MICROSOFT APPS AT LUMIFY WORK

Lumify Work is your best choice for training and certification in any of Microsoft's leading technologies and services.

We've been delivering effective training across all Microsoft products for over 30 years, and are proud to be Australia's and New Zealand's first and largest Microsoft Gold Learning Solutions Partner. Join more than 5,000 students who attend our quality Microsoft courses every year.

WHY STUDY THIS COURSE

This course delivers the complete site owner story from start to finish in an engaging and practical way to ensure you have the confidence to plan and create new sites or manage your existing sites in SharePoint Online.

Your goal is to learn how to make SharePoint Online relevant to your team by using a sites functionality to help you share information and collaborate with your colleagues. During the class, you will also learn best practices and 'what not to do' as you watch live, interactive demonstrations and put theory into practice with hands on exercises in SharePoint Online.

It is essential that course participants have Microsoft 365 or SharePoint Online currently or are moving to it in the near future.

WHAT YOU'LL LEARN

After completing this course, students will be able to:

- › Understand the benefits of using SharePoint in real world scenarios
- › Create new SharePoint sites to store business information
- › Create pages to share news and content
- › Customise the structure of a site to meet specific business requirements
- › Create and manage views, columns and apps
- › Manage the security of a site
- › Use the power platform to customise forms and automate processes
- › Use search to find business information from people to documents

Microsoft 55215 - SharePoint Online Power User

My instructor was great being able to put scenarios into real world instances that related to my specific situation.

I was made to feel welcome from the moment I arrived and the ability to sit as a group outside the classroom to discuss our situations and our goals was extremely valuable.

I learnt a lot and felt it was important that my goals by attending this course were met.

Great job Lumify Work team.

COURSE SUBJECTS

Module 1: An Introduction to SharePoint Online

Let's get started with SharePoint Online by letting you know about its fantastic selection of features. We will demonstrate popular uses of SharePoint Online to manage and share content, create engaging web pages, automate business processes and make good business decisions with Business intelligence.

We will also discuss who will be the typical users in our sites and the role of the site collection administrator. Site Owners are trusted with functionality that in other business systems would normally only be available to developers. As a new Site Owner, we're sure that you will be amazed with the potential that SharePoint Online has to offer an end user.

Lessons

- Introducing Microsoft 365 and SharePoint
- The cloud revolution
- What is Microsoft 365?
- What is SharePoint?
- Introducing Microsoft 365 Groups
- Ownership and access
- Getting started with Microsoft 365
- Login to Microsoft 365
- The app launcher
- Microsoft 365 settings
- Delve
- OneDrive

Lab 1: An introduction to SharePoint Online

Microsoft 55215 - SharePoint Online Power User

Lumify Work Customised Training

We can also deliver and customise this training course for larger groups saving your organisation time, money and resources.

For more information, please contact us on [1 800 853 276](tel:1800853276).

- Login to Microsoft 365
- Uploading to OneDrive
- Customising your app launcher
- Updating your Delve profile

Module 2: Creating Sites

Whether you are managing existing sites or you have not yet started, we will complement your current situation by discussing site hierarchy and planning your SharePoint sites. This will allow you to understand existing sites that other people have created as well as making good decisions when building new sites.

As a site owner, you will be presented with a selection of site templates. You will use a variety of popular site templates to develop an enhanced understanding of each sites function and appropriate use. Once your site is ready, we will then change the look and feel of your site. You can even try applying your business brand to your site. We will also build our navigation bar, a simple but powerful way to help users move between websites.

Lessons

- Planning your sites
- Your Microsoft 365 tenant
- Web addresses
- Site collections
- Create a new site
- Navigating your team site
- User interface: modern vs. classic
- Site contents: modern vs. classic
- Where does classic come from?
- Create new subsites
- Site templates

<https://www.lumifywork.com/en-au/courses/microsoft-55215-sharepoint-online-power-user/>

Microsoft 55215 - SharePoint Online Power User

- Apply a theme
- Building your navigation
- Delete subsites

Lab 1: Creating Sites

- Create two subsites
- Delete a subsite
- Restore a subsite
- Update the navigation

Module 3: Creating and Managing Web Pages

SharePoint boasts a rich selection of ways to build web pages. You will learn how to update the home page of your SharePoint site with text, links, images, buttons, videos and other web parts. We will also show you best practices when creating multiple pages and linking them together. In most site templates, creating and managing web pages is a simple, fast and rewarding way to present essential information and apps.

SharePoint can also be used as an Intranet for internal news. Due to the high visibility of these web sites, it is common to place more control over the release of new web pages or updates to existing pages. For this reason, SharePoint has classic publishing sites and modern communication sites.

Lessons

- The types of pages found in SharePoint
- Modern SharePoint pages
- Create news and site pages
- Web parts
- Save, publish, share and delete pages
- Communication sites
- Classic SharePoint pages

<https://www.lumifywork.com/en-au/courses/microsoft-55215-sharepoint-online-power-user/>

Microsoft 55215 - SharePoint Online Power User

- How to use classic team site pages
- Review features that are unique to classic publishing sites

Lab 1: Create and manage pages

- Populate Microsoft Stream
- Create a news article
- Create a page about your team
- Edit your home page and link to other pages
- Delete and restore a page
- Check your SharePoint app for news
- Add a communication site
- Add a survey to a page using Microsoft Forms

Module 4: Working with Apps

Apps are required to store information such as events, contacts and files in a site. SharePoint provides a selection of apps for different scenarios, all with the option to be customised for a specific business requirement. Apps can be broken down into lists, libraries and market place apps.

SharePoint lists serve as the structure for calendars, discussion boards, contacts, and tasks. This module explains the concept of lists, and then reviews popular options.

A document library is a location on a site where you can create, collect, update, and share files including Word, Excel, PowerPoint, PDF and more. We will show you the benefits of using a library and teach you how best to work with various types of files in a library.

An introduction to marketplace apps is provided to show how to extend site functionality beyond what Microsoft has provided in the SharePoint Online platform.

Lessons

- An introduction to apps

<https://www.lumifywork.com/en-au/courses/microsoft-55215-sharepoint-online-power-user/>

Microsoft 55215 - SharePoint Online Power User

- An introduction to libraries
- Classic and modern libraries
- Classic library apps
- An introduction to lists
- Classic list apps
- Marketplace apps
- Adding apps to a site
- More options for adding lists
- Create and manage columns
- Public and personal views
- Managing app settings
- Content approval
- Major and minor versioning
- Document sets
- Uploading files to a library
- Create and edit files
- File templates
- Co-author
- Check out and check in
- File properties, sort, filter and details
- Edit in grid view
- File commands
- Copy link and share

<https://www.lumifywork.com/en-au/courses/microsoft-55215-sharepoint-online-power-user/>

Microsoft 55215 - SharePoint Online Power User

- File security
- Folders
- The recycle bin
- Alerts
- OneDrive Sync
- Working with classic lists

Lab 1: Working with Apps

- Creating a new library
- Setting up columns and views
- Uploading content
- Setting up alerts and using versioning
- Creating a list
- Deleting and restoring an app

Module 5: Building processes with Power Automate and Power Apps

Building your business processes into SharePoint has been made simple and powerful with the introduction of code-free solutions to capture information and automate tasks. From SharePoint, discover Power Automate, a workflow (or flow) designer that allows you to integrate lists and libraries into your other favourite Microsoft 365 apps and business services.

Additionally, we will show you Power Apps, a form designer that allows you to bring a tailored experience to your SharePoint lists and libraries, allowing users to document information from their web browser on their PC or even on a mobile app!

This module is designed to show you the integration capabilities between SharePoint, Power Automate and Power Apps. This module will also mention SharePoint's classic workflows, although these are discontinued, their legacy is still documented.

<https://www.lumifywork.com/en-au/courses/microsoft-55215-sharepoint-online-power-user/>

Microsoft 55215 - SharePoint Online Power User

Lessons

- What are business processes?
- Classic tools for designing processes
- Design and test an out of the box workflow
- Getting started with Power Automate in SharePoint
- Design and publish a flow in Power Automate
- Getting started with Power Apps in SharePoint
- Enhance data capture with Power Apps
- Test a Power Automate and Power Apps enriched list

Lab 1: Building processes with Power Automate and Power Apps

- Creating a new approval flow
- Design a new Power App
- Initiating a business process from Power Apps to trigger a flow
- Test your new app on a mobile device

Module 6: Customising Security

Security is an important element of any site. In this module you will discover best practices for adding and removing colleagues from your site and defining their level of access. As a site owner, you can customise permission levels. This means that you can create levels of access that are aligned with the responsibilities of your site's users. An example of this would be allowing a group of users the ability to upload content but not delete content. We will also look at organising audiences with SharePoint security groups and also understand the role of Microsoft 365 security groups.

Lessons

- Microsoft 365 group access
- Updating Microsoft 365 group security
- Managing access to SharePoint

<https://www.lumifywork.com/en-au/courses/microsoft-55215-sharepoint-online-power-user/>

Microsoft 55215 - SharePoint Online Power User

- New sites: public vs. private
- Setup access requests
- Share a site
- Share a file
- Remove a user
- Customising SharePoint security
- Create permission levels and groups
- Security Inheritance
- Security best practices

Lab 1: Customising Security

- Share Content in a library
- Create new permission levels
- Create a new security group
- Add and remove users and checking permissions
- Modifying inheritance of sites/apps

Module 7: Working with Search

SharePoint provides the ability to store vast amounts of content in a variety of locations. This module covers a set of tools which help you to efficiently locate the information you need. In Microsoft 365, as well as searching SharePoint, Delve offers a more personalised experience by identifying useful and trending content and bringing it to you.

While SharePoint's search is rich and intelligent, site owners can make customisations to search to improve its relevance to an organisation. We will show common techniques used by site owners to improve search results by promoting specific content when certain keywords are used.

Lessons

- Delve

<https://www.lumifywork.com/en-au/courses/microsoft-55215-sharepoint-online-power-user/>

Microsoft 55215 - SharePoint Online Power User

- An introduction to SharePoint search
- Locations you can search
- Folders
- Libraries and lists
- Current site
- Hubs
- All sites
- Search results
- Search tips
- Accessing classic search
- Promoted results

Lab 1: Working with search

- Conduct an app search
- Search as site and all sites
- Classic search
- Create a promoted link
- Test a promoted link

Module 8: Enterprise Content Management

Traditionally departments make use of file templates and manual processes to ensure information is collected and retained correctly. This may be a choice your team makes or a decision that is more universal across your organisation. In this module, we will help your team establish reusable file templates and automate document lifecycle management. An example of this would be removing old unwanted content from your site automatically.

To achieve this, you will learn about a variety of SharePoint features including managed metadata, content types, policies, in-place records management and the content organiser.

<https://www.lumifywork.com/en-au/courses/microsoft-55215-sharepoint-online-power-user/>

BUSINESS APPLICATIONS

Microsoft 55215 - SharePoint Online Power User

Lessons

- Managed metadata service
- An introduction to content types
Create and manage content types
- Deploy content types
- Using content types in apps
- The content type hub
- Information management policies
- The records center
- In-place records management
- The content organiser
- Durable links

Lab 1: Enterprise content management

- Create site columns
- Create a new content type
- Deploy a content type
- Set up and test in place records management

<https://www.lumifywork.com/en-au/courses/microsoft-55215-sharepoint-online-power-user/>

BUSINESS APPLICATIONS

Microsoft 55215 - SharePoint Online Power User

WHO IS THE COURSE FOR?

The intended audience for this course may vary between delegates that have had little to no exposure to SharePoint Online to users that have had some level of engagement with the product, but are looking to broaden their skill set.

PREREQUISITES

People attending this course should have basic experience in SharePoint Online as an End User. You should be comfortable with navigating between SharePoint Online pages, understand what sites are, and be able to upload and download content.

The supply of this course by Lumify Work is governed by the booking terms and conditions. Please read the terms and conditions carefully before enrolling in this course, as enrolment in the course is conditional on acceptance of these terms and conditions.

<https://www.lumifywork.com/en-au/courses/microsoft-55215-sharepoint-online-power-user/>
