

## OFFER CUSTOM EMBROIDERY FOR YOUR CUSTOMERS' FAVORITE PRODUCTS

Brother makes beautiful, customized embroidery faster, easier, and more cost-effective than ever before. Offering your customers the added value of a service they'd otherwise have to wait days or even weeks for can give your businesses a real competitive edge.

- **Get Started Right Out of the Box with Built-in Designs and Fonts**

No extra software purchase required to get started. The expansive PR1060W design library includes 1,280 embroidery designs, 50 lettering fonts, and one 3D puff font. Connect to the Artspira app<sup>1</sup> to access even more designs and fonts.

- **A Range of Design Possibilities**

A wide variety of included and optional embroidery frames gives you the versatility to embroider almost any product. Four sizes of embroidery frames are included: 8" x 14", 5" x 7", 4" x 4", and 1.5" x 2". Plus, the included Tubular Frame Table works as an extension table for bigger projects or when embroidering sleeves, pants, and other tubular items.

- **Be Up and Running in No Time**

Watch all 33 tutorial videos by scanning a QR code on your mobile device. Covering everything from basic operations to embroidery functions, the QR code appears on the LCD screen when the customer selects the Video icon. These videos can help staff learn the basics in as little as 90 minutes.

- **Versatility and Efficiency**

Be efficient and productive with 10 needles, and stitch designs up to 10 colors without changing thread. With the 10-needle automatic needle threading, thread each needle in seconds – with just the touch of a button!

- **Security Features**

The Security Lock Modes can manage multiple users without individual passwords and logins, adding to productivity and efficiency. The Shortcut Key allows the user to jump directly to the embroidery screen to save time, and the Key Optimization System allows a business owner to customize access to machine functions.

- **Matrix Copy**

For increased productivity, the Matrix copy function automatically places repeat designs for maximum efficiency, which means you waste less fabric and time. Create multiple patches in one hooping.

- **Built-in Design Software**

With the Brother exclusive My Design Center, give your customers even more options for personalization and customization. Draw designs directly on the screen or use the included scanning frame to scan art to embroider.

- **Virtual Design Preview**

With Virtual Design Preview, you can get a real-time camera view of the needle area, allowing you to see where the needle will drop- making positioning easier than ever and error free!

- **Intuitive Editing Features**

Easily edit the style and size of lettering, and align text left, center or right. Group letters to move all at once, combine designs and edit them as one, or separate design elements and edit individually.

- **Real-time Status Updates Keep Things Moving**

Follow the progress of your projects in real time via the My Stitch Monitor mobile app<sup>1</sup>. Get alerts when it's time to change threads or when your embroidery is finished.

- **Optional Software\***

With a comprehensive set of power embroidery digitizing tools, you can enjoy the freedom to design and digitize your logos and customize monogrammed designs using the optional BE EmbroideryStudio Software. For advanced vector graphic editing, CorelDRAW® is integrated as a plugin within the software, allowing you to create and refine vector artwork, which can then be converted into embroidery data within the BE EmbroideryStudio. Additionally, with the optional PE-DESIGN 11 software, you can wirelessly connect up to 10 machines, significantly boosting your business' productivity.

## Basic Features
