Operation

BEFORE FIRST USE

Clean the machine with a clean, dry cloth before your first use. In order to clean the roller and cutter, you can pass a small quantity of dough through them several times. Then discard the dough.

TO USE

1. Cut the dough into manageable pieces with a knife.
2. Pull the knob and turn to "1", let the two rollers completely open (about 2.5mm).
3. Put the two covers over the wide and narrow cutters, turn on the switch and pass a piece of dough through the roller. Sprinkle some flour on the dough if necessary.
4. Repeat the operation 2-3 times.
5. When the dough has taken a regular shape, adjust the knob to "2". Then repeat until you achieve the desired thickness.
6. Put the dough into the wide cutter to achieve wide noodles. Alternatively, put the dough into the narrow cutter to achieve narrow noodles.

NOTE

- If the cutters can't cut, it means the dough is too soft and you should pass the dough through the rollers with flour several times.
- If the dough is too hard and the machine can't operate, please put the dough into a bowl and mix in more water.
- The work time of the machine cannot exceed 15 minutes at a time.
- Do not adjust the knobs while the machine is in use.

Maintenance

- Unplug the unit before cleaning and performing maintenance.
- Use a soft and dry cloth to clean the machine after use.
- Never wash the machine with water or in a dishwasher.
- Use a brush to clean the cutters and rollers after use.
- If necessary or if the rollers squeak, you can lubricate the rollers with food safe oil.
- Don't insert knives or cloths in between the rollers.
- It is advisable to store the machine and accessories in the original box after using.
- All repairs are to be performed by a qualified technician.
