Lighting Control Adapter D

TrolMaster’s Hydro-X system can control most of the horticultural lighting fixtures sold on the market today. Most light manufacturers provide the ability to control their lighting systems using what is known as a low-volt control. That low-volt control can take many forms and communication protocols. TrolMaster makes several types of lighting adapters (LMA units) that allow the Hydro-X to control lights using their low-volt control option.

This Lighting Control Adapter D (LMA-12) is specially designed for controlling D ballast.

Specifications

LMA-12

Input Voltage

Voltage	12V
---------	-----

Maximum Current

Current	0.2A
---------	------

Working Environments

Temperature	32-122°F (0-50°C)
-------------	-------------------

Humidity	≤90%
----------	------

Package Dimensions

Size	6.14"/156mm(L) x 3.27"/83mm(W) x 1.18"/30mm(H)
------	--

Gross Weight	1.74oz/50g
--------------	------------

Package Content

Lighting Control Adapter D (LMA-12)	1pc
-------------------------------------	-----
