TEKVOX 79068-Ultra

79068-Ultra User Manual

Preface

This manual is to ensure that the user can use the product properly and avoid danger while operating. Before using this product, please read the user manual carefully and keep it properly for future reference.

Overview

This manual is about 4K PTZ camera operation.

Graphic Symbols

Description of graphic symbols used in this manual.

Symbols	Description
 Illustration	This symbol indicates that the words are clarification or supplement to this article.
 Caution	This symbol indicates that negligence of the instructions may lead to mishandling that may cause injury or property damage.
 Danger	This symbol indicates a risk that may result in damage to this machine or documents. Follow the instructions to avoid property damage.

TEKVOX 79068-Ultra

79068-Ultra User Manual

Attention

This manual introduces functions, installations and operations for this product in detail. Please read this manual carefully before installation and use.

Precuations

This product can only be used in the specified conditions in order to avoid any damage to the camera:

- 1) Do not expose the product to rain or moisture.
- 2) To prevent the risk of electric shock, do not open the case. Installation and maintenance should only be carried out by qualified technicians.
- 3) Do not use the product beyond the specified temperature, humidity or power supply specifications.
- 4) Please use a soft dry cloth to clean the camera. If the camera is very dirty, clean it with diluted neutral detergent; do not use any type of solvents, which may damage the surface.

Electrical Safety

Installation and use of this product must strictly comply with local electrical safety standards. The power supply of the camera is 12V and the receiver is 24V polarity of the power supply drawing.

Transportation

Avoid any stress, vibration, or moisture during transportation, storage, installation and operation

Installation

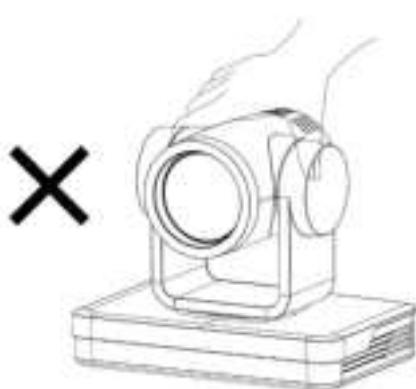

- 1) Do not rotate the camera head violently, otherwise it may cause mechanical failure.
- 2) This product should be placed on a stable desktop or other horizontal surface. Do not install the product obliquely, otherwise it may display an inclined image.

TEKVOX 79068-Ultra

79068-Ultra User Manual

- 3) Ensure there are no obstacles within rotation range of the holder.
- 4) Do not power on before completely installation.

Improper operations may damage the product structure and result in mechanical failure.
Please note the following tips.

Do not move the camera by grabbing the head.

Move the camera by holding the bottom with one or both hands.

 Please do not rotate the lens and camera head manually even if the camera is powered off otherwise, it may damage the camera. The Camera must perform a self-check at startup without any interference.

Do Not Dismantle Camera

We are not responsible for any unauthorized modification or dismantling.

Magnetic Interference

Electromagnetic fields at specific frequencies may affect the video image. This product is Class A. It may cause radio interference in a household application. Appropriate measure is required.

1.3 Camera Power-on Self-Test

1.3.1 Power on

Camera can be powered by its own 12V power supply when receiver is not used. Do not connect both power supplies. Best to only use the 24V supply connected to the receiver.

1.3.2 Self-Test

After power on, the receiver light will start flashing and camera will do a brief pan-tilt tour and return to the home position. When the light stops flashing, the self-test is finished.

- The default address of the remote control is 1#. When using the menu restore default setting, the address of IP remote control will restore 1#.
 - If preset 0 is set, the camera will return to the preset 0 position after self-test
-

1.4 Video Output

This camera can output up to 4K video through network, HDBaseT and USB 3.0.

1.4.1 Network Output

Network connection:

Login: You can reach the Web Interface by typing in the camera's IP address (default 192.168.5.163) into a web browser. To log in, type in "admin" into the username and password fields. From the Web Interface, you can adjust many of your camera's settings via this IP interface, like PTZ control, video recording, playback and configuration setting.

1.4.2 Receiver USB 3.0 Output

USB 3.0 connection: Open video software and select image device to output video.

1.4.3 HDBaseT

This camera is designed to only work with its supplied receiver. The receiver supplies power, network, RS232, and IR to the camera. The camera supplies HDMI video and audio to the receiver.

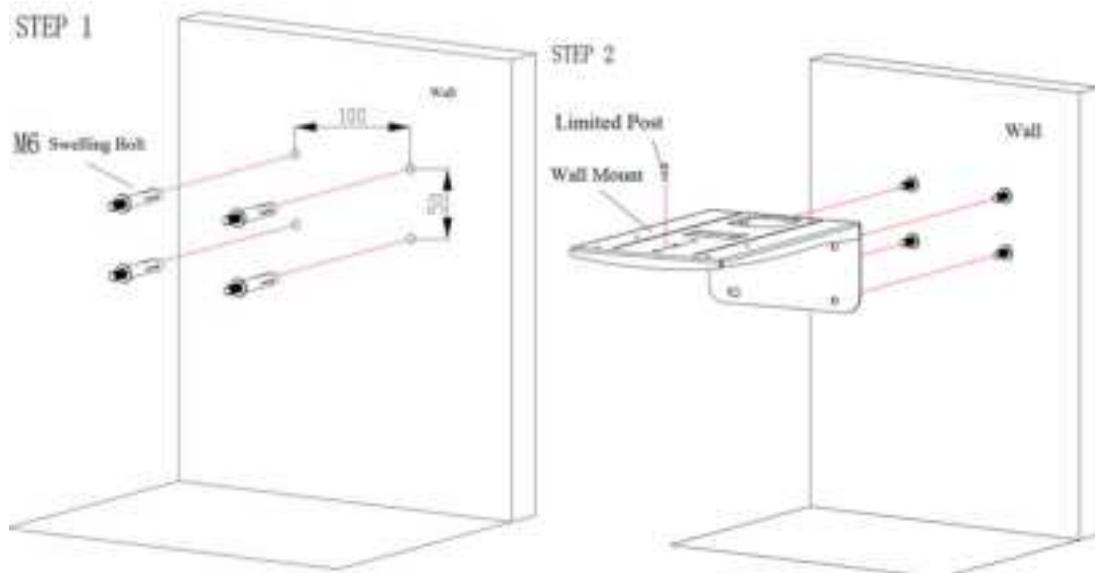

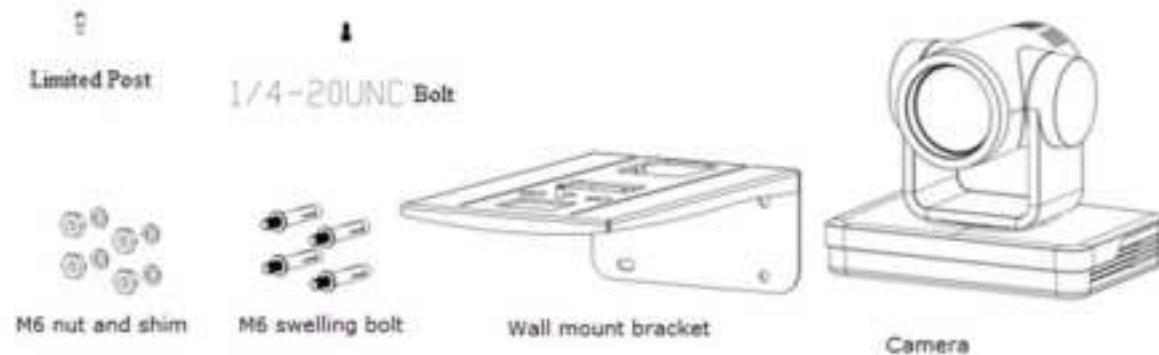

The bottom of the camera does get hot to the touch. This is normal and is used to dissipate the heat of the HDBaseT circuit to the bottom metal of the camera.

1.5 Bracket

Caution

- The bracket can only be wall or upside down mounted on a structurally supported wall with proper mounting hardware.

1.5.1 Steps of Wall Mount

2.1.3 Accessory

When you unpack your package, check that all the supplied accessories are included:

Supplied Accessory	
Supplied	1 * 4K HDBaseT PTZ Camera
	4 * Plastic pad
	1 * HDBaseT Receiver
	1 * DC14V2.7A Power adapter
	1 * US Power Cable
	1 * USB 3.0 Cable
	1 * IR Remote
	1 * IR Receiver
	3 * 3-Pin Terminal Blocks
	2 * Mounting Ears with 2 screws
Optional	1 * User manual
	Wireless remote control
	Brackets for wall mounting
	Brackets for ceiling mount

2.2 Product Feature

The 79068-Ultra is an advanced 4K HDBaseT PTZ auto-tracking camera where we bring all the connections to you with only one Cat cable up to 328'. The camera features 12x optical zoom and supports up to 4K@30Hz resolution and includes both audio in and power for an Acoustic Magic Voice Tracker III microphone. The 79068-Ultra includes a receiver that supports all the connections you need including power, HDMI, USB 3.0, LAN, RS232, IR, and Audio in and out. The camera's sophisticated facial recognition and ISP algorithms deliver fast accurate tracking of a speaker as they move with no setup. All setup and video are provided using HTML5 GUI.

- **4K UHD Resolution:** 8.29M megapixel high quality SONY CMOS sensor. Resolution is up to 4K with frame rate up to 30fps.
- **Optical Zoom Lens:** 12X optical zoom wide-angle lens.
- **Leading Auto Focus Technology:** Fast, accurate and stable auto focusing technology.
- **Low Noise and High SNR:** Super high SNR image is achieved with low noise CMOS. Advanced 2D and 3D noise reduction technology further reduces the noise while ensuring high image clarity.
- **Various video output interfaces:** Support HDMI, HDBaseT, USB 3.0, LAN interface; support POE power supply, USB 3.0 supports dual stream.
- **Multiple Audio/Video Compression Standards:** Support YUY2, MJPEG, H264, NV12 video encoding formats, MJPEG, H264support up to 3840×2160 resolution 30fps compression; support AAC audio compression.
- **Audio Input Interface:** Support AAC audio compression, AAC support 48000 sampling frequency.
- **Built-in Gravity Sensor:** Support PTZ auto-flip function and easy installation.
- **Multiple Network Protocol:** Support ONVIF, GB/T28181, RTSP, RTMP, VISCA OVER IP, RTMPS, SRT protocols; Support RTMP push mode, easy to be connected to streaming server (Wowza, FMS); Support RTP multicast mode.
- **Control Protocol:** Supports both RS232 and IP VISCA.
- **Quiet Pan / Tilt Movement:** With high accuracy step driving motor, camera can pan / tilt extremely quiet and smooth.
- **Low-power sleep function:** Support low-power sleep/wake-up, and the power consumption during sleep is less than 400mW.
- **Multiple Presets:** Up to 255 presets (10 presets via remote control).

- **AI Human Detection:** Built-in high-speed processor and advanced image processing and analysis algorithm, and real-time tracking and zone tracking modes are available, can switch the tracking object by clicking the person object frame on the webpage.
- **Multiple Application:** Online-education, Lecture Capture, Webcasting, Video conferencing, Tele-medicine, Unified Communication, Emergency command and control systems, etc.
- Extends up to 4K video, audio, LAN, power, RS232, and IR signals up to 328 feet (100m) over signal CAT cable.
- The receiver's line input mixes with the camera's audio and then output from USB and audio output.

Accessory	
Supplied Accessory	Power Supply, RS232 Control Cable, USB 3.0 Cable, IR Remote Control, User Manual
Optional Accessory	Ceiling / Wall Mount (Extra Cost)

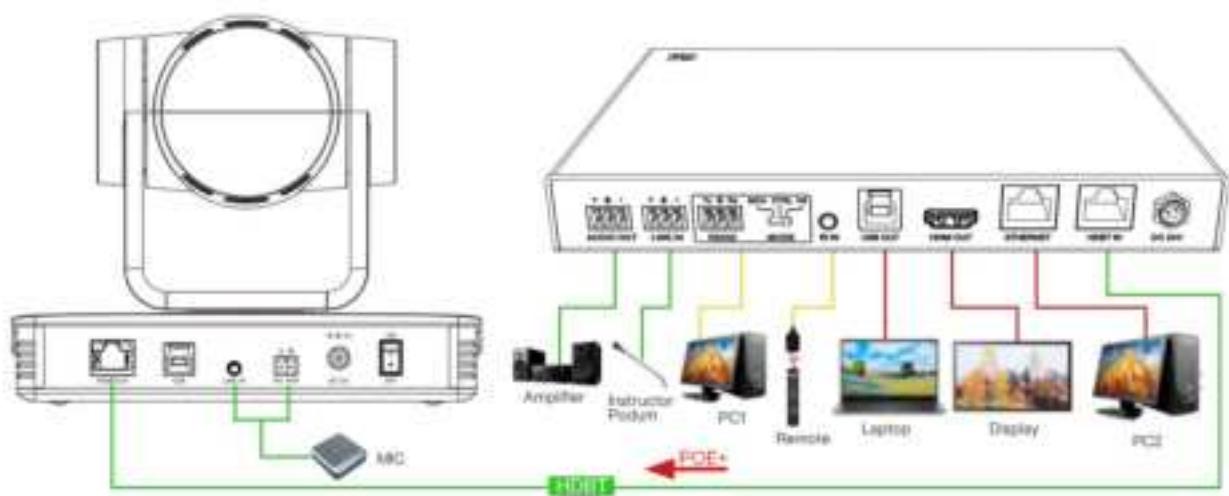

Table 2-6 AI Function

AI Function	
Real-time Tracking Mode	The longest tracking distance can reach 6-7 meters (22'), which can support the speaker to walk at a speed of 3-4 mph
Zone Tracking Mode	4 tracking zones are available, which can be set within -170° ~ +170° in horizontal and -30° ~ +90° in vertical.
Person Selection	Select the tracking object by clicking the people object box on the web page.

Receiver	
Inputs	1 HDBaseT (RJ45, Female) 1 Line In (3-pin Phoenix, balanced mono)
Outputs	1 HDMI (19-pin, Female) 1 USB (USB 3.0 Type-B, Female) 1 Audio Out (3-pin Phoenix, balanced mono)
Output Resolution	HDMI: Up to 4Kx2K @ 30Hz 4:4:4 USB: Up to 4K@60 Hz
Line Level	10dBv with max level of 6dBv
Max Output Level	2.0 ± 0.1Vrms
Total Harmonic Distortion + Noise (THD+N)	< 1%, 20Hz to 20kHz bandwidth, 1kHz sine at 0dBFS level (or max level)
Signal-to-Noise Ratio (SNR)	> 80dB, 20Hz to 20kHz bandwidth

Noise Level	-80dB
Control Ports	1 USB (USB 3.0 Type-B, Female) 1 TCP/IP (RJ45, Female, 1 with PoE) 2 IR (In/Out, 3.5mm mini jack) 1 RS232 (3-pin Phoenix)
Other Parameter	
Maximum Transmission Distance	4Kx2K @ 60Hz 4:2:0 / 1080p @ 60Hz: 328 ft (100m)
Storage Temperature	-10°C ~ +70°C
Storage Humidity	20% ~ 95%
Working Temperature	-10°C ~ +50°C
Working Humidity	20% ~ 80%
Dimension	195mm (7.68')L*130mm(5.12')W*25(0.98')H
Environment	Indoors

2.4 System Connection

3. How to Use

3.1 Video Output

3.1.1 Power-on Self-test

After powering on, the camera will have initial configuration and receiver the light will flash. Camera will do a brief pan-tilt tour and return to the home position, or if preset 0 is set, the camera will return to the preset 0 position).

3.1.2 Video Output

- 1) Network output: Connect this product and your computer through network cable, then open the browser, enter the camera IP address (factory default 192.168.5.163) in the address bar and login using the default username and password (factory default are “admin”).

- If you forget your username, password, IP address, you can manually restore the default by the remote controller key combination * + # + Manual.
-

- 2) HDBaseT (Receiver Only), HDMI Output: Connect the monitor with the corresponding video output interface.
- 3) USB 3.0 Output (Receiver): Connect this product to computer USB 3.0 interface and open USB streaming software like windows Camera or Zoom and select the camera as a video source.

3.2 Remote Control

Please read the following content for operating the IR remote including special button sequence entries.

3.2.1 IR Remote Control

1. Standby Key

After a 3-second-long press, the camera will step into standby mode. Long press again for 3-seconds, the camera will self-test again and back to HOME position. (Note: If power-on mode is turned on and Preset 0 is set, and there is no operation within 12-seconds, it will automatically point to the specified preset position.)

2. Camera Address Selection

Select the camera address which wants to be controlled

3. Number Key

Set or run 0-9 presets

4. *# Key

Key combination use

5. Focus Control Key

Auto Focus: Enter auto focus mode.

Manual Focus: The camera focus mode is manual

Switch the camera focus mode to manual focus by pressing

6. Zoom Control Key

Zoom + :Lens near Zoom - :Lens far

7. Set or Clear Preset key:

Set Preset: Set preset key + 0-9 number key:

Clear Preset key: Clear preset key + 0-9 number key

8. Pan/Tilt Control Key

Press **▲** Key :Up

Press **▼** Key :Down

Press **◀** Key :Left

Press **▶** Key: Right

“HOME” Key: Return to the camera home position or enter the next level menu.

9. BLC Control Key

Back Light ON / OFF: Turn on or off the back light

10. Menu Setting

Open or close the OSD menu

Enter / exit the OSD menu or return to the previous menu.

11. Camera IR Remote Control Address Setting

[*] + [#] + [F1] :Camera Address No. 1

[*] + [#] + [F2] :Camera Address No. 2

[*] + [#] + [F3] :Camera Address No. 3

13. AI Function Short Keys

【F1】: Turn off AI Human Detection

【F2】: Turn on AI Human Detection

【F3】: Switch figure tracking mode

【F4】: Change tracking target on real tracking mode

3.2.2 Remote Control Usage

Users can control the pan/tilt/zoom, setting and running preset positions via the IR remote controller.

Key Instruction:

1. In this instruction, “press the key” means a click rather than a long-press, and a special note will be given if a long-press for more than one second is required.
2. When a key-combination is required, do it in sequence. For example, “【*】 + 【#】 + 【F1】” means press “【*】” first and then press “【#】” and last press “【F1】”

1) Camera Selection

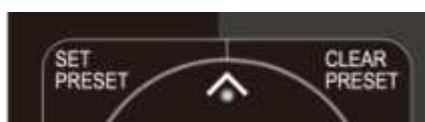

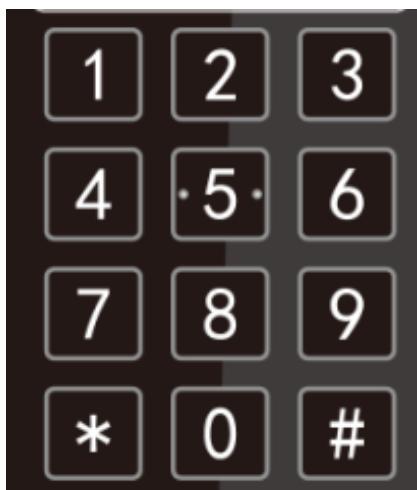

Select the camera address to control.

2) Pan/Tilt Control

Up: press \blacktriangleleft Down: press \blacktriangleright
Left: press \blacktriangledown Right: press \blacktriangleleft
Back to middle position: press “【HOME】”
Press and hold the up/down/left/right key, the pan/tilt will keep running, from slow to fast, until it runs to the endpoint; the pan/tilt running stops as soon as the key is released.

3) Presets Setting, Running, Clearing

1. Preset setting: to set a preset position, the users should press the “【SET PRESET】” key first and then press the number key 0-9 to set a relative preset.

Note: 10 preset positions in total are available by remote controller.

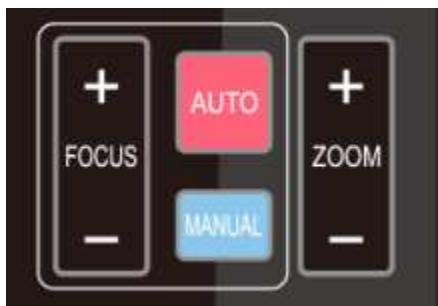

2. Preset Running: Press a number key 0-9 directly to run a relative preset.

Note: There is no action if a relative preset position is not saved.

3. Preset clearing: to clear a preset position, the user can press the “【CLEAR PRESET】” key first and then press the number key 0-9 to clear the relative preset;

Note: Press the“【#】” key three times continually to cancel all the presets.

4) Zoom Control

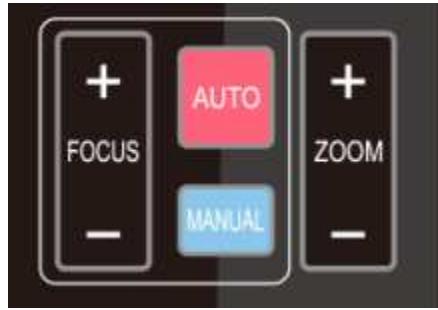

ZOOM IN: press “ZOOM ▼” key

ZOOM OUT: press “ZOOM ▲” key

Press and hold the key, the camera will keep zooming in or zooming out and stops as soon as the key is released.

5) Focus Control

Focus (near): Press “【focus+】” key (Valid only in manual focus mode)

Focus (far): Press “【focus-】”key (Valid only in manual focus mode)

Auto Focus: Support

Manual Focus: Support

Press and hold the key, the action of focus will keep continue and stops as soon as the key is released.

6) Camera Remote Controller Address Setting

【*】 + 【#】 + 【F1】 :Camera Address No.1

【*】 + 【#】 + 【F2】 :Camera Address No. 2

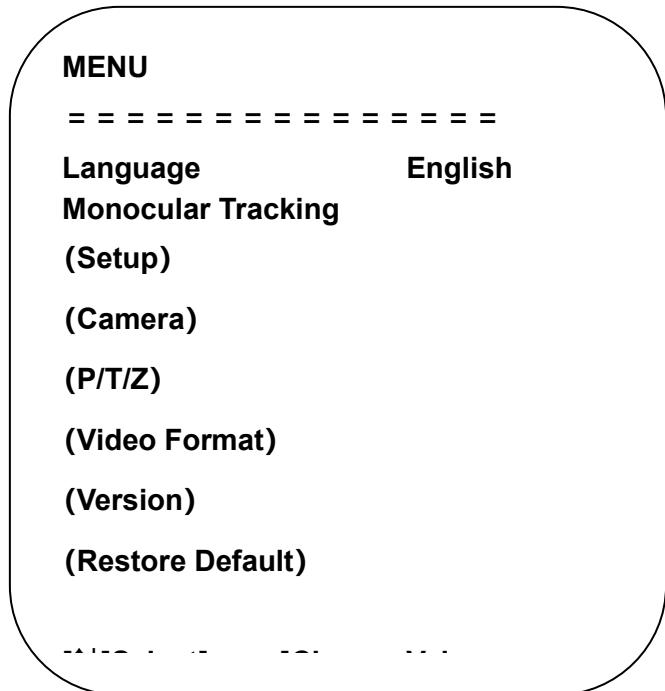

【*】 + 【#】 + 【F3】 :Camera Address No. 3

【*】 + 【#】 + 【F4】 :Camera Address No. 4

3.3 Menu Setting

3.3.1 Main Menu

In normal working mode, press 【MENU】 key to display the menu, using scroll arrow to point at or highlight the selected items.

Language: Chinese/English

Setting : Enter into submenu of system setting

P/T/Z : Enter into submenu of PTZ parameter **Version:** Enter into submenu of version

Restore Factory Default: Select Yes or No to restore factory default.

[↑↓]Select: Press [↑↓] to Select menu

[Menu]Return: Press [Menu] to return

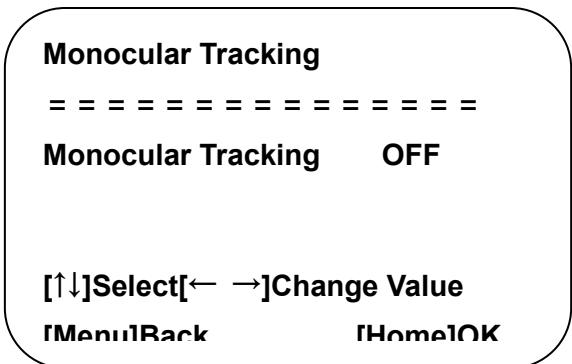

Monocular Tracking: Enter into submenu of system setting

Camera Parameter: Enter into submenu of camera parameter

[← →]Revise: Press [← →] to revise parameter

[Home]Confirm: Press [Home] to confirm

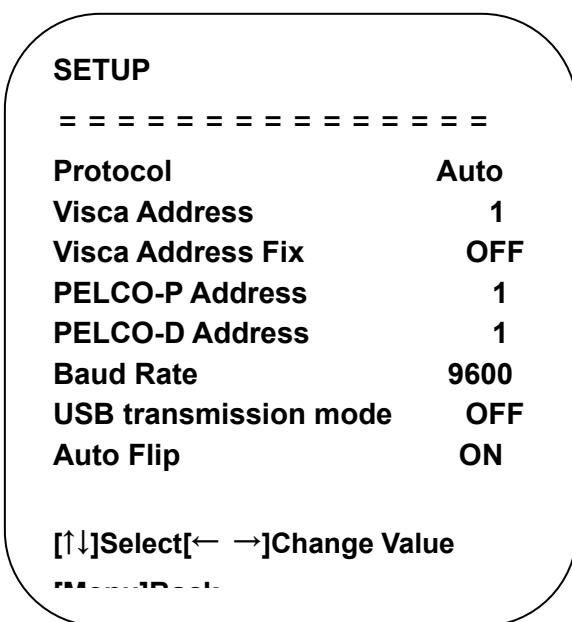

3.3.2 Monocular Tracking

Monocular Tracking: On/Off

3.3.3 System Setting

Move the pointer to the (Setup) in the Main Menu, click the 【HOME】 key and enter the (System Setting) as shown below. PELCO is not supported.

PROTOCOL: VISCA

Address: VISCA=1~7

Baud Rate:
2400/4800/**9600**/38400/115200

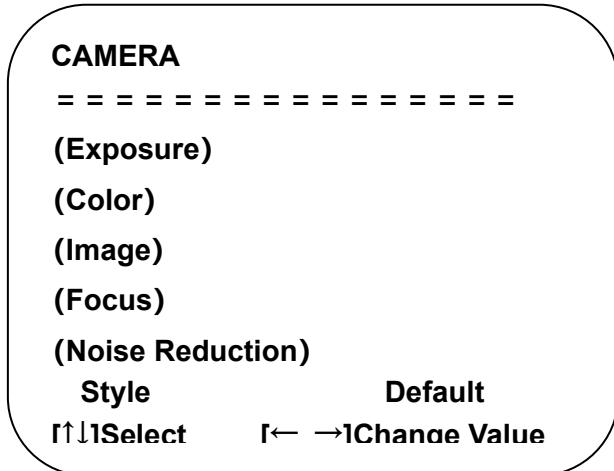

Visca Address Fix: On/Off

USB dual stream: On/Off

Auto Flip: On/Off

3.3.4 Camera Parameter Setting

Move the pointer to the (CAMERA) in the Main Menu, click the 【HOME】 key and enter the (CAMERA) as follow

Exposure: Enter into Exposure setting

Color: Enter into color setting

Image: Enter into image setting

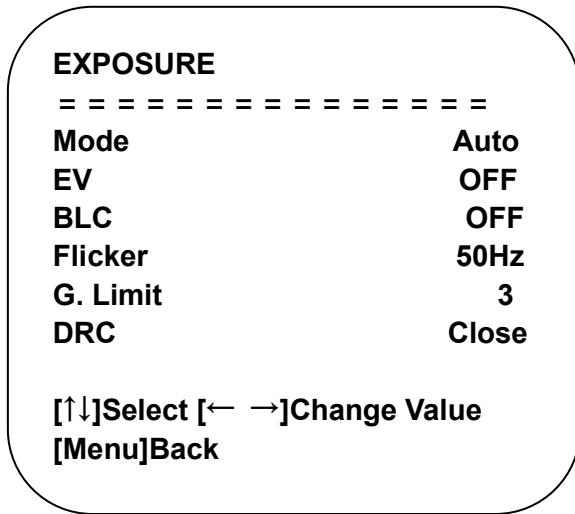

Focus: Enter into focus setting

Noise Reduction: Enter into noise reduction

Style: Default, standard, clear, bright, soft

1) Exposure

Move the pointer to the (EXPOSURE) in the Main Menu, click the 【HOME】 and enter the (EXPOSURE SET) as follow

Mode : Auto, Manual, Shutter priority, Iris priority and Brightness priority.

EV : On/Off (only available in auto mode)

Compensation Level: -7~7 (only available in auto mode when EV is ON)

BLC: ON/OFF for options (only available in auto mode)

Anti-Flicker: OFF/50Hz/60Hz for options (only available in Auto/Iris priority/Brightness priority modes)

Gain Limit: 0~15(only available in Auto/ Iris priority /Brightness priority mode)

Dynamic range: 1~8, off

Shutter Priority: 1/25, 1/30, 1/50, 1/60, 1/90, 1/100, 1/120, 1/180, 1/250, 1/350, 1/500, 1/1000, 1/2000, 1/3000, 1/4000, 1/6000, 1/10000, 1/20000 (only available in Manual and Shutter priority mode)

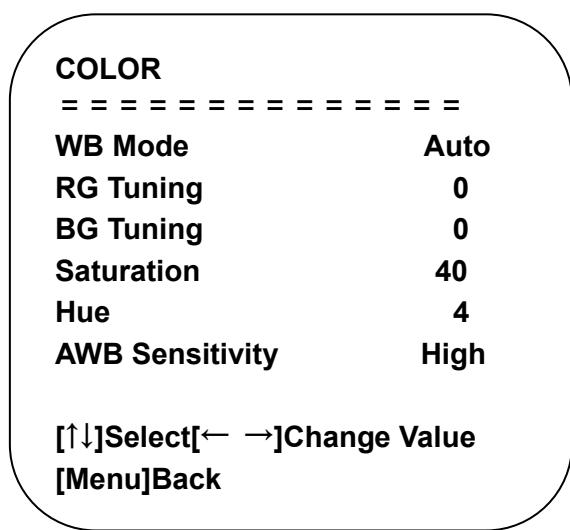

IRIS :Close,F11.0,F9.6,F8.0,F6.8,F5.6,F4.8,F4.0,F3.4,F2.8,F2.4,F2.0,F1.8(only available in Manual and Iris priority mode)

Brightness: 0~20 (only available in Brightness priority mode)

Gain: Set the size of the gain, 0 ~ 15 (Only available in manual mode and shutter priority mode)

2) Color

Move the pointer to the (COLOR) in the Main Menu, click the 【HOME】 and enter the (COLOR SET) as follow

WB Mode: Auto, Manual, One Push, Specified color temperature

Red Tuning: -10~10(only available in Auto mode)

Blue Tuning: -10~10(only available in Auto mode)

Red Gain: 0~100(only available in Manual mode)

Blue Gain: 0~100(only available in Manual mode)

Saturation: 0~127

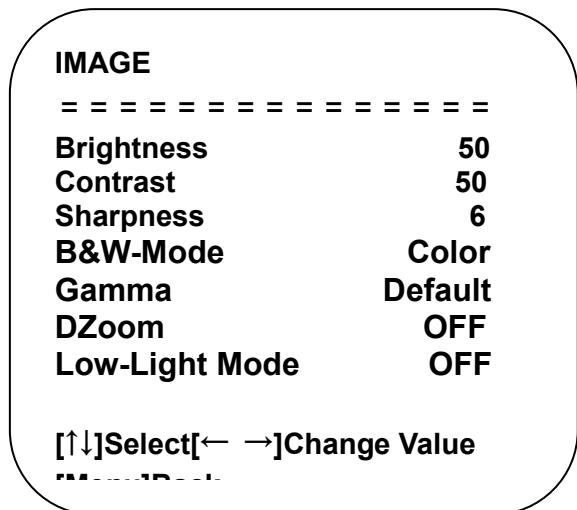

AWB Sensitivity: high/middle/low (only available in Auto mode)

Color temperature: 2400K-7100K (only valid at specified color temperature)

Chroma: 0~8

3) Image

Move the pointer to the (IMAGE) in the Menu, click the 【HOME】 and enter the (IMAGE) as follow

Brightness: 0~100

Contrast: 0~100

Sharpness: 0~15

Horizontal Flip: On/Off

Vertical Flip: On/Off

B&W Mode: Color, black/white

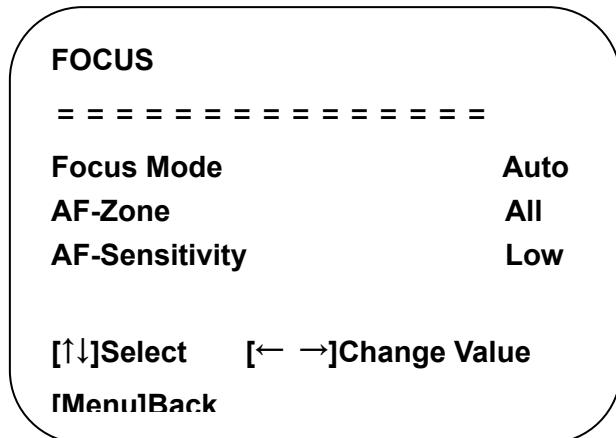

Gamma: Default, 0.45, 0.50, 0.55, 0.63

Digital Zoom: On/Off

Low-Light Mode: Close/Open

4) Focus

Move the pointer to the (FOCUS) in the Menu, click the 【HOME】 and enter the (FOCUS) as follow.

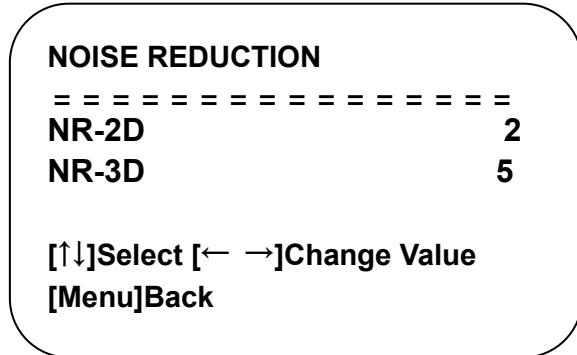

Focus Mode: Auto, manual, one push

AF-Zone: ALL/Top/Center/Bottom

AF-Sensitivity: High, middle, low

5) Noise Reduction

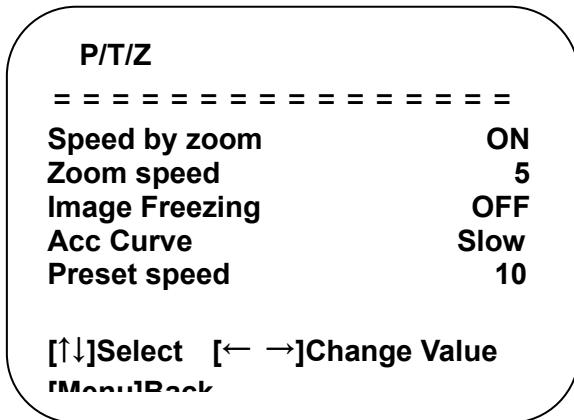

Move the pointer to the (NOISE REDUCTION) in the Menu, click the 【HOME】 and enter the (NOISE REDUCTION) as follow

Noise Reduction: OFF, 1~8

3.3.5 P/T/Z

Move the pointer to the (P/T/Z) in the Main Menu, click the 【HOME】 and enter the (P/T/Z) as follow

Speed by zoom: On/OFF – When settings is on and using the IR remote, the speed of the PTZ is determined by the field of view.

Zoom Speed: Set the zoom speed for IR remote controller and control commands.

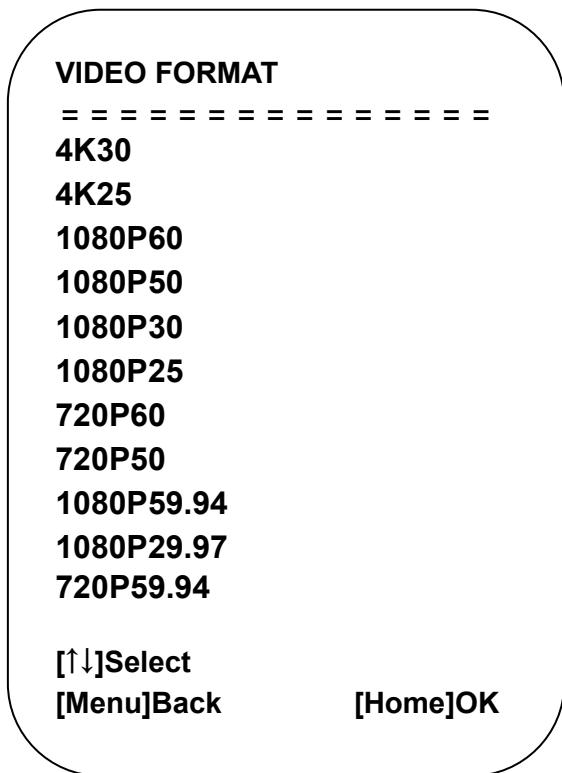

Image Freezing: On/OFF - Freezes the image during a preset recall.

Accelerating Curve: Fast/Slow

Preset Speed: 1-10

3.3.6 Video Format

Move the pointer to the (Video Format) in the Menu, click the 【HOME】 and enter the (Video Format) as follow

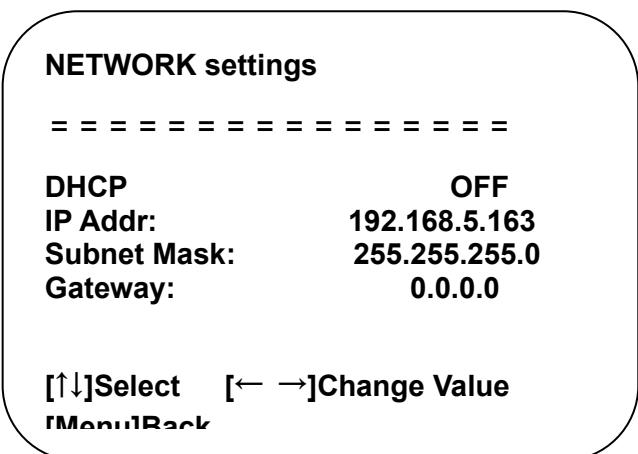

- Exit menu after modifying parameter to save it

3.3.7 NETWORK

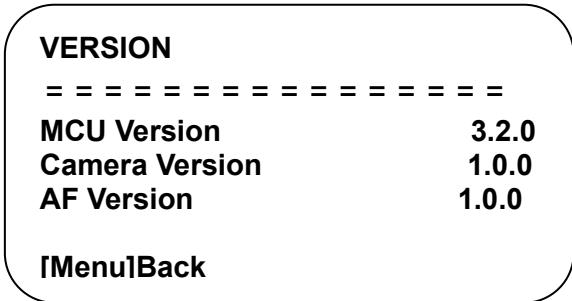

Move the pointer to (Network Settings) in the main menu and press the [HOME] key to enter the version page. The version information varies depending on the specific product.

Dynamic protocol: Set camera network DHCP, on/off

3.3.8 Version

Move the pointer to the (VERSION) in the Main Menu, click the 【HOME】 and enter the (VERSION) as follow

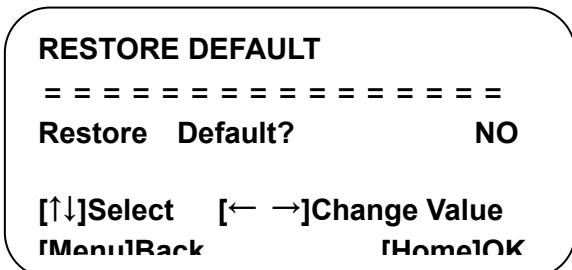

MCU Version: Display MCU version information

Camera Version: Display camera version information

AF Version: Display the focus version information

3.3.9 Restore Default

Move the pointer to the (VERSION) in the Main Menu, click the 【HOME】 and enter the (VERSION) as follow.

Restore default: Yes/No (after restoring default, the language, color, and video format won't be restored)

- If the address of former remoter is not 1 but another one from 2,3,4, the corresponding camera address will restore to 1 when all parameters or system parameters are restored. User should change the remoter address to be 1 (press No.1 according to the camera so to get normal operation)

4. Network Connection

4.1 Connection Method

Direct Connection: Direct connections via “cross-over” network cable

Connection to LAN: Connections to LAN via patch cable to LAN wall jack or LAN switch. The default camera IP is 192.168.5.163.

The computer must be on the same network segment as the camera. The camera's default IP address is 192.168.5.163.

- The computer IP address cannot be same as other computers or devices.

Click the “Start” and select “Operation” to input cmd, open DOS command window and input 192.168.5.26, then press Enter key. It will show picture as below, which means network segment has been successfully added.

```
C:\Users\Administrator>ping 192.168.5.26

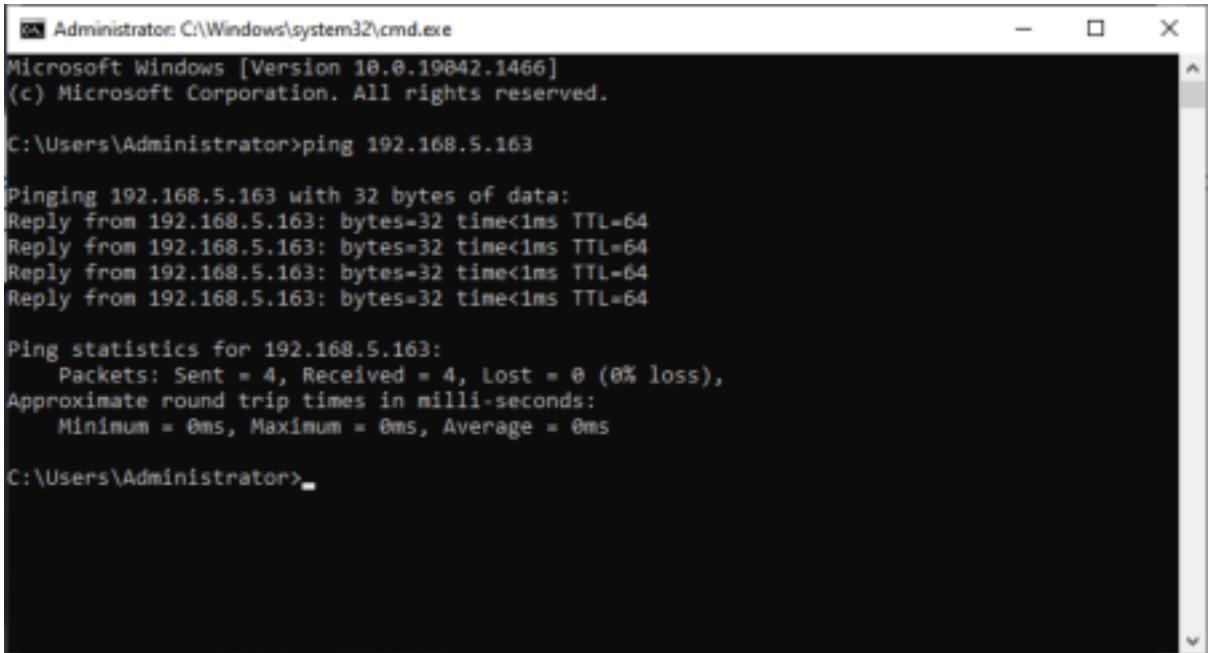

Pinging 192.168.5.26 with 32 bytes of data:
Reply from 192.168.5.26: bytes=32 time<1ms TTL=128

Ping statistics for 192.168.5.26:
    Packets: Sent = 4, Received = 4, Lost = 0 (0% loss),
    Approximate round trip times in milli-seconds:
        Minimum = 0ms, Maximum = 0ms, Average = 0ms

C:\Users\Administrator>
```

Figure 4-1 Network segment successfully added

User can also verify network connection as steps above mentioned after the finish of camera self-check. If IP is default, open DOS command window and input 192.168.5.163, then press Enter key. It will show message as below: which means network connection is normal.

```
Administrator: C:\Windows\system32\cmd.exe
Microsoft Windows [Version 10.0.19042.1466]
(c) Microsoft Corporation. All rights reserved.

C:\Users\Administrator>ping 192.168.5.163

Pinging 192.168.5.163 with 32 bytes of data:
Reply from 192.168.5.163: bytes=32 time<1ms TTL=64

Ping statistics for 192.168.5.163:
    Packets: Sent = 4, Received = 4, Lost = 0 (0% loss),
Approximate round trip times in milli-seconds:
    Minimum = 0ms, Maximum = 0ms, Average = 0ms

C:\Users\Administrator>
```

Figure 4-2Network Connection Screenshot

4.2 Camera Web Interface

4.2.1 Web Login

1) Web Login

After assigning an IP address to the camera, you can reach the Web Interface by typing in the camera's IP address into a web browser. You can login to the GUI as administrator or user. If as administrator, type in "admin" into the username and password fields. If as user, type in "user1" or "user2" into the username and password fields.

Note:

1. If login as "user", your rights are limited to preview, playback, and logout (No configuration right)
2. Browsers that support Web function are Google, IE, 360 and other popular browsers.

Language Selection: On the right top of the interface display “中文|English”, click “English”.

1) Login as administrator

Username and default password: admin

You can control all the features of the camera.

2) Login as user

Username and default password: "user1" or "user2"

You can control PTZ, zoom, focus, sound, zoom in, full screen and set run, and delete the preset position.

- There is no configuration permission for normal user login.

4.2.2 Preview

After successful login into the management interface, it enters the video preview interface. In the preview screen, users can control PTZ, zoom, focus, sound, zoom in, full screen and set the preset position, run, delete and other operations.

4.2.3 Monocular tracking

Clicking the Monocular tracking tab allows setting the Mode, turning on or off Tracking, and turning on or off click tracking.

- When tracking is on the PTZ and presets do not work.
-

I. Mode

- Presenter – This mode tracks the person while they are moving.
- Zone - This mode is used to create zones where the camera will stop tracking while the person is moving within the set zone.

II. How to set up Presenter auto-tracking

- Set preset 0 to the default area where the camera points to when it loses tracking.
- Set a preset for where tracking should start. This would typically be a podium position where the presenter is at.
- Before enabling tracking, recall the start preset. This way the camera is pointing at the presenter that wants to be tracked.
- Disable tracking when system is off.

III. How to set up Zone auto-tracking

- Set preset 0 to the default area where the camera points to when it loses tracking.
- Set up the regions. These are the areas on the stage where you want the camera to go to when a person walks into that area. The zones will capture the saved image.
- Set a preset for where tracking should start. This would typically be a podium position where the presenter is at.
- Before enabling tracking, recall the start preset. This way the camera is pointing at the presenter that wants to be tracked.
- Disable tracking when system is off.

4.2.4 Configuration

Click Configuration to enter the device parameters setting page.

Preview Monocular tracking Configuration Logout

The following options are available:

Table 4-1 Explanation of Camera Configuration

Menu	Explanation
Audio configuration	Including audio compression format, sampling frequency, sampling precision, compression bit rate and other settings
Video Configuration	Including video encoding, video parameters, character-overlapping, character size, video output settings etc.
Network Configuration	Including network port, Ethernet parameters, wireless network (only with wireless module), DNS parameters, GB28181 etc.
System Configuration	Including equipment property, system time, user management, version update, Reset, Reboot device settings etc.

4.2.5 Audio Configuration

The screenshot shows a web-based configuration interface for a device. At the top, there are tabs for 'Preview', 'Monocular tracking', 'Configuration' (which is highlighted in blue), and 'Logout'. On the left, a sidebar titled 'Configurations' lists several sections: 'Audio Configure' (selected), 'Video Configure' (with options like Video Encode, Stream Publish, RTP Multicast, Video Parameters, Video OSD, OSD Font Size, Video Out), 'Network Configure' (with options like Network Port, Ethernet, DNS, GB28181, SRT, RTSP), and 'System Configure' (with options like SysAfr, SysTime, SysUser, Update, Default, Reboot). The main content area is titled 'Audio Configure' and contains the following settings:

- Enable:** A checkbox that is checked.
- Encode Type:** A dropdown menu set to 'AAC'.
- Sample Rate:** A dropdown menu set to '48000'.
- Sample Bits:** A dropdown menu set to '16'.
- Bit Rate:** A dropdown menu set to '64Kbps'.
- Channel:** A dropdown menu set to 'Mono'.
- Input Volume:** A horizontal slider bar with a value of 8.

At the bottom right of the configuration panel is a blue 'Save' button with a disk icon.

Enable: Choose to enable the audio or not.

Compressing Format: Set audio compressing format and manually reboot the device after change (default AAC optional)

Sampling Frequency: Set sampling frequency and manually reboot the device after change (default 48000 option)Ms

Sampling Precision: Set sampling precision (default 16bits)

Compressing Code Rate: Set audio compressing code rate (default 64bits, 32, 48, 96, 128bits optional)

Channel Type: Set the channel type (mono by default, stereo optional)

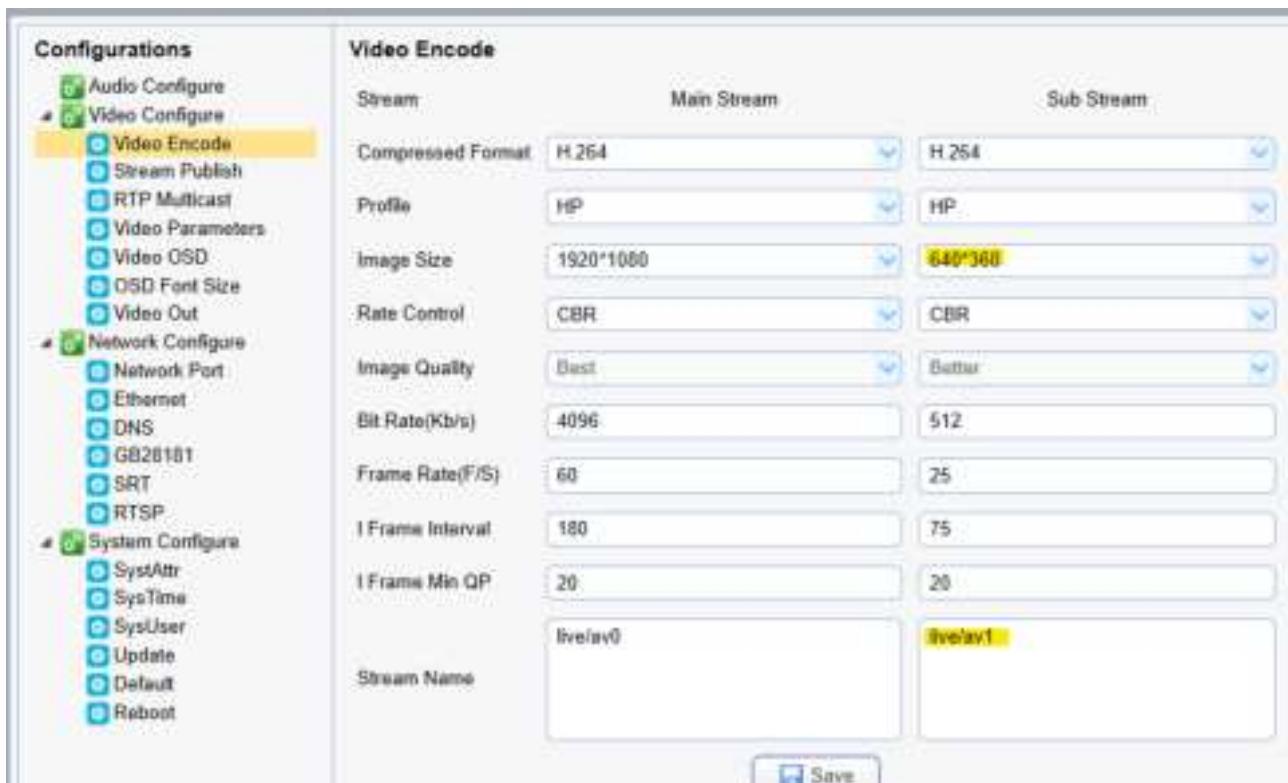

Input volume: set the input volume (default 4, 1-10 optional)

Note Click "SAVE", it will display "Successfully saved. Restart the device to take effect".

4.2.6 Video Configuration

1) Video Encoding

Video encoding can be used to stream to a touch panel using the Stream Name.

Compression Format: Set the video compression format, save to take effect (Main / Sub stream default: H.264,H.265 optional)

Profile: Profile Mode Setting (Default HP, BP, MP Optional)

Image Size: Set video image resolution, save to take effect

Main Stream: default 1920 * 1080, 1280 * 720, 640*480, 640*360

Sub Stream: 320*180, 320 * 240, 640*360, 640*480, 1280*720,1920*1080

Stream Rate Control: Set rate control mode as CBR (Constant Bitrate) or VBR (Variable Bitrate) save to take effect.

Image Quality: Set the image quality, this can only be changed when VBR is set.

Bit Rate (Kb / s): Set the video bit rate (Main stream default 4096Kb / s, 64-40960Kb/s optional; Sub stream default 512Kb/s, 64-40960Kb/s optional).

Frame rate (F / S): Set the video frame rate (Main stream default 30F / S / Sub stream default 25F / S, primary stream 5-60F/S optional, secondary stream 5-30F / S optional).

Key frame interval: Set the key frame interval (Main stream default 90 / Sub stream default 75, primary stream 1-150 optional. secondary stream 1-150 optional).

Minimum QP of key frame interval: Set minimum QP of key frame interval (Default 20, 10-51 optional)

Stream Name: Main Stream(live/av0), Sub stream(live/av1)

Click the "Save" button to display the "Parameter saved successfully" message, then settings take effect. Best to use live/av1 for streaming to touch panels at 640*360.

2) Stream Publish

Configurations <ul style="list-style-type: none"><input checked="" type="checkbox"/> Audio Configure<input checked="" type="checkbox"/> Video Configure<input checked="" type="checkbox"/> Video Encode<input checked="" type="checkbox"/> Stream Publish<input type="checkbox"/> RTP Multicast<input type="checkbox"/> Video Parameters<input type="checkbox"/> Video OSD<input type="checkbox"/> OSD Font Size<input type="checkbox"/> Video Out<input checked="" type="checkbox"/> Network Configure<ul style="list-style-type: none"><input type="checkbox"/> Network Port<input type="checkbox"/> Ethernet<input type="checkbox"/> DNS<input type="checkbox"/> GB28181<input type="checkbox"/> SRT<input type="checkbox"/> RTSP<input checked="" type="checkbox"/> System Configure<ul style="list-style-type: none"><input type="checkbox"/> SystAttr<input type="checkbox"/> SysTime<input type="checkbox"/> SysUser<input type="checkbox"/> Update<input type="checkbox"/> Default<input type="checkbox"/> Reboot	Stream Publish <table border="1"><tr><td>Stream</td><td>Main Stream</td><td>Sub Stream</td></tr><tr><td>Enable</td><td><input type="checkbox"/></td><td><input type="checkbox"/></td></tr><tr><td>Protocol Type</td><td>RTMP</td><td>RTMP</td></tr><tr><td>Host Address</td><td>192.168.5.11</td><td>192.168.5.11</td></tr><tr><td>Host Port</td><td>1935</td><td>1935</td></tr><tr><td>Stream Name</td><td>live/av0</td><td>live/av1</td></tr><tr><td>Username</td><td></td><td></td></tr><tr><td>Password</td><td></td><td></td></tr><tr><td>Password for stream encryption</td><td></td><td></td></tr><tr><td>Crypto key length in bytes</td><td>0</td><td>0</td></tr></table>	Stream	Main Stream	Sub Stream	Enable	<input type="checkbox"/>	<input type="checkbox"/>	Protocol Type	RTMP	RTMP	Host Address	192.168.5.11	192.168.5.11	Host Port	1935	1935	Stream Name	live/av0	live/av1	Username			Password			Password for stream encryption			Crypto key length in bytes	0	0
Stream	Main Stream	Sub Stream																													
Enable	<input type="checkbox"/>	<input type="checkbox"/>																													
Protocol Type	RTMP	RTMP																													
Host Address	192.168.5.11	192.168.5.11																													
Host Port	1935	1935																													
Stream Name	live/av0	live/av1																													
Username																															
Password																															
Password for stream encryption																															
Crypto key length in bytes	0	0																													

Enable: To turn on/off the main / Sub stream.

Protocol: Main / Sub stream applies RTMP protocol, RTSP, SRT

Host Address: server IP addresses (default 192.168.5.11)

Host Port: server port number (default 1935, 0-65535 optional)

Stream Name: choose a different stream name (live / av0,live / av1 optional).

User: Set the username.

Password: Set the password.

Click on the "Save" button to display the "Save successful" message, then settings take effect.

3) RTP Multicast

Stream	Main Stream	Sub Stream
Enable	<input type="checkbox"/>	<input type="checkbox"/>
Protocol Type	RTP	RTP
Address	224.1.2.3	224.1.2.3
Port	4000	4002
Access Method	rtp://224.1.2.3:4000	

Enable: On/Off

Protocol: RTP, TS optional

Address: Default 224.1.2.3. It can be edited.

Port: The Main stream defaults to 4000, the Sub stream defaults to 4002, and the main/Sub stream is optional from 0 to 65535.

Access Method: Address comes up after setting. Eg; rtp://224.1.2.3:4000;

4) Video Parameters

The screenshot shows a software interface for configuring video parameters. On the left, a tree view under 'Configurations' includes 'Audio Configure', 'Video Configure' (selected), 'Video Encode', 'Stream Publish', 'RTP Multicast', 'Video Parameters' (highlighted in yellow), 'Video OSD', 'OSD Font Size', 'Video Out', 'Network Configure', 'Network Port', 'Ethernet', 'DNS', 'GB28181', 'SRT', 'RTSP', and 'System Configure' (which further includes 'SystAttr', 'SysTime', 'SysUser', 'Update', 'Default', and 'Reboot'). The right side is titled 'Video Parameters' and contains tabs for Focus, Exposure, Color, Image, NR, and Style, along with a 'Refresh' button. Below these tabs are dropdown menus for Focus Mode (Auto), AF-Zone (All), and AF-Sensitivity (Low). A note at the bottom says 'Click the "Refresh" button to refresh parameter.'

A) Focus: Focus Mode, AF-Zone, AF-Sensitivity can be set.

Focus Mode: Set the focus mode (Default automatic, manual optional, one-push)

AF-Zone: Set the focus tactic (Default Up, middle, Down, and all are optional)

AF-Sensitivity: Set the focus sensitivity (Default is low, high, medium optional)

B) Exposure: Exposure Mode, EV (Exposure compensation), BLC (Backlight compensation), Flicker, G Limit (Gain Limit), shutter, aperture, brightness, gain can be set.

Mode: Set the exposure mode (Default automatic, manual, shutter priority, aperture priority, brightness priority optional)

EV: Exposure compensation setting is active when it is auto status (default is off).

EV Level: Set the exposure compensation value, valid when Exposure Compensation is on (default 0,-7 to 7 optional).

BLC: Set back light compensation, valid when it is auto status (default is off).

Flicker: Set anti-flicker compensation, valid in automatic exposure mode, iris priority, and brightness priority. (default 50Hz, off, **60Hz** optional). Set to the country's line rate.

G Limit: Set the gain limits, valid in auto focus, iris priority, and brightness priority. (default 4, off, 0~15 optional)

Dynamic Range: Set the dynamic range (default: off, 1 to 8 optional).

C) Color: WB Mode (White balance), RG Tuning (red gain), BG (blue gain), Saturation, Hue, AWB Sensitivity (white balance).

WB Mode: Set the white balance mode (Default automatic, manual, one-push white balance, specified color temperature optional). Note: Right click the "Correction" button when selected the One-push white balance mode.

RG Tuning: Set the red gain, valid in manual white balance mode (default 45, 0-100 optional).

BG Tuning: Sets the Blue gain, valid in manual white balance mode (default 45, 0-100 optional).

Saturation: Set the saturation (default 40, 0-127 optional).

Hue: Set the color Hue (default 4, 0-8 optional).

AWB Sensitivity: Auto white balance Sensitivity settings (default is high, low and medium optional).

D) Image: You can be set to adjust brightness, contrast, sharpness, gamma curve, black-and-white mode, horizontal flip, vertical flip, digital zoom, and ultra-low light mode.

Bright: Set the brightness (default 50, 0-100 optional).

Contrast: Set the contrast (default 50, 0-100 optional).

Sharpness: Set the sharpness value (default 6, 0-15 optional).

Gamma: Gamma value setting (default 0.45, 0.50, 0.55, 0.63 optional).

B&W Mode: Set black and white mode (default color, black and white optional)

Auto Flip: Set image flip (default on)

DZoom: Set electronic zoom (default off). Do not use it for auto-tracking.

Low-Light Mode: Set ultra low illumination (default off)

E) Noise Reduction: 2D&3D noise reduction and dynamic dead pixel correction available.

2D Noise Reduction: Set 2D noise reduction level (default 2, 1-7 and off optional).

3D Noise Reduction: Set 3D noise reduction level (default 5, 1-7 and off optional).

F) Style: Select image (Default, standard, brightness, clarity, and soft can be set)

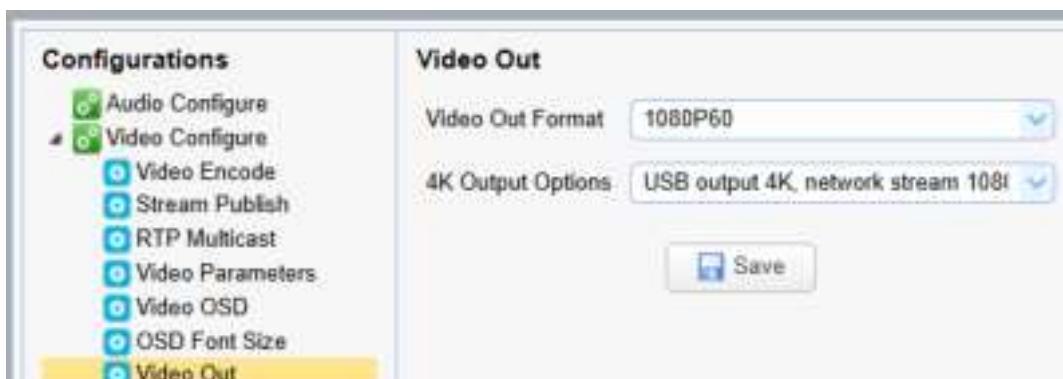

- Refresh the page after changing above parameters in a, b, c, d, e, f to take effect.

5) Video OSD (Not Supported)

6) OSD Font Size (Not Supported)

7) Video Output

Output Format: Selectable video output formats include 3840*2160P30, 3840*2160P25, 1080P60, 1080P50, 1080P30, 1080P25, 720P60, 720P50, 1080P59.94, 1080P29.97, and 720P59.94.

4K output options: Set USB output 4K, network stream 1080P, network stream output 4K, USB1080P optional

Click the "Save" button. A prompt message "(4K output options will take effect after restart)" will appear. The device will automatically restart, and the settings will be applied.

4.2.7 Network Configuration

1) Network Port

Configurations <ul style="list-style-type: none"><input checked="" type="checkbox"/> Audio Configure<input checked="" type="checkbox"/> Video Configure<ul style="list-style-type: none"><input checked="" type="checkbox"/> Video Encode<input checked="" type="checkbox"/> Stream Publish<input checked="" type="checkbox"/> RTP Multicast<input checked="" type="checkbox"/> Video Parameters<input checked="" type="checkbox"/> Video OSD<input checked="" type="checkbox"/> OSD Font Size<input checked="" type="checkbox"/> Video Out<input checked="" type="checkbox"/> Network Configure<ul style="list-style-type: none"><input checked="" type="checkbox"/> Network Port<input checked="" type="checkbox"/> Ethernet<input checked="" type="checkbox"/> DNS<input checked="" type="checkbox"/> GB28181<input checked="" type="checkbox"/> SRT<input checked="" type="checkbox"/> RTSP<input checked="" type="checkbox"/> System Configure<ul style="list-style-type: none"><input checked="" type="checkbox"/> SystAttr<input checked="" type="checkbox"/> SysTime	Network Port <table border="1"><tr><td>Port Data</td><td>3000</td></tr><tr><td>Port Web</td><td>80</td></tr><tr><td>Port Onvif</td><td>2000</td></tr><tr><td>Port Soap</td><td>1936</td></tr><tr><td>Port RTMP</td><td>1935</td></tr><tr><td>Port Rtsp</td><td>554</td></tr><tr><td>Port Visca</td><td>1259</td></tr><tr><td>Port Https</td><td>443</td></tr><tr><td>Port WebSocket</td><td>8088</td></tr></table> <p><input type="button" value="Save"/></p>	Port Data	3000	Port Web	80	Port Onvif	2000	Port Soap	1936	Port RTMP	1935	Port Rtsp	554	Port Visca	1259	Port Https	443	Port WebSocket	8088

Port RTMP	1935																		
Port Rtsp	554																		
Port Visca	1259																		
Port Https	443																		
Port WebSocket	8088																		

Port Data: set the data port. (default 3000,0-65535 optional).

Port Web: Set Web port. (default is 80, 0-65535 is optional).

Port Onvif: Set Onvif port. (default 2000, 0-65535 optional).

Port Soap: Set Soap port. (default 1936, 0-65535 optional).

Port RTMP: Set RTMP port. (default 1935, 0-65535 optional).

RTSP Port: Set RTSP port. (default 554,0-65535 optional).

Port Visca: Set Visca port. (default 1259,0-65535 optional).

Port Https: Set https port. (default 443, 0-65535 optional).

Port WebSocket: Set Web Socket port. (default 8088, 0-65535 optional).

Click on the "Save" button, it will be valid when display "Save successful". **Power cycle or reboot the camera.**

RTSP access: RTSP: // equipment IP address: 554/live/av0 (av0 main stream; av1 second stream)

RTMP Access: Rtmp://equipment IP address: 1935/live/av0 (av0 main stream; av1 second stream)

2) Ethernet Parameter

Configurations <ul style="list-style-type: none"><input checked="" type="checkbox"/> Audio Configure<input checked="" type="checkbox"/> Video Configure<ul style="list-style-type: none"><input checked="" type="checkbox"/> Video Encode<input checked="" type="checkbox"/> Stream Publish<input checked="" type="checkbox"/> RTP Multicast<input checked="" type="checkbox"/> Video Parameters<input checked="" type="checkbox"/> Video OSD<input checked="" type="checkbox"/> OSD Font Size<input checked="" type="checkbox"/> Video Out<input checked="" type="checkbox"/> Network Configure<ul style="list-style-type: none"><input checked="" type="checkbox"/> Network Port<input checked="" type="checkbox"/> Ethernet	Ethernet <table border="1"><tr><td>DHCP</td><td><input checked="" type="checkbox"/></td></tr><tr><td>IP Address</td><td>192.168.10.121</td></tr><tr><td>Subnet Mask</td><td>255.255.255.0</td></tr><tr><td>Default Gateway</td><td>192.168.10.1</td></tr><tr><td>MAC Address</td><td>E4:77:D4:AE:83:6D</td></tr></table> <p><input type="button" value="Save"/></p>	DHCP	<input checked="" type="checkbox"/>	IP Address	192.168.10.121	Subnet Mask	255.255.255.0	Default Gateway	192.168.10.1	MAC Address	E4:77:D4:AE:83:6D
DHCP	<input checked="" type="checkbox"/>										
IP Address	192.168.10.121										
Subnet Mask	255.255.255.0										
Default Gateway	192.168.10.1										
MAC Address	E4:77:D4:AE:83:6D										

DHCP: Enable or disable to obtain IP automatically. (default off)

IP Address: Set the IP address. (default 192.168.5.163).

Note: This IP address is the same used to login to Web page.

Subnet Mask: Set the subnet mask (default 255.255.255.0).

Default Gateway: Set the default gateway (default 0.0.0.0).

MAC Address: Set the physical address (the parameter is read-only)

Click the "Save" button, it will be valid when display "Save successful". (Note: To prevent IP conflicts when modified). **Power cycle or reboot the camera.**

3) DNS parameters

Preferred DNS Server: Set the preferred DNS server. (Default 0.0.0.0).

Alternate DNS Server: Set alternate DNS server. (Default 0.0.0.0).

Click the "Save" button, it will be valid when display "Save successful".

4) GB28181

Switch: Set whether to activate GB28181.

Time Synchronization: Enable/Disable time synchronization

Stream Type: Set stream type (default main stream, secondary stream optional)

Signing Time (in seconds): 3600, range 5-65535

Heartbeat Time (seconds): 60, range 1-65535

Register ID: 34020000001320000001

Register User Name: IPC

Register Password: 12345678

Equipment Ownership: Users can add their own

Administrative Regions: Users can add their own

Alarm Zone: Users can add their own

Equipment Installation Address: Users can add their own

Local SIP Port: 5060 Range 0-65535

GB28181 Server Address: IP address of the computer

Server SIP Port: 5060 Range 0-65535

Server ID: 34020000002000000001

Click on the "Save" button, it will be valid when display "Save successful".

5) SRT (Secure Reliable Transport)

SRT Port: Set the SRT port (default 9000, 0-65535 optional)

SRT Password: Set SRT password

SRT Password Length: Set the SRT password length (default 0, 16, 24, 32 optional)

Click the "Save" button, and the prompt message "Parameters saved successfully! It will take effect after restarting!"

7) RTSP

Enable RTSP: Enable/Disable RTSP

RTSP Authentication: Set RTSP authentication, default off, on optional

Click the "Save" button, and the prompt message "Save successfully! Modify RTSP authentication parameters will take effect after restarting the device!" will be displayed. After setting, restart the camera to take effect.

4.2.8 System Configuration

1) System Attributes

Device Name: Set the device name (Default Camera1, user can add their own).

Device ID: Set the device ID (default 1, read-only).

System Language: Set the system language (default Simplified English, Chinese optional).

Click on the "Save" button, it will be valid when display "Save successful".

2) System Time

Date Format: Set the date format (YYYY-MM-DD default Year - Month - Day, MM-DD-YYYY namely Month - Day - Year, DD-MM-YYYY namely Date- Month - Year Optional).

Date Separator: set the date separator (default '/' , '.' , '-' Optional).

Time Zone: Set the time zone (default UTC+08:00, other time zones optional).

Time Type: Set the time types (default 24 hours, optional 12 hours).

Enable NTP: Enable/disable NTP

Update Interval: Set the NTP server automatic updated time interval. Valid after setting NTP server synchronization (default one day, 2-10 days Optional).

NTP Server Address or Domain Name: Set NTP server address or domain name (default time.nits.gov). Valid after setting NTP server synchronization.

NTP Server Port: Sets the NTP server port (default 123).Valid after setting NTP server synchronization.

Click on the "Save" button, it will be valid when display "Save successful".

Time setting: set time mode (optional synchronization with computer time, synchronization with NTP server, manual setting)

Computer time: Display the computer time (only when the time setting method is synchronized with the computer time), click the "Synchronize" button

Manual time setting: Click the calendar icon on the right to manually set the time (only the time setting method is manual setting)

3) System User

Authority: Set the user type (the default administrator, User 1, User 2 optional)

Username: Set the user name (Select User Administrator default admin; select a common user1 default user1; to select a common user 2 default user2; user can modify their own)

Password: Set a password (Select User Administrator default admin; select a common user1 default user1; to select a common user 2 default user2; user can modify their own).

Confirm Password: Confirm the input passwords are the same or not.

Click on the "Save" button, it will be valid when display "Save successful".

Please note the capitalization of user name and password

- If you log in to the webpage with the username and password of an ordinary user, you have no configuration rights and can only perform preview, playback, and logout operations.
-

4) Update

The version information displayed on the page is read-only version and cannot be modified by the user. It is the same as the version information in the menu. The version information of different device models is different.

Update File: Click "Browse..." in the pop-up window and select the upgrade file; click the "Upgrade" button, the upgrade dialog box will pop up. After successfully update, device will automatically reboot. (Note: Make sure that the device power and network can work during update, if not, the upgrade will fail.)

- After the version upgrade is completed, you need to restore the factory default values
 - a, restore the factory default through web configuration;
 - b, restore the factory default value through the menu;
 - c, remote control shortcut key *#6 restore factory default;

Choose one of the above three methods, in which the IP account and password of "method a" are also restored to the default.

5) Restore Factory Setting

Click "Restore Factory Defaults" button and choose "yes" or "no" on pop-up window, then the device will restart automatically and restore factory setting.

6) Reboot

Click "Reboot" button and choose "yes" or "no" on the pop-up window, then the device will restart automatically.

4.2.9 Logout

Click "Logout"; and select "Yes" or "No" on pop-up window. If choose "Yes", you will exit the current page and return to the user login interface again.

5. Serial Port Communication Control

Camera control can be through RS232 or the LAN port on the receiver. The parameter of RS232 is as below:

Baud rate: 2400/4800/**9600**/38400/115200/second

Start Bit: 1 bit;

Data Bit: 8 bit;

Stop Bit: 1 bit;

Verification Bit: None.

LAN: TCP/IP port 1259

After a power on, the camera performs a calibration self-test of the lens.

The zoom lens is pulled to the farthest position, and then pulled back, after the self-test is completed.

If the camera has saved preset number 0, the camera will be set to preset position 0 after the initialization is completed.

Allow about 10 seconds before sending control commands.

VISCA Protocol List

Note: There is no need to use the AddressSet and IF_Clear commands. The camera is always set to device address 81.

5.1.1 Camera Return Command

Ack/Completion Message		
	Command packet	Remark
ACK	z0 41 FF	Returned when the command is accepted.
Completion	z0 51 FF	Returned when the command has been executed.

$z = \text{device address} + 8 = 81$

Error Messages		
	Command packet	Remark
Syntax Error	z0 60 02 FF	Returned when the command format is different or when a command with illegal command parameters is accepted.
Command Buffer Full	z0 60 03 FF	Indicates that two sockets are already being used(executing two commands) and the command could not be accepted when received.
Command Canceled	z0 6y 04 FF(y: Socket No.)	Returned when a command which is being executed in a socket specified by the cancel command is canceled. The completion message for the command is not returned.
No Socket	z0 6y 05 FF(y: Socket No.)	Returned when no command is executed in a socket specified by the cancel command, or when an invalid socket number is specified.
Command Not Executable	z0 6y 41 FF(y: Execution command Socket No. Inquiry command: 0)	Returned when a command cannot be executed due to current conditions. For example, when commands controlling the focus manually are received during auto focus.

6. Maintenance and Troubleshooting

6.1 Camera Maintenance

- 1) If the camera will not be used for a long time, please remove power.
- 2) Use a soft cloth or lotion-free tissue to clean the camera body.
- 3) Use a soft dry lint-free cloth to clean the lens. If the camera is very dirty, clean it with a diluted neutral detergent. Do not use any type of solvent or harsh detergent, which may damage the surface.

6.2 Troubleshooting

● No image

1. Check whether the power cord is connected, voltage is OK, POWER lamp is lit.
2. Check whether the camera can “self-test” after startup (camera will do a brief pan-tilt tour and return to the home position, or if preset 0 is set, the camera will return to the preset 0 position).
3. Check whether the video output and video display cable are normal

● Abnormal display of image

1. Check whether the video output cable or video display is normal

● Image dithering when zoom-in or zoom-out

1. Check whether the camera installation position is solid
2. Check whether there is shaking machine or objects around the camera

● Remote controller does not work

1. Remote control address is set to 1 (if the machine is set back to the factory defaults, remote control addresses need to be back to 1 too)

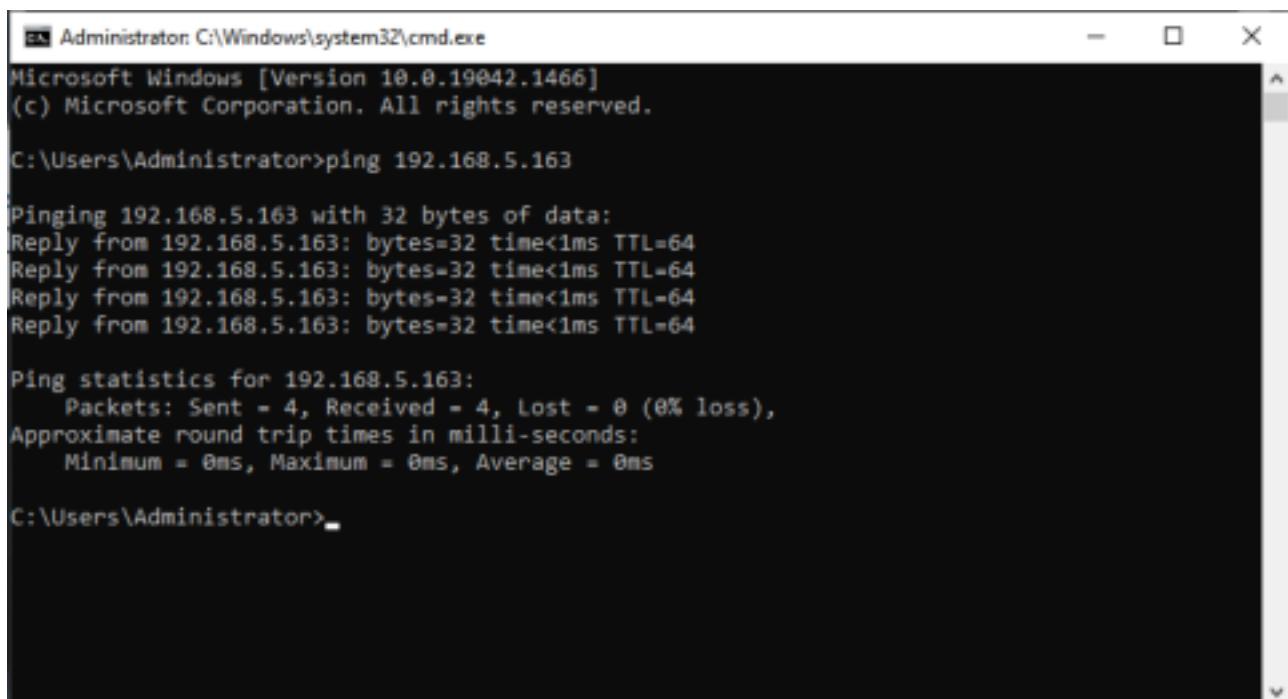

2. Check whether the battery is installed in the remote controller, and it is good.
3. Check that the menu whether it is closed, camera control through remote controller is only available after exiting the menu.

● **Serial port does not work**

1. Check whether the camera serial device protocol, baud rate, address is consistent
2. Check whether the control cable is connected properly

● **Cannot login to Web pages**

1. Check whether the camera is showing normally.
2. Check whether the network cable is connected properly (Ethernet port yellow light flashes to indicate normal network cable connection)
3. Check whether your computer and camera are on the same network and IP range.
4. Click "Start" and select "Run" and then type "cmd" in the computer; Click "OK" then turn on a DOS command window to enter ping 192.168.5.163. Press the Enter key to appear message as follows: Description network connection is normal.
