

USER MANUAL

SAFETY WARNINGS

- Warning For Vulnerable Consumer Groups:** This product is not recommended for minors, pregnant or breast-feeding women or anyone at risk of heart disease, depression and asthma.
- Battery Caution:** Do not expose the device to extreme temperatures. Do not disassemble the device without Lost Vape's recommendation.
- Warranty:** The device is covered by a 3-month warranty from the date of purchase.
- Contacts:** For further questions or inquiries, please contact Lost Vape by email at support@lostvape.com or visit our website: www.lostvape.com.

MAIN FEATURE

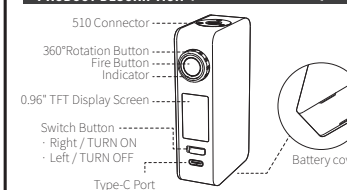

- QUEST 2.0 CHIP
- 200W MAX OUTPUT POWER
- 18650 DUAL BATTERIES (Not Included)
- TYPE-C FAST CHARGING

BASIC PARAMETERS

Dimension	93mmx56.7mmx26mm
Weight	152±5(g)
Battery	Dual 18650 Battery (Not Included)
Input Voltage	6.0V-8.4V
Battery Voltage	3.0V-4.2V
Output Voltage	0.7V-10V
Power Range	5-200W
Input Current	1A-40A
Screen Pixel	0.96 "80*160
Body Material	Aluminium-Alloy & Stainless Steels

ENGLISH

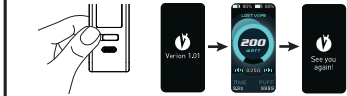

PRODUCT DESCRIPTION (COMPONENTS OVERVIEW)

BASIC OPERATION

TURN ON/TURN OFF

Push-Right the Switch Button to TURN ON the device & Push-Left to TURN OFF.

PUFF TIME DISPLAY & PUFF COUNT RESET

- Puff Time displays after every vaping.
- In the power-off state, press the Fire Button & turn on the Switch Button to reset the puff count.

CHECK THE BATTERY LEVEL

The LED indicators will flash while vaping or charging to remain the battery capacity.

- 0% - 20% 20% - 40% 40% - 60%
- 60% - 80% 80% - 100%

ENGLISH

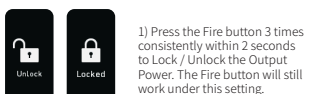

HOW TO ADJUST WATTAGE

Turn round the Rotation Button to enter into power adjust mode. Clockwise the Rotation button increments power by step (The incremental steps: 0-39W 1W, 40W-98W 2W, 100W-195W 5W). Minimum 5W and Maximum 200W can be adjusted cyclically.

SWITCH BETWEEN MODES

1) Press the Fire button 3 times consistently within 2 seconds to Lock / Unlock the Output Power. The Fire button will still work under this setting.

PUFF TIME DISPLAY & PUFF COUNT RESET

- Puff Time displays after every vaping.
- In the power-off state, press the Fire Button & turn on the Switch Button to reset the puff count.

CHECK THE BATTERY LEVEL

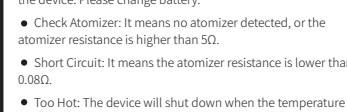

The LED indicators will flash while vaping or charging to remain the battery capacity.

DESCRIPTION OF WARNING

- Low Battery:** This message means battery voltage below 3.3V before use or lower than 2.85V when you are using, this will continue to display for a few seconds after attempting to fire the device. Please change battery.
- Check Atomizer:** It means no atomizer detected, or the atomizer resistance is higher than 5Ω.
- Short Circuit:** It means the atomizer resistance is lower than 0.08Ω.
- Too Hot:** The device will shut down when the temperature of the internal board is higher than 85°C. You can use the device again when the temperature is back to 65°C.
- Over 10s:** Output will automatically cut off and the screen shows "Over 10s" when you vape over 10s continuously.

SWITCH BETWEEN MODES

1) Press the Fire button 3 times consistently within 2 seconds to Lock / Unlock the Output Power. The Fire button will still work under this setting.

PUFF TIME DISPLAY & PUFF COUNT RESET

- Puff Time displays after every vaping.
- In the power-off state, press the Fire Button & turn on the Switch Button to reset the puff count.

CHECK THE BATTERY LEVEL

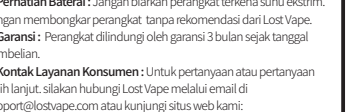

The LED indicators will flash while vaping or charging to remain the battery capacity.

- 0% - 20% 20% - 40% 40% - 60%
