Safety information

- ▶ Read and understand all instructions in the user's manual. Observe all markings on the product.
- ▶ Avoid using a telephone during a thunderstorm. There may be a slight chance of electric shock from lightning.
- ▶ Do not use a telephone in the vicinity of a gas leak. Under certain circumstances, a spark may be created when the adapter is plugged into the power outlet, or when the handset is replaced in its cradle. This is a common event associated with the closing of any electrical circuit. In an inadequately ventilated environment, the user should not plug the phone into a power outlet, nor put a charged » ' Á · Æ , Ç ¼ Ä Ç Ä Ç » , ¶ Ä ' · ¿ , È » , Á , Ç » , Á , ' Á , ¶ Ä Ä ¶ , Ä Ç Ä ' supporting gases. š Æ Ä ' Á ¾ ¼ Ä Æ È ¶ » ' Á , Ä È ¼ Ä Ä Ä Ä , Ä Ç ¶ Ä È ¿ · ¶ - È ¶ » , Ä È ¼ Ä Ä Ä Ä , Ä Ç Æ Ä ¼ ° » Ç ¼ Ä ¶ ¿ È · , Ä , · ¼ ¶ ¿ È Æ , Ä ' Ä ventilation; industrial gases (cleaning solvents; gasoline vapors; etc.); a leak of natural gas; etc.

CAUTION: Read the correct battery type. Dispose of used batteries according to the instructions.

Especially about cordless telephones

- Privacy:** The same features that make a cordless telephone convenient create some limitations. Telephone calls are transmitted between the telephone base and the handset by radio waves, so there is a possibility that your cordless telephone conversations could be intercepted by radio receiving equipment within range of the cordless handset. For this reason, you should not think of cordless telephone conversations as being as private as those on corded telephones.
- Electrical power:** The telephone base of this cordless telephone must be connected to a working electrical outlet which is not controlled by a wall switch. Calls cannot be made from the handset if the telephone base is unplugged.
- Potential TV interference:** Some cordless telephones operate at frequencies that can cause interference with television sets. To avoid interference, do not place the telephone base of the cordless telephone near a television set. If you experience interference, move the telephone base away from the television set.
- Rechargeable batteries:** This product contains nickel-metal hydride rechargeable batteries. Do not place the batteries near heat, open flames, or fire. Do not short circuit with conductive material such as rings, bracelets, and keys. The battery or conductor may overheat and cause harm. Observe proper polarity between the battery and the battery charger.
- Nickel-metal hydride rechargeable batteries:** Dispose of these batteries in a safe manner. Do not burn or puncture. Like other batteries of this type, if burned or punctured, they could release caustic material which could cause injury.

Important safety information

The RBRC Seal means that the manufacturer is voluntarily participating in an industry program to collect and recycle nickel-metal hydride rechargeable batteries when taken out of service within the United States. These batteries may be taken to a participating local retailer of replacement batteries or recycling center. You may call 1-800-8-BATTERY® for locations accepting spent Ni-MH batteries.

Precautions for users of implanted cardiac pacemakers

Cardiac pacemakers (applies only to digital cordless telephones):

Wireless Technology Research, LLC (WTR), an independent research entity, led a multidisciplinary evaluation of the interference between portable wireless telephones and implanted cardiac pacemakers. Supported by the U.S. Food and Drug Administration, WTR recommends to physicians that:

Pacemaker patients:

- ▶ Should NOT place wireless telephones directly over the pacemaker, such as in a breast pocket, when it is turned ON.
- ▶ Should use the wireless telephone at the ear opposite the pacemaker.

WTR's evaluation did not identify any risk to bystanders with pacemakers from other persons using wireless telephones.

ECO mode

This power conserving technology reduces power consumption for optimal battery performance. The ECO mode activates automatically whenever the handset is
