PLEASE READ THE INSTRUCTIONS CAREFULLY BEFORE USING THE PRODUCT AND KEEP IT WELL.

Environmental Impact Comparison

The figure compares the environmental impact of two products, Product A and Product B, across various indicators. The indicators are grouped into three main categories: Global Warming Potential (GWP), Acid Equivalent Potential (AEP), and Ozone Depletion Potential (ODP). The values for each indicator are provided for both products, allowing for a direct comparison of their environmental footprints.

Indicator	Product A	Product B
GWP (kg CO ₂ eq)	1.2	1.5
AEP (kg H ₂ O eq)	0.5	0.8
ODP (kg CFC-11 eq)	0.1	0.2
