

# ASSEMBLY INSTRUCTION

01

## INSTALL THE OTHERS TWO CROSS BARS.

- ▶ Handrail holders must face outwards.
- ▶ Use two M7\*13mm screws and hex wrench.
- ▶ The cross bars should be level.

**Tip:** If you find support brackets not level, please adjust the cross bars.

02

## INSTALL THE UPPER WOODEN PANEL

- ▶ The panel with logo "YEEZOO" is the upper panel, logo outwards.
- ▶ Four countersinks and wood surface texture face upwards.
- ▶ Use four M6\*49mm screws and hex wrench to fix the panel.

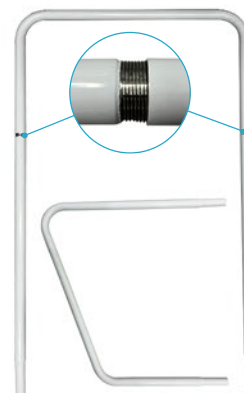

03

## INSTALL THE FIRST WOODEN PANEL

- ▶ Four countersinks and wood surface texture face upwards.
- ▶ Use four M6\*49mm screws and hex wrench to fix the panel.
- ▶ Check and tighten all screws.

04

## PREPARE TWO GRAB BARS

- ▶ The higher one: bar connection and grab bar are screw thread connected.
- ▶ The shorter one: No need to assemble.

05

## INSTALL HANDRAILS AND FIX THEM

- ▶ Insert the handrails into the handrail holders.
- ▶ Use four M7\*13mm screws and hex wrench to fix from it's bottom.
- ▶ The two grab bars do not distinguish between left and right handrail holders.

06

## INSTALL THE FOUR NON-SLIP PADS

- ▶ Warm Tip1: Please double check to make sure all screws have been tightened before stepping on.
- ▶ Warm Tip2: Please don't shake the handrail or jump on the steps to avoid dangers.
