MACALLY

RECHARGEABLE BLUETOOTH MOUSE FOR 3 DEVICES

User guide

USER GUIDE

Thank you for purchasing the Macally Bluetooth mouse. The mouse is a rechargeable Bluetooth wireless optical mouse with a 800/1200/1600 DPI switch button, two soft-click buttons and scroll wheel/button for a precise and smooth control. The ergonomic and ambidextrous design offers maximum comfort to both left-handed and right-handed users and helps to increase productivity. The 300mAh built-in rechargeable battery will power the mouse for up to 2 months before next charging is required.* No need to buy and replace batteries anymore! The Macally Bluetooth mouse works with Mac, PC, iOS/iPadOS and Android, and doesn't require any driver.

Hardware basics

Channel status LED Note: 1, quick flash - in pairing mode either the first time or BT button is pressed for 3 seconds; 2, slow flash - waiting to connect to the previously paired device; 3, off - connect to device and work normally, or time out in searching/connecting. When all 3 LEDs are off, press the BT button briefly to switch the channel.

Installation instructions

The Macally Bluetooth mouse only requires a computer or a mobile device with Bluetooth host. After following the steps below you are ready to go! You can set up and use one device in one channel, two or all three channels to use more devices. To switch between devices, just press the BT push button in the mouse, it is really quick and easy.

Bluetooth-pairing the mouse with Mac

1. To connect the mouse to your Mac computer by Bluetooth, bring it within 1 ft/25 cm range from your computer.

2. Then, turn on the mouse, press the BT push button
briefly to select an unused channel B1, B2 or B3, then you will see its LED flashes quickly to indicate pairing mode.

3. Click your Mac Bluetooth icon then Bluetooth Settings, ensure Bluetooth is turned on and searching Nearby Devices.

4. Macally Bluetooth x3 Mouse will appear, please select it and click on "Connect".

5. After the mouse is paired with the Mac computer. You are ready to use the mouse.

Bluetooth-pairing the mouse with Windows PC

1. To connect the mouse to your computer by Bluetooth, bring it within 1 ft/25 cm range from your computer.

2. In your Windows Settings, go to 'Devices and Printers' and select 'Bluetooth Devices'. Make sure Bluetooth is On.

3. Then, turn on the mouse, press the BT push button
briefly to select an unused channel B1, B2 or B3, then you will see its LED flashes quickly to indicate pairing mode.

4. Click 'Add a device' at the top left corner.

5. Macally Bluetooth x3 Mouse will appear, please select it and press 'Next'.

Bluetooth-pairing the mouse with iPad and iPhone

1. To connect the Bluetooth mouse to your iPad or iPhone, bring them together within 1ft range.

2. Then turn on the mouse, press the BT push button
briefly to select an unused channel B1, B2 or B3, then you will see its LED flashes quickly to indicate pairing mode.

3. In your iPad or iPhone, go to Settings, select Accessibility, tap on Touch, set AssistiveTouch to on; In AssistiveTouch menu, tap Devices under POINTER DEVICES, tap on Bluetooth Devices, it starts searching a new Bluetooth mouse.

4. Once Bluetooth mouse is discovered, select it from the list, iPad or iPhone will prompt to request

5. Once Bluetooth mouse appears as "Connected", you are ready to go. A circular pointer cursor will appear on your iPad or iPhone screen, you can move the circular cursor on the screen, do left and right click, and scroll pages with scroll wheel, everything just like what you normally do with a regular mouse.

Bluetooth-pairing the mouse with Android device

1. To connect the Bluetooth mouse to your Android device, bring them together within 1ft range.

2. Then turn on the mouse, press the BT push button briefly to select an unused channel B1, B2 or B3, then you will see its LED flashes quickly to indicate pairing mode.

3. In your Android device, go to Settings, select Connected devices, make sure Bluetooth is on, tap to open Bluetooth, tap on Pair new devices, and tap to select the discovered Bluetooth mouse to pair.

4. Once the Bluetooth mouse appears Connected in the list, you are ready to use the mouse.

The standard button functions are as follows:

• Left button: Set as left click, single and double clicks
• Right button: Set as right click or menu button
• Scroll wheel: Scroll speed is set as medium
• DPI button: Press the DPI button to change the sensor resolution (800/1200/1600 DPI) and set the tracking speed and precision to your preference.

Important notes
• Macally Bluetooth Mouse will go to sleep mode if it is not in use (or inactive) for 2 hours. When it is disconnected from the device, you can click on the mouse button to wake it up and reconnect it to the device.
• Battery life may vary depending on user and computing conditions.
