DIGITAL FORENSICS POWERED BY ACE COMPUTERS

ACE FORENSICS: DIGITAL FORENSICS

Powered by Ace Computers

Ace Forensics is a specialized division of Ace Computers, dedicated to delivering cutting-edge digital forensic workstations and solutions for law enforcement, government agencies, corporate security teams, and forensic investigators. With a legacy of excellence in high-performance computing, Ace Forensics combines deep industry expertise with advanced engineering to design and build forensic systems that meet the rigorous demands of digital evidence acquisition, analysis, and preservation.

FEATURED PARTNERS

- Cellebrite
- Magnet Forensics
- Belkasoft
- Ramsey
- Mission Darkness
- Ciphertex
- Berla
- Oxygen Forensics

Purpose-Built Systems for Digital Forensics

Ace Forensics builds and integrates a full range of forensic computing solutions, including:

- ACE®FORCE™ high-performance forensic workstations
- ACE®MICROFORCE™ compact workstations
- Portable systems and forensic tools for field and lab use

These systems are optimized for the secure acquisition, preservation, and analysis of data from a wide variety of sources, including computers, phones, memory sticks, and other digital devices

CASE STUDY:

New York State Troopers Forensic Investigation Center Challenge

The New York State Police Crime Laboratory System needed upgraded forensic workstations to handle increasing digital evidence volumes while maintaining ASCLD/LAB compliance. Technical Lieutenant Mark Brown selected Ace Computers based on their 30+ years of government experience, delivering high-end systems with enhanced processing speed and advanced capabilities. The deployment resulted in significantly faster processing and improved user satisfaction, with Brown confirming he would recommend Ace Computers to other agencies for exceptional value without compromising quality.

"We have had a very good response from the people using the workstations [provided by Ace Computers] — especially in regard to the increased speed."

Mark Brown, Technical Lieutenant, New York State Troopers Forensic Investigation Center

Why Ace for a Digital Forensic Solution

Ace Forensics' systems are designed to:

- Speed up evidence acquisition and analysis
- Preserve chain of custody and evidentiary standards
- Support a wide range of forensic platforms and tools
- Scale to meet agency growth and new investigative demands

Each build combines high-speed, multi-core processing with ultra-fast memory and solid-state storage. Systems are fully customizable and built in the U.S., with integration handled by experienced engineers who understand agency requirements.
