Setting The Time & Date

If your thermostat is not connected to your home Wi-Fi, you will need to follow these steps during initial setup & after a power outage.

Tap the ►► button. The display will show SET TIME at the top of the screen & 00:00 at the bottom. Tap ►►

You will see either 24 HOUR or 12 HOUR at the bottom of the screen. Use ►► to select.

The hour digits will flash. Use the DIAL to adjust the digits and press ►► to proceed to the next digits. When you have finished setting the time, tap ►► and continue to the date, using the DIAL to change the digits and ►► to proceed to the next digit.

Setting Heating Programs

Your ESi MISTRAL/CIRRUS has a pre-set heating profile as shown below, which you can change to your own heating programs. As this product does the job of a time programmer and a thermostat, you must enter ON times & temperatures as well as OFF times & temperatures. OFF times and temperatures are known as Setback Events

EVENT	Time	Temp	EVENT	Time	Temp
Week Days	1 06:00 - 08:00	20°C	Weekends	1 07:30 - 09:30	20°C
	2 08:00 - 17:00	15°C		2 09:30 - 16:30	20°C
	4 17:00 - 22:00	21°C		4 16:30 - 22:30	21°C
	5 22:00 - 06:00	15°C		5 22:30 - 07:30	15°C

Press ►► and use the DIAL to select HEATING SCHEDULE or HEATING AND HOT WATER SCHEDULE. Press ►►

The display will show HEATING SCHEDULE, Press ►►

The display will show HEATING 5-2 DAY. Use the DIAL to select a heating schedule (see below) Press ►► to confirm.

- 24 Hour** – Every day will run the same programs.
- 5-2 Day** – One program for weekdays with a different program for weekends
- 7 Day** – Different programs for each day. Every day will need to be set independently.

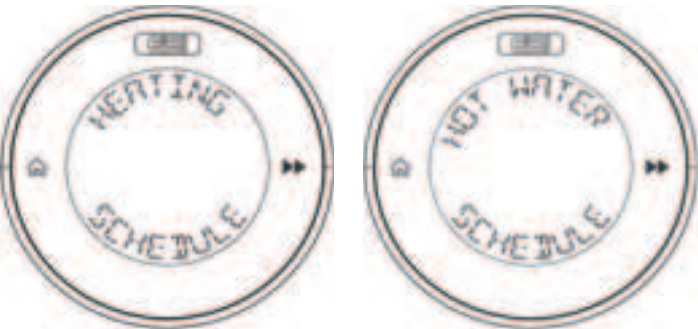

When you have selected a heating schedule, you will see the day or group of days you are programming at the top of the screen. Use the DIAL to change the day or group of days MON - FRI. Press ►► to confirm the day/group of days.

The display will show the start time (flashing), and end time for Program 1, e.g. 06:00 TO 08:00 Use the DIAL to adjust the start time & press ►► to move to the end time. The end time will flash, use the DIAL to adjust the end time & press ►► to move on to the temperature. Use the DIAL to adjust the temperature & press ►► to confirm your settings for Program 1.

Repeat these steps until all programs have been set & use ►► to confirm your settings. When you have finished setting programs, tap the HOME button until you return to the home screen.

When Holiday Mode ends, your thermostat will revert back to AUTO or MANUAL mode. To cancel Holiday Mode at any time, tap the HOME button twice.

Pairing With The ESi Centro App

You can use your smartphone or tablet to regulate your heating and hot water (MISTRAL ONLY) remotely by downloading the ESi Centro app. Simply follow the instructions on the app to pair your thermostat to your home network. The ESi CIRRUS will require the ESWIFIHUB to enable smart functions.

Pairing ESi CIRRUS to ESWIFIHUB

On your ESWIFIHUB, hold the right button (Wi-Fi) until the left button (RF) flashes green. On your ESi CIRRUS, hold the ►► button until the display shows RF SETUP Tap ►►, the display will show RF PAIR PAIRING with a number counting upwards. When your ESi CIRRUS & ESWIFIHUB are paired, you will see SAVING at the bottom of the screen.

When your CIRRUS & ESWIFIHUB are paired, download the ESi Centro app & follow the instructions on Centro to pair your ESWIFIHUB with your home network.

We are continuously developing our products to bring you the very latest in energy saving technology and simplicity. However, should you have any questions regarding setting up your controls please email us at
