■ Operating instructions

Charge

- The red light will be flashing when the speaker is in the low battery level. (Please charge it in time.)
- Press the "P" button (10s) to charge the speaker in normal mode.
- Red light is on when charging and light off when fully charged.
- To extend service life of the battery, please charge the speaker every three months when it is not used for long periods of time.

Bluetooth connection and playback

The Bluetooth connection mode is default when the speaker is powered on. In the meantime, you can pair the speaker with Bluetooth devices (mobile phones, tablets, etc.).

- The speaker is ready for Bluetooth connection when the red light flashes rapidly, and your Bluetooth devices is nearby and connected to "EDIFIER MP230".
- After pairing, the speaker will automatically connect to the Bluetooth devices (mobile phones, tablets, etc.) and play music from the speaker (unless the speaker is in the standby mode).

■ Operating instructions

AUX operation and playback

- Connect the speaker to a music player with the included audio cable.
- Press the "A" button to switch to AUX mode (green light).
- Press the "P" button to switch to AUX mode (green light).

Wired (FM) card mode playback

- Insert a wired (FM) card into the speaker.
- Press the "B" button to switch to FM mode (red light).
- Press the "P" button to switch to FM mode (red light).

USB audio streaming mode

- Connect the speaker to a computer with the included USB cable.
- Press the "B" button to switch to USB mode (blue light).
- Press the "P" button to switch to USB mode (blue light).

■ Troubleshooting

Power

- Check if the power is on.
- Make sure the battery is fully charged.
- Check if the battery is fully charged.

FCC Regulatory Compliance

Warning: changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

RF Exposure Compliance

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment.

ISED Regulatory compliance

This device contains licence-exempt transmitters that comply with Innovation, Science and Economic Development Canada's licence-exempt RSS(s). Operation is subject to the following two conditions:

This device may not cause interference.

This device must accept any interference, including interference that may cause undesired operation of the device.

L'appareil exempt de licence continue dans le présent appareil est conforme aux CNR d'Innovation, Sciences et Développement Économique Canada applicables aux appareils radio exempts de licence. L'exploitation est autorisée aux deux conditions suivantes :

L'appareil ne doit pas produire de brouillage.

L'appareil doit accepter tout brouillage radioélectrique subi, même si le brouillage est susceptible d'en compromettre le fonctionnement.

This equipment complies with IC RSS-102 radiation exposure limits set forth for an uncontrolled environment.

Cet équipement est conforme aux limites d'exposition aux radiations IC CNR-102 établies pour un environnement non contrôlé.
