

TRUE WIRELESS EARBUDS

Instruction Manual

BLUETOOTH Version 5.4

Please read this manual carefully before use.

Product instructions

1. How to use the connection and pairing of earphones and mobile phones:

Open the charging compartment or remove the earphones from the charging compartment. Two earphones light up, one earphone automatically turns off, and the other earphone flashes. At this time, you can bring the earphones close to your phone, turn on your phone's Bluetooth, search for the earphone device name to connect, and after successful connection, both earphones will not flash.

2. Charging instructions:

When the charging compartment is charging, the charging compartment flashes, and the indicator light goes out after it is fully charged. When the charging compartment charges the earphones, the indicator light of the charging compartment is always on, and the indicator light of the charging compartment goes out after the earphones are fully charged.

FCC warning:

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference, and
- (2) this device must accept any interference received, including interference that may cause undesired operation.

These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
