Elektor is part of EIM, the world's leading source of essential technical information and electronics products for pro engineers, electronics designers, and the companies seeking to engage them. Each day, our international team develops and delivers high-quality content - via a variety of media channels (including magazines, video, digital media, and social media) in several languages - relating to electronics design and DIY electronics. www.elektormagazine.com

Contents

Preface	9
Chapter 1 • The Arduino Uno Development Kit	10
1.1 Overview	10
1.2 The Arduino Uno Experimenting Kit	10
1.3 The Arduino Uno development board	13
Chapter 2 • The Integrated Development Environment (IDE)	17
2.1 Overview	17
2.2 Installing the Arduino IDE	17
2.3 Software-only experiments	20
2.3.1 Example 1: Sum of integer numbers	20
2.3.2 Example 2: Table of squares	23
2.3.3 Example 3: Area of a cylinder	24
2.3.4 Example 4: Centigrade to Fahrenheit conversion	26
2.3.5 Example 5: Times table	27
2.3.6 Example 6: Table of trigonometric sine	29
2.3.7 Example 7: Table of trigonometric sine, cosine, and tangent	30
2.3.8 Example 8: Integer calculator	32
2.3.9 Example 9: Dice	34
2.3.10 Example 10: Floating-point calculator	35
2.3.11 Example 11: Binary, octal, hexadecimal	38
2.3.12 Example 12: String functions	39
2.3.13 Example 13 – Initializing an array	41
2.3.14 Example 14: Character functions	42
2.3.15 Example 15: Solution of a quadratic equation	44
2.3.16 Example 16: Lucky day of the week	47
Chapter 3 • Hardware Projects with LEDs	49
3.1 Overview	49
3.2 Project 1: Blinking LED – using the onboard LED	49
3.3 Project 2: Blinking LED – using an external LED	50
3.4 Project 3: LED flashing SOS	53

3.5	Project 4: Alternately-blinking LEDs.....	54
3.6	Project 5: Chasing LEDs.....	56
3.7	Project 6: Chasing LEDs 2.....	59
3.8	Project 7: Binary counting LEDs.....	60
3.9	Project 8: Random flashing LEDs – Christmas lights	63
3.10	Project 9: Button controlled LED.....	64
3.11	Project 10: Controlling the LED flashing rate – external interrupts	68
3.12	Project 11: Reaction timer	72
3.13	Project 12: LED color wand	73
3.14	Project 13: RGB fixed colors.....	76
3.15	Project 14: Traffic lights	77
3.16	Project 15: Traffic lights with pedestrian crossings.....	83
3.17	Project 16: Using the 74HC595 shift register – binary up counter.....	88
3.18	Project 17: Using the 74HC595 shift register – randomly flashing 8 LEDs	91
3.18	Project 18: Using the 74HC595 shift register – chasing LEDs.....	92
3.19	Project 19: Using the 74HC595 shift register – turn ON a specified LED	93
3.20	Project 20: Using the 74HC595 shift register – turn ON specified LEDs.....	95
Chapter 4 • 7-Segment LED Displays		97
4.1	Overview	97
4.2	7-Segment LED display structure	97
4.3	Project 1: 7-Segment 1-digit LED counter	98
4.4	Project 2: 7-Segment 4-digit multiplexed LED display	102
4.5	Project 3: 7-Segment 4-digit multiplexed LED display counter – timer interrupts	107
4.6	Project 4: 7-Segment 4-digit multiplexed LED display counter – eliminating the leading zeroes	112
4.7	Project 5: 7-Segment 4-digit multiplexed LED display – reaction timer	115
4.8	Project 6: Timer interrupt blinking onboard LED	120
Chapter 5 • Liquid Crystal Displays (LCDs)		122
5.1	Overview	122
5.2	The I ² C bus	122
5.3	I ² C ports of the development board	123
5.4	I ² C LCD	123

5.5	Project 1: Display text on the LCD	126
5.6	Project 2: Scrolling text on the LCD	129
5.7	Project 3: Display custom characters on the LCD	130
5.8	Project 4: LCD based conveyor belt goods counter	132
5.9	Project 5: LCD-based accurate clock using timer interrupts.	135
5.10	Project 6: LCD dice.	140
Chapter 6 • Sensors		143
6.1	Overview	143
6.2	Project 1: Analog temperature sensor.	143
6.3	Project 2: Voltmeter	145
6.4	Project 3: On/Off temperature controller.	147
6.5	Project 4: Darkness reminder using a light-dependent resistor (LDR)	150
6.6	Project 5: Tilt detection	152
6.7	Water-level sensor	154
6.7.1	Project 6: Displaying water levels	155
6.7.2	Project 7: Water level controller	157
6.7.3	Project 8: Flooding detector with buzzer.	159
6.8	Project 9: Sound detection sensor – relay control by hand clapping.	161
6.9	Project 10: Flame sensor – fire detection with relay output.	163
6.10	Project 11: Temperature and humidity display	165
6.11	Project 12: Generating musical tones with the melody maker	169
Chapter 7 • The RFID Reader		173
7.1	Overview	173
7.2	Project 1: Finding the Tag ID	173
7.3	Project 2: RFID door lock access control with relay	176
Chapter 8 • The 4x4 Keypad		179
8.1	Overview	179
8.2	Project 1: Display the pressed key code on the Serial Monitor.	180
8.3	Project 2: Integer calculator with LCD	183
8.4	Project 3: Keypad door security lock with relay	188
Chapter 9 • The Real-Time Clock (RTC) Module		192
9.1	Overview	192

9.2	The supplied RTC module	192
9.3	Project 1: RTC with Serial Monitor	192
9.4	Project 2: RTC with LCD	196
9.5	Project 3: Temperature and humidity display with time stamping	198
Chapter 10 • The Joystick		203
10.1	Overview	203
10.2	The joystick	203
10.3	Project 1: Reading joystick analog values	203
Chapter 11 • 8x8 LED Matrix		208
11.1	Overview	208
11.2	The supplied 8x8 LED matrix	208
11.3	Project 1: Displaying shapes	209
Chapter 12 • Motors		213
12.1	Overview	213
12.2	The servo motor	213
12.2.1	Project 1: Test-rotate the servo	214
12.2.2	Project 2: Servo sweep	215
12.2.3	Project 3: Joystick-controlled servo	217
12.3	The stepper motor	218
12.3.1	Project 4: Rotate the motor clockwise and then anticlockwise	219
Chapter 13 • Infrared Receiver and Remote Controller Unit		222
13.1	Overview	222
13.2	The supplied infrared receiver	222
13.3	The supplied infrared remote control transmitter unit	222
13.4	Project 1: Decoding the IR remote control codes	223
13.5	Project 2: Remote relay activation/deactivation	226
13.6	Project 3: Infrared remote stepper motor control	228
Chapter 14 • Powering the Development Board		233
14.1	Overview	233
14.2	Power supply methods	233
Index		235
