

Starry Nights – Spa app instructions

NOTE: Turn on spa in advance to give it time to heat up for you - Keep Spa cover on while it is heating up – this will make it heat up quicker.

Open app

Once the app opens, stay on the page the app opens in as below. **No need to go into the menu or open any other options**

Spa will always be highlighted in orange. Do not touch 'pool' otherwise spa will not work.

Under Appliance Status- Scroll sideways to find 'Gas Heater' and tap to turn On, then scroll back sideways to find 'Filter Pump' and tap On

Once Gas Heater starts, please turn the Filter Pump Off (it will go to auto first so just tap again till it says Off) You will also see if it's working by the status section and if the temperature is going up at the top of the screen.

You may then use the 'Spa Jet' and 'Blower' options while in the Spa

NOTE: Please keep phone in the glad bag while outside near the water

Once finished, please turn everything to Off as soon as possible and put the phone back on the charger.

Please do not touch any other controls. The lights will operate automatically at night from 6pm till 10pm.
