Cable Bullet Drill Guide and Template for Level Runs

SKU #DG-6-COMB

Align and drill accurate tensioner and pass-through holes on wood or sleeved posts.

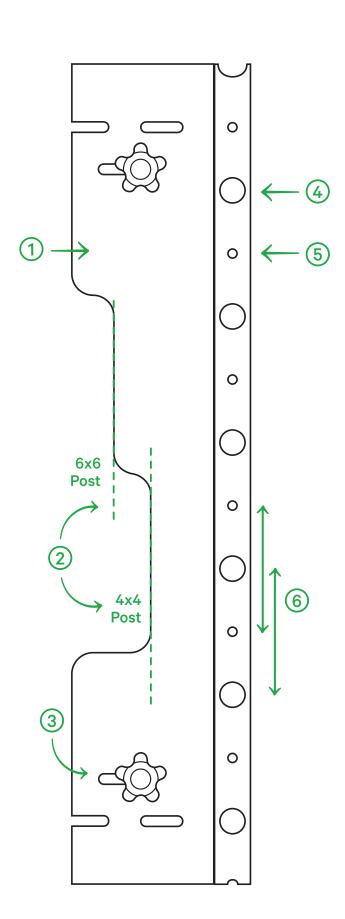

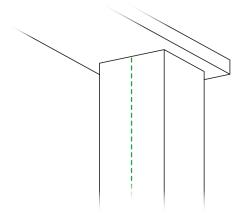

Drill Guide Overview

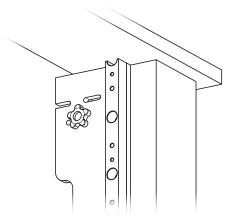

Guide Details

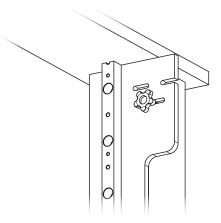

- 1 Broad Clamping Surface
- 2 Quick-Align Guides for Common Post Sizes
- (3) Adjustable Centering Knobs
- 4 9/16" Holes for Tensioners
- (5) 3/16" Holes for Pass-Throughs
- 6 Accurate 3" Cable Spacing
- **PRO TIP:** Use high-quality bits when drilling to minimize wandering.
- CAUTION: International
 Residential Code (IRC) dictates
 that no gap in your handrail (this
 includes between cables that are
 under load) may allow a
 4-inch sphere to pass through.

How to Use:

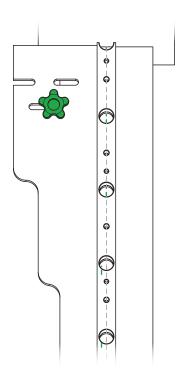

1. Find the midline of your post.

For tensioner posts: the 9/16"

0 0

For pass-through posts: flip the guide over so the 3/16" half-circle is against the top rail.

half-circle should be against the top rail.

> 4. Clamp the acrylic backer of the drill guide to your post.

• PRO TIP: On pass-through posts, drill from both sides to maintain a level hole.

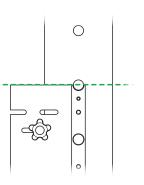

3. Center the drill guide holes over your midline.

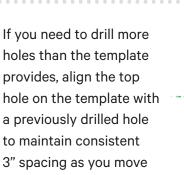

Tighten the adjustable knobs to create your template.

PRO TIP: The knobs can be removed for larger posts.

If you need to drill more holes than the template provides, align the top a previously drilled hole to maintain consistent 3" spacing as you move down your post.

2. Align the drill guide with the underside of your top rail.
