperature 33°C DB/28°C WB setting 18°C. Heating : Outdoor air temperature 0°C DB/-2.9°C WB setting temperature 25°C.

Note 2: When supply air temperature is "setting temperature + 3°C" or less, Fresh Air Intake unit operates as FAN mode.

Note 3: When supply air temperature is "setting temperature -3°C" or over, Fresh Air Intake unit operates as FAN mode.

Note 4: 46-52°C is also available but temporary operable.

TCB-IFDM TA/TF/0-10V DX KIT

> NEW

Expand the connexion capabilities between an AHU and the SMMS-u to provide the most advanced fresh air solution.

New concept

- One control kit compatible with discharge temperature, suction temperature or capacity control.
- 2PMV kits available: 8 to 12 & 14 to 20HP.

Advanced technology

- The latest generation of PMV.
- New boundaries: Up to 120HP equal to 60,000m³/h thanks to Twin Connections.
- All SMMS-u benefits (Rotation drive, auto backup and alternative defrost) applicable when using DX kit system.

Simplified installation

- Controller available with embedded relays to save time during installation.
- Control box delivered with 7.5m temperature sensor.

CAPACITY

8HP < 120HP

AIR FLOW

Up to 60,000m³/h

RBC-DXC

0/10V DX KIT

Control the capacity of the VRF Toshiba system directly from the air handling unit controller to maintain constant fresh air temperature intake inside the building: the ultimate fresh air solution.

Third party control

- 0/10v input for capacity and mode control: the AHU drives Toshiba VRF system.
- Output signal for defrost and failures: the AHU knows when Toshiba system is in trouble to avoid any troubles.

All year round comfort

- Air temperature control using AHU sensor to enlarge air stream temperature control possibilities.
- Operate in both cooling and heating modes.

Packaged solution

- DX kit composed of two parts: controller and valve kit.
- Delivered with temperature sensors.

Only compatible with SMMSe 8 and 10HP in 1:1 configuration!

CAPACITY

16kW > 31.5kW

MMW HOT WATER MODULE

With the mid temperature hot water module, produce hot water in addition of cooling and heating.

Hot water

- Designed to produce hot water from 25°C up to 50°C outlet water temperature, whilst still maintaining the performance and efficiency levels of the rest of the system.
- Compatible with both space heating and domestic hot water applications, making the unit particularly suited to small shops and residential apartments where both space heating and hot water production is required.

Adaptability

- Up to 200% diversity indoor units & hot water module
- Operating range from -20°C WB to 19°C WB.
- Compatible with 4 series FS box & SHRM Advance FS box.

Installation

- Light and compact chassis to simplify the handling and the project integration.

HIGH TEMPERATURE HOT WATER MODULE

In addition to the standard simultaneous heating and cooling function of the SHRM-e system, it is now possible with the new Toshiba high temperature hot water module, to produce hot water up to 82°C, whilst still retaining the comfort operation of the indoor units.

High temperature

- Designed to produce hot water from 50°C up to 82°C outlet water temperature, whilst still maintaining the performance and efficiency levels of the rest of the system.
- Particularly suited for hot water sanitary production for residential and business applications.

All year round hot water

- All season hot water even when the other indoor units are operate in cooling.
- Operating range from -25°C WD to +40°C DB ambient condition.

ON YOUR OWN AS A FAMILY

IN A GROUP ON

Take control of your comfort !

Toshiba offers various control solutions to meet users' and designers' expectations. From local individual control and settings to computer-based TCC link/TU2C link networks, all indoor units can be programmed and set to suit your operational needs. Remote control systems offer a wide range of features including schedule timers, diagnostic functions, power meters and input/output signals, to name just a few. Toshiba VRF units are compatible with industry standards and can be connected to all the main building management software systems in use. TCC link is Toshiba's dedicated Central Control Network which can be used with VRF and light commercial units either directly or by means of a specially-designed network adapter.

> WIRED CONTROL

Remote for multisplit cassette and duct

RB-RWS21E

- Large backlit screen
- Multilanguage menu
- Integrated weekly timer
- Enables ambient temperature sensor
- Quick access to standard functions (mode, fan speed & set point)
- Wired connection

> WIFI CONTROL

Toshiba Home AC Control Toshiba Wi-Fi control solution for RAS units

Multiple units, one app

- 1 user can control up to 10 AC units
- 1 AC unit can be controlled by up to 5 users

Easy grouping

- Make control simple by grouping your AC units in up to 3 zones

Secure connections

- Password & login
- Child lock function

Compatible Products

- DAISEIKAI 9, SHORAI, Console, SEIYA. (Jan'19)

Download YOUR APP

- Toshiba AC Control App for your Android and iOS smartphone from Google Play or the App Store

**Toshiba Home
AC CONTROL**

> DO YOU WANT A SMART SOLUTION TO GIVE YOUR FAMILY GREATER COMFORT WHILST EASILY MANAGING YOUR ENERGY SAVINGS?

- **MULTIPLE UNITS, ONE APP**
 - 1 user can control up to 10 AC units
 - 1 AC unit can be controlled by up to 5 users

- **EASY GROUPING**
 - Make control simple by grouping your AC units in up to 3 zones

- **SECURE CONNECTIONS**
 - Password & login
 - Child lock function

- **COMPATIBLE PRODUCTS**
 - DAISEIKAI 9, SHORAI, Console, SEIYA. (Jan'19)

- **DOWNLOAD YOUR APP**
 - Toshiba AC Control App for your Android and iOS smartphone from Google Play or the App Store

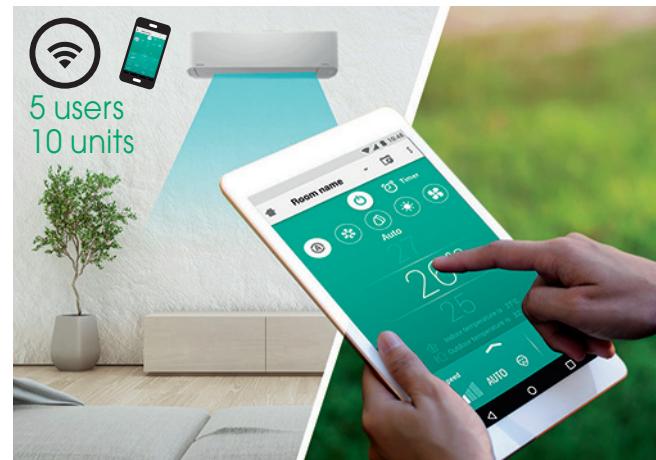

Take complete control of your comfort with the Toshiba Home AC Control App. Simple to use on your smartphone or tablet, both at home and on the move. Fully compatible, the adapter can be used with all Toshiba High-walls and Console units.

Enhance your comfort, at home or away

Customise your comfort, finding the perfect cooling or heating level for your family at any time, no matter where you are. When at home, simply replace your infrared remote control with the intuitive smart app. This also gives you easy access to your air conditioner on the move, allowing you to adapt your comfort to your lifestyle!

Smart & efficient

- Want to go home and immediately enjoy an ideal temperature? Simply use the app to check the status, quickly and easily, adjust your comfort, no matter where you are.
- Match your AC schedule to your family's routine to optimise running time, and enjoy savings on your energy bill.

Modern app

• This user-friendly app is available in 5 languages, and boasts a host of intuitive features. With a different colour for each different mode, and the main functions accessible in just one touch.

• Toshiba premium features enable you to enjoy all the benefits of your AC systems at home. Simply swipe up on the main app screen on your smartphone or tablet to access additional Toshiba-specific features.

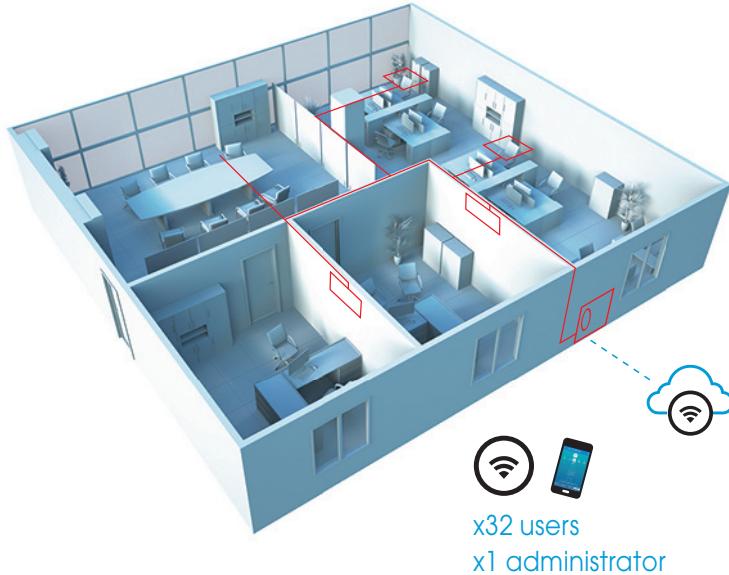

FLOOR

8°C	Holiday frost protection mode	Silent CDU to reduce the outdoor unit noise level
Hi POWER	Boost mode	Plasma & ionizer filters
Fireplace mode		
FLOOR	Floor function for Consoles	

> "DO YOU WANT FULL CONTROL OF YOUR AC SYSTEM IN ONE TOUCH, WHEREVER YOU ARE?"

Designed for commercial applications, the Toshiba AC Control App is your one-stop solution for managing up to 32 indoor units via an Android or iOS smartphone, with all main functions accessible in a single touch.

BMS-IWF0320E

Solutions wherever you are

Toshiba technology you can trust, fully committed to providing creative building management solutions, designed to enhance your sustainable lifestyle.

Make it your own

With different access levels for different users, this app can be used by everyone from facilities managers to standard users to manage all of the unit's functions. For an enhanced level of security, a user name and password is needed to log in.

Everything you need in one app

All of the indoor unit's functions can be accessed in an instant, allowing you to enjoy the full advantages of the AC system at work. The entire system is simple to manage, even remotely.

• QUICK AND EASY

- Simplified installation with direct connection to the TCC link bus line

• DESIGNED FOR YOU

- Up to 32 users for control of a maximum of 32 assigned indoor units
- Administrator mode for control of the entire system via a single app

• EVERYTHING UNDER CONTROL

- Optimise the management of your facilities without compromising comfort

• COMPATIBLE PRODUCTS

- Mini SMMS-e, SMMS-e, SHRM-e and RAV systems

• DOWNLOAD YOUR APP

- Toshiba AC Control App for your Android and iOS smartphone from Google Play or the App Store

Administrator-specific functions:

- Group control with on/off function for all devices
- User access restriction management & advanced mode

**RAV/VRF
INDIVIDUAL REMOTE CONTROLLER**

> INFRARED REMOTE CONTROLLER

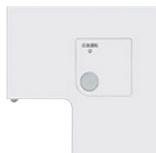

One remote compatible with every LC/VRF indoor units

Included with
bi-flow console

Included with
LC/VRF higwall

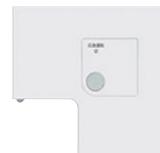

RBC-AX41U(W)-E

- Smart cassette panel corner receiver

RBC-AX33UYP-E

- 1 way cassette panel corner receiver (compatible with YHP 1-way cassette)

RBC-AXU33UP-E

- Standard cassette panel corner receiver

RBC-AXU31UM-E

- Panel corner receiver (compatible with compact 4-Way cassette)

RBC-AX31UC-E

- Ceiling panel receiver

RBC-AXU31-E

- Stand alone receiver (compatible with all indoor units)

> WIRED REMOTE CONTROLLER

One solution for every projects

RBC-ASCU11-E

Back to basics with this new remote offering all the standard functionalities with compact dimensions and large screen.

Functions:

On/Off, operation mode, temperature setting, fan speed, louvres fault codes & unit setup.

RBC-AMTU31-E

The standard remote to control an individual indoor unit or a group of 8 indoor units

Functions:

On/Off, operation mode, temperature setting, fan speed, louvres, fault codes, unit setup and button restrictions

RBC-AMSU51E-ES/EN

The ultimate in local remote controller with built-in 7-Day timer, large screen and menu

Functions:

On/Off, operation mode, dual set point, fan speed, louvres, return back, energy savings, frost protection, auto summer/winter clock, soft cooling, leak detection, fault codes, unit setup and button restrictions

> SPECIFIC REMOTE CONTROLLER

Ventilation control

NRC-01HE

- Dedicated remote controller for Air-to-Air heat exchanger
- Integrated functions: fan speed, freecooling, air balance volume rate, temperature management and timer

A2W/RAV/VRF **CENTRAL CONTROL**

➤ UP TO 64 INDOOR UNITS

64 central controller

TCB-SC640U-E

64 central controller is now able to control Estia R32 products.

- Full control of max 64 LC & VRF indoor units + Estia R32 air to water systems
- Individual indoor unit, group (up to 10 groups) or full installation control
- Simple and intuitive interface with user friendly menus
- Large backlit display
- Touch-sensitive keys
- Standard features (On/Off, mode, temperature setting, fan speed, louvers) + permit/prohibit functions + Estia R32 functions accessibility
- Embedded digital outputs
- Compatible with TCC link and TU2C Link

Centralized Touch Screen Controller

TCB-TSC640-PY

- Centralized control of max 64 indoor units
- 7-inch color touch screen
- User friendly interface (indoor unit and room naming)
- One by one FCU or global system control: On/Off, mode, fan speed, louvers, set point and prohibit mode
- Daily, weekly, monthly and annually timer with Winter/Summer differentiation: up to 32 schedules
- Fault code access
- Multilanguage interface
- Compatible with TCC link

➤ UP TO 128 INDOOR UNITS

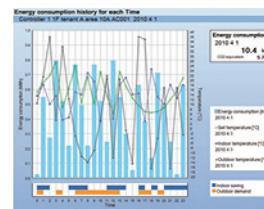

Smart Manager

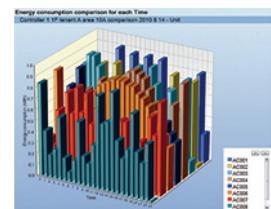

BMS-SM1281ETLE

The Smart Manager has the same hardware control function as the Compliant Manager, but also has the ability of control from a Local Area Network with dedicated interface accessible from every Web Browser. Energy Monitoring and Data Analyser function is included and brings to the user strong tool to analyse power consumption day by day, hour by hour and finally save energy. Compatible with TCC link

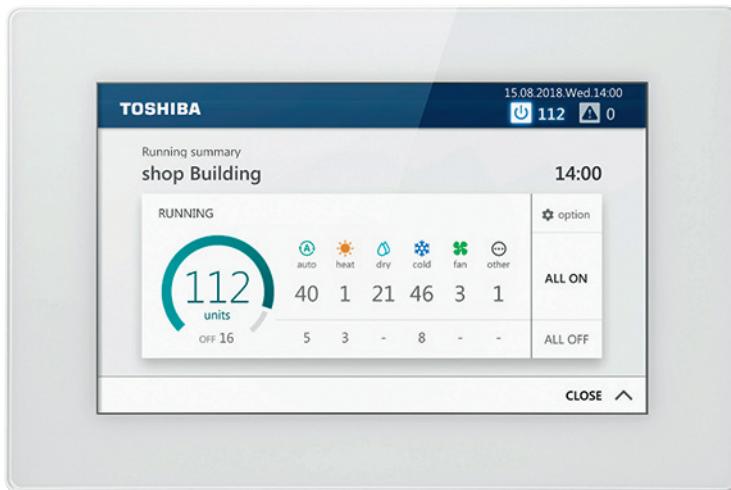

This controller is ideal where advanced control, Energy Monitoring, advanced scheduling or access to individual Air Conditioners is required from networked computer systems

Energy consumption history

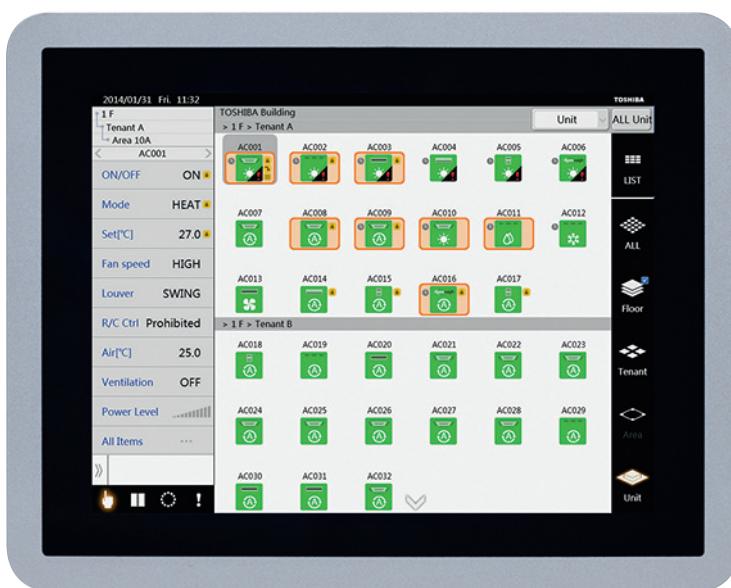

Energy consumption comparison

**RAV/VRF
CENTRAL CONTROL**
 **UP TO 256 INDOOR UNITS**
Touch Screen Smart Manager

BMS-CT2560U-E

- Full control of max 256 indoor units
- 7" color touchscreen
- Nice looking menu with intuitive navigation to enhance control experience
- Advanced scheduling of indoor and outdoor units to maximize comfort & save energy
- Energy monitoring with or without power meter thanks to Data Analyser software
- Webserver to keep control in any circumstances
- Embedded input and output to enlarge control or interact with other equipment
- Dedicated fault code menu with Email transfer capability
- Compatible with TCC link & TU2C link

 **UP TO 512 INDOOR UNITS**
Centralized Touch Screen Controller

BMS-CT5121E

- Full control of max 512 indoor units: on/off, mode, set point, fan speed, louver management and prohibit mode
- 12.1 large screens
- Quick and accurate view of indoor unit status through dedicated logo
- Floor, building, tenant and system overview with possibility to integrate plan
- Built in web server for control through web browser
- Weekly timer with up to 20 steps per day
- Energy monitoring with graph, to view operating hours, set point, inside/outside temperature, and power consumption
- Email alert in case of troubles
- Compatible with TCC link

VRF

LEAK MANAGEMENT

The comprehensive answer to IEC 60335-2-40/EN378 safety requirements for all Toshiba VRF systems

► MINI SMMS-E, SMMS-E AND SHRM-E

R410A refrigerant

► Make your choice between 3 possibilities to manage toxicity constraints :

A - Leak detection only.

B- Leak detection
+ indoor unit isolation.

C- Leak detection
+ isolation
+ refrigerant pump down (SMMS-e & SHRM-e).

Model	Picture	Description	A	B	C
TCB-LDS1		Leak detector with plastic cover	✓	✓	✓
TCB-LDS2		Leak detector with metal cover	✓	✓	✓
TCB-AW1786*		Shut off valve	✓	✓	
TCB-LD1		Control box	✓		
TCB-LD2		Control box		✓	
TCB-LDSBB1		Flush mounting for leak detector (dry lining)			
TCB-LDSBB2		Flush mounting for leak detector (concrete)			

► SHRM ADVANCE

R32 refrigerant

► With SHRM-Advance, Toshiba has developed different solutions to comply with the European safety regulation related to toxicity and flammability limitations.

A - Pump down and system shutdown. Recommended for office buildings.

B- Individual isolation allowing continuous operation. Recommended for hotel applications.

C- Refrigerant dilution with continuous operation. Adapted to small systems.

Model	Picture	Description	A	B	C
TCB-LD1UPE		R32 leak sensor (audible and visual alarm)	✓	✓	✓
RBM-Y_1FUxP-E		Shut-off valve included into FS Box for 3-pipe SHRM Advance operations.	✓	✓	
RBM-SV_1HUP-E		Shut-off valve for 2 pipe SHRM Advance operations.	✓	✓	
TCB-BTIUPE		Battery kit to secure Shut-off valve operations in case of power failure.	✓	✓	

Additional PCB

> DEDICATED TO OUTDOOR UNITS

Outdoor units advanced functions

> POWER PEAK CUT CONTROL BOARD SENSOR

TCB-PCDM4E

- Limits capacity of the VRF outdoor unit at 85%, 80%, 75% and 60% load or stop it.
- Compatible with all VRF outdoor units.

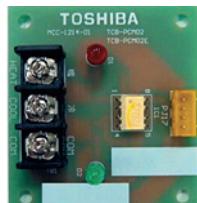

> CONTROL OPERATION BOARD SENSOR

TCB-PCIN4E

- Error/Individual compressor operation output control board.
- Compatible with all VRF outdoor units.

> EXTERNAL MASTER ON/OFF CONTROL SENSOR

TCB-PCMO4E

- External master On/Off control board, night mode and mode priority selection.
- Compatible with all VRF outdoor units.

> APPLICATION CONTROL SENSOR KIT

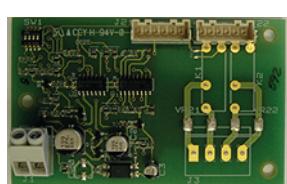

TCB-PCOS1E2

- Enables night operation control, demand control and operation monitoring.
- Compatible with DI.

> DEDICATED FOR INDOOR UNITS

Indoor units advanced functions

> WINDOWS SWITCH SENSOR

TCB-IFCB5PE

- Ensures the indoor unit not operate when outside window is open or for door entry systems.
- RAS, RAV and VRF indoor units.

> OPTIONAL CONNECTION KIT

TCB-PCUC2E

- Extends control capability of light commercial and VRF indoor units with third party equipment.
- Compatible with RAV and VRF indoor units.

> MULTI-TENANT

TCB-PSMT1E

- For multi tenant application, this PCB maintains low voltage power supply during tenant absence when the main power supply for the FCU is shut down.
- Compatible with VRF indoor units.

> TCC LINK INTERFACE

TCB-PCNT30TLE2

- Allows DI/SDI indoor units & AHU DX kits to be connected to TCC link network.

> RAV/VRF/ESTIA GATEWAY

> MODBUS® RTU

Reliable and easy to use

TCB-IFMB1280U-E

Directly connect up to 128 Toshiba Air Conditioning indoor units to a Modbus® Building Management System. Maximum 15 Modbus I/F can be connected per Modbus Master Device. Compatible with TCC Link & TU2C Link protocols.

Individual gateway

BMS-IFMB0UCW-E (RAV/VRF)
BMS-IFMB0UEW-E (Estia)

Connect easily one indoor unit or a group of 8 indoor units to a Modbus Building Management Control System.

> LONWORKS®

12 input network variables

TCB-IFLN642TLE

Directly connect up to 64 Toshiba Air Conditioning indoor units and up to 16 outdoor units to a Lonworks® Building Management Control System. Compatible with RBC-WP1-PE Lonworks Control software.

> KNX®

ETS configuration

TO-AC-KNX-64 (RAV/VRF - TCC Link)
TO-AC-KNX-16 (RAV/VRF - TCC Link)
BMS-IFKX0UCW-E (RAV/VRF)
BMS-IFKX0UEW-E (Estia)

Directly connect up to 64, 16 or only one Toshiba Air Conditioning indoor units to a KNX® Building Management Control System.

> BACNET® IP

Standard gateway

BMS-IFBN1280U-E
(Estia R32, SMMS-u &
SHRM-Advance compatibility)

Directly connect up to 128 Toshiba Air Conditioning indoor units to a BACnet® Building management Control System.

Network adaptor TCB-PCNT30TLE2 required for connection of DI/SDI Indoor Units (1 per Master Indoor Unit)

> RAV/VRF INTERFACES

> ANALOGUE INTERFACE

Analogue 0/10V control

TCB-IFCB640TLE

The Analogue Relay Interface is a device that can be connected directly to the TCC-Link Central Control network to provide Analogue & Digital Inputs & Outputs for control over Toshiba Air Conditioner products from non-Toshiba control systems.

> GENERAL PURPOSE RELAY INTERFACE

Toshiba equipment control

TCB-IFCG1TLE

The General Purpose Relay Interface is a device that can be connected directly to the TCC-Link Central Control Network and addressed on the TCC-Link Network in order to provide control of non-Toshiba equipment from a Toshiba control system, and control of the Toshiba Air Conditioner from Digital & Analogue Inputs.

> GSM INTERFACE

Control any time anywhere...

TCB-IFGSM1E

The TCB-IFGSM1E Interface is a device that allows control of the Toshiba Air Conditioning Equipment from a remote location using standard GSM (Global system for Mobile communications) Mobile phone SMS text messages.

VRF CONTROL

Model number	Reference	TCC-Link	TU2C-Link	Description	Used with
BMS-CT1256U-E	7" Touch Screen Controller	●	●	Enables full control of up to 256 indoor units	
BMS-CT5121E	12" Touch Screen Controller	●		Enables full control of up to 512 indoor units with electric billing, ML	
BMS-IFBN1280U-E	BacNet Interface	●	●	BACnet Interface for Estia R32, LC & VRF	
BMS-IFBN640TLE	BacNet Interface	●		BACnet Interface for LC & VRF	Enables integration with BACnet
BMS-IFDD03E	Digital I/O relay interface	●		Digital I/O relay interface	Touch screen controller, Compliant manager, Web based controller, Smart Manager
BMS-IFKX0UCW-E	1:1 KNX interface	●		Connect RAV/VRF system to a KNX Building Management System	Remote Control wiring
BMS-IFKX0UEW-E	1:1 KNX interface	●	●	Connect Estia R32 system to a KNX Building Management System	
BMS-IFLSV4E	TCS-Net Relay Interface	●		Relay for integration to TCS-Net	Bacnet gateway, Touch-screens & Web based controller
BMS-IFMB0UCW-E	1:1 Modbus interface	●		Connect LC & VRF systems to a Modbus Building Management System.	Remote Control wiring
BMS-IFMB0UEW-E	1:1 Modbus interface	●	●	Connect Estia R32 system to a Modbus Building Management System.	
BMS-IFWH5E	Energy monitoring relay interface	●		Energy monitoring relay interface	Touch screen controller, Compliant manager, Web based controller, Smart Manager
BMS-IWFQ320E	Smart Device Control Interface	●		Enables full control of up to 32 indoor units by using Toshiba AC app (Smart phone & Tablet)	
BMS-SM1281TELE	Smart BMS Manager with data analyzer	●		Enables full control of up to 128 indoor units with Energy Monitoring and Advanced Control Options	network 1:1 model connection interface required for DI/SDI (Excluding high-wall type)
NRB-1HE	Remote ON/OFF adapter	●		Allows ON/OFF control	All Air-to-air heat exchangers
NRC-01HE	Wired Remote Controller	●		Air-to-air heat exchanger remote controller, including with DX coil and humidifiers models	Air-to-air heat exchangers and Air-to-air heat exchangers with DX coil
RBC-AMSU51E-EN/ES	Design remote Controller with schedule timer	●	●	Multi-Language LCD display, a built-in 7-Day timer, Energy Saving options and return back function, Dual set points, and Soft cooling. EN = English, Italian, Polish, Greek, Russian, Turkish. ES = English, Spanish, Portuguese, French, Dutch, German	
RBC-AMTU31-E	Wired Remote Controller	●	●	Main wired remote controller	
RBC-ASC11U-E	Wired Remote Controller	●	●	Main wired remote controller	
RBC-AX33UYP-E	Infra-red Remote Kit	●	●	Wireless remote controller	One-way cassettes (YHP series)
RBC-AXU31C-E	Infra-red Remote Kit	●	●	Wireless remote controller	All ceiling units and one-way cassettes (SH series)
RBC-AXU31-E	Infra-red Remote Kit	●	●	Wireless remote controller	All units
RBC-AXU33UP-E	Wireless remote unit kit	●	●	Wireless remote controller	4 way cassette series 4 & RBC-U33P-E panel
TCB-IFCB-4E2	Remote location On/Off Control Box	●		Enables remote location On/Off control	
TCB-IFCB5-PE	Window Switch & Remote on/off	●		Ensure the indoor unit not operate when outside window is open or for Door Entry systems	
TCB-IFCB640TLE	Analog interface	●		Control & monitoring up to 64 IU on TCC-link	Combination with TCB-IFCG1TLE
TCB-IFCG1TLE	General purpose interface	●		enables control of A/C by the DI/DO and AI/AO	Combination with TCB-IFCB640TLE
TCB-IFLN642TLE	LN interface	●		Allows control of 64 indoor units from a Lonworks based BMS	
TCB-IFMB1280U-E	Modbus interface box	●	●	Connect LC & VRF systems to a Modbus Building Management System.	
TCB-KBCN32VEE	Connectors	●		For CN32	
TCB-KBCN60OPE	Connectors	●		For CN60	
TCB-KBCN61HAE	Connectors	●		For CN61	
TCB-KBCN70OAE	Connectors	●		For CN70	
TCB-KBCN73DEE	Connectors	●		For CN73	
TCB-KBCN80EXE	Connectors	●		For CN80	
TCB-PCDM4E	Application Control PC Board	●		Power Peak Cut Control	
TCB-PCIN4E	Application Control PC Board	●		Error/Individual compressor Operation Output Control Board	
TCB-PCMO4E	Application Control PC Board	●		External Master ON/OFF Control Board	
TCB-PCUC2E	Optional connection kit	●			
TCB-PSMT1E	Optional connector kit	●		Multi-Tenant Kit for VRF Systems	SMMS-e, SHRM-e and Mini-SMMS Indoor Units (refer to I/M for more details of connectable Indoor units)
TCB-PX100-PE	Enclosure for the Window Switch / Remote On/Off	●		For use when the Window Switch / Remote On/Off Accessory cannot fit within the AC unit, eg. High Walls	For use with TCB-IFCB5-PE
TCB-PX30MUE	E-Box Extension Enclosure	●		For 1:1 Model connection I/F and Window Switch / Remote On/Off PCB	4-Way Cassettes only & TCB-IFCB5-PE
TCB-PX40MUE	E-Box Extension Enclosure	●		For 1:1 Model connection I/F and Window Switch / Remote On/Off PCB	4-Way Compact Cassettes only & TCB-IFCB5-PE
TCB-SC640U-E	Centralized remote controller	●	●	Up to 64 indoor units	
TCB-TC41U-E	Remote temperature sensor	●	●	Remote temperature sensor for cassette & duct

			< 6.4 - 24 HP indoor units

* Embedded shut off valve

VRF ACCESSORIES

Indoor unit type	Parts name	Model name	Comply with VRF FCU	Notes	Remarks
4-way Air Discharge Smart cassette type	Standard panel	RBC-U41PG(W)-E	MMU-UP***1H-E/TR	Required accessory	
	Fresh air and filter chamber	TCB-GFC1603UE		For fresh air inlet box	
	Auxiliary fresh air flange	TCB-FF101URE2	MMU-UP***1H-E/TR	For easy fresh air intake by using the knockout hole of indoor unit. (Dia.=100mm)	
	Spacer for height adjustment	TCB-SP1603UE		height 50 mm	
4-way Air Discharge cassette type	Air discharge direction kit	TCB-BC1603UE		Air direction change by cutting off air discharge port (3 pcs.)	
	Standard panel	RBC-U33P-E	MMU-UP***1HP-E/TR	Required accessory	
	PM2.5 filters	TCB-PLFC1UPE-120	MMU-UP***1HP-E/TR	Before pre filter	
Compact 4-way cassette type		TCB-PLFC2UPE-80	MMU-UP***1HP-E/TR	After pre filter	
	Decoration panel	RBC-UM21PG(W)-E	MMU-UP***1MH-E/TR	Required accessory	
		RBC-UW283PG(W)-E	MMU-UP0071WH-E/TR to MMU-UP0151WH-E/TR		
	Decoration panel	RBC-UW803PG(W)-E	MMU-UP0181WH-E/TR to MMU-UP0301WH-E/TR	Required accessory	
		RBC-UW1403PG(W)-E	MMU-UP0361WH-E/TR to MMU-UP0561WH-E/TR		
2-way cassette type	Auxiliary fresh air flange	TCB-FF151US-E	MMU-UP***1WH-E/TR	For easy fresh air intake by using the knockout hole of indoor unit	
		TCB-FC283UW-E	MMU-UP0071WH-E/TR to MMU-UP0151WH-E/TR		
	Filter chamber	TCB-FC803UW-E	MMU-UP0181WH-E/TR to MMU-UP0301WH-E/TR		
		TCB-FC1403UW-E	MMU-UP0361WH-E/TR to MMU-UP0561WH-E/TR		
		TCB-LF283UW-E	MMU-UP0071WH-E/TR to MMU-UP0151WH-E/TR		Use with TCB-FC283UW-E
	Super Long life filter	TCB-LF803UW-E	MMU-UP0181WH-E/TR to MMU-UP0301WH-E/TR	For use with filter chamber	Use with TCB-FC803UW-E
		TCB-LF1403UW-E	MMU-UP0361WH-E/TR to MMU-UP0561WH-E/TR		Use with TCB-LF1403UW-E
1-way cassette type	Decoration panel	RBC-UY32P-E	MMU-UP0031YHP-E/TR to MMU-UP0121YHP-E/TR	Required accessory	
		RBC-UY42P-E	MMU-UP0151YHP-E/TR to MMU-UP0271YHP-E/TR		
	Air purifier kit	TCB-EAPC1UYHP-E	MMU-UP-1YHP-E/TR	Set of Plasma Air Purifier, Dust sensor, Air quality indicator and Wireless receiver	
Slim duct type	3DW Louvers	TCB-TDL0141SDY-E TCB-TDL0181SDY-E TCB-TDL0271SDY-E	MMD-UP0031SPHY-E/TR to MMD-UP0121SPHY-E/TR MMD-UP0151SPHY-E/TR to MMD-UP0181SPHY-E/TR MMD-UP0201SPHY-E/TR to MMD-UP0271SPHY-E/TR	Horizontal, vertical motorized louver for slim duct	RBC-AMSU51E-ES/EN needed
Concealed duct type	Spigot shaped flange	TCB-SF56C6BE	MMD-UP0071BHP-E/TR to MMD-UP0181BHP-E/TR		
		TCB-SF80C6BE	MMD-UP0241BHP-E/TR to MMD-UP0301BHP-E/TR		
		TCB-SF160C6BE	MMD-UP0361BHP-E/TR to MMD-UP0561BHP-E/TR		
Concealed Duct high static pressure type	Long life filter kit	TCB-LK801D-E	MMD-UP0181HP-E/TR to MMD-UP0271HP-E/TR		
		TCB-LK1401D-E TCB-LK2801DP-E	MMD-UP0361HP-E/TR to MMD-UP0561HP-E/TR MMD-UP0721/0961HP-E/TR		
	Spigot shaped flange	TCB-SF56C6BPE	MMD-UP0181HP-E/TR to MMD-UP0271HP-E/TR		
		TCB-SF80C6BE	MMD-UP0361HP-E/TR to MMD-UP0561HP-E/TR		
		TCB-SF160C6BE	MMD-UP0721HP-E/TR to MMD-UP0961HP-E/TR		
	Auxiliary fresh air flange	TCB-FF151US-E	MMU-UP***1HP-E/TR		
	Drain Pump kit	TCB-DP40DPE	MMU-UP***1HP-E/TR		
High Wall	PMV Kit	RBPM-PMV0361U-E RBPM-PMV0901U-E		For FCU capacity 0.3-1.3HP For FCU capacity 1.7-2.5HP	Suitable for high wall 1 serie with or without embedded PMV
Ceiling-suspended type	Drain pump kit	TCB-DP31CE	MMC-UP***1HP-E/TR	Lift up to 600 mm	Use TCB-KP13, 23CE
	Elbow Piping kit	TCB-KP14CPE TCB-KP24CPE	MMC-UP0151/0181HP-E/TR MMC-UP0241HP-E/TR to MMC-UP0561HP-E/TR		
Fresh air intake type	High-efficiency filter 65	TCB-UFM0481D-E	MMD-UP0481HF-E/TR	Dust collecting effect: 65% (NBS Colorimetric method)	Use with TCB-FC0481DF-E
		TCB-UFM1281D-E	MMD-UP0721HF-E/TR to MMD-UP1281HF-E/TR		Use with TCB-FC1281DF-E
	High-efficiency filter 90	TCB-UFH0481D-E	MMD-UP0481HF-E/TR	Dust collecting effect: 90% (NBS Colorimetric method)	Use with TCB-FC0481DF-E
		TCB-UHF1281D-E	MMD-UP0721HF-E/TR to MMD-UP1281HF-E/TR		Use with TCB-FC1281DF-E
	Long life prefilter	TCK-PF1281DF-E	MMD-UP0721HF-E/TR to MMD-UP1281HF-E/TR		Use with TCB-FC1281DF-E
	Filter chamber	TCB-FC0481DF-E TCB-FC1281DF-E	MMD-UP0481HF-E/TR MMD-UP0721HF-E/TR to MMD-UP1281HF-E/TR	For high efficiency filter or long life prefilter	
Air-to-air heat exchanger with DX coil	Drain pump kit	TCB-DP40DFP-E	All models	Lift up to 330 mm	
	Drain pump kit	TCB-DP31HEXE	MMD-VN502/802/1002HEXE & MMD-VNK502/802/1002HEXE	Lift up to 330 mm	

> SOFTWARE

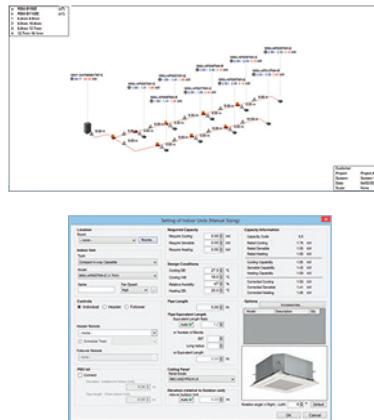

> SELECTION TOOL

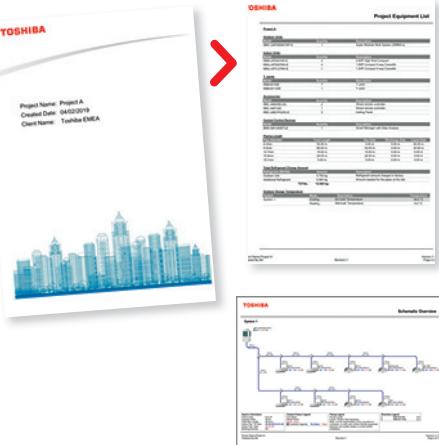

Software main screen

Toshiba Selection software has been fully designed, with a user-friendly interface allowing novice and expert users alike to create simple, yet detailed VRF system schematics. It is highly versatile, allowing the level of detail to be tailored to suit customer requirements. The software also allows the user to specify pricing strategy and create additional interim reports, including any diagrams and schematics required. Final detailed reports can then be produced and sent to customers in PDF format or in more complex files, such as AutoCAD DXF, allowing simple integration into their existing software packages.

Project fully customizable

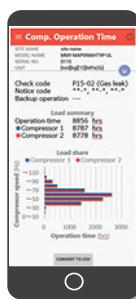

Complete report

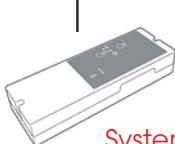

> SERVICE TOOL

Save time during commissioning and maintenance. Choose between the "Wave Tool Advance" using Smartphone NFC connection or the link adaptor connected to the outdoor or indoor unit.

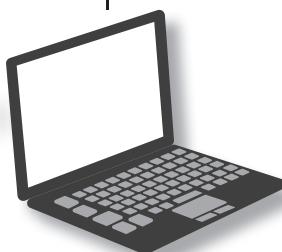

Wireless connection using smartphone NFC technology to collect system data

System operation self record using link adaptor

Get access to system data indoor using link adaptor

Direct USB connection to get access to system data

* Please contact Toshiba for iOS® & Android® phone compatibility list.

Wave tool compatible with SMMS- u, SMMS- e, SHRM-Advance and SHRM- e. Service tool compatible with SMMS- u & SHRM- Advance. Please, use Dyna Doctor for MiNi SMMS- e, SMMS- e & SHRM- e.

› INSTALLATION AND USE OF REFRIGERANTS NOT SPECIFIED BY TOSHIBA CARRIER CORPORATION

Toshiba Air Conditioning products are designed and manufactured on the assumption that each product is used with the specific refrigerant specified for that product.

The use of incorrect refrigerant may cause mechanical defects, malfunctions or failures which, in some cases, could result in a serious safety issue. For this reason Toshiba Carrier Corporation requires that only the specified refrigerant for a product should be used.

The type of refrigerant specified for a product is stated in the accompanying owners manual for a product, or on the label attached to the product itself.

Toshiba Carrier Corporation shall not assume any liability for failures, malfunctions or safety issues on any product if incorrect refrigerant is used in that product.

› TESTING CONDITIONS BASED ON EUROVENT REQUIREMENTS

Cooling mode

Indoor air temperature: 27°CDB / 19°CWB

Outdoor temperature: 35°CDB / 24°CWB

Heating mode

Indoor air temperature: 20°CDB

Outdoor temperature: 7°CDB / 6°CWB

Certified data accessible on Eurovent website

Seasonal data accessible on Toshiba Ecodesign website

TOSHIBA

Better Air Solutions

Through our commitment to world-class **efficiency**, versatile **scalability** and leading **quality**, Toshiba Air Conditioning advances leading-edge technologies to find the most forward-thinking solutions possible for your world.
