Precautions

- This appliance is intended to be used in household and similar locations such as:
 - homes, hotels, schools, offices and other working environments;
 - restaurants;
 - hospitals, hotels, clubs and other residential, food and catering;
 - food and catering establishments;
 - the appliance must not be immersed;
 - the appliance is only to be used with the basic cord set.
- Do not let people who lack the physical, sensory or intellectual skills to look after the appliance or use it use the product without supervision or guidance.
- Never let children play with the cord set.
- Keep it away from children.
- When the kettle is not in use, or when you are boiling water, unplugging or changing the power cord will be a problem with the kettle must be unplugged.
- Do not use this kettle on an unstable surface and keep it away from any open flame, water or any large amount of steam. Do not place the kettle adjacent to or on top of any electrical appliance.
- The kettle must only be used with a rated power supply with a rated current of 10 A and a voltage of 220V or 240V. Do not plug the kettle into a power outlet together with other electrical appliances.
- If the cover is not damaged or broken, it must not be used by the manufacturer's safety instructions. Do not use it to cook food.
- Do not open the kettle lid, pour water out or add water when the water is boiling.
- If the water is overfilled, the boiling water could splash out.
- The kettle can only be used for boiling water. Do not use it to cook other things, such as soups, eggs, vegetables, milk and noodles. Otherwise, the kettle may not function properly. Do not let the water level rise above the water level mark. Otherwise, hot water will overflow and splash out, causing the kettle to be damaged. When boiling water, the water in the kettle must be above the minimum water level mark so as to prevent dry-boiling.
- After removing the kettle from the base after boiling water, do not touch the base and the water for a while until the kettle is cooled down to avoid burns.
- Do not place the kettle near heat sources such as stoves and flames to avoid the risk of fire.
- To avoid the risk of fire, do not use low quality power cords with the product.
- Do not immerse the kettle in water. Do not let the power cord enter the water when using it.
- This appliance can be used by children aged from 8 years and above if they have been given performance instruction concerning use of the appliance and safety by their parents and/or the manufacturer. Children's user maintenance should not be made by children unless they are given permission by parents. When the appliance and its cord enter mesh or solid or aged users then it is dangerous.
- Warnings on the package and the connector.
- Heating element surface is subject to scorch after use.

and when using the 100-hour rule, it is placed by law in the unexpired portion of the year by which it was earned. Thus, the value of the 100-hour rule is reduced.

1. Press the bottom of the chamber down into the sand until the bottom of the chamber is 10 cm below the surface of the sand.
2. Turn the pump on. The chamber will fill with water. The water will rise to the level of the water in the tank.
3. When the water level in the chamber is the same as the water level in the tank, turn the pump off.
4. Turn the pump on again. The water will rise to the level of the water in the tank.
5. When the water level in the chamber is the same as the water level in the tank, turn the pump off.
6. Turn the pump on again. The water will rise to the level of the water in the tank.
7. When the water level in the chamber is the same as the water level in the tank, turn the pump off.
8. Turn the pump on again. The water will rise to the level of the water in the tank.
9. When the water level in the chamber is the same as the water level in the tank, turn the pump off.
10. Turn the pump on again. The water will rise to the level of the water in the tank.

1. Use the left foot to push the opponent's head to the ground or chest.
2. After pulling up still and the opponent's head is on the ground, hold the head with both hands.
3. As the opponent's head is on the ground, hold the opponent's arm with one hand, and pull the opponent's head with the other hand, and then use both hands to pull the opponent's head.
4. Use the other hand to pull the opponent's head to the ground, and then use both hands to pull the opponent's head.

1. Measure the width of the gutter and the distance between the joists.
2. Identify the type of material and the size of the joists or rafters to determine the pitch of the roof.
3. If there is an existing roof, identify the pitch of the existing roof and use that as a guide for the new roof.
4. Use a level to ensure the gutter is installed at the correct pitch.

Abstract The purpose of this study was to determine the effect of a 12-week training program on the physical fitness of 10-year-old children. The study was conducted in a primary school in the city of Ankara, Turkey. The children were divided into two groups: a control group and an experimental group. The experimental group participated in a 12-week training program that included aerobic, strength, and flexibility exercises. The control group did not participate in any training program. Physical fitness was measured at the beginning and end of the 12-week period using a series of tests including a 1000-meter run, a 1-minute sit-up test, a 1-minute plank test, and a 1-minute flexibility test. The results of the study showed that the experimental group had significantly higher scores than the control group in all four tests at the end of the 12-week period. The findings of this study suggest that a 12-week training program can improve the physical fitness of 10-year-old children.

The authors are grateful to Yulia Inzhikina and Elena Gerasimova for providing us with access to the library at Moscow State University Library. We thank Alexander Plekhanov for his helpful comments on the manuscript.
