

SEPARATED-COMBUSTION, PACKAGED SYSTEM

Price Sheet for Model SCE Non-Plan Product Effective March 15, 2024

SHIPMENT, TITLE AND RISK OF LOSS

All prices quoted are FOB shipping point. Prices apply to continental U.S.A. and Canada (payable in U.S. funds). All prices subject to change without notice. Terms of Sales for all Purchase Orders are outlined in the Distributor contracts for these products. If you would like a copy, call (800) 695-1901.

NOTE: The manufacturer reserves the right to add components (at net prices) when necessary to obtain the operation desired by the customer.

KEY: Base price includes all items listed with a price of 'S'. '-' indicates no change in price. '■' indicates not available

FEATURES:

- Available for natural and LP gas
- 80% thermal efficient
- Intermittent spark pilot
- Single-stage 24-volt gas valve
- Aluminized steel heat exchanger
- Aluminized burners with a stainless steel insert
- 115 volt supply voltage
- 115 volt venter motor with stainless steel shaft
- 24 volt control voltage transformer

MOUNTING SUPPORT (6" Legs)	Part Number	Quantity Required	List Price Each
(o Legs)	RZ74487	4 per unit	\$42

Additional field-furnished supports between furnace and blower section are required.

- (A) When ordering propane (Option AA2), both burner air shutters (Option AE2) and spark pilot with lockout (Option AH3) must be added.
- (B) Check with Reznor Distributor for complete warranty details.
- (C) Gas controls for makeup air include DPST on/off wall switch, shipped packed inside the furnace control panel or mounted on the optional remote console (if ordered)
- (F) For 3 HP TEFC Motor with 575V power contact factory agent.
- (G) Included in the Unit Base Price
- (H) Select option AN2 Contactor (C), AN10 Starter (S), or VFD1, VFD2 Variable Freq Drive (V) per the availability shown on this chart
- (J) For other VFD control source sequence, contact your factory representative.
- (K) Additional relays (3-6) depending on the application) are required to accommodate Option CL33 or CL52; appropriate BG Option(s) will be added. Do not order any Remote Console having switches CL33 or CL52.
- (L) All thermostats (except CL9) have Fan Auto-On function. You must add an Option BG2F fan relay to enable this function.
- (M) For CL22 or RCT2 used with Remote Consoles:
- 1) Recirculated Heating and/or Cooling (AG1 and AG2): Use CL22 alone or only with RC1, RC2, RC3, RC4, or RC9 remote consoles. Fan On/ Auto and Heat/Cool/Auto/Off Mode functions on thermostat will control unit operation. Panels with On/Off switch: Off position prevents unit operation.
- 2) Simple Makeup Air (AG3, AG15, AG16, AG60, AG61, AG62): For consoles having a Summer/Winter/Off or Heat/Vent/Cool Switch, unit fan on/ off and heat/cool mode are controlled by toggle switch(es) on the console. CL22 (or RCT2) acts as a room temperature override for additional heating and/or cooling. Thermostat will not cycle fan. Cooling relays and controls are not furnished except with evap cooling. 3) Other: Submit complete control sequence. Additional relays (\$) are required.
- (P) Dirty filter pressure switch is included in the list price of the remote console. Order a remote console with dirty filter light to get pressure switch.
- (Q) Must order Damper Arrangement Option AR18 to get remote potentiometer. Potentiometer is included in list price of Option AR18.
- (R) Must order Gas Control Option AG9 or AG39 to get temperature selector. List price of temperature selector is included in Option AG9.
- (S) Lead time is extended for stainless steel cover.
- (T) General Guide to Indoor Disconnect Options (unit motor/voltage availability varies by model/size)
