

## Precautions

- Please do not leave the child alone on the changing table as it may be dangerous.
- To prevent accidental injury, it is essential to use the safety belt to protect your baby when using the changing table. Older children are not allowed to climb or play on the changing table.
- To prevent accidental falls or slipping, please never leave your child unattended.
- This product is suitable for babies weighing less than 15kg. The storage basket can hold lightweight items, with a maximum weight capacity of 2.5kg.

## Step 1

The steel pipe side with the letter label faces outward, and the long steel pipe is connected to B and C, and the short pipe is connected to A and D

## Step 2

Connect the upper and lower components installed in Step 1 according to the corresponding letter labels

## Step 3

After installation, place E should be levelled, and the height of the diaper table at place E should be adjusted as required

Note: Do not tighten all screws at once during the installation process. After all steps of the installation of the diaper table are completed, fix all screws tightly
