Troubleshooting

If any of the following conditions accur while using this product，it can be resolved independently，

1.Left & Right earbud can not pairing with each other

Take out the earbuds from charging case，two earbuds always flash red and blue or there are two bluetooth name of Y42 Pro on the mobile Solution:Turn off both earbuds, delete the connection record Y42 Pro displayed in the connection list of the phone or other bluetooth devices. Then 2 click the right earbud quickly,after 2-3s,both earbuds will flash blue slowly, that means they have paired with each other successfully.

2.Only one earbud working

There is only sound on one side when the headset is connected to the mobile phone, and the lights on the other side do not flash or the red and blue lights flash alternately.

Solution: Delete the connection record Y42 Pro displayed in the connection list of the phone or other bluetooth devices. Put two earbuds back into the case，close the case and then tack out the earbuds. **If** both earbuds flash red and blue light,pls 2 click the right earbud quickly,after 2-3s,both earbuds will flash blue light slowly,that means they have paired with each other successfully. Then open the mobile bluetooth to search **Y42 Pro** to connect.

3.Earbuds can not be connected with mobile

Solution:

1.Turn off the earbuds and turn off the bluetooth on mobile, then turn on earbuds and turn on bluetooth on mobile, to search the bluetooth name Y42 Pro again.

2.**If** the earbuds has been connected by the mobile before, then just need to find the bluetooth name in the bluetooth list, and connected.

3.Delete the bluetooth list record on mobile, then search Y42 Pro to connect.
