Vertiv™ XTE PTS enclosures are co-located with active electronic enclosures in wireless networks to provide AC power transfer, surge protection, distribution, and T1 terminations for cellular, PCS, and all wireless markets.

Description

The Vertiv XTE PTS Series is a full service power transfer switch designed to provide main service disconnect, AC surge protection, AC distribution and generator connection in a single environmentally protected enclosure.

Application

The Vertiv XTE PTS Series of cabinets is co-located with active electronic enclosures in wireless and wireline telecommunication networks. PTS enclosures provide.

This ordering guide is a sample of our most common configurations. Custom options are available. Just ask.

PTS (Generator Power up to 200A)

PE15 Model

- Developed for wireline applications but well suited for wireless too.
- Compact design allows for low profile mounting.
- Meter housing placement option.

Technical Specifications

Cabinet Dimensions	16.75"H x 18.75"W x 11"D
Exterior Material	Powder-coated aluminum
Mounting	Wall or Pole
Cabinet Enclosure Type	NEMA 3R
Operating Voltage	120/240 VAC, single phase, 3 wire and ground
Service	60-100A
Disconnect	Interlock toggle switch
AIC Rating	10kAIC 22kAIC 42kAIC
Load Center	12-position
Standby Power Receptacle	30-100A
TVSS with Indicator Lights	AC DATA AC2100-F-NA-07
Security (padlockable)	Single-point locking mechanism secured with a padlock hasp
Safety Compliance	UL 891, dead front switchboards

NOTE: Circuit breakers available, please call customer service at 1-800-800-1280.

Services

A complete life-cycle approach to service, from project launch to ongoing maintenance and performance optimization

We strive to keep your network infrastructure highly available, efficient and adaptable, so you can:

- Increase mean time between failure
- Decrease operating cost
- Implement future technologies while maximizing your resources

Project

When launching new facilities or powering up new equipment, you want to do it right – right from the start

- Plan
- Design
- Engineer
- Integrate
- Commission
- Project management

Maintenance

Services to ensure that your business-critical infrastructure operates reliably, safely and efficiently

- Preventive and corrective maintenance
- Remote services and monitoring
- Cap / fan / battery replacements
- Repair
- Spare parts

Performance

Full range of services designed to optimize infrastructure performance and reduce complexity

- Assess
- Audit
- Model
- Configure
- Upgrade
- Train
