

POWERFUL, SAFE AND EASY TO USE

BLACK DIFFUSER - DAP-102NP

Product Manual

PRODUCT MANUAL

White Diffuser DAP-101NP

AromaPlan scent diffusers are powerful, easy to use and the most silent devices available. Our innovative technology converts the liquid perfume into dry vaporous microparticles, creating a practically invisible mist that drifts evenly throughout any space.

For example, when a candle burns, its perfume is stronger the closer you get. Our devices are different. A space is scented evenly, regardless of where you are.

Our devices are perfect for scenting any setting, controlling foul odors and improving the quality of indoor air in business and home environments.

With AromaPlan's diffuser you have ultimate control. You can schedule the strength of the fragrance as well as when it will automatically turn on and off, to perfectly scent your environment according to your daily needs, without ever wasting your favorite fragrance.

NO RESIDUE

ECO-FRIENDLY

PET-FRIENDLY

Features:

- Easy floor or wall installation.
- Space evenly scented.
- No Residue.
- Safe for Kids & Pets
- Physical diffusion without heating and water.

Approved Certificate: CE, FCC, RoHS, CNAS and so on.

Application Place: Brand clothing store, 4S shop, bar, clubhouse and so on.

IV. How to use the equipament

V.Operation Introduction

1. APP Operation Introduction The device has four buttons:

- "(BACK)" is the return button
- "(ENT)" is the confirmation button,
- " (is the increasing button

and " " is the shift button.

2. Buttons operation:

The device has four buttons:

1.Under the normal working interface, press "BACK" and "ENT" buttons at the same time to **enter the password setting interface.**

2.Under the normal working interface, press "(ENT)" and " (Δ) " buttons at the same time to **turn on/off the essential oil detection function.**

3.Under the normal working interface, press " (Δ) " button **to adjust the** concentration level A, B and C.

4.Under the normal working interface, press " (Δ) " and "(b)" buttons at the same time to **enter local time setting interface.**

5.Under the normal working interface, press "\(\bigcup \)" button to **enter the** working time and frequency setting interface.

6.Under the normal working interface, long press "BACK" button to **turn on/off the fan.**

7. Under the normal working interface, long press "ENT" button to turn off the machine.

3. Factory Reset:

Under the normal working interface, firstly, press the "BACK" and "D" buttons at the same time until the interface **shows YES/NO**, **then let your hand go.** Secondly, operate "D" button to **choose YES** then press "ENT" button to **confirm it and finish the setting.**

4. Configure your diffuser

1.Programming Date/Time:

Programming your AromaPlan diffuser updating the date and time is very simple. After plugging in your machine you're going to press "\(\rightarrow \)" and "\(\rightarrow \)" buttons at the same time to **update the time in a 24-hour format** you're first going to click the button "\(\rightarrow \)" in order to **adjust the hour** and then you'll go to the button
"\(\rightarrow \)" to **update the minutes.**

DATE/TIME INTERFACE

Next, set the **day of the week** and the **date** using the same buttons as before to configure. Clicking the " \bigcirc " button **changes the item**, and the " \bigcirc " button **moves you to the next item to be adjusted.**Press " \bigcirc " button to **confirm it and finish the setting.**

2. Scenting schedule configuration:

Programming working hours

After configuring the date and time, configure the scenting schedule of the diffuser. The first step is to **program the diffusers working hours.** We will do this by pressing "\(\bigcup\)" in order to enter these settings.

Once you are in the program screen click " ENT " to move from the current day to the hour.

SCENTING SCHEDULE INTERFACE

Now we can begin adjusting the diffusers Start Time (St) by clicking " \bigcirc ", we'll **change the hour** and we can click " \bigcirc " in order to **change the minutes** we will then click the " \bigcirc " again in order to **move to the end time**.

Programming working intervals

Once we have finished setting up the hours, now we are going to **adjust the intensity of your fragrance this is done by setting up working intervals** in seconds so we'll click "\(\overline{\text{b}}\)" after we adjust the time to come down to your **Working (W)** seconds this is how long your diffuser will release fragrance, for example so we have it **set to Work**, by clicking "\(\overline{\text{b}}\)" button, for 30 seconds **(30s).** Then we will click the "\(\overline{\text{b}}\)" again in order to move it, so we can also adjust the **Pause (P)** for resting time. We call also ajust the **Pause (P)** for resting time, so for example you can **set it to pause** for 90 seconds **(90s)** by clicking in "\(\overline{\text{b}}\)" button.

Now once we have finished setting up this program screen we can press " (ENT)" for the diffuser to begin working in the Normal Working Interface where you'll see the countdown of the Working (W) seconds that you programmed and the Pause (P) for resting seconds that you programmed.

You can programming up to five schedules.

NORMAL WORKING INTERFACE

3. Scenting schedule configuration:

The diffuser has three different intensity settings depending on the size of your space once you are in the home screen simply click " " and you will begin to see the intensity changing from A, B and C.

The suggested intensity is for spaces up to 1000 square feet use intensity A, spaces is up to 1500 square feet use intensity B, spaces above 1500 square feet use intensity C and if in any case you need more intensity for your fragrance you'll just hold " BACK " for 5 seconds and it'll enter into turbo mode " * ".
