MJ3D POGO Gotcha MOD quick start guide

Green switch position:

- Charging your device
- Pairing your device
- Manual auto catching
- Pokémon Sleep
- Auto spin poke stops
- Conserve battery

Pair your Device:

1. Ensure device is switched to the **green position.**
2. Open Pokémon go and go to settings. Select **connected Devices and Services.**

3. Press the center button on the Gotcha device, the center button should begin flashing.

4. Once the gotcha appears in app select the device and follow the prompts given on screen.

If you are experiencing issues things to check include:

- Bluetooth is enabled on cell phone.
- Gotcha device is in green switch position
- Gotcha has been charged.

Red Position:

- Autocatch with Ultra/Great balls (user selected in app)
- No vibration
- Auto spin poke stops
  Ensure your in-game settings are set as shown to allow for Pokémon encounters using great, ultra and poke balls automatically.
