eero

eero Home WiFi System for installation professionals

Choose eero Home WiFi systems because of our quick installation, easy setup, painless maintenance, powerful and reliable TrueMesh™ WiFi, and best-in-class support. Wasting fewer resources on network installation leaves you free to tackle other projects and expand your business.

eero (2nd generation)

The gateway of an eero system, eero (2nd generation) has a third 5GHz radio, making it tri-band and 2x as fast as its predecessor. eeros also come with two auto-detecting Ethernet ports, allowing them to connect to wired devices and other eeros for even faster speeds and better coverage.

eero Beacon

Half the size of its counterpart, eero Beacon is 30% more powerful than the original eero and can be plugged directly into an outlet to easily expand your system. It also includes an intelligent LED nightlight with an ambient light sensor.

eero

Powerful performance, beautiful design

Incredible WiFi in any home
Instead of relying on a single router, multiple eeros connect in a wireless or wired configuration to form a mesh network that blankets any size or shape home in fast, reliable WiFi.

Thoughtful and discreet design
eero was created with simplicity and precision in mind. Thanks to a thin, color-matched white cover, our new PoE+ adapter and wall mount ensure eero systems will ensure eero systems keep a low profile no matter where they're installed in your clients' homes.

Save time on set up and maintenance

Simple set up
With an easy step-by-step process, set up a network in minutes not hours, leaving technicians free for more complex services and products.

Quick and customizable
No need to string additional power; with our PoE+ adapter and wall mount, all you need to connect eero is an Ethernet connection. And with easily customizable systems, installations can be tailored to your clients' unique connectivity needs.

Fewer truck rolls with RNM
Remote Network Management makes it easy to troubleshoot, reboot, and check client network health right from your office or home. And with over-the-air updates, eero's new features and security updates are automatic.

Best-in-class support
eero offers best-in-class support 7 days a week, and has a proven track record of implementing installation professional feedback.

New ways to grow

Expandable solutions for each home your business
Design expandable eero solutions based on what each unique home needs. A great opportunity to make your clients' happy and capture more end to end profit in the process.

Smart home upsell opportunities
Having eero as the center of the connected home opens up new opportunities to sell additional smart home products that require a strong foundation of connectivity (e.g. connected speakers, smart doorbells, and more). Using eero's powerful and reliable network, these products can live up to their full potential.

eero Plus for peace of mind
eero Plus adds an important extra layer of digital protection, with advanced network security, enhanced parental controls, and a weekly report of activity to your customers.

eero:
Tri-band WiFi radios, simultaneous 2.4GHz, 5.2GHz, and 5.8GHz wireless, 2x2 MU-MIMO, beamforming, IEEE 802.11a/b/g/n/ac, Dual auto-sensing Gigabit ports for WAN and/or LAN connectivity, Thread 1.1 Border Router, Bluetooth® LE 4.2

eero Beacon:
Dual-band WiFi radios, simultaneous 2.4GHz and 5GHz wireless, 2x2 MU-MIMO, beamforming, IEEE 802.11a/b/g/n/ac, 10 Lumen LED nightlight, with automated dimming

eero Plus:
Additional monthly subscription for clients to access advanced security, enhanced parental controls, VIP support

New PoE+ adapter and wall mount:
Wall mount compatible with single, double, round and octagonal junction box and PoE+ adapter to power eeros over Ethernet. Certified PoE+ injector and certified PoE+ switch. CAT 5e ethernet or higher (5e or higher, 6A recommended), max 100m/328ft, PoE+ injector or switch required. Inbox materials include: PoE+ adapter and wall mount, slim color-matched mount cover, 4 standard screws

Remote Network Management (beta):
Remote troubleshooting, remote network reboot, network health checks

eero:
4.76in (121mm) x 4.76in (121mm) x 1.26in (32mm)

eero Beacon:
4.76in (121mm) x 2.91in (74mm) x 1.18in (30mm)

New PoE+ adapter and wall mount:
5.04in (128mm) x 5.87in (149mm) x 2.80in (71mm)
