

# How to Install

## A Replacement Computer

- 1** Make sure the original computer is powered off before unplugging it.
- 2** After unplugging the computer, unplug the various cords (i.e., barcode scanner, credit card reader, etc).
- 3** Plug the new computer in and power it on.
- 4** Reconnect all the cords that were connected to the original.
- 5** Call customer support to register the kiosk to your store!
