Serving the Electrical, HVAC/R and Pool & Spa Markets

Since 1940, Intermatic has been focused on developing and manufacturing products that save energy. Known for the “yellow dial timer,” still popular after many years as well as our multi-voltage, high performance, programmable systems, we are dedicated to providing energy conscious solutions for today’s demanding needs for energy use.

In this catalog, you will find new energy saving controls and a wide range of complementary electrical products that are designed to solve field application issues, while offering savings and convenience to the installer, and the ultimate end user. Our “Contractor Friendly” approach is evident in products like our Grässlin branded GM40 Auto-Voltage time switch series and LightMaster light sensing controls. These two product categories not only offer energy savings, but offer installation efficiencies that save time and money. Our new MultiWave Wireless 2 speed pump control offers a cost effective, Title 20 solution for the pool and spa market.

Meeting codes and regulations is critical to the electrical distribution channel and is therefore critical to us. We have redesigned our surge products to comply with the current UL 1449 3rd Edition standards. You can trust Intermatic products to meet current codes and standards set forth by the National Electrical Code, UL, CSA and other standards associations.

Intermatic is dedicated to providing energy conscious solutions for commercial, industrial and residential customers. Our fundamental commitment to the business of producing energy control products is long-term and steadfast. For over 70 years we have believed that saving energy is the responsible thing to do...always.

Thank you for your loyal business.

INTERMATIC®
Providing a brighter solution.™

Commercial Applications

- A In-Wall programmable timers for office lighting
- B Heavy-duty programmable timers for outdoor lighting
- C Lighting controls for daylight harvesting and parking deck security
- D Count-down timers for low usage areas like store rooms and closets
- E Hot water heater timers
- F Cycle timers for pumps, fans, misters
- G Irrigation timers
- H Photo controls for parking lot and building lighting
- I Point-of-use surge protection for computers and peripherals
- J Wall-pack HID and Floodlight fixtures
- K Pool and Spa controls
- L Weatherproof covers
- M Vapor Tight fixtures
- N Defrost Timer

Residential Applications

- A Programmable in-wall timers for interior and exterior lighting
- B Photo-controls for exterior lighting
- C Count-down timers for attic fans, exhaust fans, heat-a-vents, storage areas
- D Low-Voltage transformers and timers for landscape lighting
- E Timers for exterior lighting
- F Water heater timers
- G Plug-in timers for appliance and lamps
- H Irrigation timers for outdoor sprinklers
- I Cycle timers for misters, pumps
- J Point-of-use surge protection for home electronics
- K Surge protection (before and after electrical panel applications)
- L Surge protection for air conditioning units
- M Pool and spa controls - wireless and hardwired options
- N Weatherproof outlet covers in a variety of formats: recessed, wall mount, post-top
- O Wall mounted floodlights and HID fixtures

T100 Series 24-Hour Timers

- Electrical loads up to 40 Amps
- Provides direct 24 hour control of most loads
- 1 to 12 ON/OFF operations each day with minimum ON/OFF times of 1 hour
- Manual override
- All models equipped with one ON and one OFF tripper

Applications — Commercial, Industrial, Residential:

- Indoor/Outdoor Lighting
- Pool Heaters
- Air Conditioning
- Pumps
- Music and Signal Systems
- Post Lanterns
- Filters
- Blowers
- Heating/Ventilating Systems
- Poultry Foggers
- Signs
- Hydro Chlorinators
- Electric Fences
- Fans
- Conveyors

Specifications:

Enclosure: See table below

Optional Enclosures: See pages 46 and 47

Replacement Motors: See page 158 for available clock motors.

Switch Rating: Each Pole; 40 Amp Resistive, 120-480 VAC; 40 Amp Tungsten, Inductive or 1000 VA Pilot Duty, 120-277 VAC; 2 HP (24 FLA) 120 VAC; 5 HP (28 FLA) 240 VAC single phase.

* Separate clock motor terminals for switching circuits not on line voltage.

** Can be wired as SPDT.

Note: For additional trippers (1 ON/1 OFF per pack), order No. 156T1978A.

† See pages 46 and 47 for details.

Upgrade to an electronic 24 hour time switch on pages 31-32

Mechanical Time Switches

T170, T1400 and T1800 Series 24-Hour Timers w/Skipper™ and with Skipper and Carryover

Features:

- Designed for commercial, industrial and residential applications
- Loads up to 40 Amps per pole
- Providing direct 24 hour control of most loads
- 1 to 10 ON/OFF operations each day with minimum ON/OFF times of 1 hour
- Manual override
- All models equipped with one CUTOUT (ON), one OFF tripper and three day-skipper screws
- Day-skipper screws in skipper dial to omit operation on selected days of the week

Models with Carryover (Suffix C)

- Minimum of 16 hours carryover operation for maintaining preset schedules during power failures
- Carryover automatically rewinds when power resumes; only one hour of rewinding time required for every two hours of power outage.
- 4PST models are ideal for 3-phase load control

Specifications:

Enclosure: See table below

Optional Enclosures: See pages 46 and 47

Note: 4 pole models will not fit in standard or plastic enclosure; only in NEMA 3R steel enclosure. T170CR series only available in NEMA 3R steel enclosure.

Replacement Motors: See page 158 for available clock motors.

Switch Rating: Same as T100 Series. 4PST models also rated 7.5 HP (28 FLA) 208 VAC; 10 HP (28 FLA) 240 VAC **3-phase**.

T1900 Series 24-Hour Timers

T1970 Series 24-Hour Timers with Skipper™

- Provides up to 96 operations (48 ON/48 OFF) every 24 hours
- Skipper models provide 80 operations daily, can be omitted on selected day(s) of the week
- Minimum ON/OFF time 15 minutes
- Trippers slide in and out of dial for fast, accurate setting

Applications:

- Oil Well Pumps
- Filters
- Blowers
- Poultry Feeders
- Heaters
- Process Equipment
- Recorded Music
- Dairy Equipment
- Fans
- Silo Unloaders
- Poultry Foggers

Specifications:

Enclosure: See table below

Optional Enclosures: See pages 46 and 47

Replacement Motors: See page 158 for available clock motors.

Switch Rating: 20 Amp, 125, 208-277 and 480 VAC; ½ HP, 125 VAC; 1 HP, 250 VAC

Power Input: 5 Watts maximum.

Mechanical Time Switches

T50000 Series

7-Day Timing Control Centers with Carryover

- Provides photo control initiated/time switch terminated control
- Provides control of 1, 2, or 3 circuits
- Provide different ON/OFF program each day of the week and a spring wound carryover
- Recommended for applications where you need to turn a load ON at dusk and OFF at a preset time
- Spring wound carryover provides a carryover of 16 hours maximum to maintain accurate load control even during power failure
- Carryover automatically rewinds itself when power resumes
- Only 1 hour is required to rewind the carryover for each 2 hours of outage
- Light level adjustment is provided on the photo control
- All models have single pole double throw switches and manual circuit by-pass switches
- Unit is designed to control the contactor coil circuit only
- Not recommended for direct switching of tungsten, mercury vapor or similar loads

Applications:

- Parking Lot Lighting • Landscape Lighting • Billboard Lighting • Entryway Lighting
- Storefront Lighting • Stairway Lighting • Car Lot Lighting • Security Lighting

Specifications:

Enclosure: NEMA 1 Rated Indoor Steel

12½ in. H x 8¼ in. W x 3⅞ in. D

Optional Enclosures: None available

Contact Rating: 15 Amp, ½ HP, 125-250 VAC; 420 VA Pilot Duty; 150 W Tungsten, 125 VAC (May also be used with 24 volt systems if wired in accordance with National Electrical Code Regulations.)

T7000B Series

7-Day Timers with and without Carryover

- Provide different ON/OFF program each day of the week
- Provides true 7-day load control with minimum ON/OFF time of 3½ hours
- Provide for 4 pole single throw and 4 pole (2NO/2NC) switching
- Separate clock motor terminals for switching loads not on-line voltage

Applications:

- Heating
- Outdoor Lighting
- Ventilating Systems
- Air Conditioning
- Motors
- Fans
- Pumps
- Signs
- Filters
- Indoor Lighting
- Billboards
- 3 Phase Loads

Specifications:

Enclosure: NEMA 1 Rated Indoor steel in gray finish w/separate grounding terminal. 12½ in. (31.7 cm) H x 8¼ in. (21.0 cm) W x 4 in. (10.2 cm) D

Knockouts: Combination ½ – ¾ in. nominal knockouts, two on back, one on each side and two on bottom. Also one 1 in. nominal on bottom center.

Outdoor Enclosure: Same as above with gaskets

Replacement Motors: See page 158 for available clock motors.

Switch Rating: Each Pole 40 Amp Resistive, 120-480 VAC; 40 Amp Tungsten, Inductive or 1000 VA Pilot Duty, 120-277 VAC; 2 HP (24 FLA) 120 VAC; 5 HP (28 FLA) 240 VAC single phase; 7½ HP (28 FLA) 208 VAC 3-phase; 10 HP (28 FLA) 240 VAC 3-phase.

Carryover: Models with BC suffix only. Minimum time – mechanical operation: 16 hours. Carryover accuracy +/-2%.

* All models (suffix B) have separate clock motor terminals for switching circuits not on line voltage.

For additional trippers (7 ON/7 OFF per pack), order No. 156T2548A.

† See pages 46 and 47 for details.

T2000 Series

Compact 7-Day Timers

Features:

- Minimum ON/OFF time 2 hours
- Up to 84 (42 ON/OFF) operations each week

Specifications:

Enclosure: NEMA 1 Indoor steel; see page 46

Replacement Motors: See page 158 for available clock motors.

Switch Rating: 20 Amp Resistive, 120 and 208-277 VAC; ½ HP, 120 VAC; 1 HP, 240 VAC

Model #	Switch	Clock Motor Volts AC 60 Hz	Amps
T2005	SPDT	120	20
T2006	SPDT	208, 277	20

For additional trippers (12 per pack), order No. 156T1950A.

For replacement Snap Switch order No. 133T701A.

Mechanical Time Switches

GM40 Series (24-Hour/7-Day) Multi-Voltage General Purpose Time Switch

GRÄSSLIN™
by **INTERMATIC®**

Features:

- Universal, mechanical time switches that can be field configured for various power supply voltages; includes 120 VAC, 208/240 VAC, and 277 VAC all within the same unit.
- Selection of the desired supply voltage is easily achieved by selecting the DIP switch to the corresponding input voltage.
- Mechanism mounted in compact NEMA 3R outdoor enclosure and features a DPDT switching configuration standard (i.e. two normally open and two normally closed contacts)
- Available as "Mechanism Only" (-M) for installation in other enclosures or control panels.
- Available with Quartz battery backup.

The GM40 is a robust time switch capable of switching high amperage. Below are samples of the many applications where the GM40 can be used:

- Lighting Control
- Access Control
- HVAC/R
- Agricultural Facilities
- Pumps/Motors/Fan Controls
- General Purpose Electrical Circuits

* Has 7-Day/Weekly/Skip-A-Day Functionality.

Mechanical Time Switches

GM40AV

Auto-Voltage Mechanical Time Switch

The GM40AV auto-voltage time switch is a universal, mechanical clock which automatically detects input voltage. No more dip switch. It is as simple as "wire the clock and go". The clock understands the corresponding input voltage automatically. No need to worry any longer if the correct voltage was set before wiring.

Features:

- Automatically detects input voltage without the use of dip switch or selector pins
- Can operate at any voltage between 120 and 277 VAC
- Mounted in a compact NEMA 3R outdoor enclosure
- Features a DPDT switching configuration (two normally open and two normally closed contacts)
- Manual override switch allows for ON/OFF/AUTO functionality

Applications:

- Lighting Control
- HVAC/R
- Pumps/Motors/Fan Controls
- Access Control
- Agricultural Facilities
- General Purpose Electrical Circuits

Specifications:

Normally Open Contacts:

- 40 Amp Resistive, 120 VAC, 120-277 VAC
- 1 HP (16 FLA, 90 LRA), 120 VAC
- 2 HP (12 FLA, 52 LRA), 208-277 VAC
- 30 Amp Ballast, 120 VAC
- 20 Amp Ballast, 277 VAC
- 15 Amp Tungsten, 120 VAC
- 300 VA Pilot Duty, 120-240 VAC

Normally Closed Contacts

- 30 Amp Resistive, 120-277 VAC
- 1 HP (12 FLA, 30 LRA), 120 VAC
- 2 HP (10 FLA, 30 LRA), 240 VAC
- 10 Amp Ballast, 277 VAC
- 2 Amp Tungsten, 120 VAC
- Operating Temperature: -40°C to 55°C (-40°F to 131°F)

Enclosures: NEMA 3R Indoor/Outdoor, see page 48, Model No. E300

DTMV40 Series Multi-Voltage Time Switch

Mechanical time switches designed for defrost control of refrigeration equipment, stand-up coolers and freezer cases.

Multi-voltage feature reduces the need to stock additional SKUs. Simply snaps into existing enclosures. Replaces over 40 competitive SKUs.

Product Features:

- 40 Amp rated contacts
- Captive trippers are independently adjustable for full or partial defrost cycles in 15 minute intervals
- Time initiated, temperature, pressure or time-terminated
- "Real time" clock face for quick, easy and accurate setting
- Field adjustable multi-voltage DIP switch for 120, 208, 240 Volts
- Multi-voltage feature reduces the need to stock additional SKUs
- Red and green LED lights indicate defrost or refrigeration cycle
- Available in a Quartz model with 7-day battery back-up (DTQMV)
- NEMA 3R standard outdoor enclosure (*DTMV40 ONLY*)
- All-in-one assembly
- UL94HB Flame Class Rated
- Electrically isolated

Applications:

- Restaurants
- Stand-up Coolers
- Schools, Universities
- Convenience Stores
- Refrigeration Equipment
- Bars
- Food Industry Refrigeration
- Hospitals
- Supermarkets
- Freezer Cases
- Hotels

Specifications:

Indoor/Outdoor Enclosure: NEMA 3R raintight enclosure, Gray with lockable hasp 8.8 in. (22.0 cm) H x 6.6 in. (16.5 cm) W x 2.9 in. (7.3 cm) D

Battery Back-Up: Quartz drive model allows for 7 day battery back-up

Temperature Range: -40°F (-40°C) to 131°F (55°C)

Min ON/OFF Time: 15 minutes

Max ON/OFF Time: 23 hours 45 minutes

Wiring Connections: Large screw terminals and ground lug termination

Wire Size: AWG #8

Shipping Weight: 3.0 lbs (1.36 kg)

ELECTRICAL RATINGS:

- 40 Amp Resistive, 120, 208, 240 VAC
- 1 HP (16 FLA, 90 LRA) 120 VAC; 2 HP (12 FLA, 52 LRA) 240 VAC
- "F" Terminal: 30 Amp Resistive, 120/240 VAC; 1 HP, 120 VAC; 2 HP, 240 VAC

Mechanical Timer Modules

FM/1 Series 24-Hour, 7-Day

Applications:

The FM/1 series mechanical timer modules are designed to be placed inside a machine control panel, circuit board, or other equipment. It offers up to 21 Amp switching designed for control of heating, ventilating, air conditioning, refrigeration, lighting, security, circulating pumps, spas or any electrical load requiring 24-hour or 7-day scheduling.

Specifications:

Size: 3.25 in. H x 3.25 in. W x 2.25 in. D

Supply Voltage: 24, 120, 240 VAC

Power Consumption: 1 VA

Switch Rating: SPDT

Resistive: 21 Amp

Tungsten: 1350 W

Inductive: 1 HP, 125 VAC; 2 HP, 240 VAC

Wiring Connections: 1/4 in. quick-connect terminals

Operating Temperature Range: "S" models -40°F to 185°F (-40°C to 85°C)
"Q" models -20°F to 131°F (-20°C to 55°C)

Installation: Stand alone or with Indoor/Outdoor enclosure

Panel: Surface mounting

Modular Mechanical Timer Switches

GRÄSSLIN™
by **INTERMATIC™**

GMXST-I-120

GMX Series

24-Hour/7-Day General Purpose Time Switch

Features:

- Universal, mechanical time switches
- Low cost alternative for applications that do not require more than 21 Amp or 2 HP, 240 VAC
- NEMA 1 Indoor or NEMA 3R Outdoor enclosure
- 21 Amp Rating
- NEMA 1 Indoor or 3R Outdoor enclosure
- SPDT Switch
- Captive trippers with intervals of 15 minutes on 24-hour models (2 hours on 7-day models)
- True clock face, easy to set
- Finger safe terminals
- Enclosure provides space for field added contactor or other accessories

Applications:

The GMX is a light duty commercial time switch ideal for 24, 120, or 240 VAC single phase applications such as:

- Lighting Control
- Heating, Air-Conditioning
- Pumps/Motors/Fan Controls
- Access Control
- Agricultural Facilities
- General Purpose Electrical Circuits

Specifications:

Operating Temperature Range: "S" models -40°F to 185°F (-40°C to 85°C)

"Q" models -20°F to 131°F (-20°C to 55°C)

Enclosure: NEMA 1 or 3R, see page 48, Model No. E150

Mechanical Cycle Time Switches

Talento 121

One-Hour Repeat Cycle Time Switch

Features:

- Synchronous motor driven mechanical one hour time switch
- Low cost repeat cycle timer for industrial processes and other applications
- Provides continuous ON and OFF cycling of a load in a pattern which will repeat every hour
- Captive trippers allow setting up to 24 ON and 24 OFF times in 1.25 minute increments over a one hour period
- May be used in conjunction with an Intermatic 24-hour or 7-day time switch to provide repeat cycle timed switching only during selected periods of the day or week
- May be surface or DIN rail mounted with panels, or may be mounted in an Intermatic indoor or outdoor enclosure
- Available with or without 3-way override
- True clock face

Switch Rating: Each Pole; 40 Amp Resistive, 120-480 VAC; 40 Amp Tungsten, Inductive or 1000 VA Pilot Duty, 120-277 VAC; 2 HP (24 FLA), 120 VAC; 5 HP (28 FLA), 240 VAC single phase.

Specifications:

Size: 3.31 in. H x 2.13 in. W x 2.56 in. D

Switch Output: SPDT isolated contacts

16 Amp Resistive, 125-250 VAC

4 Amp Inductive, 125-250 VAC

1350 W Tungsten, 240 V

Minimum Switching Time: 1.25 Minutes

Operating Temperature: -40°F to 131°F

Operating Humidity: 0 to 95% RH

non-condensing

Wiring Connections: Screw terminals for up to #12AWG wire

FM1S12HU-120U

12-Hour Repeat Cycle Time Switch

The FM1S12HU-120U is a synchronous motor driven mechanical 12-hour time switch intended as a low cost repeat cycle timer for industrial processes and other applications. It provides continuous on and off cycling in a pattern which will repeat every 12 hours.

Features:

- 12-hour cycle
- SPDT 21A switch
- Flush, surface or DIN rail mounting
- Captive trippers allow setting up to 48 ON and 48 OFF times in 7.5 minute increments

Specifications:

Size: 3.25 in. H x 3.50 in. W x 2.25 in. D

Supply Voltage: 120 VAC

Power Consumption: 1 VA

Switch Rating: SPDT

Resistive: 21 Amp, 250 VAC

Inductive: 1 HP, 125 VAC; 2 HP, 240 VAC

Wiring Connections: 1/4 in. quick-connects

Percentage Cycle Timers

Common Applications:

- Poultry Houses
- Foggers
- Nurseries
- Fans
- Feeders
- Pumps
- Misters
- Irrigation

Common Specifications:

Voltage/Frequency: 120-240 VAC, 60 Hz

Switch: SPST

Resistive: 20 Amp

Motor: 2 HP, 240 VAC; 1 HP, 120 VAC

General Purpose: 20 Amp, 240 VAC

Tungsten (incandescent): 5 Amp, 240 VAC

Pilot Duty: 470 VA, 240 VAC

Ballast (fluorescent): 10 Amp, 277 VAC

Operating Ambient Temperature Range: -10°C (14°F) to +54°C (129°F)

Surge Protection: Up to 6000 VAC

CT1000 Percentage Cycle Timer

Field selectable cycle durations and up front user selection of percentage cycle time provide the ultimate in flexibility in repetitive cycling control.

Features:

- Dip switch provides 6 field selectable timer durations
30 seconds
1 minute
3 minutes
5 minutes
10 minutes
30 minutes
- Cycling pattern can be selected from 3% to 97% of total cycle duration
- Aluminum, sealed enclosure handles dusty, ammonia rich, or wash down environments
- LED indicators provide constant operational feedback
- Manual ON/OFF override allows users to bypass cycling pattern when required

CT2000 Percentage Cycle Timer

Field selectable via upfront push button control offering true flexibility for repetitive cycle times.

Features:

- Provides 8 field selectable timer durations
30 Seconds
1 Minute
3 Minute
5 Minutes
10 Minutes
30 Minutes
1 Hour
4 Hours
- Push button control on front of timer. No more DIP switches to program cycle time
- Upfront instructions give you constant direction on programming
- Manual ON/OFF control allows for temporary or permanent override

For Modular Cycle Timers see page 25

Mechanical Cycle & Irrigation Timer Switches

C8800 Series

Short Range Cycle Timers

- Short Range Cycle Timers provide repeat cycling for ON times
- Ten combination ON/OFF trippers supplied with each switch

Applications:

- Ventilating Fans
- Spraying Equipment
- Livestock Feeders
- Poultry Fans
- Fogging Equipment
- Poultry Feeders
- Bulk Milk Coolers
- Pumps
- Process Equipment

Specifications:

Enclosure: NEMA 1 Rated Indoor steel, see page 46 for details. For optional enclosures see pages 46-47

Switch Rating: 20 Amp Resistive, 125, 208-277 VAC; ½ HP, 125 VAC; 1 HP, 250 VAC

Model #	Switch	Clock Motor Volts AC 60 Hz	Dial Cycle	Tripper Actuating Time
C8815	SPDT	125	10 Min.	5 Sec.
C8835	SPDT	125	30 Min.	15 Sec.
C8865	SPDT	125	1 Hr.	30 Sec.
C8845	SPDT	125	4 Hr.	120 Sec.
C8866	SPDT	208-277	1 Hr.	30 Sec.

Note: The life of the switch contacts is affected by the size and type of the controlled load. The expected minimum life at 20 amps (resistive) load is 100,000 cycles.

For Replacement Snap Switch order No. 133T773A.

For additional trippers (12 trippers per pack), order No. 156T1950A.

R8800 and T8800 Series

Sprinkler/Irrigation Timers with 14-Day Skipper™

- 1 to 60 ON operations every 24 hours
- Designed for water metering in increments of 12 minutes to 20 hours and 45 minutes for maximum conservation of water resources
- 14-day skipper feature permits irrigation to be omitted on selected day(s)
- 14-day skipper feature provides for "every other" day operation
- ON/OFF/AUTOMATIC switch allows shutdown during rainy days or extended watering during dry periods without disturbing the automatic cycle set on dial
- Rain sensor enabled

Applications:

- Multi-Station Hydro Indexing Valves
- Greenhouses
- Lawn Sprinkling
- Pumps
- Irrigation Control
- Feeders
- Drip Irrigation Systems

Specifications:

Enclosure: NEMA 3R Rated Plastic Indoor/Outdoor Enclosure. See pages 46-47

EH40**

Mechanical Water Heater Timers

Utilities in many areas of the country offer two electric rates for residential or commercial customers. One rate has the regular daytime electrical rate, the other is the "off-peak" rate. The "off-peak" rate provides customers with "lower-priced" electricity during the nighttime and weekend periods. These time switches allow the customer to shift electricity use into these "off-peak" time periods in an attempt to save utility costs.

Features

- Convenient external override switch (WH40 only)

Applications

Water Heater Control for:

- Residential
- Commercial
- Industrial
- Institutional/Schools
- Military Facilities

Specifications:

Enclosure: NEMA 1 Rated Indoor steel in gray finish.

Spring hasp, with hole for lock, holds permanently attached, side hinged door closed.

Three mounting holes on back plus handy box mounting holes.

7¾ in. (19.7 cm) H x 5 in. (12.7 cm) W x 3 in. (7.6 cm) D

Knockouts: Combination ½ – ¾ in. nominal knockouts, one on back and each side of enclosure and two on bottom.

Replacement Motors: See page 158 for available clock motors.

Switch Rating: 10,000 W (40 amp) Max 250 volt, 60 Hz.

Model #	Switch	Clock Supply Volts AC 60 Hz	Watts	External Switch	Amps/Pole
T104-20	DPST	208, 240	10000	No	40
WH40	DPST	240	10000	Yes	40

For additional trippers (1 ON/1 OFF per pack), order No. 156T1978A.

Electronic Water Heater Timers

These time switches provide automatic control for electric water heaters. They provide to-the-minute accuracy in programming and time keeping. The time switches can be programmed for repeat daily scheduling, 5-day working week scheduling, weekend scheduling or any individual day scheduling. Timers can be scheduled for operation during the lowest time-of-day rates or to switch off the electric heater during period of utilities peak power usage. The time switches can be set to operate for up to 6 ON/OFF operations daily for a maximum of 42 ON/OFF operations weekly. Both models provide a convenient external override switch and LED load indicator for ease in scheduling hot water as required for extra hot water demands. The timers include a "AA" alkaline battery carryover which protects both time keeping and program information for a minimum of 3 years.

Specifications:

Switch Rating: 30 Amp Resistive or Inductive 120-240 VAC; 1 HP, 120 VAC; 1½ HP, 240 VAC; 5 Amp Tungsten, 120-240 VAC.

Enclosure: Same as T104-20 above.

Model #	Switch	Clock Supply Volts AC 50/60 Hz Operation	Watts	External Switch	Amps/Pole
EH10	SPST	120	3600	Yes	30
EH40	DPST	240	7200	Yes	30

Water Heater Time Switches

WHQ Series

24-Hour/7-Day Water Heater Timers With Battery Backup

Mechanical Time Controls

Features:

- Designed for control of commercial, industrial or residential electric water heaters up to 10,000 Watts capacity running at 208-240 VAC
- NEMA 3R outdoor enclosure can be placed in basements or mechanical rooms

Applications:

This unit is designed to save energy and maximize hot water usage throughout the day. For example, the unit could be programmed to turn ON during periods of high usage such as in the early morning hours and OFF during low demand periods such as late evenings.

Specifications:

N.O. Contacts:

- 40 Amp Resistive, 250 VAC
- 10,000 W
- 1 HP (16 FLA, 90 LRA), 120 VAC
- 2 HP (12 FLA, 52 LRA), 208-277 VAC

N.C. Contacts:

- 30 Amp Resistive, 120-277 VAC
- 7,500 W
- 1 HP (12 FLA, 30 LRA), 120 VAC
- 2HP (10 FLA, 30 LRA), 240 VAC

Wiring Connections: Screw box lug terminals

Operating Temperature Range: -40°F to 131°F (-40°C to 55°C)

Operating Humidity: 0 to 95% non-condensing

Enclosure Dimensions: 8.795 in. H x 6.631 in. W x 2.935 in. D

Shipping Weight: 3 lbs.

Switch Configuration: DPDT (2-N.O. and 2-N.C. Contacts)

Battery Backup: Rechargeable Quartz battery with 7 days minimum backup life standard

Mechanical Astronomic Time Switches

V46471CR

V45000 Series

Astronomic Dial Timers With Skipper™ & Carryover

- Adjusts for seasonal changes
- Astronomic dial automatically adjusts as days grow shorter or longer
- Skipper provides lighting control to be omitted on selected day(s) of the week
- Three Skipper screws furnished
- Independent clock motor terminals
- 3PST switch configuration provides control of 3-phase lighting
- Spring wound carryover provides a carryover of 16 hours minimum to maintain accurate load control even during power failure
- Carryover automatically rewinds itself when power resumes
- Only 1 hour is required to rewind the carryover for each 2 hours of outage

Applications:

- Parking Lots
- Landscape Lights
- Stairways
- Billboards
- Entryways
- Security
- Storefronts
- Car Lots

Specifications:

Enclosure: Steel, NEMA 3R Rated; Gray finish with hasp, with hole for lock, holds permanently attached, side hinged door closed. Mounting bracket plus two holes below switch on back for mounting. Separate grounding terminal.

8¼ in. (20.95 cm) H x 5¼ in. (13.34 cm) W x 4¾ in. (12.07 cm) D

Knockouts: Combination ½ – ¾ in. nominal knockouts, one on back and each side of enclosure and two on bottom.

Optional Enclosures: None.

Switch Rating: Each pole; 40 Amp Tungsten up to 277 VAC; 1 HP, 120-277 VAC, 690 VA Pilot Duty.

Auto Voltage Electronic Time Switch

GM40AVE

24-Hour/7-Day Auto-Voltage Electronic Time Switch

The GM40AVE auto-voltage time switch is a universal, electronic clock which automatically detects voltage input. It is as simple as "wire the clock and go". The clock detects the corresponding input voltage automatically. No need to worry any longer if the correct voltage was set before wiring.

- Automatically detects the voltage input without the use of DIP switches or selector pins
- Operates at any voltage between 120-277 VAC
- Clock is mounted in a compact NEMA 3R outdoor enclosure
- Features a DPDT switching configuration (two normally open and two normally closed contacts)
- Override Switch allows for manual operation until the next timed event
- 20 events can be programmed in either a daily or weekly schedule format

Applications

Robust time switch capable of controlling many applications:

- Lighting Controls
- HVAC/R
- Pumps/Motors/Fans
- Agricultural Facilities
- General Purpose Electrical Circuits

Specifications:

N.O. Contacts:

- 40 Amp Resistive, 120-277 VAC
- 1 HP (16 FLA, 90 LRA) 120 VAC
- 2 HP (12FLA, 52 LRA) 208-277 VAC
- 30 Amp Ballast, 120 VAC
- 20 Amp Ballast, 277 VAC
- 15 Amp Tungsten, 120 VAC
- 300 VA Pilot Duty, 120-240 VAC

N.C. Contacts:

- 30 Amp Resistive, 120-277 VAC
- 1 HP (12 FLA, 30 LRA) 120 VAC
- 2 HP (10 FLA, 30 LRA) 240 VAC
- 10 Amp Ballast, 277 VAC
- 2 Amp Tungsten, 120 VAC

Operating Temperature: -40°C to 55°C (-40°F to 131°F)

Enclosure: NEMA 3R Outdoor enclosure, see page 48, Model No. E300

ET1100 Series

24-Hour Time Switch (Same Operation Each Day)

Upgrading to an electronic time switch has never been easier with the ET1100 series. This series replaces our popular ET100 series.

Features:

- Program can be repeated on a daily basis
- Multi-volt operation from 120-277 VAC, 50/60 Hz
- To-the-minute programming for accurate load control and reduced energy costs
- Up to 28 set points or events (14 ON/14 OFF per channel) can be preset to automatically repeat on a daily basis
- Automatic Daylight Saving Time adjustment (Factory Enabled)
- Non-volatile EEPROM memory protects programming indefinitely
- Temporary override or permanent manual override available via push buttons

Specifications:

Enclosure Options: Standard: NEMA 1 Gray Painted Drawn Steel (see page 46 "A")

'R' Option: NEMA 3R Gray Painted Drawn Steel (see page 46 "B")

'PD82' Option: NEMA 3R Gray High-Impact UV Resistant Polycarbonate Plastic with Clear Cover (see page 46 "C")

Knockouts: Combination 1/2 – 3/4 in. nominal knockouts, one on back and each side of enclosure and two on bottom

Optional Enclosures: See pages 46-47 for optional enclosures.

Note: The electronic mechanism snaps into the standard Intermatic time switch enclosure, replacing mechanical mechanisms, if desired.

Cycle: ALL models 50/60 Hz.

Switch Rating: 30 Amp Inductive/Resistive, 24, 120, 240, 277 VAC, 60 Hz; 20 Amp Resistive, 28 VDC; 1 HP, 120 VAC, 60 Hz; 2 HP, 240 VAC, 60 Hz; 5 Amp Tungsten, 120-240 VAC, 60 Hz; 20 Amp Ballast, 120-277 VAC, 60 Hz.

1 CPD82 Models feature NEMA 3R high impact polycarbonate plastic enclosure with clear cover for easy viewing of time switch mode and current status.

2 ET1125 Models feature contacts that can be field configured to act as two independently operated SPST, one simultaneously operated DPST, or independently pulsed SPST for contactor and bell ringing applications.

7-Day Electronic Time Switches

ET1700 Series

7-Day Time Switch (Permits Different Operation Each Day)

Upgrading to an electronic time switch has never been easier with the ET1700 series. This series replaces our ET170 series.

Features include:

- Permits different operation each day
- Multi-volt operation from 120 to 277 VAC, 50/60 Hz
- To-the-minute programming for accurate load control and reduced energy costs
- Up to 28 set points or events (14 ON/14 OFF per channel) can be distributed throughout the days of the week
- Automatic Daylight Saving Time adjustment (Factory Enabled)
- Non-volatile EEPROM memory protects programming indefinitely
- Temporary override or permanent manual override available via push buttons

Specifications:

Enclosure Options: Standard: NEMA 1 Gray Painted Drawn Steel (see page 46 "A")

'R' Option: NEMA 3R Gray Painted Drawn Steel (see page 46 "B")

'PD82' Option: NEMA 3R Gray High-Impact UV Resistant Polycarbonate Plastic with Clear Cover (see page 46 "C")

Knockouts: Combination 1/2 – 3/4 in. nominal knockouts, one on back and each side of enclosure and two on bottom

Optional Enclosures: See page 46-47 for optional enclosures.

Note: The electronic mechanism snaps into the standard Intermatic time switch enclosure, replacing mechanical mechanisms, if desired.

Cycle: ALL models 50/60 Hz.

Switch Rating: 30 Amp Inductive/Resistive, 24, 120, 240, 277 VAC, 60 Hz; 20 Amp Resistive, 28 VDC; 1 HP, 120 VAC, 60 Hz; 2 HP, 240 VAC, 60 Hz; 5 Amp Tungsten, 120-240 VAC, 60 Hz; 20 Amp Ballast, 120-277 VAC, 60 Hz.

ET1715 models Normally Open (NO), Normally Closed (NC) contact ratings:

20 Amp (NO), 10 Amp (NC) Resistive/Inductive, 120, 240 VAC; 1 HP (NO), 1/4 HP (NC), 120 VAC; 2 HP (NO), 1/2 HP (NC), 240 VAC; 5 Amp Tungsten, 120, 240 VAC; 20 Amp (NO), 3 Amp (NC) Ballast, 120-277 VAC

Pulse Feature: 2-Circuit models feature 2-Second pulse option for contactor and bell ringing applications

Auto DST: Automatic Adjustment for Daylight Saving Time (DST)

Battery Backup: Field replaceable "AAA" batteries maintain date and accurate time keeping for 3 years minimum. Up front replacement does not require removal of mechanism

Wiring Terminals: #18 to #10 AWG wire

Minimum ON/OFF Times: 1 minute

Maximum ON/OFF Times: 6 days 23 hours 59 minutes

7-Day Astronomic Time Switch (Tracks Sunrise & Sunset)

Independent 7-day programming provides flexibility for applications where load switching differs each day of the week.

- Automatically switches loads according to a preset weekly schedule
- Multi-volt operation from 120-277 VAC, 50/60 Hz
- To-the-minute programming for accurate load control and reduced energy costs
- Astronomic feature provides sunset ON and sunrise OFF settings to eliminate the need for separate photo control devices
- Astronomic programming can be combined with independent programs to provide a sunset ON and timed OFF program
- Up to 28 set points or events (14 ON/14 OFF per channel)
- Non-volatile EEPROM memory protects programming indefinitely
- Temporary override or permanent manual override available via push buttons

Specifications:

Enclosure Options: Standard: NEMA 1 Gray Painted Drawn Steel (see page 46 "A")

Modular Electronic Time Controls

FMD Series

24-Hour/7-Day Electronic Time Switches

These timer modules offer versatile programming for either 24-hour or 7-day applications.

Features:

- 24-Hour or 7-day applications
- 24, 120 and 240 VAC input
- 12V and 24V single channel models can operate on either AC or DC voltage
- Easy to follow menu-led programming (available in 7 languages, English is default)
- All programming stored in non-volatile memory
- Various mounting types provide complete versatility for all applications
- Minimum ON/OFF 1 minute
- Manual override: Switch allows for manual operation until next programmed event
- Battery backup: Lithium battery included provides minimum 3-year date and time protection
- Large LCD display
- FM1D20: 20 programs, up to 140 events per week
- FM1D50: 50 programs, up to 350 events per week

Advanced Electronic Time Controls 1 & 2 Circuits

Talento472-120plus

Talento 400 Plus 24-Hour/7-Day, Multi-Function Time Controls

The Talento 400 Plus series of electronic time switches provide 24-hour or 7-day control.

Features:

- Offers automatic leap year and Daylight Saving Time adjustment once user enters current date and respective Daylight Saving Time change-over dates
- LCD display indicates load status, time of day, and week day
- In addition to the standard ON/OFF programming format, these units offer both pulse and cycle functions
- Pulse events are programmable to one or more seconds of duration
- Cycle function is programmable for both total cycle duration and ON duration in minutes or seconds
- Cycle function can be set to repeat indefinitely or to occur within a time and/or date range
- Programming is stored in non-volatile memory while a Lithium battery will keep the date and time for a minimum of 3 years
- Talento 400 plus comes in one or two circuits
- Two circuit models can be programmed for independent or simultaneous operation
- Manual override allows for Fixed ON or Fixed OFF operation
- Minimum ON Time: One second

Applications:

- Billboards
- Automatic Shutters/Awnings
- Lighting Controls
- HVAC/R
- Pumps/Motors/Fans
- General Purpose Electrical Circuits

Specifications:

Advanced Electronic Time Controls 1, 2, and 4 Circuits

Talento 800 Series

365 Day Multi-Function Astronomic Clock

Features:

- Automatic leap year and Daylight Saving Time adjustment once user enters current date and respective Daylight Saving Time change-over dates
- LCD display indicates load status, time of day, week day, and date
- Units come DIN-rail mountable or already mounted in indoor or outdoor NEMA enclosures
- Pulse events are programmable to one or more seconds in duration
- Cycle function is programmable for both total cycle duration and ON duration in minutes or seconds
- In addition, the cycle function can be set to repeat indefinitely or to occur within a time and/or date range
- Programming is stored in non-volatile memory while a Lithium battery will keep the date and time for a minimum of 3 years
- Multiple circuit models can be programmed for independent or simultaneous operation
- Manual override allows for Fixed ON or Fixed OFF operation
- Minimum ON time is one second

Applications:

- Automatic Shutters/Awnings

Remote PC Programming

The Talento 800 series can be programmed from a PC utilizing the optional Talento dialog set. The set includes Windows®-based software, the Taxxi hand-held programmer, CD-ROM, interconnect cable and instructions.

The software contains a schedule of fixed and floating holidays that can be selected, as required, for the particular application. Floating holidays will automatically repeat on the correct date, year after year. Thus, all fixed and floating holidays need only be programmed once. In addition, an astronomical program is included which will automatically adjust the program schedule to follow the changing sunrise and sunset times.

Once the programming is completed on the PC, it is transferred to the Taxxi hand-held programmer from which programs are downloaded into one or more installed Talento 800 series time controls. The Taxxi can store up to four independent programs and can also upload a program from the Talento into a PC for review or editing.

365-Day Time Switch (1, 2, & 4 Circuit Models)

- To-the-minute programming for 7-day or full year load control
- Includes 7-day repeat feature for simplifying programming of identical set points
- 12/24 Hour clock format
- 1,000 + ON/OFF events, 99 holiday schedules
- Automatic Daylight Saving Time adjustment (Factory Enabled)
- Flexible load control is enhanced by Astro, Variable Pulse, and Interval options as required for outdoor lighting control, bell ringing, and after hour temporary override, respectively
- Non-volatile memory maintains all programmed switching times for the life of the time switch
- Manual override: Program can be overridden at any time by placing the load switch in the Disable position and pressing the ON/OFF button

Specifications:

Enclosure: ET70115 & ET70215 Models: NEMA 1 – Drawn steel in gray finish

7¾ in. (19.7 cm) H x 5 in. (12.7 cm) W x 3 in. (7.6 cm) D

NEMA 3R – Drawn steel in gray finish

9⅜ in. (23.8 cm) H x 5½ in. (14.0 cm) W x 3⅝ in. (9.0 cm) D

ET70415 Model: NEMA 3R – Heavy duty .047 in. 18 gauge steel in gray finish

12½ in. (31.7 cm) H x 8¼ in. (21.0 cm) W x 4 in. (10.2 cm) D

ON/OFF Events: 1,000+ Events

Knockouts: Combination ½ – ¾ in. nominal knockouts, one on back and each side of enclosure and two on bottom

Optional Enclosures: See page 46-47 for optional enclosures.

Cycle: Line voltage models 50 or 60 Hz; Low voltage models 60 Hz, 24 Volts

Switch Rating: Each Pole; 20 Amp Resistive/General Purpose, 12-277 VAC

Normally Open (NO), Normally Closed (NC) contact ratings:

20 Amp (NO), 10 Amp (NC) Resistive/General Purpose, 120, 240 VAC; 1 HP (NO), ½ HP (NC), 120 VAC; 2 HP (NO), ½ HP (NC), 240 VAC; 5 Amp Tungsten, 120, 240 VAC; 470 VA (NO), 275 VA (NC) Pilot Duty; 20 Amp (NO) 3 Amp (NC) Ballast, 120-277 VAC

Battery Backup: Non-volatile memory requires no backup. Time keeping and calendar data maintained within 0.01% accuracy for minimum of 8 years with one factory installed, field replaceable Lithium coin cell

Wiring Terminals: #18 to #10 AWG wire

Minimum ON/OFF Times: 1 minute

Maximum ON/OFF Times: 6 days 23 hours 59 minutes

Shipping Weights: ET70115C - 4.65 lbs (2.11 kg), ET70115CR - 5.55 lbs (2.52 kg),

ET70215C - 4.75 lbs (2.15 kg), ET70215CR - 5.85 lbs (2.65 kg),

ET70415CR - 10.01 lbs (4.54 kg)

Model #	Circuits	Switch	Clock Volts AC	Amp Rating	HP Rating	Enclosure

1 Multi-Circuit Models feature contacts that can be field configured to act as independently operated SPDT, or independently pulsed SPDT for contactor and bell ringing applications.

Next Generation Electronic Astronomic Time Switches

ET70000 Series

365-Day Time Switch (8 & 16 Circuit Models)

- To-the-minute programming for 7-day or full year load control
- 12/24 Hour clock format
- 4,000+ ON/OFF events, 99 holiday schedules
- Automatic Daylight Saving Time adjustment
- Flexible load control is enhanced by Astro, Variable Pulse, and Interval options as required for outdoor lighting control, bell ringing, and after hour temporary override, respectively
- Non-volatile memory maintains all programmed switching times for the life of the time switch
- Manual override: Program can be overridden any time by placing the load switch in the Disable position and pressing the ON/OFF button
- Multi-Circuit Models feature contacts that can be field configured to act independently operated SPDT, or independently pulsed SPDT for contactor and bell ringing applications
- Remote manual override feature up to 4000' from time switch

Applications:

- Schools
- Offices
- Airports
- Stores
- Hotels
- Restaurants
- Factories
- Parks
- Apartments

Specifications:

Enclosure: 8-Circuit NEMA 3R – Heavy duty .048 in. steel in gray finish with lockable hasp

10¾ in. (27.3 cm) H x 11½ in. (29.2 cm) W x 4¾ in. (12.1 cm) D

16-Circuit NEMA 3R – Heavy duty .060 in. steel in gray finish with lockable hasp

20⅝ in. (52.4 cm) H x 13¼ in. (33.7 cm) W x 5⅞ in. (13.0 cm) D

ON/OFF Events: 4,000+ Events

Special Voltages and Cycles: Line voltage models 50/60 Hz; Low voltage models 60 Hz, 24 Volts

Switch Rating: Each Pole; 20 Amp Resistive/General Purpose, 12-277 VAC

Normally Open (NO), Normally Closed (NC) contact ratings:

20 Amp (NO), 10 Amp (NC) Resistive/General Purpose, 120, 240 VAC; 1 HP (NO), ⅓ HP (NC), 120 VAC; 2 HP (NO), ½ HP (NC), 240 VAC; 5 Amp Tungsten, 120, 240 VAC; 470 VA (NO), 275 VA (NC) Pilot Duty; 20 Amp (NO) 3 Amp (NC) Ballast, 120-277 VAC

Battery backup: Non-volatile memory requires no backup. Time keeping and calendar data maintained within 0.01% accuracy for minimum of 8 years with one factory installed, field replaceable lithium coin cell

Wiring Terminals: #18 to #10 AWG wire

Minimum ON/OFF Times: 1 minute

Maximum ON/OFF Times: 6 days 23 hours 59 minutes

Shipping Weights: ET70815CR - 15.05 lbs (6.8 kg), ET70815CR24 - 15.25 lbs (6.9 kg), ET71615CR - 28.2 lbs (12.8 kg), ET71615CR24 - 27.75 lbs (12.6 kg)

Model #	Circuits	Switch	Clock Volts AC	Amp Rating	HP Rating	Enclosure
ET70815CR	8	SPDT	120, 208, 240, 277	20	1 HP/2 HP	NEMA 3R
ET70815CR24	8	SPDT	24	20	1 HP/2 HP	NEMA 3R
ET71615CR	16	SPDT	120, 208, 240, 277	20	1 HP/2 HP	NEMA 3R
ET71615CR24	16	SPDT	24	20	1 HP/2 HP	NEMA 3R

All models comply with ASHRAE 90.1-1999-9.2.1.3 for exterior lighting control & ASHRAE 90.1-1999-9.2.1.2 for space control.

Next Generation Programming Software & Accessories

ET7232M – Flush Mount
ET7232M1 – Surface Mount

156ET9403A

Unleash the Power of the Next Generation Time Switch!

The NextGen programming software is written specifically for installing contractors and maintenance personnel. It is the fastest and easiest way to program the Intermatic Next Generation series of electronic time switches.

Features:

- Programming of all current Next Generation models (1, 2, 4, 8, & 16 circuits)
- Easy point-and-click programming of holiday and daily event schedules
- File Save function for archiving event schedules for future editing and use
- On-line Help Manual gives easy to follow directions
- One-button time and date programming synchronizes the time switch with your PC's date and time

Required software available free at www.intermatic.com

Next Generation programming allows facility managers to make schedule changes from across the building or campus through an intranet or even across country through the Internet.

NEXT GENERATION ACCESSORIES

ET7232M – Flush Mount with Gasket

ET7232M1 – Surface Mount

RS232 Serial Interface for all Next Generation Time switches. Also used as remote override for 1 & 2 circuit models.

156ET9402A

8-Circuit remote override input header

156ET9403A

16-Circuit remote override input header

LAN Connection to a PC

Office computers are typically connected through local area networks (LANs) which provide an in-place backbone to allow control of Next Generation time switches from any networked PC. This applies to office buildings, as well as distributed facilities such as university or corporate campuses.

Next Generation Distributed Control

By linking distributed Next Generation time switches together with the facility manager's PC, the time and associated cost of making periodic schedule changes is greatly reduced. All timing throughout the network can be synchronized to the second with the PC's internal clock.

Next Generation Connectivity

Serial Connection for the Next Generation Lighting Controls

Equipment Needed

- A ET70000 Series Timer
- B ET7232M/M1 Serial Interface (M1 – no gasket)
- C Free Software Download at www.intermatic.com
- D Handy Box and mounting hardware
- E DB-9 Serial Cable Male to Female
- F Computer to run software – PC or Laptop
Must have 9-pin Serial output*

* Application Note: USB to serial converters do **not** operate correctly with this device. If the laptop does not have a 9-pin serial output, a PCM card is available for Type II/III card slots. The PCM card is supplied with a cord to connect to the serial (RS232) cable, item E. Tested and recommended: Model JJ-PCMO12 by SIIG, Inc., Fremont, CA 94538-3152.

Network Connection for the Next Generation Lighting Controls

Equipment Needed

- A ET70000 Series Timer
- B ET7232M/M1 Serial Interface (M1 – no gasket)
- C Free Software Download at www.intermatic.com
- D Handy Box and mounting hardware
- E DB-9 Serial Cable Male to Female (null modem cable or serial printer cable)
- F Ethernet to Serial Converter*
RS232/IEEE 488 Converter
- G Local Area Network
(hubs, cables, et al)
- H Computer to run software

* Available at <http://bb-elec.com/> part number ESP901 or other suppliers.

CN5 Jumpers:

PC Cable **Modem Cable**
straight through cable Null-modem cable

1 to 2	1 to 6
6 to 7	2 to 7
8 not jumpered	8 not jumpered
4 to 9	4 to 9
5 to 10	5 to 10

Connection point for patch cord to timeswitch CN2

Note: Use patch cord supplied with this piece of equipment. If a longer patch cord is required, duplicate the wiring polarity of cord supplied with this device. Patch cord may be up to 1,000 feet long under normal electrical conditions. Be sure to use the torroid coil supplied with this unit at the timeswitch end of the patch cord.

For 1 & 2 circuit time switches only

Circuit # 2 override terminals (CN7)

LightMaster Lighting Control System

GRÄSSLIN™
by **INTERMATIC™**

LM2-O-120

LM Series

2 channel lighting controller with unique light level set points for each channel

Specifications

Enclosures:

- NEMA 1 - Indoor Use Only Equivalent
- NEMA 3R - Raintight Enclosure, industrial grade plastic, gray finish with lockable hasp
8.8 in. (22.0 cm) H x 6.6 in. (16.5 cm) W x 2.9 in. (7.3 cm) D

Temperature range:

Control: -4°F (-20°C) to 131°F (55°C)
Sensor: -22°F (-30°C) to 158°F (70°C)

Switch configuration:

SPDT "dry" contacts per channel

Resistive Rating: 16 Amp, 277 VAC per channel

Ballast Rating: 8 Amp, 277 VAC per channel

Output Relay: SPDT "dry" contacts per channel

Sensor available in two variations:

- LS1 Transparent Sensor
0.2 to 50 Foot-Candles; Transparent case (IP65)
- LS2 Dark Sensor
10 to 1000 Foot-Candles; Dark UV Filter case (IP65)

Sensor time delay:

0 to 100 seconds

Humidity range:

Control: 0 to 95% RH non-condensing
Sensor: 0 to 100% RH

Shipping weight (LM series):

2 lbs. (0.9 kg)

The **LightMaster LM Series** is a control system that operates on ambient light level sensing. There are two components to the basic LightMaster offering: The 2 channel lighting controller and one ambient light sensor, which comes packaged in either an indoor or outdoor enclosure. Individual components are available to customize the LightMaster to fit your application.

LightMaster is an affordable alternative to expensive or unreliable lighting controls. It's a cost effective solution for providing additional light level control beyond the typical timer or photo control. It can be added to an existing timer.

Energy Savings

The LightMaster's accuracy and functionality exceeds that of timers and photo controls. It offers true dusk to dawn operation and can achieve additional energy savings by adjusting light levels throughout the day or night. Additionally, the LightMaster offers an affordable solution for daylight harvesting. For large installations, up to 10 units (20 channels) can be connected to a single sensor. The integral light sensitivity adjustment provides a wide range of settings, making these units applicable for control of indoor and outdoor lighting as well as automatic awnings or shades. It features a delay setting to avoid nuisance switching ON and OFF of lighting during intermittent environmental changes like clouds, lightning or headlights.

Additional Safety

The LightMaster is essential where activities are impacted by changing and inadequate light levels throughout the day. It will turn lighting ON during inclement weather and OFF when normal light levels resume.

Maintenance Savings and Convenience

The LightMaster is more reliable than photo controls and can save maintenance costs over time. It's quality construction and convenient installation features prevent the need for expensive lift trucks and crews typically used to replace failed photo controls installed on top of luminaries. The LightMaster controller can be mounted at a convenient level for programming - the sensor can be mounted up to 330 feet away from controller. Sensors are Millivolt eliminating wire cost for heavy wire.

Typical LightMaster applications below:

- Security Lighting
- ATM/Banks
- Parking Garages
- Site Lighting
- Perimeter Lighting
- Exterior Lighting, Signage
- Atriums
- Awnings, Shades, Blinds
- Industrial Yards, Off-Shore Rigs, Shipyards
- 24-Hour Retail Convenient Store/Service Establishments
- Access ways, Walkways, Driveways

Features:

Control Unit:

- Available in 1 and 2 channel control units
- 1 light level set point per channel
- NEMA 3R Outdoor or NEMA 1 Indoor enclosure
- Adjustable dial for setting foot candle levels
- 0-100 second delay adjustment to avoid nuisance switching from clouds, headlamps, lightning

Expandable:

Up to 10 control units (20 Channels) can be connected to one sensor

Sensor:

Light level sensor can be mounted up to 330 feet away from control unit
Sensors are non-arcng

Individual sensors have specific foot candle ranges:

- Dark Sensor: LS2 10 to 1000 fc
- Transparent Sensor: LS1 0.2 to 50 fc

LightMaster Lighting Control System

The Logical Alternative to Expensive or Unreliable Lighting Control

A. Steel Indoor Enclosures

• NEMA 1 Rated

- Drawn steel with gray powder coat paint finish
- Hasp (with hole for seal or lock) holds permanently attached hinged door closed
- Combination $\frac{1}{2}$ – $\frac{3}{4}$ in. nominal knockouts, one on back and on each side, and two on bottom
- Convenient mounting holes

Model Number	Description/Enclosure – Size (H x W x D)	Weight
2T2040GA*	Gray Standard Indoor Enclosure – $7\frac{3}{4}$ in. x 5 in. x 3 in.	1.4 lbs

* Available for SERIES T100, T170, T180, T1100, T1200, T1400, T1900, T2000, C8800, ET100C, ET170C, ET700C and models EH10, EH40, ET279C ET70115, ET70215, and ET8000 series.

B. Steel Indoor/Outdoor Enclosures

• NEMA 3R Rated

- For protecting time switch from rain, sleet, snow and ice
- Drawn steel with gray or beige powder coat paint
- .036 in. Heavy duty construction with side-hinged door
- Hasp provided for lock
- Combination $\frac{1}{2}$ in – $\frac{3}{4}$ in. nominal knockouts one on back and each side of enclosure, and two on bottom
- Separate grounding terminal
- Convenient mounting holes

Model #	Description/Enclosure – Size (H x W x D)	Weight
2T511GA*	Gray Standard Indoor/Outdoor – $9\frac{3}{8}$ in. x $5\frac{1}{2}$ in. x $3\frac{5}{8}$ in.	2.5 lbs
2T2485GA*	Beige Standard Indoor/Outdoor – $9\frac{3}{8}$ in. x $5\frac{1}{2}$ in. x $3\frac{5}{8}$ in.	2.5 lbs
2T2331GA**	Gray Indoor/Outdoor – $9\frac{3}{8}$ in. x $5\frac{1}{2}$ in. x $3\frac{5}{8}$ in.	2.5 lbs
2T2293GA***	Gray Indoor/Outdoor – $12\frac{1}{2}$ in. x $8\frac{1}{4}$ in. x $3\frac{7}{8}$ in.	4.0 lbs

* Available for SERIES T100, T170, T180, T1100, T1200, T1400, T1900, T2000, C8800, ET100C, ET170C, ET700C and models EH10, EH40, ET279C ET70115, ET70215, and ET8000 series.

** Available for SERIES T100CR, T170CR, T1400BR, T1400BCR, T1800BR and T1800BCR.

*** Available for SERIES T7400B, T7800B, T7400BC and T7800BC.

C. Plastic Indoor/Outdoor Enclosures

Ends rusting problems forever.

• NEMA 3R Rated

- Made of heavy-duty industrial grade plastic
- Rainproof all-plastic enclosure is perfect for applications where high humidity and/or dust can be a problem
- Plastic enclosure has combination $\frac{1}{2}$ and $\frac{3}{4}$ in. nominal knockouts, one on back and each side of enclosure, and two on bottom

Model #	Description/Enclosure – Size (H x W x D)	Weight
2T2500GA*	Gray Indoor/Outdoor Plastic – $9\frac{3}{8}$ in. x $5\frac{1}{2}$ in. x $3\frac{3}{4}$ in.	1.3 lbs
2T2502GA*	Beige Indoor/Outdoor Plastic – $9\frac{3}{8}$ in. x $5\frac{1}{2}$ in. x $3\frac{3}{4}$ in.	1.3 lbs
2T2926A*	Gray Indoor/Outdoor Plastic – $9\frac{3}{8}$ in. x $5\frac{1}{2}$ in. x $3\frac{3}{4}$ in. with 4 x $3\frac{1}{2}$ in. see through window	1.3 lbs

* Available for SERIES T100, T170, T180, T1100, T1200, T1400, T1900, T2000, C8800, ET100C, ET170C, ET700C and models EH10, EH40, ET279C ET70115, ET70215, and ET8000 series.

Time Switch Enclosures & Panels

D. 2-in-1 Raintight Enclosure and Panels

- **NEMA 3R Rated**
- Use where 2 time switches are to be mounted side by side
- Heavy-duty, spot-welded NEMA 3R construction with beige powder coat paint
- Hasp (with hole for lock) holds permanently attached hinged door closed
- Combination $\frac{1}{2}$ – $\frac{3}{4}$ in. nominal knockouts conveniently located – two on back, five on bottom and one on each side
- Top mounting brackets plus two holes below switch level on back of enclosure

Model Number	Description/ Enclosure or Panel – Size (H x W x D)	Weight
T10000R*	2-in-1 Indoor/Outdoor – 10½ in. x 10½ in. x 4 in.	6.5 lbs
(replaces 2T2089GA)	Enclosure	
T21000R*	Indoor/Outdoor Panel – 10½ in. x 10½ in. x 4 in. with 4/8 Breaker Base	
T30000R*	Indoor/Outdoor Panel – 16¾ in. x 10½ in. x 4¼ in. with 8/16 Breaker Base	11.0 lbs
T40000R*	Indoor/Outdoor Panel – 20¾ in. x 12¾ in. x 4¼ in. with 8/16 Breaker Base	17.0 lbs

* Available for SERIES T100, T170, T1900, T2000 and C8800. NOT FOR T1400/T1800 series and other models with carryover.

E. Flushmount Enclosure

- **NEMA 1 Rated**
- For concealing mechanism in wall and giving a finished, flush appearance
- Heavy-duty, formed steel construction with hinged door
- Gray finish with powder coat paint
- Convenient mounting holes
- Cutout 9⅞ in. H x 6 in. W x 4⅞ in. D; flange 11 in. H x 8 in. W

Model Number	Description	Weight
2T308A*	Standard Flushmount w/Lock	6.5 lbs
2T2365GA**	Flushmount Enclosure w/Lock	7.0 lbs
6ET1398GA	Flush Cover for ET70415CR and ET70415CR24	2.5 lbs

* Available for SERIES T100, T170, T180, T1900, T2000 and C8800. NOT FOR T1400/T1800/T1900 MODELS WITH BCR SUFFIX.

** Available for SERIES ET100C, ET170C, ET700C and models EH10, EH40, ET279C, ET7115C, ET7215C, ET70215C and ET70115C.

F. Mounting Brackets

- Heavy gauge steel mounting bracket mounts to a standard symmetrical rail TS35 according to DIN46277 and EN50022
- Ideal for panel mounting of mechanical or electronic time switch controls, alongside of other DIN rail mountable electrical devices
- Snap-in type bracket accepts a wide range of Intermatic time switches including most T100, T170, T180, T1900, T2000, C8800, ET100, ET170, ET700 and ET70000 time switches

Model Number	Description	Weight
22T535GR	DIN Rail Bracket – 6 x 5 x 2 in.	1.0 lbs
22T338GR	Surface Mount Snap-in Bracket – 6 x 5 x 2 in.	1.0 lbs

Energy Master Panels

Common Features:

- Energy Master Control System provides 100% digital replacement for traditional time clocks, spring-wound timers and contractor packages
- Panels and switches daisy-chain together using Category 5 patch cables with RJ45 Connectors
- The digital timing control of the EM1400 Energy Master Series includes many advance features and provides for complete control of up to 256 circuits
- Control options are enhanced by the ability of the EM1400 series to accept inputs from a variety of accessory devices including digital photo sensors, dry contact closures, keypads & switches, as well as peripheral devices such as serial and ethernet interfaces

Master Control with Digital Time Control

Features:

- 32 independent 365-day schedules
- Astronomical timing of Sunrise and Sunset events
- Large LCD user interface display
- Ten-year battery backup of time-of-day
- Non-volatile system memory stores all programming
- Manual override of each circuit
- On-board digital contact closure inputs
- On-board photo sensor input

MASTER PANELS – MC Suffix

System Inputs: 14 Digital contact closure inputs and 1 Photo sensor input (Use EM14PS photo sensor)

Programming: Via EM1400 clock or via PC with EMI-Manager Software

Power Supply Voltage: 120-277 VAC

Bus Specifications: 16 devices maximum

Bus Protocol: RS 485 (EM1400 bus)

Bus Connector: RJ45 Connectors

Bus Length: 4000 feet maximum

Max. Humidity: 10% – 90% Non-condensing

Ambient Temperature: 0° – 105°F

Enclosure Type: Surface mount, hinged cover enclosure with friction catch, NEMA 1

Enclosure Dimensions: 12 in. W x 18 in. H x 6 in. D (8 or 16 relays)

Listings: UL/CUL 916 listed, ETL listed to UL 924 (for emergency circuit use)

SLAVE PANELS – SC Suffix

System Inputs: 14 Digital Contact Closure Inputs

No photo sensor input on slave panel

Power Supply Voltage: 120-277 VAC

Bus Protocol: RS 485 (EM1400 bus)

Bus Connector: RJ45 connectors

Max. Humidity: 0% – 90% Non-condensing

Ambient Temperature: 0° – 105°F

Enclosure Type: Surface mount, hinged cover enclosure with friction catch, NEMA 1

Enclosure Dimensions: 12 in. W x 18 in. H x 6 in. D (8 or 16 relays)

Listings: UL/CUL 916 listed, ETL listed to UL 924 (for emergency circuit use)

Energy Master Series Advanced Lighting Control System

Energy Master Control Stations

- These 100% digital momentary switches control partitions, groups or scenes of lighting
- A single button can be set to control up to 240 circuits
- Programming also allows keypad inputs to be configured for momentary, toggle or bypass timing, as well as many other popular switching functions
- Control stations may be ordered with up to six buttons per gang

Model #	Buttons	Style	Color
EMKB1	1	Decorator	White
EMKB2	2	Decorator	White
EMKB3	3	Decorator	White
EMKB4	4	Decorator	White
EMKB5	5	Decorator	White
EMKB6	6	Decorator	White

Energy Master Rocker Stations

- Look like traditional wall switches
- Rocker switches provide a familiar interface to a modern lighting control system and can be mounted in standard switch boxes
- Both digital and contact closure rocker switches can be programmed to control any relay in any panel in the system

Model EMDS

The Momentary Rocker Switch interfaces with the lighting control system through digital contact input on the master control panel or through connection to photo sensor input module (EMPS3IN).

Model EMRS-W-D

The Digital Rocker Switch interfaces directly with the lighting control system communication bus using standard Category 5 patch cables with RJ45 connectors.

Energy Master Series Advanced Lighting Control System

EMSL-NC & EMSL-NO

EMSL600NC & EMSL600NO

Energy Master 120 – 347 Volt Relay Modules

Intermatic offers a variety of relay configurations for different applications including the demands of today's high-efficiency ballast loads. Each relay is individually removable from the insulating track, where it is mounted within the relay panel. All relays are UL and CUL 916 listed as well as ETL Listed to UL Standard 924.

Model EMSL-NC – Normally Closed Latching Relay

Model EMSL-NO – Normally Open Latching Relay

Load Ratings

Ballast: 30 Amp, 277 VAC

Tungsten: 20 Amp, 120 VAC

Ballast: 20 Amp, 347 VAC

Performance Ratings

Maximum conductors: 2 each # 8AWG per lug

Short circuit current rating: 18,000 Amps, 277 VAC

Cycle rating: 250,000 Cycles

Energy Master 600 Volt Relay Modules

The 600 volt double-pole relay occupies the footprint of two standard single-pole relays when mounted in a EM1400 Series panel. The 600 volt relay is ideal for 277/480v (347/600 in Canada) HID loads and eliminates the need to have relays controlling lighting contactors.

Model EMSL600NC: Normally Closed Double-Pole 600 Volt Relay

Model EMSL600NO: Normally Open Double-Pole 600 Volt Relay

Load Ratings

Ballast: 20 Amp, 600 VAC

Motor: 1 HP, 120-208 or 120-240 VAC, 2 HP, 277-480 VAC (or 347-600 VAC in Canada)

Performance Ratings

Maximum Conductors: 2 each # 8AWG per lug

Short Circuit Current Rating: 5,000* Amps, 600 VAC

* Implied SCCR for all UL 50 or UL 916 products is 5000 Amps.

This relay has not been tested to any specific SCCR.

Energy Master Panels, Control Switches and Relays are intended to be used together and as a complete system. These products cannot be used outside the system or in conjunction with a system other than Energy Master.

Energy Master Series Advanced Lighting Control System

Energy Master Photo Sensors & Accessories

Intermatic has a complete line of photo sensors to optimize your lighting control system for both simple and complex site lighting applications and can even stagger ON lighting as outdoor light levels decrease. When using the photo sensor input module in conjunction with digital photo sensors, the system is capable of delivering up to 14 different levels of lighting in reaction to sensed ambient light.

Model EM14PS Outdoor Local Photo Sensor

- May be incorporated into outdoor lighting schedules (Photo sensor ON, time clock OFF)
- Designed for single zone or multi-zone lighting applications
- Suitable for wet locations
- Standard ½ in. – 14 threaded mounting

Model EMOPS1 Outdoor Digital Global Photo Sensor

- When combined with a photo sensor input module, this sensor provides up to 14 different trigger points, each controlling a unique relay group in as many as 15 relay panels
- Designed for single zone or multi-zone lighting applications
- Suitable for wet locations
- Standard ½ in. – 14 threaded mounting

Model EMPS3IN Photo Sensor Input Module

- Accepts input from up to 3 connected indoor or outdoor Digital Photo Sensors or contact closure inputs
- Up to 14 switch-trigger points
- Inputs may be digitally enabled or disabled via time clock or other controllers such as digital switch, building automation or occupancy sensors
- Triggers act as global ON and OFF commands; each programmed at a unique light level and controlling a unique group of relays
- Advanced daylight harvesting features

Model EM-MOD Modem Module

- Mounts directly into the EM1408MC or EM1416MC master panel
- Allows the EM1400 series to be programmed remotely over standard telephone lines
- Requires EMI-Manager Software

FWZ Series

FWZ 36, 53, and 55 Hour Meters are rectangular flush panel mount designed to fit into tight locations. All can withstand an IP20 environmental rating (IP54 with use of gasket). See page 161 for explanation of IP classifications.

All models also available with 1/4 in. spade terminals without screw clamp.

FWZ53-120/50U, FWZ53-120U & FWZ53-24U

Specifications:

- Bezel: 1.42 x 0.95 in. (36 x 24mm)
- Capacity: 99,999.99 hours
- Digits: 7 – 0.16 in. high numerals
- Voltage: 24, 120, 240 VAC, 50/60 Hz models
- Power Consumption: 2 Watts
- Temperature: –40° to 160°F (–40° to 72°C)
- Termination: Combination 1/4 in. spade and screw clamp. Rear access screw terminals available (model "K")
- Weight: 1.2oz
- Flush panel retainer mounted with wire spring clip retainer
- Panel Opening: 1.36 x 0.90 in. rectangular (34.5 x 23mm)

FWZ55K-240U*, FWZ55-220/50, FWZ55K-120U*, FWZ55K-220/50, FWZ55-120U & FWZ55-240U

Specifications:

- Bezel: 2.36 x 1.36 in. (60 x 34.5mm)
- Capacity: 99,999.99 hours
- Digits: 7 – 0.16 in. high numerals
- Voltage: 24, 120, 240 VAC, 50/60 Hz models
- Power Consumption: 2 Watts
- Temperature: –40° to 160°F (–40° to 72°C)
- Termination: Combination 1/4 in. spade and screw clamp. Rear access screw terminals available (model "K")
- Weight: 1.8oz
- Flush panel retainer mounted with slip-on plastic retaining bracket
- Panel Opening: 2.06 x 1.08 in. rectangular (52 x 27.5mm)

* Rear access screw terminals

All can withstand an IP20 environmental rating. See page 161 for explanation of IP classifications.

Black Polycarbonate

Specifications:

- Bezel: 2.83 in. round (72mm) 3-hole
- Capacity: 99,999.99 hours
- Digits: 7 – 0.16 in. high numerals
- Voltage: 24, 120, 240 VAC, 50/60 Hz models
- Power Consumption: 2 Watts
- Temperature: -40° to 160°F (-40° to 72°C)
- Termination: Combination ¼ in. spade and screw clamp. Rear access screw terminals available (model "K")
- Weight: 1.8oz
- Flush panel mounted with (3) 0.185 in. holes for #8 screws
- Panel Opening: 1.75 in. round (44.5mm) or 1.50 x 1.00 in. rectangular (38 x 25mm)

*Rear access screw terminals (Model "K").

FWZ72B-240U & FWZ72B-24U

Blue-Silver on Colorless Frosted Polycarbonate

Specifications:

- Bezel: 2.83 in. round (72mm) 3-hole
- Capacity: 99,999.99 hours
- Digits: 7 – 0.16 in. high numerals
- Voltage: 24, 120, 240, 50 or 60 Hz models
- Power Consumption: 2 Watts
- Temperature: -40° to 160°F (-40° to 72°C)
- Termination: Combination ¼ in. spade and screw clamp
- Weight: 1.8oz
- Flush panel mounted with (3) 0.185 in. holes for #8 screws
- Panel Opening: 1.75 in. round (44.5mm) or 1.50 x 1.00 in. rectangular (38 x 25mm)

FWZ72C-120

Blue-Silver on Colorless Frosted Polycarbonate

Specifications:

- Bezel: 2.83 in. round (72mm) 3-hole
- Capacity: 99,999.99 hours
- Digits: 7 – 0.16 in. high numerals
- Voltage: 24, 120, 240 VAC, 50/60 Hz models
- Power Consumption: 2 Watts
- Temperature: -40° to 160°F (-40° to 72°C)
- Termination: Combination ¼ in. spade and screw clamp
- Weight: 1.8oz
- Flush panel mounted with (3) 0.185 in. holes for #8 screws
- Panel Opening: 1.75 in. round (44.5mm) or 1.50 x 1.00 in. rectangular (38 x 25mm)

UWZ Series

The UWZ 48 Series is designed to meet IP20 environmental rating for indoor applications. All can withstand an IP20 environmental rating (IP54 with use of gasket). See page 161 for explanation of IP classifications. All models are light gray color with white numerals on black background. Tenths and hundredths numerals are yellow. An orange dial adjacent to the hundredths digit provides running indication.

UWZ48-120U, UWZ48-240U, UWZ48-24U & UWZ48-220/50U

Surface mounted type. The UWZ 48 unit with plug-in base where terminal protection is not necessary. The socket base is easy to install and connect. The meter is simply plugged into the base and secured by one screw.

Specifications:

- Bezel: 1.89 x 1.89 in. (48 x 48mm)
- Capacity: 99,999.99 hours
- Mounting: Surface
- Digits: 7 – 0.16 in. high
- Voltage: 24, 120, 240 VAC, 50/60 Hz
- Power Consumption: 2 Watts
- Temperature: -40° to 160°F (-40° to 72°C)
- Termination: Screw Lugs
- Weight: 2.5oz.

UWZ48A-120U & UWZ48A-24U

Wall mounted type. Used in conjunction with a terminal cover for added safety, the UWZ 48A is surface mounted. Installation merely requires fixing the base to wall or panel with two screws, wiring the base, and plugging in the meter with the terminal cover.

Specifications:

- Bezel: 1.89 x 1.89 in. (48 x 48mm)
- Capacity: 99,999.99 hours
- Mounting: Surface
- Digits: 7 – 0.16 in. high
- Voltage: 24, 120, 240 VAC, 50/60 Hz
- Power Consumption: 2 Watts
- Temperature: -40° to 160°F (-40° to 72°C)
- Termination: Screw Lugs
- Weight: 2.5oz.

AC Hour Meter (Non-Reset Type)

UWZ Series Cont.

UWZ48E-120U, UWZ48E-240U, UWZ48E-24U, UWZ48E-220/50U & UWZ48E-24/50U

Flush mounted with bracket. The UWZ 48E unit fits into a 1.79 x 1.79 in. (45.5 x 45.5mm) cut-out. The thickness of the panel for flush mounting can be up to 0.35 in. (9mm). The unit is secured in position by a plastic slip-on retaining bracket. Also fits square or round openings for 72mm meters with optional 72mm bezel. All can withstand an IP20 environmental rating (IP54 with use of gasket). See page 161 for explanation of IP classifications.

Specifications:

- Bezel: 1.89 x 1.89 in. (48 x 48mm)
- Capacity: 99,999.99 hours
- Mounting: Flush
- Digits: 7 – 0.16 in. high numerals
- Voltage: 24, 120, 240 VAC, 50/60 Hz
- Power Consumption: 2 Watts
- Temperature: -40° to 160°F (-40° to 72°C)
- Termination: Combination ¼ in. spade and screw clamp
- Weight: 2.1oz

UWZ52E-120U

Flush mounted with bracket. The UWZ 52E with round face is fastened with a plastic slip-on retaining bracket. For larger cutouts up to a 60mm diameter, a slip-on 65mm bezel is available.

Specifications:

- Bezel: 2.28 in. round (58mm)
- Capacity: 99,999.99 hours
- Mounting: Flush
- Digits: 7 – 0.16 in. high numerals
- Voltage: 24, 120, 240 VAC, 50/60 Hz
- Power Consumption: 2 Watts
- Temperature: -40° to 160°F (-40° to 72°C)
- Termination: Combination ¼ in. spade and screw clamp
- Weight: 2.1oz

UWZ48V-120U & UWZ48V-24U

DIN rail mounting. A special snap-on socket base enables the unit to be quickly and simply fitted on DIN rail.

Specifications:

- Bezel: 1.89 x 1.89 in. (48 x 48mm)
- Capacity: 99,999.99 hours
- Mounting: DIN Rail
- Digits: 7 – 0.16 in. high numerals
- Voltage: 24, 120, 240 VAC, 50/60 Hz
- Power Consumption: 2 Watts
- Temperature: -40° to 160°F (-40° to 72°C)
- Termination: Combination ¼ in. spade and screw clamp
- Weight: 2.5oz

DC Hour Meter (Non-Reset Type)

GRASSLIN™
by **INTERMATIC®**

GZ40AU

GZ40BU

GZ52BU

GZ Series

Hour meter series set to operate on DC voltages.

Measures up to six digits for machinery, etc... in order to determine usage. All can withstand an IP20 environmental rating (IP54 with use of gasket). See page 161 for explanation of IP classifications.

GZ40AU

Specifications:

- SAE Bezel: 2.31 in. diameter (59mm)
- Capacity: 99,999.9 hours
- Digits: 6 – 0.125 high numerals; Hours: white on black; Tenths: red on white
- Voltage: 4-40 VDC and 10-80 VDC
- Power Consumption: .03 W, 12VDC; .70 W, 48 VDC
- Temperature: -22° to 150°F (-30° to 65°C)
Special Model Temp: -40° to 185°F (-40° to 85°C)
- Vibration Resistance: 10-75 Hz, 1-8g's
- Protected From: reverse polarity, inductive switch
- Weight: 2oz

GZ40BU

Specifications:

- 3-Hole Bezel: 2.80 in. diameter. (72mm)
- Totally sealed enclosure
- Capacity: 99,999.9 hours
- Digits: 6 – 0.125 high numerals; Hours: white on black; Tenths: red on white
- Voltage: 4-40 VDC and 10-80 VDC
- Power Consumption: .03 W, 12 VDC; 70 W, 48 VDC
- Temperature: -22° to 150°F (-30° to 65°C)
Special Model Temp: -40° to 185°F (-40° to 85°C)
- Vibration Resistance: 10-75 Hz, 1-8g's
- Termination: 1/4 in. spade terminals
- Protected From: reverse polarity, inductive switch
- Weight: 2oz

GZ52BU

Specifications:

- Operating Voltage: 8-30 VDC
- Current Consumption: < 3 mA, 12 VDC
- Accuracy: ±0.5 sec/day at 20°C
- Mechanical Movement: 2-Phase Step Motor
- Display: 6 Digits (99999.9 Hours)
- Operation Indicator: LED
- Bezel: Black (Plastic) Circular
- Electrical Connection: 1/4 in. Quick Connectors
- Polarity Protection: Diode
- Mounting: Flush (screw adj.)
- Operating Temperature: -40° C – 85°C
- Storage Temperature: -40° C – 90°C
- Environmental Rating: IP65
- Shock Resistance: DIN EN60068-2-27
- Vibration Resistance: DIN EN60068-2-64
- Approvals: CE

DC Hour Meter (Non-Reset Type) & Accessories

RZ Series

The Hour Meter Without Electrical Connection

RZ52HU, RZ52DHU, RZ52VU & RZ52V

The RZ hour meter records the running time of machines, vehicles, etc. which vibrate during operation. The automatic mechanism in this meter converts vibrations into energy which drives the hour meter and minute sweep hand. It is so sensitive, it is capable of operating from the slight vibration of a moving car. All can withstand an IP20 environmental rating (IP54 with use of gasket). See page 161 for explanation of IP classifications.

FD Decorator Series Auto-Off Timers

Features:

- Energy saving timers use no electricity to operate
- Designed to replace any standard wall switch, single or multi-gang
- Automatically limits ON time of fans, lights, motors, heaters and other energy-consuming loads
- Time limits of 5, 15, 30 and 60 minutes and 2, 4, 6, and 12 hours available
- "Hold feature" allows the user to override the automatic shut-off function for extended use of the load as required
- Supplied with a molded white, ivory, or almond time dial plate designed to fit either toggle or decorator style switch plates
- Single or multi-gang with no field modifications required to fit either style switch plate
- Time saving "up front" terminal connection with teeter type terminals
- Easy "press-on" knob design ensures quick and easy installation

Applications:

- Indoor Lighting
- Outdoor Lighting
- Lighting Overrides
- Exhaust Fans
- Whole House Fans
- Ventilating Fans
- Tennis Court Lighting
- Pumps
- Air Conditioners
- Steam Rooms
- Bathroom Fans
- Whirlpools
- Porch Lights
- Broom Closets
- Carriage Lights
- Television Sets
- Self Storage Units

Commercial Spring Wound Timers

FF Commercial Series Auto-Off Timers

Features:

- Energy saving commercial timers use no electricity to operate
- Designed to replace any standard wall switch, single or multi-gang
- Automatically limits ON time of fans, lights, motors, heaters, etc...
- Time limits of 5, 15, 30 and 60 minutes and 2, 4, 6, and 12 hours available
- "Hold feature" allows the user to override the automatic shut-off function for extended use of the load as required
- Rugged time-dial plate takes the abuse encountered in commercial environments
- Commercial "brush metal" look meets NEC requirements. (Plastic Construction)
- Time saving "up front" terminal connection with teeter type terminals
- Easy "press-on" knob design ensures quick and easy installation

Applications:

- Indoor/Outdoor Lighting
- Pumps
- Television Sets
- Lighting Overrides
- Air Conditioners
- Closet/Storage Units
- Fans
- Steam Rooms/Whirlpools
- Engine Block Heaters

Specifications:

In-Wall Timer (24 Hour)

Features:

- Replaces standard wall switch (toggle) to provide automatic control of outdoor or indoor lighting, fans, pumps, office machines, and other types of circuits
- Captive trippers are easy to set, cannot be lost
- Tripper intervals are 20 minutes
- 72 trippers provide up to 36 ON/OFF events in 24 hour period
- Three way, OFF/AUTO/ON override switch provides continuous ON or OFF positions
- UL Listed and CSA C/US Listed
- Easy wiring and installation
- Multiple plates available
- Reliable, synchronous timer motor
- Easy wiring and installation
- Works with fluorescent and compact fluorescent lights

Specifications

Switch Rating:

21 Amp, 250 VAC, 60Hz; 1 HP, 125 VAC; 2 HP, 250 VAC; 1350 W Tungsten

Environmental Ratings:

Operating Temperature Range: -40°F to 180°F (-40°C to 85°C)

Operating Humidity: 0 to 95% Non-condensing

Wiring Connections: (3) #14AWG color coded lead wires

Hot – Black

Switched – Red

Neutral – White

Electronic Auto-Off Timers

EI200 Series

Decorator Electronic Auto-Off Timer

Features:

- Provides silent operation in time ranges from 30 minutes up to 12 hours
- Four basic models available in three colors reduce the need to stock many competitive models
- Available in White, Ivory, and Light Almond
- Replaces single-pole switches in a variety of applications
- Requires neutral wire

Specifications:

Switch: Single-pole

Switch Rating:

Resistive (heater): 15 Amp, 120 VAC, 1800 Watts

Tungsten (incandescent): 8.3 Amp, 120 VAC, 1000 Watts

Ballast (fluorescent): 8 Amp, 120 VAC

Motor: 1/4 HP, 120 VAC

Cycle: 50/60 Hz.

Operating Ambient Temperature Range: 32°F (0°C) to 122°F (50°C)

Caution: Do not use for sunlamps, sauna, etc...

Style: Can be used with decorator type switch plates (Not included)

EI400 Series Decorator Digital Auto-Off In-Wall Timer

Effectively replaces 16 different spring-wound models, freeing up additional shelf space, providing more specification flexibility, ease of installation and absolutely silent operation.

Features:

- Timer setting from 1 second to 24 hours – To-the-second accuracy
- Provides “true” 3-way control allowing the load interval to be started and stopped using a standard mechanical switch
- No Neutral Wire required
- Factory supplied CR2 lithium battery provides up to three years of time keeping without AC power
- User program selection stored in non-volatile memory
- Low battery indicator
- ADA Compliant
- Warning feature provides an audible and/or visual signal that load is switching off
- Functions to control all voltages and frequencies (within the correct ratings) with no adjustments required
- CFL Compatible
- Available in White, Ivory, and Light Almond
- Decorator Styling (*switch plate NOT included*)

Applications:

- Indoor Lighting
- PAR Lights
- Exhaust Fans
- Air Conditioners
- Tennis Court Lighting
- Whirlpools
- HID Lighting
- Carriage Lights
- Library Lights
- Fluorescent Lighting
- Lighting Overrides
- Recreational Vehicles
- Ventilating Fans

Digital 7-Day Time Switch

EI500 Series

Decorator Digital In-Wall 7-Day Time Switch

Features:

- Compact 7-day timer provides up to 7-ON and 7-OFF operations per week
- Can be used for 24-hour or 7-day load control of lights, fans, pumps, and other medium-duty loads
- Compact, quiet, low profile design is easy to program for to-the-minute 24-hour or 7-day control
- Display continuously shows time of day, day of the week, timer load and the load status
- Available in three colors: white, ivory and light almond
- Can be used with decorator type switch plates (Not included)
- Replaces single-pole switches in a variety of applications
- Requires neutral wire

Applications:

- Hall Lights
- Ceiling Lights
- Whole House Fans
- Paddle Fans
- Porch Lights
- Outdoor Lights
- Air Conditioners
- Coffee Makers
- Boilers
- Attic Fans
- Industrial Fans
- Automated Control

Specifications:

Switch: Single-pole

Switch Rating:

Resistive (heater): 15 Amp, 120 VAC, 1800 Watts

Tungsten (incandescent): 8.3 Amp, 120 VAC, 1000 Watts

Ballast (fluorescent): 8 Amp, 120 VAC

Motor: ¼ HP, 120 VAC

Cycle: 50/60 Hz.

Caution: Do not use for sunlamps, sauna, etc...

Events: 7 ON & 7 OFF events per day

EI600WC
White

EI600LAC
Light Almond

Energy Code Tip:

Meet energy codes with a simple wall switch replacement. Manual ON assures lights are used only when needed. The sweep OFF makes sure lights are not left ON all night long with a switch that is set to turn OFF multiple times in the evening. Replace wall switch occupancy sensors to eliminate nuisance turn OFF.

EI600 Series Decorator Electronic 7-Day Astro Time Switch

Features:

- Easy-to-program timer provides up to 42 ON/OFF operations per week
- No Neutral Wire required
- CFL Compatible
- Auto Daylight Saving Time adjustment
- Can be used for 24-hour or 7-day load control
- Astronomic feature provides sunset ON and sunrise OFF settings or combine astronomic feature with specific timed ON/OFF programming
- Independent 7-day programming provides complete flexibility for applications where load switching differs each day of the week
- Low battery indicator
- Display continuously shows time of day, day of the week, time load and load status
- The timer has an isolated single pole single throw switch which allows the timer to switch any load type, including PAR lamps and motor loads from 12-277 VAC or 12-28 VDC, within the specified ratings
- A "3 wire" design allows the timer to replace, or be used as a single-pole or 3-way (multi-way) switch
- Factory-supplied CR2 lithium battery provides up to three years of time keeping without AC power
- User program selections are stored in non-volatile memory
- Random setting feature available to avoid predictable "time controlled" look
- Decorator Styling (switch plate not included)
- Available in White, Ivory, and Light Almond

Specifications:

Switch: Single-pole or 3-way (multi-way) Compatible

Switch Rating:

Resistive (heater): 20 Amp, 120-277 VAC

Tungsten (incandescent): 15 Amp, 120 VAC; 6 Amp, 208-277 VAC

In-Wall Timers

ST01C (White) & ST01AC (Almond)

Heavy Duty In-Wall Timers with Astronomic Feature

Can be used with four separate programming options:

Same settings Monday through Friday, Saturday & Sunday, all 7 days of the week or individual daily settings.

Features:

- Automatic DST and flexible for future changes, if needed
- Set it once and never set it again; follows daily changes in sunrise/sunset times
- For single pole and three way applications up to 100 ft..
- Controls lighting including fluorescent and heavy duty loads such as fans and appliances
- No neutral wire required
- Up to 6 ON/OFF settings per 7-day period for a total of 42 ON/42 OFF settings per week
- Easy-to-set 6 button programming
- LCD digital clock and readout
- To-the-minute setting accuracy
- Battery backup with replaceable battery
- Random setting feature available to avoid predictable "timer controlled" look
- Manual override feature
- Use with decorator-style wall plate (not included)

Specifications:

Resistive: 15 Amp, 120-277 VAC

Tungsten: 15 Amp, 120 VAC; 6 Amp, 208-277 VAC

Ballast: 8 Amp, 120 VAC; 4 Amp, 208-277 VAC

Motor: 1 HP, 120 VAC; 2 HP, 240 VAC

DC Loads: 4 Amp, 12 VDC; 2 Amp, 28 VDC

Heavy Duty In-Wall Time Switches

Features:

- Heavy duty timers used to turn on lights, fans, pumps and other heavy duty loads for energy savings, security and convenience
- Designed to mount to any standard junction box for replacing a wall switch
- Available in single ON/OFF or multiple ON/OFF type
- Easy to use manual override
- Model E1010 equipped with a 24-hour dial divided in half-hour increments
 - Permanently attached ON and OFF tripper permitting single "ON/OFF" control every 24 hours
- Model E1020 equipped with a multiple program dial
 - Dial accommodates 12 ON and 12 OFF trippers
 - Furnished with two ON and two OFF trippers
- Both timers have three color code leads and require a hot, neutral and one side of the load

Specifications:

Size: 4¼ in. (10.8 cm) H x 3¼ in. (9.5 cm) W x 1⅝ in. (3.5 cm) D

Switch Rating: 120 VAC, 60 Hz; 1440 W Tungsten; 12 FLA; 15 Amp Resistive

Timing Cycle: Minimum ON time ½ hour, maximum ON time 22½ hours; Minimum time between any two ON trippers (and any two OFF trippers) is 2 hours

Programmable 24-hour Security Timer

Caution: *NOT for use with Compact Fluorescents*

Features:

- Up to 24 ON/24 OFF settings per day
- Random setting turns light ON and OFF at slightly different times each day
- Self-learning feature: if not manually programmed, it will repeat the first 24 hr. ON/OFF pattern
- 15 minute memory guard protects against power failure
- Replaces any standard wall light switch
- Use with existing wall plate; standard (toggle) or decorator (rocker) styles (not included)

Specifications:

500 Watts Incandescent, 120 VAC, 60 Hz

EJ500C

Indoor Digital Wall Switch Timer with Astronomic Feature

Caution: *NOT for use with Compact Fluorescents*

Features:

- Flushmount design
- 7 ON/7 OFF settings per day
- Controls incandescent lighting
- Easy to set programming
- Automatic Daylight Saving Time adjustment
- Follows daily changes in sunrise/sunset times; Set it once and never set it again
- Replaceable Battery backup guards against memory loss
- Replaces any standard wall switch
- Use with decorator style wall plate (not included)

Specifications:

500 Watts Incandescent, 120 VAC, 60 Hz, 4 Amp Tungsten

EJ500AC

Indoor Digital Wall Switch Timer with Astronomic Feature

Caution: *NOT for use with Compact Fluorescents*

Features/Specifications:

- Same as EJ500C except Almond Color

Plug-In Timers

Indoor and Outdoor Timers

Reduce Utility Costs — Intermatic timers help reduce energy consumed by household loads. Mechanical or digital, indoor or outdoor, plug-in or in-wall, Intermatic has a timer to control most residential loads.

Flexible scheduling and easy to program – Multiple events scheduling, astronomic function, and to-the-minute accuracy are just a few of the features of our digital plug-in timers.

Safety and Security — Intermatic timers provide the control you need to keep your home safe and comfortable. Never come home to a dark house again.

TN311C Heavy-Duty Indoor Timer

- Grounded receptacle and plug
- 3 ON/3 OFF settings per day
- For air conditioners, heaters and other heavy electrical loads

Ratings:

15 Amp Resistive, 1750 W Tungsten & Resistive, 125 VAC, 60 Hz,
1 HP, (12 FLA, 72 LRA), 120 VAC Motor (12 Amp Air Conditioner)

DT620CL Heavy Duty Indoor Digital Timer

Specifications:

- Pool Pumps
- Holiday Lights

TN111RM40 Great For:

- Landscape Lighting Transformers

For additional trippers see page 158,
model numbers 107TN221 (red trippers)
& 107TN222 (turquoise trippers)

Plug-In Appliance Timers

HB112C

HB112C

Air Conditioner & Appliance Timer

Features:

- Automatically controls 240 VAC air conditioners, heaters, heavy-duty appliances and lamps
- 3,750 Watt capacity
- Plugs directly into wall outlet
- 2 ON/2 OFF settings per day
- 3-prong 220-240 VAC grounded plug and receptacle
- Manual override ON/OFF switch

Specifications:

3750 W, 240 VAC; 2 HP, 240 VAC Max. Motor Load

HB113C

HB113C

Air Conditioner & Appliance Timer

Features:

- Same as HB112C except for the following:
- Automatically controls 120 VAC air conditioners, heaters, heavy-duty appliances and lamps
- 2,500 Watt capacity

Specifications:

2500 W, 120 VAC; 1 HP, 120 VAC Max. Motor Load

HB114C

HB114C

Air Conditioner & Appliance Timer

Features:

- Same as HB112C except for the following:
- 5,000 Watt capacity

Specifications:

5000 W, 240 VAC; 2 HP, 240 VAC Max. Motor Load

Note: For additional trippers see page 159, model numbers 107SB189 (red trippers) & 107SB192 (Black trippers).

Photo Controls

Photo Controls

Full line of SPST thermal type photo controls and relay type photo controls provide "dusk-to-dawn" lighting control.

Thermal type photo controls feature:

- Cadmium sulfide photocell
- Sonic welded polycarbonate housing and lens to seal out moisture
- Delay action which eliminates loads switching OFF due to car headlights, lightning, etc.
- Design utilizes a temperature compensating bimetal and a metal film resistor for reliable long life operation over ambient temperature extremes

Applications:

- Parking Lot Lighting
- Area Lighting
- Car Lot Lighting
- Security Lighting
- Billboard Lighting
- Municipal Lighting
- Roadway Lighting
- Street Lighting

K4000C Series

Fixed Position Mounting, Thermal Type

- Designed to fit into standard outlet box, post lamp or wall packs
- Model K4321 includes a weatherproof wall plate with neoprene gasket. UL listing for this model applies to the entire plate assembly when properly mounted to an approved outdoor junction box
- All other models equipped with a $\frac{3}{8}$ in. – 18 threaded side mounting, locking nut and washer gasket
- All models with 9 in. leads

Specifications:

Unless noted otherwise, the specifications listed below apply to K4000, K4100, K4200, K4300 & K4500 Series.

Size: See individual models. Most hard wired models supplied with 6 in. leads

K4000 fixed position models have 9 in. leads

Switch Rating: See chart for each series.

Note: The ballast wattage rating is based upon a 50% power factor

Activation: 1-5 FC ON; 3-15 FC OFF (without shield on models with shield)

Color: Gray

Shipping Weight: See individual models

Size: Plate – $4\frac{1}{2}$ in. (11.4 cm) H x $2\frac{3}{4}$ in. (7.0 cm) W

Mechanism – $1\frac{5}{16}$ in. (3.3 cm) W x $1\frac{13}{16}$ in. (4.6 cm) L x $\frac{1}{16}$ in. (2.1 cm) D

LC4500 Series

Low Cost Locking-Type, Thermal Type

The LC4500 Series provides low cost, reliable control for street lighting and other applications requiring a NEMA twist and lock type plug connection. An integral polypropylene housing with UV protection, keeps moisture out and ensures long life. Complies with ANSI C136.10 standard.

Activation: .5 FC minimum ON; 15 FC maximum OFF

Size: 2¾ in. (7.0 cm) High, 3 in. (7.6 cm.) Diameter

Color: Translucent with color coded band for voltage identification

Photo Controls

Solid State Photo Controls – Locking-Type

The **K4536SS** Photo Control is electronically calibrated and provides reliable control of street lighting and other applications requiring a NEMA plug-in locking type connection. Complies with ANSI C136.10 standard.

The **K4536SST** is the most energy efficient photo control available today by offering a photo control and a timer all in one! This electronically calibrated solid state model continually adjusts itself and never needs resetting. Let the K4536SST pay for itself by reducing your energy bill.

K4536SST Features:

- No time switch needed
- Turns ON like a photo control and OFF like a time switch
- Turns lights ON at dusk, OFF at user's pre-set time throughout the night and turns the lights ON again at user's pre-set time in the morning
- Provides a fixed OFF time adjustable in half-hour increments from 6:00 p.m. – 2:00 a.m. and a fixed ON time adjustable in half-hour increments from 4:00 a.m. – 8:00 a.m.
- Easily retrofits any standard locking-type photo control
- No rewiring — fits ordinary locking-type socket
- Automatically resets itself after power outage
- Complies with Federal Energy Act, California Title 24, and Dark Sky Initiative

Activation: 3 FC ON, 2-4 FC OFF

Operation: Instant ON, 10 Second Delay OFF

Size: 23¾ in. (7.0 cm) High, 3 in. (7.6 cm) Diameter

Color: Translucent with color coded band for voltage identification

Power Packs

Intermatic offers the widest variety of power packs in any wattage and control option your system may require. Power Packs are available from 44 to 900 Watts, allowing you to choose which power supply is right for your particular lighting plan.

All power packs are certified for safe operation and long life. Keyhole mountings are featured for ease of operation and installation. See chart below for available power packs and features.

120 VAC input, 12 VAC output

Models	Max. Wattage Output	Specifications	Color
ML44T	44 Lamp Watts	Timer with 2 sets of trippers	Black
ML88T	88 Lamp Watts	Timer with 2 sets of trippers	Black
ML100THB	100 Lamp Watts	Electronic Timer and photo control	Black
ML121RT	121 Lamp Watts	Timer with 2 sets of trippers	Black
ML200RT	200 Lamp Watts	Timer with 2 sets of trippers	Black
ML200RTW	200 Lamp Watts	Timer with 2 sets of trippers and ground shield	Black
ML300RTW	300 Lamp Watts	Timer with 2 sets of trippers and ground shield	Black
ML300RTWSN	300 Lamp Watts	Timer with 2 sets of trippers and ground shield	Sand
ML600TW	600 Lamp Watts	Timer with 2 sets of trippers and ground shield	Black
ML600TWSN	600 Lamp Watts	Timer with 2 sets of trippers and ground shield	Sand
ML900TW	900 Lamp Watts	Timer with 2 sets of trippers and ground shield	Black
ML900TWSN	900 Lamp Watts	Timer with 2 sets of trippers and ground shield	Sand

IMPORTANT: When planning your lighting and choosing a power pack, your total bulb wattage must not exceed maximum transformer wattage output rating.

ML814DRP Photo Eye Accessory

- Automatically controls low voltage transformers based on sunrise & sunset
- 12 VAC 50/60 Hz
- Can only be used with 100 Watt or greater transformers
- 300 Watt Tungsten

Why Every Commercial/Residential Facility Needs Surge Protection

Electrical disturbances and downtime cost North American companies and residents more than \$26 billion every year. Every process and appliance within your building is controlled by electrical equipment and electronic components which all require surge protection to function reliably.

ANSI/IEEE has defined common disturbances which occur in modern facilities; Voltage, Waveform, Current Waveform and 100 kHz Ring Wave. Depending on the proximity of the equipment to your power entry points, the severity increases. As the transient event propagates throughout your building, it degrades your electronic components by stressing them with excess voltage and current.

Every modern facility is a strong candidate for surge protection. Intermatic has a broad line of Service Entrance, Panelboard and Point-of-Use Surge Protection.

Service Entrance, Panelboard and Point-of-Use surge protection can be found in the following types of facilities and installations:

- Industrial Manufacturing
- Commercial Office Space
- Health Care Facilities
- Institutional Buildings
- Government
- Hospitality
- Retail Space
- Single/Multi-Family Residences

Virtually all devices which are powered by electricity are vulnerable. Surge Suppression is required for protection of the following types of systems:

- Computers/Peripherals/Servers
- Network Servers/Routers/Modems
- Telecom Equipment
- Variable Frequency Drives
- Lighting Ballasts
- HVAC/R Controls
- Fire Alarm Systems
- Security Systems
- Lighting Control and Dimming Systems
- Automatic Test Equipment
- Uninterruptible Power Supplies
- Bar Code Scanning Equipment
- Programmable Logic Controllers
- Stereos
- Televisions
- Home Theater Systems
- Pumps, Motors and Related Equipment with Electronic Controls or Starters

To understand how Surge Protective Devices work with generators please visit www.intermatic.com

ANSI/UL 1449 3rd Edition Surge Protection Definitions

As of September 30, 2009 ANSI/UL 1449 3rd Edition replaced UL 1449 2.5. Surge Protective Devices (SPDs) manufactured after September 30, 2009 need to meet ANSI/UL 1449 3rd Edition standards. Any products manufactured before this date may still be sold as a UL 1449 2.5 compliant product.

Due to increased use of electrical devices in residential, commercial and industrial markets, ANSI/UL 1449 3rd Edition was adopted. Electrical components in devices such as computers, security systems, home theater systems and factory equipment are susceptible to transient overvoltage and can create significant downtime, equipment replacement and costly repairs.

As a result "Surge Protectors" will now be known as "Surge Protective Devices" (SPD) and are reclassified into Type 1, Type 2 and Type 3 SPDs.

Surge Protective Device types: (The type of SPD is listed on the product)

TYPE 1: Permanently connected SPD which is intended to be installed between the secondary transformer and the line side of the service equipment.

TYPE 2: Permanently connected SPD which is intended to be installed on the load side of the service equipment over current device.

TYPE 3: Cord connected SPD which is intended to be installed at the point of use.

Glossary of ANSI/UL 3rd Edition Terms

SURGE: A sudden and sharp increase of current or voltage within electric circuits.

SURGE PROTECTIVE DEVICE (SPD): A device used to limit a surge on equipment by diverting or limiting it. SPDs were previously known as Transient Voltage Surge Suppressors or secondary surge arresters.

SHORT CIRCUIT CURRENT RATING (SCCR): The measurement of how much current the electrical system can supply during a fault condition. This value determines where an SPD may be installed. (Listed on the product)

NOMINAL DISCHARGE CURRENT (In): Peak value of the current through the SPD having a current wave shape of 8/20 where the SPD remains functional after 15 surges. (Listed on the product)

NOMINAL SYSTEM VOLTAGE: The voltage level at which a system normally operates.

Nominal system voltages include, but are not limited to, 120, 208, 240, 277, 347, 480, 600 VAC. (Listed on the product)

MODES OF PROTECTION: Electrical paths within a system which an SPD offers defense against surge events.

Examples of protection include, Line to Neutral (L-N), Line to Ground (L-G), Line to Line (L-L) and Neutral to Ground (N-G). (Listed on the product)

VOLTAGE PROTECTION RATING (VPR): The value assigned by UL which specifies the measured limited voltage value of the SPD. VPR rating is formally known as the "suppressed voltage rating". (Listed on the product)

MAXIMUM CONTINUOUS OPERATING VOLTAGE: The maximum RMS voltage that may be applied to each mode of a surge protection device. (Listed on the product)

Guidelines to consider when choosing a Surge Protection Device

1. Geographic location
 - a. Exposure to utility grid switching
 - b. Locations susceptible to brownouts or frequent utility power switching
2. Point of installation (also see types of SPD within definitions)
 - a. Protect equipment which is located near switching motors or transformers
 - b. Sensitive equipment: Computers, home theater systems, appliances which have sensitive electronics should be protected

System Voltage

The wiring diagrams characterize common voltage configurations available for the products. Refer to individual product pages for models available in below configurations. Match the voltage configuration below with your voltage configuration at your service entrance, distribution panel or panelboard location where you want protection.

Note: As with all SPDs, this standard only protects against surges that travel along the electrical pathway and does not protect against direct lightning strikes traveling down non-electrical paths. For Type 2 SPDs, your SPD is only as useful as your weakest breaker. Make sure sizing of breakers within the electrical panel are at least a 20 amp dual pole breakers to aid in preventing short circuits before the SPD becomes functional. Type 1 SPDs are normally mounted before the panels which would not include a breaker.

Types 1 & 2 Surge Protective Devices PanelGuard®

**NEW
PRODUCTS**

IG Series

Features:

- Hard-wired models provide greater capacity to handle surge energy (based on their close location to the service ground) compared to standard plug-in strips
- Designed for 120, 240 VAC single or split-phase panels
- Green LED indicator provides surge protection status
 - ON: Energized and providing protection
 - OFF: May still be energized but protection has been diminished and the unit should be replaced

Match the correct model to the voltage of your system/machine.

Type 3 Point-of-Use Surge Protective Devices

Surge Protective Strips

Features:

- Type 3 SPD (Surge Protective Device)
- Designed for heavy industrial use
- 14 gauge SJT power cord with molded plug
- 3-mode Surge Protection (L-N, L-G, N-G)
- Protection monitoring circuitry with LED light indicator
- CSA listed to UL 1449, 3rd Edition
- 15 Amp resettable breaker
- Ivory metal housing (except IG112663BLK10)

IG112463

- 4 outlets
- 6 ft. cord
- Lighted ON/OFF switch

IG112663

- 6 outlets
- 6 ft. cord
- Lighted ON/OFF switch

IG112663BLK10

- Black metal housing
- 6 outlets
- 10 ft. cord
- Lighted ON/OFF switch

IG20663 & IG206153

- 6 specification-grade outlets
- Master ON/OFF switch
- 6 ft. cord (IG20663); 15 ft. cord (IG206153)
- EMI/RFI noise filtration

IG20B123 & IG2012B153

- 6 specification-grade outlets
- Master ON/OFF switch
- 6 ft. cord (IG20B123); 15 ft. cord (IG2012B153)
- EMI/RFI noise filtration

IG20863

- 8 specification-grade outlets
- Master ON/OFF switch
- 6 ft. cord
- EMI/RFI noise filtration

Weatherproof Receptacle Covers

Flexi-Guard Patented Insert Design

CONTRACTOR FRIENDLY – OUR FEATURES MAKE INSTALLATION EASY AND EFFICIENT!

Intermatic's line of quality weatherproof covers offer many time saving features:

- Flexi-Guard inserts are designed to easily snap into all Intermatic weatherproof covers and are available in one and two-gang combinations, to cover a multitude of needs
- All Intermatic weatherproof covers are packaged with the three most common Flexi-Guard inserts that cover configurations for GFCI, duplex, toggle or round receptacles
- Flexi-Guard inserts feature key-hole slots to make installation easy
- Additional inserts are available for two-gang applications. All Flexi-Guard inserts can be ordered separately. See page 93 for corresponding part numbers.
- Easy to remove cord set exit ports
- Pre-adhered gaskets
- Single-gang weatherproof covers can be mounted horizontally or vertically

All Intermatic weatherproof covers meet the current code requirements

Code Requirements:

Intermatic's line of NEMA 3R receptacle covers ensures compliance with 2008 NEC Article 406.8 (B) which requires that 15 and 20 ampere, 125 and 250 volt receptacles installed in a wet location have an enclosure that is weatherproof whether or not the attachment plug cap is inserted. They are designed to meet the 2008 NEC Article 210-60(b), which requires that receptacles installed behind beds in hotels and motels be protected with a suitable guard.

NEMA 3R

Patented: U.S. Patent #5 280 135

U.S. Design Pat. #342233

Canadian Patent #2 073 932

Other Patents Pending

Meets UL and CSA Cold Impact Testing at -60°F (-51°C)

Specifications:

All covers can be used for flush mount, surface mount or FS junction box mounting

Cover: Clear (gray or white on selected models) UV stabilized polycarbonate

Mounting Base and Inserts: Black UV stabilized polycarbonate

Gasket: Neoprene — 1/8 in. (4.8 mm) thick with slits for mounting screws

Weatherproof Receptacle Covers

Flexi-Guard Weatherproof Plastic While-In-Use Covers

Intermatic's weatherproof covers are easy to install, offer flexible options and reduce the amount of inventory needed to cover the project.

Features:

- Complies with 2008 NEC Article 406.8 (B)
- Packaged with 3 patented inserts for GFCI, duplex, toggle or round receptacles
- Two-gang models include 6 snap-together, rotating inserts that create 70 combinations to fit almost every application. See page 93 for insert options
- Single-gang covers mount both vertically and horizontally by switching the hinge points
- Clear or white cover
- Heavy-duty polycarbonate construction
- Inserts include keyhole slots for up to 14 installation configurations
- Pre-adhered gasket
- Meets requirements for cold impact testing at -60° F (-51°C)
- Lockable hasp for .250 in. (6.35 mm) shank lock — WP1100C and WP1100WC only
- Lockable hasp for .125 in. (3.175 mm) shank lock — WP3100C and WP3103C only
- Hidden hinges — WP3100C and WP3103 only
- Easy to remove cord set exit ports — WP3100C and WP3103 only
- Max cord size for all covers: (2) 14 gauge AWG OR (1) 12 gauge AWG
Except WP1250C and WP1150C: (2) 14 gauge AWG OR (1) 10 gauge AWG

Warranty: Limited 1-year warranty

Weatherproof

Weatherproof Receptacle Covers

Guardian Series Weatherproof Plastic While-in-Use Covers

- Complies with 2008 NEC Article 406.8(B)
- Patented inserts offer more configurations and cover more jobs
- Two-gang models include inserts for Duplex or GFCI applications

Features:

- Single-gang covers packaged with three patented inserts for GFCI, duplex, toggle or round receptacles
- Inserts include keyhole slots for easy installation
- Pre-adhered gasket
- Heavy-duty polycarbonate construction
- Clear cover on most models. Two models with gray cover
- Meets requirements for cold impact testing at -60°F (-51°C)
- Max cord size for all covers: 2 – 14 gauge OR 1 – 12 gauge. Except WP1050: 2 – 14 gauge OR 1 – 10 gauge.

Warranty: Limited 1-year warranty

WP17 †

Two-gang products Include:

Two-gang Duplex

WP101

Two-gang GFCI

WP102

Use with Intermatic Spring Wound Timers pages 60-61

† Converts to toggle, 1⅜, 1½, 1¾ or 2⅝ in. diameter round.

Note: Lockable hasp accepts up to .125 in. (3.175 mm) diameter shank
See page 93 for insert information.

Weatherproof Receptacle Covers

Recessed Weatherproof While-in-Use Covers

WP1000RC — Vertical Cover

WP1000HRC — Horizontal Cover

Product Features:

- Complies with 2008 NEC Article 406.8(B)
- Heavy-duty polycarbonate cover for long lasting durability

Specifications:

- Device recesses into wall for a flush finish. Used for siding, stucco or brick finishes
- Removable siding flange provides clear finish for all siding types
- Patented single-gang inserts for GFCI, duplex, toggle or round receptacles
- Heavy-duty gasket ensures protection from the elements
- Recessed sleeve adjusts to ensure lowest profile installation in every application
- Outlet box offers mounting options for stud, block, brick or cut-in
- Cord exit easily handles two 12/3 cord sets
- Handles NmB (Non-Metallic Building Wire) or conduit
- Heavy-duty, UV resistant, polycarbonate constructed cover

2.00 lbs
0.91 kg

Item #	Description
WP1000RC	Recessed In-Use Cover Kit: Includes Back Box, Siding Flange, and Vertical Mount Finish Kit
WP1000HRC	Recessed In-Use Cover Kit: Includes Back Box, Siding Flange, and Horizontal Mount Finish Kit

WP2000 Flexi-Guard Outlet Post

Product Features:

- Complies with 2008 NEC Article 406.8(B)
- Heavy-duty PVC construction for long lasting durability

Applications:

Provides a new, code compliant solution for supplying power to gardens and other out-of-the-way areas. A remotely mounted energy saving photo control and/or timer are also available to activate area lighting.

Specifications:

- Patented single-gang inserts for GFCI, duplex, toggle or round receptacles
- Provisions for installing mechanical or digital timers to control area lighting:
 - PB913N84: 24 hour, 120 Volt mechanical timer – allows for 2 ON/OFF daily cycles see page 144
 - PB313EK: 24 hour, 120 Volt electronic timer – allows for 8 ON/OFF daily cycles (Timers sold separately) see page 146
- Provisions for fixed-position, stem-mounting and stem & swivel mounting photo controls to control area lighting (See page 71-72 for photo control options)
- All ports accept 1/2, 3/4, or 1 in. PVC conduit (adapters included)
- Base includes mounting holes and template for optional concrete/pavement mounting
- Cover includes lockable hasp that accepts up to .375 in. (9.525 mm) diameter shank

Warranty: Limited-1 year warranty

WP1030MC

Flexi-Guard Weatherproof Die-Cast While-in-Use Covers

- For Commercial Applications
- Heavy-duty die cast receptacle covers
- Complies with 2008 NEC Article 406.8(B)
- Offers same features as plastic models but are manufactured of heavy-duty cast metal for severe applications such as schools and commercial buildings
- Patented Flexi-Guard inserts provide flexibility in field by selecting and installing proper insert
- Two-gang model WP1030MC includes inserts for two-gang duplex and GFCI requirements
- Cover includes lockable hasp that accepts up to .280 in. (7.112 mm) diameter shank (lock not included)
- Max cord size for all covers: 2-16 gauge or 1-14 gauge

Model	Description	Depth (in.)	Color	Cord Exit Port Diam. (in.)	Port Length (in.)

Single-gang Flexi-Guard

WP17

Converts to toggle, 1 $\frac{3}{8}$, 1 $\frac{5}{8}$, 1 $\frac{3}{4}$ or 2 $\frac{1}{8}$ in. diameter round.

Two-gang Flexi-Guard

WP217

Converts to toggle, 1 $\frac{3}{8}$ or 1 $\frac{5}{8}$ in. diameter round.

See Page 93 for additional inserts.

Flexi-Guard Inserts

These patented Flexi-Guard Inserts fit single-gang or two-gang models of clear, gray plastic or die cast design. Each insert package can be purchased separately. All weatherproof covers come with Flexi-Guard inserts and mounting screws. The two-gang inserts (Part Numbers: WP217, WP101, WP102, WP107 and WP213) include a special two-gang gasket.

WP17 – Single-gang Flexi-Guard Inserts

3 standard Flexi-Guard inserts – 14 possible configurations!

The WP17 insert package comes standard in all Flexi-Guard single-gang weatherproof covers. It includes three separate inserts that can be configured into as many as 14 different receptacle or switch applications. Configurations are diagrammed below. The special pre-scored insert converts to either toggle, or the following round receptacle sizes: 1.375, 1.625, 1.75 or 2.125 in.

WP217 – Two-gang Flexi-Guard Inserts

6 standard Flexi-Guard inserts – 70 possible configurations!

These 6 two-gang Flexi-Guard inserts can be combined to make the following configurations for two-gang covers. The special pre-scored insert converts to either toggle, or the following round receptacle sizes: 1.375, 1.625 in.

Additional Inserts Available for Flexi-Guard or Guardian Series:

WP101

Two-gang Duplex

WP102

Two-gang GFCI

WP107

Two-gang Round
1.375 in.
1.625 in.
1.75 in.

WP213

Two-gang Round
2.156 in.
2.656 in.

Replacement Bulb Information
(See page 160)

Intermatic's line of HID lighting is the perfect solution for a wide variety of indoor and outdoor lighting needs. In addition, Intermatic has a full array of controls and sensors designed to complement any commercial, industrial or residential lighting system.

Now offering Pulse Start option.

Look for model numbers ending in PS.

Wall Packs

Ideal for: Parking Areas, Entrances, Walkways, Underpasses, Loading Docks, Recreation Areas and Tunnels

- UL and/CUL listed for wet locations
- Heavy-duty die-cast aluminum powder coated construction
- Corrosion-resistant hardware
- Bronze finish
- 1/2 in. tapped holes available for installing optional photocell
- Lamp included

Specifications:

Part Number	Wattage	Lamp	Voltage	Lens
WL035HPS	35	High Pressure Sodium	120 VAC	Polycarbonate
WL050HPS	50	High Pressure Sodium	120 VAC	Polycarbonate
WL050MH	50	Metal Halide	Quad Tap* 120, 208, 240, 277 VAC	Polycarbonate
WL070HPS	70	High Pressure Sodium	120 VAC	Polycarbonate
WL070MH	70	Metal Halide	Quad Tap* 120, 208, 240, 277 VAC	Polycarbonate

WL100MH	100	Metal Halide	Quad Tap* 120, 208, 240, 277 VAC	Glass
WL150HPS	150	High Pressure Sodium	Quad Tap* 120, 208, 240, 277 VAC	Glass
NEW WL150MH-PS**	150	Metal Halide	Quad Tap* 120, 208, 240, 277 VAC	Glass
WL250HPS	250	High Pressure Sodium	Quad Tap* 120, 208, 240, 277 VAC	Glass
WL250MH	250	Metal Halide	Quad Tap* 120, 208, 240, 277 VAC	Glass
NEW WL250MH-PS**	250	Metal Halide	Quad Tap* 120, 208, 240, 277 VAC	Glass
WL400HPS	400	High Pressure Sodium	Quad Tap* 120, 208, 240, 277 VAC	Glass
WL400MH	400	Metal Halide	Quad Tap* 120, 208, 240, 277 VAC	Glass
NEW WL400MH-PS**	400	Metal Halide	Quad Tap* 120, 208, 240, 277 VAC	Glass

* Fixture is available as 120, 277, 347 VAC Tri Tap Ballast fixtures. Add a "T" suffix to the appropriate part number.

** PS – Pulse Start.

High Intensity Discharge (HID) Lighting

Cut-Off Wall Packs

Ideal for: Buildings, Backyards, Parks, Signs and Sports Fields

- UL/CUL listed for wet locations
- Heavy-duty die-cast aluminum powder coated construction
- Reduces light pollution
- 1/2 in. tapped holes available for installing optional photocell
- Lamp included
- Bronze finish
- Glass lens

Specifications:

Part Number	Wattage	Lamp	Voltage
WLC70HPS	70	High Pressure Sodium	120V
WLC100HPS	100	High Pressure Sodium	Quad Tap 120, 208, 240, 277 VAC
WLC100MH	100	Metal Halide	Quad Tap 120, 208, 240, 277 VAC
WLC150HPS	150	High Pressure Sodium	Quad Tap 120, 208, 240, 277 VAC
WLC150MH	150	Metal Halide	Quad Tap 120, 208, 240, 277 VAC
WLC175MH	175	Metal Halide	Quad Tap 120, 208, 240, 277 VAC
WLC250HPS	250	High Pressure Sodium	Quad Tap 120, 208, 240, 277 VAC
WLC400HPS	400	High Pressure Sodium	Quad Tap 120, 208, 240, 277 VAC
WLC250MH	250	Metal Halide	Quad Tap 120, 208, 240, 277 VAC
WLC400MH	400	Metal Halide	Quad Tap 120, 208, 240, 277 VAC

Floodlights

Ideal for: Buildings, Backyards, Highway Signs, Outdoor Advertising Boards, Parks and Sports Fields

- UL and CUL listed for wet locations
- Heavy-duty die-cast aluminum powder coated construction
- Corrosion-resistant hardware
- High impact-resistant tempered glass lens
- Bronze finish
- Lamp holder E-26, UL approved
- Lamp included

Specifications:

* Fixture is available as 120, 277, 347 VAC Tri Tap Ballast fixtures. Add a "T" suffix to the appropriate part number.

** PS – Pulse Start.

Quartz Floodlights

Ideal for: Building Facades, Signs, Sports Fields and Emergency and Temporary Floodlighting

- UL and CUL listed for wet locations
- Hinged front door
- ½ in. threaded swivel mount
- 120 Volt fixture
- Die-cast aluminum construction
- Tempered door glass
- Dark bronze finish
- Lamp included

Specifications:

Part Number	Wattage	Lamp	Voltage	Finish	Lens
FL150Q	150	Quartz Halogen	120V	Bronze	Glass
FL300Q	300	Quartz Halogen	120V	Bronze	Glass
FL500Q	500	Quartz Halogen	120V	Bronze	Glass

High Intensity Discharge (HID) Lighting

Canopy Lights

Ideal for: Parking Areas, Entrances, Walkways, Underpasses, Loading Docks and Recreation Areas

- UL and CUL listed for wet locations
- Heavy-duty die-cast aluminum powder coated construction
- High impact polycarbonate lens
- Corrosion-resistant hardware
- Lamp included
- Bronze finish
- Quad Tap* ballast: 120, 208, 240, 277 Volts

Specifications:

Part Number	Wattage	Lamp	Voltage
CP150HPS	150	High Pressure Sodium	Quad Tap
			120, 208, 240, 277 VAC
CP150MH	150	Metal Halide	Quad Tap*
			120, 208, 240, 277 VAC

* Fixture is available as 120, 277, 347 VAC Tri-Tap Ballast fixture.
Add a "T" suffix to the appropriate part number.

Dusk-to-Dawn Lights

Ideal for: Perimeter and Security Lighting, Loading Platforms, Barnyards, Parking Lots, Rural Homes, Public Entrances and Off-Street Parking

Specifications:

- UL and CUL listed for wet locations
- Precision die-cast aluminum housing with natural finish
- UV-stabilized Polystyrene Lens
- 24 in. arm
- Dusk-to-dawn with twist-lock photo control
- Mounting hardware included
- Lamp holder E-39, 4KV and UL approved
- Lamp included
- 120 Volt fixture

Specifications:

Part Number	Wattage	Lamp	Voltage	Arm
DD150HPS	150	High Pressure Sodium	120 VAC	24 in.
DD100MH	100	Metal Halide	120 VAC	24 in.

Wall Fixture with Photocell

Ideal for: Parking Areas, Entrances, Walkways, Underpasses, Loading Docks and Recreation Areas

- UL and CUL listed for wet locations
- High-impact polycarbonate lens and housing
- Aluminum baseplate with conduit access
- Corrosion-resistant hardware
- 120 Volt installed photocell included
- Bronze finish
- 120 Volt fixture
- Lamp included

Vapor Tight Fixtures

Ideal for: Use in severe service areas where extreme conditions prevail; Subways, Construction Sites, Bridges, Tunnels, Freezers, Coolers, Waste Water & Sewage Treatment Plants

- UL and CUL listed for wet locations
- Industrial grade, fully enclosed with gasket
- Rugged, seamless, die-cast construction prevents moisture from entering
- Powder coat finish for maximum durability
- Heat-resistant glass globes
- CFL compatible
- Lamp not included

Specifications:

Part Number	Wattage	Voltage	Glass Globe	Cast Guard
VPXG-11-CGI	100	120 VAC	Yes	Yes
VPKG-11-CGI	100	120 VAC	Yes	Yes
VWG-01-CGI	100	120 VAC	Yes	Yes

Professional Grade Motion Detection Fixtures

Dual Sensor Motion Detection Security Light

Ideal for: Entries, Patios, Porches, Garages and Outbuildings

- UL and CUL listed for wet locations
- Distortion free lens
- Built-in surge protection
- Manual override
- 150 W halogen max (bulb included)
- Voltage – 120 VAC, 60 Hz
- Wall mount
- Adjustable ON time

Specifications:

Part Number	Wattage	Description	Voltage	Finish	Lamp Included
FL150QMSW	150	Dual Sensor Motion Detection Security Light	120 VAC, 60 Hz	White	Yes

Motion Detection Security Light

Ideal for: Buildings, Backyards, Parks, Signs and Sports Fields

- UL and CUL listed for wet locations
- Distortion-free lens with two detection planes
- Built-in surge protection
- Manual override
- Voltage – 120 VAC, 60 Hz
- Wall mount and soffit/eave mount applications
- Adjustable ON time

Specifications:

Part Number	Wattage	Description	Voltage	Finish	Lamp Included
FL300MSW	300	Motion Detection Security Light	120 VAC, 60 Hz	White	No

Motion Detection Security Switch

Ideal for: Lighting, Alarms, Video Cameras, Fans and Electrical Appliances

- UL and CUL listed for wet locations
- Distortion-free lens with two detection planes
- Built-in surge protection
- Switching capacity: maximum 300 Watts
- Detection angle of sensor: 140° horizontal/Plane A (10 zones)
- Sneek-by guard: 90° horizontal/Plane B (6 zones) 8° vertical
- Swiveling range of sensor: 130° horizontal, 65° vertical
- Range over which detection is adjustable: 270° horizontal
- Sensor reach: minimum 40 feet in front, 23 feet at sides (based on 10 foot mounting height)
- Manual override
- Voltage – 120 VAC, 60 Hz
- Wall mount and soffit/eave mount applications
- Adjustable ON time

MULTI
WAVE™

Redefine pool controls

*variable and
two-speed control*

PE653RC

INTERMATIC®
Providing a brighter solution.™

see page 108 for more details

Pool & Spa Controls

Pool & Spa

Affordable and energy saving pool and spa controls

Intermatic pool and spa controls are affordable, efficient and easy to install. The core components are interchangeable to provide you with the flexibility you need to manage your pool, spa and backyard. Intermatic makes it easy for you to choose the right controls for your new pool, or upgrade an existing pool control to digital and wireless operation. Parts can be purchased as mechanisms that easily snap into most existing Intermatic enclosures or packaged inside raintight enclosures.

Intermatic's Wave family of pool and spa controls

- **MultiWave** – Five Circuits featuring Single, Two & Variable Speed Pump Control, Booster Pump Control, Freeze Protection, Heater Thermostat, Z-Wave® control, Wireless Control
- **IWave** – Five Circuits featuring Single & Two Speed Pump Control, Booster Pump Control, Freeze Protection, Heater Thermostat, Actuator Control, Wireless Control
- **MiniWave** – Up to five circuits featuring Single Speed Pump Control, Booster Pump Control, Heater Thermostat, Actuator Control, Wireless Control
- **PoolWave** – Three Circuits featuring Single & Two Speed Pump Control, Booster Pump Control, Freeze Protection, Heater Thermostat, Wireless Control
- **SpaWave** – Three Circuits featuring Single & Two Speed Pump Control, Booster Pump Control, Freeze Protection, Heater Thermostat, Wireless Control
- **Mechanisms** – Available for upgrading or adding to current systems
- **Accessories** – To expand your pool and spa controls

Energy Consumption – Can you afford to leave your filter on high speed all day?

Pool operation can be 20% of your entire electrical consumption. Title 20 recommends filtering pool water only twice per 24 hour period - which is sufficient for most residential pools. Intermatic has several digital, multi-circuit solutions that offer features to control Two-Speed and Variable-Speed pumps. For simple Two-Speed control, the P1353ME (Mechanism) snaps right into most existing Intermatic enclosures. For Variable-Speed control, the new MultiWave connects to any existing enclosure. See Intermatic's offering for simple, efficient upgrades that meet Title 20 and other new energy legislation.

New Multiwave wireless control for one, two or variable speed pumps

MultiWave is the newest addition to the Intermatic Wave Pool and Spa product line. It features wireless control for one, two and variable speed pumps. Five circuits control pool/spa equipment, plus any other landscape or backyard features from its hand-held control.

Setup is easy – just choose your equipment from the MultiWave equipment list, and the MultiWave automatically locates and sets up the equipment.

Features:

- 5 Circuits
- Wireless control
- Controls Variable Speed , Two-Speed and Single-Speed pumps
- Plug and Play equipment detection and set-up – easy to initialize and use
- Handheld circuit display can be customized to suit your specific equipment control need

Pool & Spa

Upgrading and expanding to fit your pool, spa and backyard needs

Upgrading from a mechanical one circuit time switch is easy and affordable.

P1353ME Series digital three circuit clock mechanism

- Features Three Separate Circuits – Program independent circuits to operate any Two-Speed pump. Use circuit one for HIGH speed, circuit two for LOW speed, and circuit three can be used for lighting, cleaners, water features, or any other backyard equipment that needs to be turned ON or OFF
- Pre-programmed modes for equipment combinations – Saves set up time
- Each circuit has Three ON/OFF Event Programs – Perfect for turning pump on either HIGH or LOW-Speed 2 times per day. For example: ON at 6:00 AM and OFF at 9:00 AM on HIGH-Speed, back ON at 8:00 P.M. and OFF at 11:00 PM on LOW-Speed (2 total events programmed)
- Manual Override – Allows you to turn equipment ON/OFF outside the programmed event
- Snaps into most existing Intermatic enclosures – Easy to install and contractor/user friendly

Valve actuator controls for pool/spa combinations

Intermatic offers two separate valve actuator controls. The Intermatic P4243ME controls three separate valves simultaneously. This is a great control for pool/spa combinations and also offers two separate relays in addition to the valve controls, for control of pool/spa/backyard equipment. The P4043ME operates two valve actuators and is perfect for automating water features and pool/spa combinations.

Wireless control

Intermatic offers a wireless control system upgrade consisting of PE650 and PE953 which can be added to existing Intermatic digital P1353ME series timer. Intermatic's new MultiWave PE653RC features wireless control built into the variable speed timer.

Wireless control allows the user to operate equipment and devices from a hand-held remote. Programming is set-up and operated on a user-friendly, waterproof remote control. Wireless control offers the following functions:

- ON/OFF switching of all five circuits
- Temperature control
- Activation of actuator controls for pool/spa combinations
- Lighting
- Water features
- Cleaners

The easy-to-read backlit remote offers time of day, water temperature setting and is water submersible

Enclosures

Intermatic offers separate enclosures to house the individual components. Additionally, Intermatic offers enclosures for breaker panels and transformers. Intermatic makes the choice simple by packaging it all under one part number, or you can simply mix and match components with the enclosure you need.

Accessories

Intermatic offers a full line of digital control accessories to make operating your pool and spa easy and affordable.

Variable Speed & Two Speed Control Systems

**MULTI
WAVE™**

PE653RC

PE653

PE953
(See page 120-121)

Wireless 5-Circuit Pool/Spa Control System PE653RC

The "MultiWave" Wireless Control System Controls Pools/Spas and now your Home!

Combine the PE653 MultiWave Controller with the PE953 MultiWave Hand Held Transceiver and automate your pool/spa and even your home with the most technologically advanced wireless control system in the market today!

The MultiWave is designed as a "plug and play" system. Install the water sensor PA122 (see page 121) and watch the MultiWave thermostat come alive to maintain your pool and/or spa water temperatures. Install the air sensor 178PA28A (see page 121) and let the MultiWave freeze protection system take over to protect your investment. Connect your equipment to the intelligent RS485 communication port and relax as the MultiWave recognizes and controls your equipment with ease.

Included:

- Owner's Manual
- Three AA Batteries
- Small Flat Head Screwdriver
- Receiving PE653 Controller with 2T2485GA Enclosure
- Equipment Labels
- Hand Held PE953 Transmitter
- Water Sensor with Hose Clamp

Specifications:

Enclosure & Control: NEMA 3R rated for Indoor/Outdoor installation in beige finish 9 $\frac{3}{8}$ in. (23.8 cm) H x 5 $\frac{1}{2}$ in. (14.0 cm) W x 3 $\frac{3}{8}$ in. (9.2 cm) D

Enclosure Knockouts: Combination $\frac{1}{2}$ - $\frac{3}{4}$ in. nominal knockouts, one on back and each side of enclosure and two on bottom

Shipping Weight: 5.4 lbs (2.3 kg)

Agency Approval: CSA/C-US

Ratings:

Control Supply: 120, 240 VAC, 50/60Hz, 5-Watts Maximum

Circuit #1: 20 Amp Resistive (17 FLA, 80 LRA), 120, 240 VAC 50/60 Hz

Circuit #2 thru #5: 15 Amp Resistive (10 FLA, 60 LRA), 120, 240 VAC, 50/60 Hz

Full Two-Speed & Variable Speed Controller

MultiWave Accessories & Applications

There are many equipment pad configurations the MultiWave Control System can control. Below are a few of the most common configurations.

240 VAC Variable-Speed Pump

Select Breaker to match wire size and load requirement. Observe maximum control circuit capacity.

* IntelliFlo and IntelliPro are registered trademarks of Pentair Water Pool and Spa, Inc.

240 VAC 2-Speed Pump + 240 VAC Booster Pump + other 120 VAC Equipment + Heater

Select Breaker to match wire size and load requirement. Observe maximum control circuit capacity.

Actuator model P4043ME must be installed in a separate enclosure. Intermatic model 2T2485GA is recommended or just order a PE140 on page 118. Refer to Actuator installation instructions for additional wiring instructions.

NOTE:
Refer to Heater manufacturer's installation instructions for Heater installation and setup

Optional Controller Accessories: (Not Included)

Freeze (Air Temperature) Sensor 178PA28A

Needed to sense and display outside air temperature and activate freeze protection. See page 121

Actuator Control P4043ME

Needed to control actuators for pool and spa applications. (Rain Tight Enclosure Needed) See page 118-119

Raintight Enclosure 2T2485GA

Needed to house the P4243ME Actuator Controller. (If no enclosure is present) See page 46, 131

60 Amp Variable Speed & Two Speed Control Systems

PE20065RC

PE24065RC

PE20000RC Series Kits

Wireless 5-Circuit Pool/Spa Control System with 60 Amp Breaker Base, Actuator Control & Two Actuators

Combine the features of the PE653RC MultiWave Control System with the convenience of the PE20000 60 Amp Intermatic Panel and create a powerful PE20065RC wireless control system kit for any pool or spa installation. The PE20000 series panel includes a four position 60 Amp breaker base to accommodate a variety of different equipment loads and one mechanism slot to accommodate the vast array of mechanisms Intermatic has to offer. In addition, there is a low voltage raceway for low voltage control lines (i.e. actuators, sensors, etc...), two décor knockouts for GFCIs and switches, and a convenient side knockout for an outdoor receptacle.

Order PE24065RC, which includes a P4043ME mechanism and two PE24VA actuators, and remotely control any pool and spa combination. With this addition, you can now switch both your water valves and heater thermostat settings between your pool and spa with a click on your wireless control. These are by far the most affordable and versatile control systems offered today.

Included in Kits:

- MultiWave Control System (PE653RC)
- Three AA Batteries
- Equipment Labels
- Water Sensor (PA122) with Hose Clamp
- P4043ME Actuator Controller (**PE24065RC only**)
- (2) PE24VA Water Valve Actuators (**PE24065RC only**)
- Owner's Manual
- Small Flat Head Screwdriver
- Hand Held (PE953) Transmitter
- PE20000 Enclosure w/60 Amp Base

Specifications:

Enclosure & Control: NEMA 3R rated for Indoor/Outdoor installation

0.048 in. steel with electrostatically applied light beige finish.

16½ in. (41.9 cm) H x 10⅞ in. (27.6 cm) W x 4¼ in. (10.8 cm) D

Enclosure Knockouts: Two 1.09 in. diameter through holes, six combination ½ – ¾ in. knockouts, and three combination ¾ – 1 in. knockouts on the bottom. Two combination ½ – ¾ in. on the left side and one combination ¾ – 1 in. on the back.

One knockout 1¾ x 2¾ in. on the right side for mounting switches or GFCI

Panel Rating: 60 Amp, 120, 240 VAC or 120, 208 VAC single phase

Shipping Weight: 5.4 lbs (2.3 kg)

Agency Approval: CSA/C-US

Ratings:

Control Supply: 120, 240 VAC, 50/60 Hz, 5-Watts Maximum

Circuit #1: 20 Amp Resistive (17 FLA, 80 LRA) 120, 240 VAC 50/60Hz

Circuits #2 thru #5: 15 Amp Resistive (10 FLA, 60 LRA) 120, 240 VAC 50/60 Hz

Note: The following page refers to only a fraction of the most common applications of the MultiWave Control System. Contact your Intermatic representative or visit www.intermatic.com and visit the Pool & Spa section of our website for more application ideas and details.

Common PE20000RC Applications

PE20065RC Applications

240 V 2-Speed Pump

240 V 2-Speed Pump + 240 V Booster Pump + other 120 VAC Equipment + Heater

PE24065RC Applications

120 V 1-Speed Pump + 120 VAC Blower or Lights + 120 V Booster Pump + 120 V Actuator + Heater

120 V 1-Speed Pump + 120 V Blower + 120V Lights + 120 V Actuator + Heater

80 Amp Variable Speed & Two Speed Control Systems

PE30065RC

PE34065RC

PE30000RC Series Kits

Wireless 5-Circuit Pool/Spa Control System with 80 Amp Breaker Base, Actuator Control & Two Actuators

Some heat pumps can consume between 40 and 60 Amps worth of power, therefore, it may be necessary to have a higher amperage breaker base to accommodate heat pumps. Combine the features of the PE653RC MultiWave Control System with the convenience of the PE30000 80 Amp Intermatic Panel and create a powerful PE30065RC wireless control system kit for any pool or spa installation. The PE30000 Series Panel includes an eight position 80 Amp breaker base to accommodate a variety of different equipment loads and two mechanism slots to accommodate the vast array of mechanisms Intermatic has to offer. In addition, there is a low voltage raceway for low voltage control lines (i.e. actuators, sensors, etc...), four décor knockouts for GFCIs and switches, and a convenient side knockout for an outdoor receptacle.

Order a PE34065RC which includes a P4043ME mechanism and two PE24VA actuators and remotely control any pool and spa combination. With this addition, you can now switch both water valves and heater thermostat settings between your pool and spa with a click on your wireless control. These are by far the most affordable and versatile control systems offered today.

Included in Kits:

- MultiWave Control System (PE653RC)
- Three AA Batteries
- Equipment Labels
- Water Sensor (PA122) with Hose Clamp
- P4043ME Actuator Controller (**PE34065RC only**)
- (2) PE24VA Water Valve Actuators (**PE34065RC only**)
- Owner's Manual
- Small Flat Head Screwdriver
- Hand Held (PE953) Transmitter
- PE30000 Enclosure w/80 Amp Base

Specifications:

Enclosure & Control: NEMA 3R rated for Indoor/Outdoor installations

0.048 in. steel with light beige finish

22 in. (55.9 cm) H x 14 $\frac{3}{4}$ in. (37.5 cm) W x 4 $\frac{1}{4}$ in. (10.8 cm) D

Enclosure Knockouts: Two 1.09 in. diameter through holes, six combination $\frac{1}{2}$ – $\frac{3}{4}$ in. knockouts, 2 combination $\frac{3}{4}$, 1, 1 $\frac{1}{4}$ in. knockouts, four $\frac{1}{2}$ in. knockouts on the bottom. Two combination $\frac{1}{2}$ – $\frac{3}{4}$ in. knockouts on the left side and four combination $\frac{1}{2}$ – $\frac{3}{4}$ in. knockouts, two combination $\frac{3}{4}$ – 1 in. on the back. One knockout 1 $\frac{3}{4}$ x 2 $\frac{3}{4}$ in. on the right side for mounting switches or GFCI.

Panel Rating: 80 Amp 120, 240 VAC or 120, 208 VAC single phase

Shipping Weight: 5.4 lbs (2.3 kg)

Agency Approval: CSA/C-US

Ratings:

Control Supply: 120, 240 VAC, 50/60 Hz, 5-Watts Maximum

Circuit #1: 20 Amp Resistive (17 FLA, 80 LRA) 120, 240 VAC 50/60 Hz

Circuits #2 thru #5: 15 Amp Resistive (10 FLA, 60 LRA) 120, 240 VAC 50/60 Hz

Note: The following page refers to only a fraction of the most common applications of the MultiWave Control System. Contact your Intermatic sales representative or visit www.intermatic.com and visit the Pool & Spa section of our website for more application ideas and details.

Common PE3000RC Applications

PE30065RC Applications

240 V 2-Speed Pump + any three 240 VAC Auxiliary Equipment

240 V 2-Speed Pump + Booster Pump + 120 V Light + Heater

PE34065RC Applications

240 V 2-Speed Pump + 240 V Booster Pump + 240 V Actuator + Heater

240 V 2-Speed Pump + 240 V Blower + 240 V Actuator + Heater

Digital Two Speed Controller Mechanism

P1353ME

Specifications:

- Three individual circuits
- Three ON/OFF events per day per circuit
- Seven pre-programmed modes for common pool & spa applications
- Input voltage 120, 208, 240 VAC
- Memory backup
- Freeze protection
- Heater protection (fireman switch)
- LCD readout
- Shipping weight: 3 lbs (1.4 kg)
- Agency approval: CSA/C-US

CONTACT RATINGS — EACH CIRCUIT, ALL MODES

- 17 Amp Resistive, 120, 240 VAC, 50/60 Hz
- (20 FLA, 96 LRA) 120 VAC, 50/60 Hz
- (17 FLA, 80 LRA) 240 VAC, 50/60 Hz
- 5 Amps Tungsten, 120, 240 VAC, 50/60 Hz
- 5 Amps Ballast, 120, 240 VAC, 50/60 Hz

P1353ME

Three Circuit Clock Mechanism

Designed as an upgrade to your T100 Series time switch, the P1353ME mechanism can be installed into almost any Intermatic enclosure and has the ability to program up to three circuits. Choose between seven pre-programmed modes of operation, which include single speed pump or 2-speed pump/cleaner pump combinations. In addition, programmed modes that include auxiliaries can control pumps up to 3 HP as well as underwater, landscape and/or fountain lighting. Countdown and Override features allow cycle interruptions when pool/spa service is required. All timing and protection associated with filter pump/cleaner pump combinations and two-speed pumps has already been integrated into the software.

Pre-Programmed Equipment Pad Modes

Mode 1 – (Aux1, Aux2, Aux3)

The time switch is a 3-circuit switch with all three switches controlling auxiliary devices.

Mode 2 – (Pump High, Pump Low, Aux3)

The time switch is a 2-circuit switch with the 1st & 2nd switch controlling a two-speed pump. The 3rd switch is controlling any auxiliary device. All protection associated with a two speed pump is pre-programmed into this mode.

Mode 3 – (Pump, Aux2, Cleaner Pump)

The time switch is a 3-circuit switch with the 1st switch controlling a single speed pump, the 2nd switch controls any auxiliary device, and the 3rd switch operates a booster/cleaner pump. All timing & protection associated with a filter pump/cleaner pump combination is pre-programmed into this mode.

Mode 4 – (Pump High, Pump Low, Cleaner Pump)

The time switch is a 2-circuit switch with the 1st & 2nd switch controlling a 2-speed pump. The 3rd switch is controlling a booster/cleaner pump. All protection associated with a 2-speed pump and booster/cleaner pump combination is pre-programmed into this mode.

Mode 5 – (Pump L1, Pump L2, Aux3)

The time switch is a 2-circuit switch with the 1st & 2nd switch controlling a 240V pump, where both L1 & L2 are required to be disconnected when the pump is OFF. The 3rd switch is controlling any auxiliary device.

New Pre-Programmed Equipment Pad Modes

Mode 6 – (Aux1, Aux2, Aux3)

Heater green mode

The time switch performs identical to Mode 1 except this mode allows the heater to heat the water only when Circuit 1 (the filter pump) is manually turned on – not when the clock turns the pump on. This mode is helpful when you have Circuit 1 connected to a circulation pump in a spa. When the spa is not in use, the clock circulates the water to filter it, but does not turn ON the heater. When the spa is in use, the heater is also turned ON by manually switching Circuit 1 ON.

Mode 7 – (Pump High, Pump Low, Common)

Break both lines

The time switch performs identical to Mode 2 except this mode allows the hook up to break both hot lines of a 240VAC two speed pump connection. In this mode the time switch becomes a single circuit device specifically designed to control a two-speed pump motor. The 1st & 2nd circuits connect to the High and Low lines of the two-speed pump respectively and the 3rd circuit connects to the second hot leg. All timing & protection associated with a two-speed pump is pre-programmed into this mode.

P1353ME Mode Applications

3 Circuit Pre-Programmed Options

Setting up the P1353ME Series 3-circuit timer is easy. Intermatic has already pre-programmed the most popular pool/spa/auxiliary combinations for your convenience. Just choose the mode that best suits your needs!

Mode 1 – (Aux1, Aux2, Aux3)

Each of the three single pole circuits are defined generically, and can control any load within each of its individual circuit ratings. All three circuits act independent of each other.

Applications: In Mode 1, the P1353ME Three Circuit Clock Mechanism is ideal for pool or spa only applications where each piece of equipment is independently controlled. With the addition of a PE650 Receiver and PE953 Transmitter, you can easily add wireless control to your equipment and thermostat control to your pool or spa. Each of the three circuits is rated for up to 3 HP and can handle both 120 VAC and 240 VAC equipment loads. This is the most versatile timer in the market today and can be added to almost all Intermatic control panels, both new and existing, making it ideal for upgrades to older Intermatic systems.

Mode 2 – (Pump High, Pump Low, Aux3)

Circuits one and two are dedicated single pole outputs for a two-speed pump load. Circuits one and two will never be ON at the same time, consistent with a two-speed pump application. Circuit three is a single pole circuit for a generic load, and independent of circuits one and two.

Applications: In Mode 2, the P1353ME Three Circuit Clock Mechanism acts as a Two Speed Controller and can be used for two speed pool applications but is ideal for spa applications where the filter pump on the spa is used for filtering in low speed and used for jets in high speed. The remaining circuit can be used for spa lights or blower. With the addition of a PE650 Receiver and PE953 Transmitter, you can easily add wireless control to your equipment and thermostat control to your pool or spa.

Mode 3 – (Pump, Aux2, Cleaner Pump)

Circuits one and three are dedicated single pole outputs for a single speed pump working with a pressure side cleaner pump. Circuit three will never come ON unless circuit one is ON for at least one minute, consistent with a pressure side cleaner pump. Circuit two is a single pole circuit for a generic load, independent of circuits one and three.

Applications: In Mode 3, the P1353ME Three Circuit Clock Mechanism is ideal for pool applications where a Booster/Cleaner pump is being controlled. In this mode, if the Filter Pump is OFF, the Booster/Cleaner pump will activate the Filter Pump first and then turn itself ON when activated. This ensures adequate priming of the Booster/Cleaner pump. The remaining circuit can be used for lights. With the addition of a PE650 Receiver and PE953 Transmitter, you can easily add wireless control to your equipment and thermostat control to your pool.

P1353ME Mode Applications

3 Circuit Pre-Programmed Options

Continued

Mode 5 – (Pump, Pump, Aux3)

Circuits one and two are now coupled together making one circuit capable of switching the power source to one pump. The ON/OFF button for circuit one now controls both circuit one and two simultaneously. The ON/OFF button for circuit two is disabled. Circuit three remains a single pole circuit for a generic load, and is independent of circuits one and two.

Applications: In Mode 5, the P1353ME Three Circuit Clock Mechanism acts as a two circuit clock to allow the breaking of both hot legs in a 240 VAC equipment hookup on circuit #1. Even though the P1353ME is not a disconnect, and you can easily control a 240 VAC load by breaking only one leg, some wiring situations may dictate breaking both legs of a 240 VAC load. It is good service practice to always open the equipment circuit breaker and red tag it appropriately when working on pool or spa equipment. When working on equipment, DO NOT rely on any clock to disconnect power. The clock may be scheduled to turn ON during servicing.

Mode 4 – (Pump High, Pump Low, Cleaner Pump)

Circuits one and two are dedicated single pole outputs for a two-speed pump load. Circuits one and two will never be ON at the same time, consistent with a two-speed pump application. Circuit three is also a dedicated single pole output for a pressure side cleaner pump. Circuit three will never come ON unless circuit one is ON for at least one minute, consistent with a pressure side cleaner pump.

Applications: In Mode 4, the P1353ME Three Circuit Clock Mechanism acts as a Two Speed Controller and is ideal for pool applications where a booster/cleaner pump is being controlled. In this mode, if the filter pump is OFF or in low speed, the booster/cleaner pump will activate the filter pump in high speed first and then turn itself ON when activated. This ensures adequate priming of the booster/cleaner pump. With the addition of a PE650 Receiver and PE953 Transmitter, you can easily add wireless control to your equipment and thermostat control to your pool.

Mode 6 – (Aux1, Aux2, Aux3)

Identical to Mode 1, in which each of the three single pole circuits are defined generically and can control any load within each of its individual circuit ratings, with all three circuits acting independent of each other. However, with Mode 6, the fireman switch closes only when Circuit 1 (the filter pump) is manually turned ON, not when the clock turns it ON. This mode is useful when you have Circuit 1 connected to a circulation pump in the spa. When the spa is not in use, the clock circulates the water to filter it, but does not turn ON the heater. When the spa is in use, the heater is also turned ON by manually switching Circuit 1 ON.

Applications: In Mode 6, the P1353ME Three Circuit Clock Mechanism is ideal for spa applications where you need to control three pieces of individual equipment (circulation pump, blower, light), but do not want to heat the spa while it's not in use.

P1353ME Mode Applications

3 Circuit Pre-Programmed Options

Continued

Mode 7 – (Pump High, Pump Low, Aux3)

Circuits one and two are dedicated single pole outputs for a two-speed pump load. Circuits one and two will never be ON at the same time, consistent with a two-speed pump application. Circuit three is a single pole circuit tied to circuits one and two and used to control the common line of the two speed pump. In Mode 7, all three circuits are used to control the two speed pump and break both legs of a 240 Volt pump installation.

Applications: In Mode 7, the P1353ME Three Circuit Clock Mechanism acts as a two speed controller and can be used for two speed pool applications but is ideal for spa applications where the filter pump on the spa is used for filtering in low speed and used for jets in high speed. The remaining circuit is used to open the second hot leg of a 240 Volt two speed installation when the pump is turned to the OFF position. With the addition of a PE650 Receiver and PE953 Transmitter, you can easily add wireless control to your equipment and add thermostat control to your pool or spa.

Actuator Controller & Load Mechanisms

P4043ME

PE140

P4243ME

P4000ME Series

Actuator Control & Load Mechanisms

Specifications:

- 120, 208, 240 VAC input voltage
- Controls up to three valve actuators
- Switches heater thermostat
- Remote control capabilities
- Agency approval: CSA/C-US
- Controls two circuits (**P4243ME only**)

Contact Ratings – Each Circuit

- Valve Actuator Supply: 24 VAC, 40 VA
- 17 Amp Resistive, 120-240 VAC, 50/60 Hz (**P4243ME only**)
- 1.5 HP, 120 VAC, 50/60 Hz (**P4243ME only**)
- 3.0 HP, 240 VAC, 50/60 Hz (**P4243ME only**)
- 10 Amp Tungsten, 120, 240 VAC, 50/60 Hz (**P4243ME only**)

P4043ME – Valve Actuator Control Mechanism

Have you ever wanted an affordable control that would only automate a set of water valves from the pool position to the spa position? Or maybe just turn a single water valve to engage a water feature?

Designed specifically for aftermarket and retro-fit applications, the P4043ME is ideal for controlling up to three water valve actuators with any latching or momentary contactor (**not provided**) capable of providing 120 VAC or 240 VAC. In addition, the P4043ME can switch the thermostat on most heaters between pool and spa when the actuators change position.

The P4043ME is ideal for those applications where only simple water valve control is required and can be triggered by any switching device you may provide (i.e. light switch, spring wound AUTO/OFF, wireless switch, relay, etc...). Installation is easy! Simply snap the P4043ME into any existing Intermatic enclosure that contains an available mechanism support bracket, hook up power to both the P4043ME and the trigger device, and plug in your 24 VAC water valve actuators behind the top door of the mechanism.

PE140 – Valve Actuator Control

If you do not have an Intermatic enclosure, you can order the PE140 model which contains the P4043ME mechanism and the appropriate low voltage hardware for running your actuator cables.

P4243ME – Valve/Pump Switch Mechanism

Designed as part of the I-Wave system and for aftermarket and retro-fit applications, the P4243ME does everything a P4043ME does and is most suited for controlling up to two different circuits associated with pool/spa combinations. It can also be used to control all the equipment typically needed in connection with water features, solar heating and other similar applications. This unit snaps into almost any Intermatic enclosure and controls pumps up to 3HP, 24 volt supply for up to three valve actuators, automatic HIGH/LOW water temperature selector, heater connection circuit and push button control for each load with indicator lights on the face of switch. In addition, the unit has connections for a hard wired or wireless remote and a master switch controller.

Note: The following page refers to only a fraction of the most common applications of the MultiWave Control System. Contact your Intermatic sales representative or visit www.intermatic.com and visit the Pool & Spa section of our website for more application ideas and details.

Actuator Controller & Valve/Pump Switch Applications

P4043ME Application

Applications: The P4043ME Actuator Control Mechanism gives you an economical way to control up to three valve actuators with either a simple aftermarket switch, a sophisticated PE650/PE953 wireless control or both. In the example, we illustrate controlling two valve actuators most commonly found in a fountain control, solar control or pool/spa control system. This device is also capable of switching a pool/spa thermostat on a remote heater by wiring the remote heaters thermostat pool/common/spa wires to the onboard connector. When a 120 VAC or 240 VAC trigger voltage is transferred through the aftermarket switch to the mechanism's blk/wht wires, the valve actuators and heater thermostat will change to the opposite position, (i.e. pool to spa, pool thermostat to spa thermostat), and back again once the switch is opened. If a wireless PE650/PE953 combination is added to the mechanism, a wireless full thermostat control system along with actuator control would now be available.

P4243ME Application

Sensor Line

Applications: The P4243ME Valve/Pump Switch Mechanism gives you an economical way to control up to three valve actuators and two additional 120 VAC or 240 VAC loads. The example, illustrates controlling two valve actuators on a pool/spa combination and have each of the available loads wired to a 240 VAC spa blower and 240 VAC jet pump. This device is also capable of switching a pool/spa thermostat on a remote heater by wiring the remote heaters thermostat pool/common/spa wires to the onboard connector. When a 120 VAC or 240 VAC trigger voltage is transferred through the aftermarket switch to the mechanisms blk/wht wires, each of the loads will change state, (i.e. ON to OFF or OFF to ON) and the valve actuators and heater thermostat will change to the opposite position, (i.e. pool to spa, pool thermostat to spa thermostat), and back again once the switch is opened. If a wireless PE650/PE953 combination is added to the mechanism, a wireless full thermostat control system along with actuator control and individual load control would now be available.

Wireless & Remote Control Accessories

PE650

PE953

133PE1484A

I-Wave Remote Controls Panel-Mounted Transceiver (PE650) with Antenna (PA118)

Utilizing ground breaking Z-Wave® technology, Intermatic's Wireless Panel-Mounted Transceiver and Hand-Held Transceiver provide reliable two-way communication and long range ability that is unmatched by any other wireless protocols.

The main function of the Panel Mounted Transceiver is to take commands from the Wireless Hand Held Transceiver (PE953) and hand them off to two mechanisms (P1353ME and/or P4243ME).

This unit can control:

- One P1353ME and one P4243ME
- One or two P1353ME units
- One or two P4243ME units
- Gas or electric heater thermostat

In cases where the two devices are too far apart for direct communication you can also purchase a (PA121) 35-ft. Antenna Extension Cable Assembly when structures impede transmissions between the Panel Mounted Transceiver and Hand Held Transceiver.

Wireless Hand-Held Transceiver (PE953)

The primary function of the PE953 MultiWave wireless hand-held controller is to both transmit user commands and receive equipment data from a variety of different devices, including the PE650, PE653, specific OEM equipment and any Z-Wave compatible transceiver device. The PE953 is an all-in-one multitasking controller capable of communicating with all the above devices by toggling the screens on the controller to the appropriate device. With the addition of the new backlit display and improved features; the new PE953 MultiWave controller replaces the I-Wave PE950 controller.

Features:

- Waterproof
- Replaces the PE950
- Backlit LCD display
- User friendly programming
- Improved programming capabilities
- New Z-Wave home automation features
- Controls the PE650, PE653, specific OEM equipment & Z-Wave devices
- Z-Wave certified capable of communicating with any Z-Wave certified devices

Three-Button Wired Remote Control (133PE1484A)

The Three-Button Wired Remote Control 133PE1484A plugs into either the Three-Circuit Clock P1353ME or Valve/Pump Switch P4243ME and is normally installed as a spa-side remote. Most often the remote controls the filter pump, jets and lights, plus includes indicator lights on the face of the button. When installed as part of a system, it replaces the wireless method of controlling the three circuits within the mechanism. The Three-Button Wired Remote Control can also be installed where a third mechanism is needed in the enclosure, since the Wireless Hand-Held Transceiver (PE953) can only control two mechanisms.

Control Accessories

I-Wave Accessories

Antenna (PA118)

The Intermatic Antenna PA118 installs on the top of the PE650 I-Wave receiver. All PE650 I-Wave receivers come with the antenna so you would only require a PA118 for replacement purposes. Only a PA118 antenna will work with the PE650 I-Wave Receiver.

Water Temperature Sensor (PA122)

The Intermatic Water Temperature Sensor PA122 installs in the inlet side of the heater and monitors both pool and spa water temperature, depending on the position of the diverter valves. Installation is necessary for the thermostatic control to work. The sensor plugs into the Panel-Mounted Transceiver PE650 and the water temperature is displayed on the Hand-Held Transceiver PE953.

Freeze (Air Temperature) Sensor (178PA28A)

Add the Intermatic Freeze or Air Temperature Sensor 178PA28A to installations where below-freezing outdoor temperatures are a concern. The sensor is designed to protect the pool and spa equipment and plumbing against freeze damage. The sensor plugs into the circuit board on the back of the P1353ME and turns ON the filter pump when air temperature drops below the programmed temperature. The freeze programming mode will not appear unless the sensor is plugged into the clock.

35-ft. Antenna Extension Cable Assembly (PA121)

When a structure impedes transmission between the Panel-Mounted Transceiver PE650 and Handheld Transceiver(s) PE953, you can use the 35-ft. Antenna Extension Cable Assembly PA121 to relocate the antenna from the Panel-Mounted Transceiver to the area of operation, ensuring that communication between the Hand-Held unit and the control center is successful.

Model #	Description	Case Qty.	Case Weight

I-Wave Wireless Pool/Spa Control Panels

For pool, spa or water feature applications, the I-Wave Series Digital Controls includes one P1353ME mechanism that controls a total of three timed circuits, including single speed or two-speed filter pumps, cleaner/booster pumps, pool lights, spa lights and landscape lights. Countdown and override features allow programs to be interrupted for service and automatically resumed without reprogramming your system.

For pool/spa combinations or pool/water feature combinations, the PE45343RC includes all the features of the PE Series Digital Controls plus two PE24VA valve actuators, Wireless Panel-Mounted Transceiver PE650 and Hand-Held Transceiver PE950 which allows the system to display the status of each of the five circuits (3 timed and 2 on-demand), pool and spa water temperature, pool and spa thermostat set point, heating status and overall communication status.

Applications:

- Pool/Spa Combinations
- Pool/Water Feature Combinations
- Pool/Spa Lighting
- Water Features
- Fountains
- Landscape Lighting

Specifications:

Enclosure: 0.048 in. steel with electrostatically applied light beige finish
26.0 in. (66.3 cm) H x 18.0 in. (45.9 cm) W x 5.5 in. (14.0 cm) D

Knockouts: Two combination $\frac{3}{4}$ – 1 – $1\frac{1}{4}$ in. and eleven combination $\frac{1}{2}$ – $\frac{3}{4}$ in. knockouts on the bottom. Two $\frac{3}{4}$ – 1 in. combination and four combination $\frac{1}{2}$ – $\frac{3}{4}$ in. knockouts on the back. Low voltage compartment has two combination $\frac{1}{2}$ – $\frac{3}{4}$ in. knockouts and one $\frac{3}{4}$ in. hole with a shutter bushing installed. Two combination $\frac{3}{4}$ – 1 in. and one combination $\frac{1}{2}$ – $\frac{3}{4}$ in. knockouts. One $1\frac{3}{4}$ x $2\frac{3}{4}$ in. knockout on the right side

Panel Rating: 125 Amp, 120, 240 VAC or 120, 208 VAC single phase

Switch Rating: P1353ME (page 114) and P4243ME (pages 118-119)

Shipping Weight: See Table

Digital Control Applications

I-Wave Application PE45343RC & PE45343RCT3

Features

- Three timed circuits
- Two on-demand circuits
- Controls up to five loads
- Controls up to three actuators
- Heater thermostat control for pool & spa
- 125 Amp circuit breaker bus
- 120 VAC & 240 VAC capabilities
- Approved direct connect for lights
- Z-Wave® wireless transceiver
- Controls two speed pumps
- Booster pump timing features
- Fireman Switch Control
- Freeze Protection Control
- Models available with low voltage light transformer
- PE45343RCT3 with 300 Watt transformer

PE1500RC Series

Mini-Wave Wireless Pool/Spa Control Panels

For pool/spa combinations or pool/water feature combinations, the PE1541RC includes a PB313E one circuit electronic timer for controlling the filter pump, two PE24VA valve actuators, Wireless Panel Mounted Transceiver PE650 and Hand-Held Transceiver PE950, which allows the system to display the status of each of the four on-demand circuits, pool and spa water temperature, pool and spa thermostat set point, heating status and overall communication status. PE1501RC does not include actuators and is designed for pool or spa applications.

Specifications:

Panel Rating: 100 Amp, 120, 240 VAC or 120, 208 VAC single phase
Switch Rating: 17 Amp Resistive, 120, 240 VAC, 50/60 Hz; 1.5 HP, 120 VAC, 50/60 Hz; 3.0 HP, 240 VAC, 50/60 Hz; 10 Amp Tungsten, 120, 240 VAC, 50/60 Hz
Shipping Weight: 24.3 lbs. (10.9 kg)
Agency Approval: CSA/C-US

Model #	Timer	Circuits	Actuators	Switch	Clock Supply Volts 50/60 Hz
PE1541RC	PB313E	4	2	4 - DPST	120, 240
PE1501RC	PB313E	4	None	4 - DPST	120, 240

Note: See Page 120-121 for PE650 and PE953 specifications.

PA120 Relay (24 VAC Coil)

Booster/Cleaner Pump, Water Feature or Extra Circuit

If you need to control a booster/cleaner pump, water feature or just require an additional circuit, the PA120 can be added as circuit #3 to your Mini-Wave Control Center. If used as a booster/cleaner pump relay, you will need to program your PE953 Wireless Hand-Held Transceiver to lock out the booster/cleaner pump whenever your valve actuators change from the pool position to the spa position. This relay requires a 24 VAC coil, not a 24 VDC coil like the remaining four relays.

143T145A (24 VDC Coil)

Replacement Relay

The 143T145A is the replacement relay for the I-Wave, Mini-Wave or most any other competitors control system available on the market today. Capable of controlling up to a 3 HP motor, it has a 24 VDC coil, and comes equipped with a 10 in. red/black lead wire and two pin connector suitable for most control systems.

Model #	Description	Case Qty.	Case Weight
PA120	Relay - DPST, 24 VAC coil	1	0.4 lbs. (0.2 kg)
143T145A	Relay - DPST, 24 VDC coil	1	0.4 lbs. (0.2 kg)

Mini-Wave Applications

Mini-Wave Application PE1541RC & PE1501RC

Features:

- One timed circuit for filter pump
- Controls up to five loads
- Two separate actuator circuits
- Heater thermostat control for pool & spa
- 100 Amp circuit breaker bus
- Optional relay for booster pump circuit
- 120 VAC & 240 VAC capabilities
- Approved direct connect for lights
- Z-Wave® wireless transceiver
- Available with and without actuators
- PE1541RC with actuators
- PE1501RC without actuators

Mechanical Time Switches

T104M

T104M201

T100M Series

24 Hour Mechanical Time Switch Mechanisms

These heavy duty Time Switch Mechanisms are designed for commercial, industrial and residential applications, and have the highest motor load ratings in the industry. They provide up to 12 ON/OFF operations each day with minimum ON/OFF time of 1 hour. All models are equipped with ON and OFF trippers and can be installed in almost all Intermatic enclosures.

Applications:

- Filter Pumps
- Heat Pumps
- Lighting

Specifications:

Switch Rating: 40 Amp Resistive each pole, 120-480 VAC; 40 Amp Tungsten, Inductive or 1000 VA Pilot Duty each pole 120-277 VAC; 2 HP (24 FLA) 120 VAC; 5 HP (28 FLA) 240 VAC

Shipping Weight: See Table

Agency approval: CSA/C-US

for 2-speed pump applications				

T100M201 Series

24 Hour Mechanical Time Switch Mechanism with Heater Protection

This Time Switch Mechanism provides coordinated control for heater and filter pump operations. It is designed to turn OFF a gas fired swimming pool heater approximately 20 minutes before the filter pump shuts down. This eliminates the problem of pounding and knocking due to overheated water, reduces scale and lime deposits and extends the service life of the heater. The 24-hour dial allows up to 12 ON/OFF operations each day. One set of ON and OFF trippers is supplied with each switch. Minimum ON/OFF time is one hour. Can be installed in almost all Intermatic enclosures.

Applications:

- Pool and/or spa pumps with gas fired heaters

Specifications:

Switch Rating: 40 Amp Resistive each pole, 120-480 VAC; 40 Amp Tungsten, Inductive or 1000 VA Pilot Duty each pole 120-277 VAC; 2 HP (24 FLA) 120 VAC; 5 HP (28 FLA) 240 VAC

Heater Control Circuit: 10 Amp, 240V. max

Shipping Weight: See Table

Agency approval: CSA/C-US

Model #	Description/ Mechanism	Switch	Clock Supply Volts 60 Hz	Shipping Weight
T104M201	Mechanism only with heater protection	DPST	208-277	1.4 lbs (0.6 kg)

Mechanical Time Switches

T100 Series Pool/Spa Time Switches

These heavy-duty Mechanical Time Switches are designed for commercial, industrial and residential applications and have the highest motor load ratings in the industry. They provide up to 12 ON/OFF operations each day with a minimum ON/OFF time of 1 hour. All models are equipped with ON and OFF trippers and are available in either plastic or metal indoor/outdoor enclosure.

T100R201 and T100P201 Series Time Switches are designed to turn OFF a gas fired swimming pool heater approximately 20 minutes before the filter pump shuts down. This eliminates the problem of pounding and knocking due to overheated water, reduces scale and lime deposits and extends the service life of the heater.

Applications:

- Booster Pumps
- Fans
- Heat Pumps
- Lighting
- Air Conditioning
- Swimming Pool and/or Spa Filter Pumps with Gas Fired Heaters
- Hydro Chlorinators
- Music and Signal Systems

Specifications:

Enclosure: NEMA 3R rated for Indoor/Outdoor installation. 0.034 in. drawn steel in beige finish

9 $\frac{3}{8}$ in. (23.8 cm) H x 5 $\frac{1}{2}$ in. (14.0 cm) W x 3 $\frac{5}{8}$ in. (9.2 cm) D

"P" models are the same as above, except made from outdoor grade plastic

Knockouts: Combination $\frac{1}{2}$ – $\frac{3}{4}$ in. nominal knockouts, 1 on back and each side of enclosure and 2 on bottom

Switch Rating: 40 Amp Resistive each pole, 120-480 VAC; 40 Amp Tungsten, Inductive or 1000 VA Pilot Duty each pole, 120-277 VAC; 2 HP (24 FLA) 120 VAC; 5 HP (28 FLA) 240 VAC

Heater Protection Circuit: 10 Amp, 240 V max

Agency Approval: CSA/C-US

T104R201*	Time switch in metal enclosure w/heater protection	DPST	208-277

* The heater protection switch (fireman switch) is closed when the time switch contacts are open to allow remote operation of the heater. A flow or pressure switch must always be part of the heater control circuit.

For additional trippers (1 ON/1 OFF per pack), order No. 156T1978A.

For additional OFF trippers (25 OFF per pack), order No. PA115.

Note: See page 130 for a detailed list of replacement mechanisms.

Mechanical Controls

T10000R

T10004R

T10404R

T10000R Series Pool/Spa Control Centers

The T10000R Series Control Centers feature an all-weather enclosure and contain one or two heavy-duty timer mechanisms. In addition, they have provision to install switches or GFCI receptacle on the side and additional switches inside. The enclosure accepts any combinations of P1353ME or P4243ME or T100M or RC2000M or PF1000M Series mechanisms.

Applications:

- Filter Pumps/Booster Pump Combinations
- Filter Pump/Light Controls
- Pool/Spa Combinations
- Landscape or HID Lighting
- Signs

Specifications:

Enclosure: 0.048 in. steel with electrostatically applied light beige finish
12 in. (30.5 cm) H x 12 in. (30.5 cm) W x 4 1/4 in. (10.8 cm) D

Knockouts: Five combination 1/2 – 3/4 in. and two combination 3/4 – 1 in. knockouts on the bottom. One combination 1/2 – 3/4 in. on the left side and one combination 3/4 – 1 in. on the back. One knockout 1 3/4 x 2 3/4 in. on the right side for mounting switches or GFCI

Center Rating: 92 Amp per leg, 168 Amp Max. 120-240 VAC or 120-208 VAC single phase, 60 Hz

Time Switch Rating: 30 Amp Resistive/Inductive, Tungsten or 1000 VA Pilot Duty each pole 120, 208, 240 VAC; 2 HP (24 FLA), 120 VAC; 5 HP (28 FLA), 240 VAC

** The heater protection switch (fireman switch) is closed when the time switch contacts are open to allow remote operation of the heater. A flow or pressure switch must always be part of the heater control circuit.

For additional trippers (1 ON 1 OFF per pack), order No. 156T1978A.

For additional OFF trippers (25 OFF per pack), order No. PA115.

For stand-offs for décor knockouts (4 stand-offs per pack), order No. 21T156A.

Note: See page 130 for a detailed list of replacement mechanisms.

Mechanical Controls

T20000R Series 60 Amp Pool/Spa Control Panels

The T20000R Series Control Panels features an all-weather enclosure and contain a 4 circuit breaker base, an equipment grounding bar and a mechanical time switch mechanism. The circuit breaker base accepts interchangeable type breakers made by a several manufacturers. In addition, the enclosure has provision for installing additional switches or GFCI receptacles on the side and inside.

Applications:

- Filter Pumps
- Lights
- Ventilating Systems
- Signs
- Air Conditioners
- Heaters

Specifications:

Enclosure: 0.048 in. steel with electrostatically applied light beige finish
16 $\frac{3}{4}$ in. (42.6 cm) H x 8 $\frac{7}{8}$ in. (22.5 cm) W x 4 $\frac{3}{8}$ in. (11.1 cm) D

Knockouts: Five combination $\frac{1}{2}$ – $\frac{3}{4}$ in. and three $\frac{3}{4}$ – 1 in. on the bottom, one combination $\frac{1}{2}$ – $\frac{3}{4}$ in. on the left side, one $\frac{3}{4}$ – 1 in. on the back and one combination $1\frac{3}{4}$ x 2 $\frac{3}{4}$ in. knockout on the right side for mounting switches or GFCI

Panel Rating: 60 Amp, 120, 240 VAC or 120, 208 VAC; Single Phase, 60 Hz

Time Switch Rating: 30 Amp Resistive/Inductive, Tungsten or 1000 VA Pilot Duty each pole, 120, 208, 240 VAC; 2 HP (24 FLA), 120 VAC; 5 HP (28 FLA), 240 VAC

For additional trippers (1 ON 1 OFF per pack), order No. 156T1978A.

For additional OFF trippers (25 OFF per pack), order NO. PA115.

For additional stand-offs for décor knockouts (4 stand-offs per pack), order No. 21T156A.

Radio Remote Controls

RC600 & RC900 Series Outdoor Radio Remote Controls

These Modular Radio Receivers are one half of a two part remote control system. They operate as ordinary ON/OFF switches but they also respond to the signals of a hand held transmitter — the other half of the system. The modules are designed for indoor or outdoor use, and can handle a variety of switching applications. By the push of a button on the face of the transmitter, the user is able to turn ON/OFF the connected load (lights, pump, etc.) from any remote location, inside or outside of the house, safely and conveniently. In addition, a single transmitter can operate up to three receivers and is able to “teach” each module a different code (Transmitter model RC939 sold separately).

Applications:

- Pool/Spa Pumps, Lights & Heaters
- Pool/Spa Combinations
- Outdoor Lighting
- Air Blowers
- Fountain Pumps
- Motorized Gates
- Signs
- Water Features
- Motorized Valves

Specifications:

Enclosure: Beige outdoor grade plastic

Electrical Rating: See table

Maximum Range: 100 ft. See transmitter model RC939 for details

Agency Approval: CSA/C-US

Model #	Description	Electrical Rating	Size	Shipping Weight
RC613	Receiver with ON/OFF button	15 Amp Resistive, 10 Amp (1200 W) Tungsten, 1 HP, motor load, 120 VAC	4½ in. H (11.4 cm), 3 in. W (7.6 cm), 1¼ in. D (4.0 cm)	0.5 lbs (0.2 kg)
RC613L	RC613 with (3) 36 in. long leads	Same as RC613	Same as RC613	0.7 lbs (0.3 kg)
RC613R	Heavy duty receiver module	20 Amp Resistive, 120, 240 V, 12.5 Amp (1500 W); 1.5 HP, 120 VAC; 3 HP, 240 VAC; DPST Contacts	7¾ in. H (19.7 cm), 4 in. W (10.7 cm), 3½ in. D (8.9 cm)	1.4 lbs (0.6 kg)
RC615	Timer Interface Module without manual button	Same as RC613	Same as RC613	0.5 lbs (0.2 kg)

Hand Held Radio Transmitter

This hand held radio transmitter operates the shared equipment of a pool/spa combination by the touch of a button. Additional buttons are available on the transmitter to turn ON/OFF a booster pump, blower and lights.

Applications:

- Pool/Spa Pumps, Lights & Heaters
- Pool/Spa Combinations
- Outdoor Lighting
- Air Blowers
- Signs
- Motorized Gates
- Fountain Pumps
- Water Features
- Motorized Valves

Specifications:

Enclosure: Beige plastic, 4¾ in. (11.1 cm) H x 2¾ in. (7.0 cm) W x 1 in. (2.5 cm) D

Agency Approval: CSA/C-US

Model #	Description	Range*	Battery	Shipping Weight
RC939	3 Channel Radio Transmitter	100 ft..	9 V Transistor type	0.5 lbs (0.2 kg)

* The range is 100 feet but depends on many factors including age of battery, proximity of large metal objects, location of the receiver and environmental conditions at the time of transmission.

Air Operated Controls

RC Series

Single Circuit Air Switches & Accessories

These Air Switches are designed to control one piece of equipment with one air button. The switch can safely control loads without electricity at the pool, spa or tub side, for example a pump, blower or light. Each time pressure is applied to the remote air button the connected equipment will operate as described in the table. Model with suffix "T" has a built-in 10-minute automatic shut down timer. However, the operation can be stopped any time during the cycle by simply pressing the air button.

Applications:

- Pumps
- Air Blowers
- Heaters
- Lights

Specifications:

Enclosure: Plastic for Indoor/Outdoor installations

4 1/8 in. (10.5 cm) H x 4 1/8 in. (10.5 cm) W x 3 3/8 in. (8.6 cm) D

Electrical Rating: 20 Amp, Resistive 120, 240 VAC, 1 HP, 120 VAC; 2 HP, 240 VAC

Voltage: All models (except as noted) operate either on 120 VAC., (Line and Neutral) or 240 VAC., (Line 1, and Line 2 and Neutral). On 50 Hz operation, models with suffix "T" will time out in 11 minutes

Maximum Range: See table and note

Shipping Weight: See table

Agency Approval: CSA/C-US

Note: The actual distance between the control and air button depends on the amount of displaced air, the inside diameter of the air hose and other factors beyond the control of the manufacturer.

Model	Description	Switch	Distance	Shipping Weight
RC2103S	ON/OFF	SPST	100 ft.	2.0 lbs (0.09 kg)
Model	Description	Distance/Length	Case Qty	Case Weight
RC4G	Air button for gunite spas	100 ft.	10	1.0 lbs (0.5 kg)
RC6F	Air button – universal	150 ft.	10	1.0 lbs (0.5 kg)
RC117	Air tubing	75 ft.	10	12.0 lbs (5.4 kg)
RC150	Air tubing	500 ft.	10	15.0 lbs (6.7 kg)
RC122B	Air tubing and RC4G	25 ft.	10	4.5 lbs (2.0 kg)
RC127B	Air tubing and RC4G	75 ft.	10	13.0 lbs (5.9 kg)
RC510	(10) Air tubing coupler	N/A	1	0.1 lbs (0.05 kg)

Air Operated Controls

RC2343PT
RC2123PT

RC2000 Series Multi-Function Air Switch Mechanisms

These Air Switches provide remote control for one, two or three separate loads. A push button connected to the mechanism with a flexible air hose enables the user to operate a pump, a blower and a light up to 75 feet away. Models with a "T" suffix have a 24-hour digital, multiple program timer that turns a single or two-speed pump ON/OFF several times per day. The air buttons and air hose are not included and must be purchased separately.

The RC2403RT model controls a single speed or two-speed filter pump, a blower and an independent 30 Amp circuit. Comes complete with 2 air buttons and 75 ft. air hose.

Applications:

- Filter Pumps
- Jet Pumps
- Lights
- Booster Pumps
- Blowers
- Heaters

Specifications:

Enclosure: For Indoor/Outdoor installations, beige plastic, 9³/₈ in. (23.8 cm) H x 5¹/₂ in. (14.0 cm) W x 3³/₄ in. (9.5 cm) D

Knockouts: Four combination 1/2 - 3/4 in., one on each side of enclosure and two on bottom

Electrical Rating: 20 Amp Resistive, 120, 240 VAC; 1 HP, 120 VAC; 2 HP, 240 VAC; each circuit

Voltage: All models operate on 120 VAC (Line and Neutral) or 240 VAC (Line 1, Line 2 and Neutral)

Shipping Weight:

RC2123PT – 3.0 lbs (1.4 kg)

RC2343PT – 3.25 lbs (1.5 kg)

Agency Approval: CSA/C-US

Model #	Description	Switch	Clock Supply Volts AC, 60Hz
RC2123PT	ON/OFF or HIGH LOW, w/timer	SPDT	120/240
RC2343PT	Two circuit sequential w/timer	4-function	120/240

Air Operated Controls

RC2100 Series

Air or Remote Operated Pool/Spa Controls

This line of Air or Remote Operated Controls is specially designed to control pool/spa combinations economically and reliably away from the equipment. With one touch, these units automatically override the 24 HR. timer and turn ON the filter pump, switch the valves from pool-filter mode to the spa/water feature mode and switch the compatible dual thermostat on the heater/heat pump from the pre-set pool temperature to the pre-set spa temperature. Comes complete with two PE24VA 24-Volt valve actuators.

Applications:

- Pool/Spa Combinations
- Pool/Water Feature Combinations

Specifications:

RC2163BE, RC2163BFE

Enclosure: 0.048 in. steel with electrostatically applied beige finish
16½ in. (41.9 cm) H x 10⅞ in. (27.6 cm) W x 4¼ in. (10.8 cm) D

Knockouts: Two ½ in., three combination ½ – ¾ in., and two combination ¾ – 1 in. knockouts on the bottom. Four ½ in., three combination ½ – ¾ in. on the back. One combination ¾ – 1 in. on the left side. One 1¾ x 2¾ in. knockout on the right side for mounting switches and GFCI

Panel Rating: 100 Amp, 120, 240 VAC. or 120, 208 VAC single phase, 60 Hz

Electrical Rating: See table below. Actuator Circuit: 24 V, 40 Amp Max

Shipping Weight: See table below

Agency Approval: CSA/C-US

Specifications/Features		RC2163BE	RC2163BFE
Voltage		120/240	120/240

RC2163BFE**

Freeze Protection Controls

PF1102M

PF1102

PF1103MT

PF1103T

PF1100 Series

Single Circuit Freeze Protection Controls

These Freeze Protection Controls are designed to protect pool and spa equipment and plumbing against freeze damage. They turn the pump and heater ON when the outdoor temperature drops below the temperature set by the user-adjustable thermostat.

Models without timer connect to a timing or switching device and they control operation of the equipment, as well as protect it against freeze damage. Models with timer provide both automation and protection for the equipment.

Applications:

- Filter Pumps
- Filter Pump/Booster Pump Combinations
- Waterfalls
- Water Features

Specifications:

Enclosure: 0.034 in. drawn steel, electrostatically coated, beige color

Hasp, with hole for lock, holds permanently attached side-hinged door closed
9³/₈ in. (23.8 cm) H x 5¹/₄ in. (14.0 cm) W x 3⁵/₈ in. (9.2 cm) D

Knockouts: 1/2 – 3/4 in. combination knockouts, one back, one on each side, two bottom

Thermostat Range: 45°F – 32°F with 5 degrees differential

Electrical Rating: See table.

Agency Approval: CSA/C-US

Model #	Description	Input Rating	HP	Shipping Weight
PF1102	Thermostat only for 240 VAC installation	240 VAC	3	3.7 lbs (1.7 kg)
PF1102M	mechanism only	240 VAC	3	2.0 lbs (0.9 kg)

PF1103T	Timer with thermostat for 120/240 VAC installation	120/240 VAC*	1.5/3	4.5 lbs (2.0 kg)
PF1103MT	mechanism only	120/240 VAC*	1.5/3	2.5 lbs (1.1 kg)

* Neutral must be installed.

Freeze Controls

PF1100 & PF1200 Series Multi-Circuit Freeze Protection Control Centers & Panels

These heavy-duty Freeze Protection Controls are designed specifically for pools requiring one or two time switches and protect the pool and spa equipment and plumbing against freeze damage. They turn the pump and heater ON when the outdoor temperature drops below the temperature set by the user-adjustable thermostat. In addition, they have a provision to install switches inside or GFCI receptacle on the side of enclosure.

Applications:

- Filter Pumps
- Filter Pump Booster Pump
- Fountains
- Combinations
- Pool-Spa Combinations

Specifications:

PF1112T, PF1202T

Enclosure: 0.048 in. steel with electrostatically applied light beige finish
12 in. (30.5 cm) H x 12 in. (30.5 cm) W x 4 1/4 in. (10.8 cm) D

Knockouts: Five combination 1/2 – 3/4 in. and two combination 3/4 – 1 in. knockouts on the bottom. One combination 1/2 – 3/4 in. on the left side and one combination 3/4 – 1 in. on the back. One knockout 1 3/4 x 2 3/4 in. on the right side for mounting switches or GFCI

Center Rating: 92 Amp per leg, 168 Amp Max. 120, 240 VAC or 120, 240 VAC single phase, 60 Hz.

Electrical Rating: See table

Thermostat Range: 44°F – 32°F with 5 degrees differential

Shipping Weight: See table

PF1222TB

Enclosure: 0.048 in. steel with electrostatically applied beige finish
16 1/2 in. (41.9 cm) H x 10 3/8 in. (27.6 cm) W x 4 1/4 in. (10.8 cm) D,

Knockouts: Two 1/2 in., three combination 1/2 – 3/4 in., and two combination 3/4 – 1 in. knockouts on the bottom. Four 1/2 in., three combination 1/2 – 3/4 in. on the back. One combination 3/4 – 1 in. on the left side. One 1 3/4 x 2 3/4 in. knockout on the right side for mounting switches and GFCI

Panel Rating: 85 Amp max., 120, 240 VAC or 120, 208 VAC single phase, 60 Hz

Electrical Rating: See table

Thermostat Range: 44°F – 32°F with 5 degrees differential

Shipping Weight: See table

Agency Approval: CSA/C-US

Model #	Description	Electrical Input	Rating HP	Shipping Weight
PF1112T	For pools requiring one time switch	240 VAC	3	8.0 lbs (3.6 kg)
PF1202T	For pools with cleaner, requiring two time switches	240 VAC	3	10.0 lbs (4.5 kg)
PF1222TB	Same as a PF1202T with 4/8 breaker base and heater protection	240 VAC	3	17.0 lbs (7.7 kg)

For additional trippers (1 ON 1 OFF per pack), Order No. 156T1978A.

For additional OFF trippers (25 OFF per pack), Order No. PA115.

For stand-offs for décor knockouts (4 stand-offs per pack), order No. 21T156A.

Note: See page 130 for a detailed list of T100M replacement mechanisms and page 140 for freeze switch mechanisms.

See pages 122-124 for digital freeze protection devices.

Safety Transformers

PX100

PX100S

PX300

PX300S

PX600

PX600S

PX100, PX300 & PX600 Series Safety Transformers

These Safety Transformers are specifically designed to supply 12 volts to pool/spa lights, submersible fixtures and outdoor garden lights. A grounded shield between the primary and secondary windings assures safe operation and the built-in circuit protection will disconnect power to the transformer in case of defect or overload.

Applications:

- Pool Lights
- Spa Lights
- Garden Lights
- Fountain Lights

Specifications:

PX100/S, PX300/S

Enclosure: Stainless steel or steel with electrostatically applied light beige finish
Mounting brackets top and bottom

7.25 in. (19.4 cm) H x 5.25 in. (13.3 cm) W x 4.5 in. (11.4 cm) D

Knockouts: Total of ten combination $\frac{1}{2}$ – $\frac{3}{4}$ in. knockouts, (2) right side, (2) left side, (2) back, (4) bottom

Electrical Rating: See table

Shipping Weight: See table

PX600/S

Enclosure: Stainless steel or steel with electrostatically applied light beige finish.
Mounting brackets top and bottom

10 in. (25.4 cm) H x 10 in. (25.4 cm) W x 5 in. (12.7 cm) D

Knockouts: Two combination $\frac{1}{2}$ – $\frac{3}{4}$ in., and 4 combination $\frac{3}{4}$ – 1 in. knockouts on the bottom. Total of six combination $\frac{1}{2}$ – $\frac{3}{4}$ in. knockouts, 2 right side, 2 left side, 2 back

Electrical Rating: See table

Mechanical Controls With Safety Transformers

T10000RT, T40000RT & PE45343RCT

Series

Pool Panels with Transformer

These Panels with Transformer offer an all-in-one, easy to wire and extremely cost effective electrical control center for any pool or spa installation. Inside the enclosure are the time switch, the transformer and other components needed for the completion of this installation. The T40000RT Series panels will accept additional Intermatic mechanisms and/or components.

The PE45343RCT Series includes all the features of the PE Series Digital Controls plus two PE24VA valve actuators, Wireless Panel-Mounted Transceiver (PE953), which allows the system to display the status of each of the five circuits (3 timed and 2 on demand), pool and spa water temperature, pool and spa thermostat set point, heating status and overall communication status. (See pages 120-121)

Applications:

- Filter Pumps
- Blowers
- Low Voltage Pool/Spa Lighting
- Low Voltage Outdoor Lighting
- Fountains

Specifications:

T10000RT Series

Enclosure: 0.048 in. steel with electrostatically applied light beige finish
12 in. (30.5 cm) H x 12 in. (30.5 cm) W x 4 1/4 in. (10.8 cm) D

Knockouts: Five combination 1/2 – 3/4 in. and two combination 3/4 – 1 in. knockouts on the bottom. One combination 1/2 – 3/4 in. on the left side and one combination 3/4 – 1 in. on the back. One knockout 1 3/4 x 2 3/4 in. on the right side for mounting switches or GFCI

Center Rating: 62 Amp per leg, 168 Amp Max., 120, 240 VAC or 120, 208 VAC single phase, 60 Hz

Shipping Weight: See table

T40000RT Series

Enclosure: 0.048 in. steel with electrostatically applied light beige finish
20 3/4 in. (52.7 cm) H x 12 3/4 in. (32.4 cm) W x 4 1/4 in. (10.8 cm) D

Knockouts: Seven combination 1/2 – 3/4 in. and three combination 3/4 – 1 in. knockouts on the bottom. Five combination 1/2 – 3/4 in. on the left side. One 1 3/4 x 2 3/4 in. knockout on the right side for mounting switches and GFCI

Panel Rating: T40000RT Series — 100 Amp, 120, 240 VAC or 120, 208 VAC single phase, 60 Hz

Mechanical Replacement Timers

PB913N

PB913N66

PB913N84

PB873MKZ

PB800 & PB900 Series Mechanical Timer Mechanisms

These timers provide automatic control for pumps, cleaners and other types of loads. Timers have three-way mounting; flush in round opening, raised in rectangular opening or on base. Quick connect terminals for easy installation.

Applications:

- Filter Pumps
- Booster Pumps
- Sprinkler Systems
- Heating Systems
- Lights
- Fountains
- Cleaning Systems
- Security Systems

Specifications:

Size: 3 1/3 in. (84.8 cm) H x 2 13/16 in. (71.4 cm) W x 1 61/64 in. (49.6 cm) D

Electrical Rating: 20 Amp Resistive, 120-277 Volt; 1250 Watt Tungsten 125 VAC; 1 HP (16 FLA), 120 VAC; 2 HP (12 FLA), 240 VAC; 360 VA Pilot Duty, 120-240 VAC.

Timing Cycle: 24 hour dial – minimum ON time 1 hour, maximum ON time 23 hours, increments of 30 minutes. 7-day dial – minimum ON time 6 hours, maximum ON time 162 hours, in increments of 3 hours

Color: Black housing with white screening and orange trippers

Shipping Weight: 8 oz (0.22 kg) All mechanisms are shipped in bulk (36 per carton) unless otherwise specified

Agency Approval: UL, CSA

Model #	Switch	Dial	Volts AC, 60 Hz	# of Trippers	Manual Override
PB873MKZ	SPST	7 day	120	56*	No

Note: Replacement mechanisms may or may not have the same tripper colors and may require different method of connections.

1 – Original timer has gold plated contacts.

2 – Replacement is 50/60 Hz electronic timer.

3 – Original timer lead connections must be changed to 1/4 in. quick connects.

Portable Outdoor Timers With GFCI & Photo Control

P1100 Series

Portable Outdoor Timers & Heavy-Duty Outdoor Timers

These portable outdoor timers are specially designed to control the filter pump of a portable pool or spa, but they can also be used to turn ON and OFF outdoor decorations, engine block heaters and other appliances, indoors or outdoors.

Applications:

- Filter Pumps
- Air Conditioners
- Signs
- Lights
- Engine Block Heaters
- Fans

Specifications:

Enclosure: Outdoor grade plastic

5 in. (12.7 cm) H x 5½ in. (13.97 cm) W x 3¾ in. (9.52 cm) D

Cord: 3 wire, outdoor grade, 22 in. long, with grounded plug

Timer: 24 hour with 23½ hour maximum ON time. Two ON, two OFF trippers: standard. Dial will accept up to 12 sets of trippers

Shipping Weight: 1.7 lbs (0.7 kg)

Model #	Description	Electrical	Plug & Receptacle
P1101	Timer	15 Amp (1800 W), Resistive or Tungsten; 1 HP Air Conditioner, (15 FLA, 90 LRA), Motor Load	5-15 
P1121	Timer	15 Amp (1800 W), Resistive or Tungsten; 1 HP Air Conditioner, (15 FLA, 90 LRA), Motor Load	5-15 
P1131	Heavy-Duty Timer w/Twist-Lock Plug & Receptacle	20 Amp Resistive, 1 HP, (15 FLA, 90 LRA) Motor Load	5L-20 

For additional trippers (2 ON 2 OFF per pack), order No. 156PB10398A.

P1200 Series

Two-Circuit Portable Outdoor Timer

These portable two-circuit above ground pool timers incorporate a plug in for a timed circuit (normally used for a pool pump) and a plug-in for a live circuit (typically used for a pool light). GFCI protected circuits and a three-prong grounded plug for the time switch supply are also built-in.

Applications:

- Above Ground Pool Pumps
- Above Ground Pool Lights

Specifications:

Enclosure: NEMA 3R rated for Indoor/Outdoor installation

9¾ in. (23.8 cm) H x 5½ in. (14.0 cm) W x 3¾ in. (9.2 cm) D

Knockouts: Combination ½ – ¾ in. nominal knockouts, one on the back and each side of enclosure, two pre-cut on bottom

Timer: 24 hour with 23½ hour maximum ON time. Two ON, two OFF trippers standard. Dial will accept up to 12 sets of trippers

Shipping Weight: 2.8 lbs. (1.3kg)

Model #	Description	Electrical	Plug & Receptacle

Electronic Replacement Timers

**PB313E
PB313EK
PB314E
PB314EK**

**PB373E
PB374E**

PB300 Series Electronic Timer Mechanisms

These compact Electronic Timers are specially suited for applications where equipment needs to be cycled ON and OFF up to 8 times per day, and where automatic operation of the equipment requires occasional override by someone other than a qualified service professional. They offer rugged construction, resistance to surges and humidity, operate between wide temperature extremes and come with a 5 year service life replaceable lithium battery. A light indicator illuminates when the timer is in the ON position. Select feature allows timers to be continuously ON, OFF or in AUTO mode.

PB300EK Series Electronic Timer kits are designed for applications where PB Series Mechanical Timers need to be replaced. The connected load must not exceed the ratings of these timers. The kits contain all the necessary hardware for a speedy repair or exchange.

Applications:

- Filter Pumps
- Booster Pumps
- Sprinkler Systems
- Heating Systems
- Lights
- Fountains
- Cleaning Systems
- Security Systems

Specifications:

Enclosure: Beige electrical grade plastic

Size: PB300 Series: 2 $\frac{3}{8}$ in. (6.0 cm) High and Wide

EB suffix: 1 $\frac{1}{8}$ in. (28 cm) Deep

E suffix: $\frac{7}{8}$ in. (2.2 cm) Deep

Electrical Rating:

A = 16 Amp Resistive, 0.5 HP motor load 24, 120 or 240 VAC, 50/60 Hz

B = 20 Amp Resistive, 10 Amp (1200 Watt) Tungsten, 1 HP (16 FLA), motor load;
720 VA Pilot Duty, 120 VAC, 50/60 Hz

C = 20 Amp Resistive, 2 HP (12 FLA), 240 VAC, 50/60 Hz

Shipping Weight: 0.3 lbs. (0.14 kg)

Agency Approval: UL

Model #	Description	Switch	Rating	Volts AC 50/60 Hz

* Output voltage is the same as supply voltage.

Electronic Time Switches

P1000 & P7000 Series Electronic Time Switches and Mechanisms

This line of electronic time switches in safety enclosures is specially suited for applications where there is a need to turn equipment up to 8 ON and OFF cycles daily, and where the automatic operation of the equipment requires occasional override by someone other than a qualified service professional. Electronic technology allows up-to-the-minute programming accuracy. The unique "door within the door" provides safe access to the timer control buttons, but prevents entry into the wiring compartment. Light indicator illuminates when timer is in ON position. An override feature is provided to allow pool service without interruption of ON/OFF settings. "Select feature" allows timer to be continuously ON, OFF or in Auto mode. The addition of a radio receiver (Model P1203FR) provides a 2nd circuit for any other load (light, blower etc.) requiring control from a remote location. Typical application for the clock circuit would be the pool pump, and a pool light for the radio circuit. In case of power failure, a replaceable lithium battery preserves programming for up to three years.

Applications:

- Filter Pumps
- Pool/Spa Lights
- Water Features
- Fountains

Specifications:

Mechanism Specifications:

Size: Standard mechanism fits in all standard Intermatic time switch enclosures and swimming pool control panels

Rating:

P7103ME – 1.5 HP, 120 VAC; 3.0 HP, 240 VAC

Shipping Weight: 1.41 lbs (0.6 kg)

Enclosure Specifications: All plastic NEMA 3R rated for Indoor/Outdoor installation. 9 $\frac{3}{8}$ in. (23.9 cm) H x 5 $\frac{1}{2}$ in. (14.0 cm) W x 3 $\frac{5}{8}$ in. (9.2 cm) D in beige finish

Knockouts: Combination $\frac{1}{2}$ – $\frac{3}{4}$ in. nominal knockouts, 1 on back and each side of enclosure, and 2 on bottom

Shipping Weight: 3.75 lbs (1.7 kg)

Agency Approval: CSA/C-US

Model #	Description	Switch	Supply Voltage 50/60 Hz
P1103FE	24-Hour Electronic Time Switch Enclosure	One DPST	120 V for clock 120 V, 240 V for load

Pool/Spa Junction Boxes & Water Valve Motorized Actuator

PJB2175

PJB4175

PE24VA

PJB Series

Pool/Spa Junction Box & Mounting Bracket

These polymeric, water tight, multi-fixture Junction Boxes are specially designed for pools, pool-spa combinations and landscape applications. The PJB4175 provides safe and reliable connection for up to four lights, while the PJB2175 supports up to two lights. They will accommodate flexible cords from #16-3 up to #12-3 and #10-3 in any combination and non-metallic conduits from 1/2 to 1 in., including one for supply conductor feed. An optional wall/post mounting bracket is also available.

Applications:

- Pool Lights
- Spa Lights
- Landscape Lights

Specifications:

Enclosure: Outdoor grade plastic. PJB4175 – 7.5 in. L x 4.75 in. W x 5.0 in. D
PJB2175 – 7.0 in. L x 3.0 in. W x 4.0 in. D

Note: Bracket sold separately.

Photo call outs:

- A. Only two screws required to attach lid to base
- B. Easy access ground bar
- C. Innovative strain relief design
- D. Accepts multiple conduit sizes
- E. Platform design offers ease of installation
- F. One external bonding lug
- G. Supports up to two pool/spa lights
- H. Sloped platform design provides ultimate convenience
- I. Supports up to four pool/spa lights

Model #	Description	Light Connection	Case Qty.	Shipping Weight
PJB2175	Pool/Spa Light Junction Box	2	24	19.2 lbs (8.6 kg)
PJB4175	Pool/Spa Light Junction Box	4	12	13.2 lbs (6.0 kg)
PA114	Wall/Post Mounting Bracket	—	10	5 lbs (2.3 kg)

24-Volt Valve Actuator

Designed with quality in mind, Intermatic's 24-Volt valve actuators provide reliable control of 2-way and 3-way diverter valves for pool/spa combinations and water features. The water flow can be altered for specific applications through the adjustable cam, which rotates diverter valves to multiple degree settings. The cam settings can be easily adjusted by simply removing the lid.

These valve actuators are compatible with all pool/spa valves currently offered in the industry and will retrofit into all pool/spa control systems.

Applications:

- Pools
- Spas
- Fountains
- Water Features

Standard Features:

- Automates compatible diverter valves for pool/spa & pool/water feature combinations
- Adjustable cam rotates diverter valves to multiple degree settings
- Retrofits into all pool/spa control systems on the market

Specifications:

Shipping Weight: See table

Case Quantity: 6

Model #	Description	Voltage	Shipping Weight Each
PE24VA	Valve Actuator	24 VAC	3.5 lbs (2.2 kg)

Pool/Spa Accessories

Emergency Shut Off Switch PA600

The revised Article 680-12 of the National Electrical Code (NEC) now requires the installation of a disconnect switch "...located within sight from all pools, spas..." This Safety Switch is intended for disconnecting electrical equipment from its power source, quickly and safely, in case of emergency. Any person, even if not familiar with the installation or safety procedures, can shut down the connected equipment by simply moving the large red lever to the OFF position. It fits in a single-gang junction box and is rated for outdoor installations.

Specifications:

Electrical Rating: 1 HP, 120V; 3 HP, 240V; 20 Amp Resistive, 120, 240V DPST

Shipping Weight: 0.5 lbs (0.2 kg)

Housing: Electrical grade plastic.

Face Plate: Beige powder coated steel

Agency Approval: CSA/C-US

Fireman Switch 156T4042A

This switch provides coordinated control for any pool/spa heater and any filter pump. It is designed to turn OFF a gas fired pool/spa heater approximately 20 minutes before the filter pump shuts down. This eliminates the problem of pounding and knocking due to overheated water, reduces scale and lime deposits and extends the service life of the heater.

Nonmetallic Hub Kits

**156PA13713A (1½ in.), 156PA13714A (¾ in.),
156PA13715A (1 in.)**

All Intermatic Control Centers and Control Panels are approved for direct underwater light connection, eliminating the need for additional junction boxes. These Nonmetallic Hub Kits provide direct connection to 12 Volt and 120 Volt underwater luminaries.

Metallic Hub Kit

156PA14336A (1½ in.)

The Metallic Hub Kit is used for the same type of applications as the Nonmetallic Hub Kits, but is designed for applications that require red brass conduit.

Stand-Off Posts

21T166A (2), 21T156A (4)

Stand-Off Posts are used for mounting toggle switches inside any Intermatic Pool/Spa Control Center and Control Panel. The switches are normally used for on-demand control pool/spa lighting, landscape lighting, water features, etc. The dead front is detached, the switch knockout is removed from the dead front and the stand-off post is secured to the back panel of the enclosure. The switch is then mounted to the posts with standard mounting screws and the dead front is re-attached.

Back-Feed Retainer Kit 22T904A

A recent revision to the breaker base in all Intermatic Pool/Spa Control Panels now allows installers to back-feed the branch circuits using one breaker, single or double pole, as a main disconnect. In accordance with NEC Article 408.36 (F) –2005, the installation requires an additional fastener/retainer kit.

Model	Description
Electronic Timers	
101--00040	Battery holder for ET100
101ET945A	Discontinued – use part number: 101--00040
133ET1189A	Power Board only for ET70115C Series
133ET1191A	Power Board only for ET70215C Series
133ET1192A	Power Board only for ET70415CR Series
133ET1424A	Logic Module only for ET70115C Series
133ET1425A	Logic Module only for ET70215C Series
133ET1426A	Logic Module only for ET70415CR Series
133ET1427A	Logic Module only for ET70815CR Series
133ET1428A	Logic Module only for ET71615CR Series
156ET3905A	(4) "AA" NiCad Rechargeable Bat. for ET700C & ET800CR Series
156ET4159A	(2) Lithium Coin Cells for ET70000C / ET70000CR Series
156ET9402A	8 Circuit Remote Override for ET70815CR & ET70815CR24 NEMA 3R
156ET9403A	16 Circuit Remote Override for ET71615CR & ET71615CR24 NEMA 3R
156ET9748A	Voltage and Momentary Output Selector Jumpers for ET Series and CT1000
188ET1045A	Power Board only for ET70815CR Series
188ET1049A	Power Board only for ET71615CR Series
22T338GR	Snap-In Bracket for ET Series, T100, T170, T180, T1900, T2000 & C8800 Series
22T535GR	DIN Rail Bracket for ET Series, T100, T170, T180, T1900, T2000 & C8800 Series
CA8750	CA USB Stick w/Base
CA8750SW	CA USB Stick w/Base & Pro CD
ET7232M	Override Accessory for ET70115C & ET70215C Series Outdoor or Flush Mount
ET7232M1	Override Accessory for ET70115C & ET70215C Series Surface Mount
Enclosures	
6ET1398GA	Flush Mount Cover with Lock for ET70415CR & ET70415CR24
24EB5495	Replacement Plate Only for E1120, KM2ST-1G & KM2SW-1G
24EB5497	Replacement Plate Only for E1220, KM2ST-2G & KM2SW-2G
24EB5524	Replacement Plate Only for E1221, KM2ST-2D & KM2SW-2D
24EB5526	Replacement Plate only for E1222, KM2STST-2G & KM2SWSW-2G
Hour Meters	
G-55U	Gasket for all FWZ55 flush mount models
G-72U	Gasket for all FWZ72 flush mount models
Mechanical Timers	
107T119	Tripper (silver) for T8800 & R8800 Series
107T73	Day Wheel Pin for T8800 & R8800 Series
119T86A	Transformer for T8845PV
124T1948	Insulator for Single Pole Time Switches
124T1952	Insulator for Double Pole Time Switches
124T2097	Plastic Insulator for T8800 & R8800 Series
124T2247	Insulator Old Style Replaces 124T1607

Model	Description
131T68GA	125 V, 60 Hz Motor & Carryover T7400BC & T7800BC Series
133T698A	Replacement Snap Switch for T1970 Series
133T1115A	Toggle Switch for T8800 & R8800 Series
133T700A	Micro Switch for T8800 & R8800 Series
133T701A	Replacement Snap Switch for T1900 & T2000 Series
133T773A	Replacement Snap Switch for C8800 Series
156EB1945A	Trippers 2 Sets (ON / OFF) for E1020, E1022, EB11, EB11R & WH21
156T1948A	Trippers One Set (ON/OFF/ON Cutout) for T170, P171, T1400 & T1800 Series
156T1949A	Tripper Variable (10 to 60 minute) for Model T185
156T1950A	Trippers (12 ON or OFF) for T1900, T2000, C8800, R8800 & T8800 Series
156T1954A	14 Pins for R8800, T8800 Series
156T1957A	Skipper Screws (3 per package)
156T1978A	Trippers (1 ON / 1 OFF) for T100, T170, T7000, & WH40 (Same as 156T3492A)
156T2548A	Trippers 7 Sets (ON / OFF) for T7400 & T7800 Series
156T3085A	3 Skipper Screws for T170, P171, T1400, T1800 and WH Series
156T3230A	Trippers (1 ON / 1 OFF / 1 On Cutout) for WH Series
FM-FU	FM1 Flush Mount Housing Kit
FM-SU	FM1 Surface/DIN Rail Kit
WG1381-10	Motor - Boxed, 125 V, 50 Hz for T170CR
WG1380-11	Motor - Boxed, 125 V, 60 Hz for T1400BCR
WG1383-11	Motor - Boxed, 208/277 V, 60 Hz for T1800BCR
WG1570-10D	Motor - Boxed, 125 V, 60 Hz for T101, T103 & T105
WG1571-10D	Motor - Boxed, 125 V, 50 Hz for T101, T102, T103, T104, T105, T100R201 & WH10
WG1573-10D	Motor - Boxed, 208/277 V, 60 Hz for T102, T104, WH10 & WH30
WG1574-10D	Motor - Boxed, 208/277 V, 50 Hz for T100R301
WG1576-10D	Motor - Boxed, 480 V, 60 Hz for WH40, WH70 & WH80
WG1600-11	Motor - Boxed, 125 V, 60 Hz for T7400B & T7800B
WG1603-11D	Motor - Boxed, 208/277 V, 60 Hz for T7400B & T7800B
WG190-15D	Motor - Boxed, 125 V, 60 Hz
WG230-13D	Motor - Boxed, 125 V, 60 Hz for E1000
WG233-18	Motor - Boxed, 208/277 V, 60 Hz for E1000
WG430-10D	Motor - Boxed, 125 V, 60 Hz for T1400BR
WG430-20D	Motor - Boxed, 125 V, 60 Hz for T1800BR
WG433-20D	Motor - Boxed, 208/277 V, 60 Hz for T180 & T500
WG436-20	Motor - Boxed, 480 V, 60 Hz for WH10 & WH30
WG630D	Motor - Boxed, 125 V, 60 Hz
WG720-10D	Motor - Boxed, 125 V, 60 Hz for T2000 Series
WG723-10D	Motor - Boxed, 208/277 V, 60 Hz for T2000 Series
WG730-14D	Motor - Boxed, 125 V, 60 Hz for R8800, T1900, T1970, T8800 Series
WG733-14D	Motor - Boxed, 208/277 V, 60 Hz for R8800, T1900, T1970, T8800 Series
WG736-14D	Motor - Boxed, 480 V, 60 Hz for R8800, T1975E & T1976E Series
WG750-10	Motor - Boxed, 125 V, 60 Hz for C8845
WG760-10	Motor - Boxed, 125 V, 60 Hz for C8825 (timer obsolete)

Parts/Accessories Chart

Model	Description	Model	Description
WG770-10	Motor - Boxed, 125 V, 60 Hz for C8866	PA123	100 Watt 12 V Transformer Assembly Kit for PE40000 Series I-Wave Control System
WG770-10D	Motor - Boxed, 125 V, 60 Hz for C8865	PA124	300 Watt 12 V Transformer Assembly Kit for PE40000 Series I-Wave Control System
WG7773-10	Motor - Boxed, 208/277 V, 60 Hz for C8866	PA600	Pump Shut-Off Switch
WG7773-10D	Motor - Boxed, 208/277 V, 60 Hz for C8865	PB913N66	24 Hr. Panel Mount Timer, 120VAC for PF & RC Series Products
WG780-12D	Motor - Boxed, 125 V, 60 Hz for C8835	PE650	Wireless I-Wave Panel Mount Receiver for P1353ME and/or P4243ME Mechs (PE950 transmitter req.)
WG790-11D	Motor - Boxed, 125 V, 60 Hz for C8815	PE653	Wireless 5 Circuit Pool/Spa/Variable Speed Receiver (MultiWave)
Pool & Spa		PE953	Wireless Hand Held Transmitter for all Wave Series Products
PB313EK	Electronic 24 Hr 120 V, 50/60 Hz Replacement Clock Kit for Mechanical PB Clock	PJB2175	Plastic Pool/Spa Light Junction Box - Two Light Capacity w/ Conduit sizes from .5" to 1"
PB314EK	Electronic 24 Hr 240 V, 50/60 Hz Replacement Clock Kit for Mechanical PB Clock	PJB4175	Plastic Pool/Spa Light Junction Box - Four Light Capacity w/Conduit sizes from .5" to 1"
119T267	Transformer - 100 Watt	RC117	Air Tubing - 75 Ft. Long
119T340	Transformer - 300 Watt	RC122B	Air Tubing - 25 Ft. Long w/RC4G Button
124T2530A	8-Pole Buss Bar Assembly	RC127B	Air Tubing - 75 Ft. Long w/RC4G Air Button
124TP2608A	4-Pole Buss Bar Assembly	RC150	Air Tubing - 500 Ft. Long
133PE1484A	Three Button Wired Remote Control for P1353ME Digital Control	RC4F	Air Button for Fiberglass Construction - 100 Ft. Range
133RC1144	Pressure Sensing Momentary Air Switch 3 Amp	RC510	Tube Coupler - 10 Units
143PS307	DPST Relay w/24 VDC Coil	RC6F	Air Button for Gunite/Fiberglass Construction - 150 Ft. Range
143RC126	Bi-Stable Relay SPDT, 1 H.P.-120 V, 2 H.P. - 240 V, 120 V Coil	Spring Wound Timers	
143RC140	Four Function Stepper Relay	146MT573	Small Ivory Knob
143T135	Double Pole Single Throw Relay w/240 V Coil	146MT574	Small White Knob
143T136	Double Pole Single Throw Relay w/120 V Coil	146MT575	Small Almond Knob
143T145A	Double Pole Single Throw Relay, 24 VDC Coil w/leads	146MT577	Large Stonedust (gray) Knob
156PA13713A	1/2" Nonmetallic Hub Kit For Direct Connection To Underwater Pool Lights	146MT579	Large Black Knob
156PA13714A	3/4" Nonmetallic Hub Kit For Direct Connection To Underwater Pool Lights	AG1BRKT	L Bracket for AG Series
156PA13715A	1" Nonmetallic Hub Kit For Direct Connection To Underwater Pool Lights	107TN221	Red trippers for TN311C
156PA14336A	1/2" Metallic Hub Kit For Direct Connection To Underwater Pool Lights	107TN222	Turquoise trippers for TN111RM40
156PB10398A	(2) ON (2) OFF Trippers for P1000 Series Timers	107SB189	Red trippers for HB plug-ins
156T4042A	Heater Control (Fireman) Switch Kit	107SB192	Black trippers for HB plug-ins
178PA28A	Freeze Protection Thermostat for P1353ME Digital Control	176ET10A	Surge Suppressor - For Switching Inductive 240 V Nominal Loads
178T24	Freeze Protection Thermostat	176ET22A	Surge Suppressor - For Switching Inductive 277 V Nominal Loads
21T156A	(4) Stand-off for Mounting Wiring Devices	176ET8A	Surge Suppressor - For Switching Inductive 24 V Nominal Loads
22T904A	Hold-Down Kit For Circuit Breakers	176ET9A	Surge Suppressor - For Switching Inductive 120 V Nominal Loads
24T5265A	Snap-in Bracket for (2) Wiring Devices	107SB234	OFF Trippers for HB35R
PA102	Replacement Thermostat Relay Assembly for PF1202T & PF1222TB	107SB216	ON Trippers for HB31R & P1121
PA108	Repair Kit for all PAV Series Water Valves (includes 5 cover rings & 10 shaft rings)	107SB217	OFF Trippers for HB31R & P1121
PA114	Plastic Pool/Spa Light Junction Box Mounting Bracket	107TN222	ON Trippers for TN, PB, TB Series, P1101, P1131, P1161, P1261, AL300TPWS, AL600TPWS & AL900TPWS
PA115	25 Off Trippers Only and Screws	107TN221	OFF Trippers for TN, PB, TB Series, P1101, P1131, P1161, P1261, AL300TPWS, AL600TPWS & AL900TPWS
PA117	Replacement Latch Kit	107SB189	ON Trippers for HB11, HB35R, HB112C, HB113C, HB114C, AL300RTW, AL600TW, AL900TW, AL60TW & ML Series Transformer Timers
PA118	Antenna only for PE650 Transceiver	107SB192	OFF Trippers for HB11, HB112C, HB113C, HB114C, AL300RTW, AL600TW, AL900TW, AL60TW & ML Series Transformer Timers
PA120	Double Pole Single Throw Relay w/24 VAC Coil		
PA121	35 Foot Antenna Extension Cable Assembly for PE650 Transceiver		
PA122	Water Temperature Sensor for PE650 Transceiver (I-Wave)

IP Classifications

IP Classifications			
Ingress Protection class of enclosures is according to IEC 529 given in form of IP classification, a two digit coding which is shown below			
First Digit		Second Digit	
Protection against contact and ingress of solid objects		Protection against ingress of water	
0	No special protection	0	No special protection
1	Protected against ingress solid objects with a diameter of more than 50 mm. No protection against deliberate access, e.g. with a hand, but large surfaces of the body are prevented from approach	1	Protection against dripping water falling vertically. No harmful effect must be produced (vertically falling drops)
2	Protected against penetration by solid objects with a diameter of more than 12 mm. Fingers or similar objects prevented from approach	2	Protection against dripping water falling vertically. There must be no harmful effect when the equipment (enclosure) is tilted at an angle up to 15° from its normal position (drops falling at an angle)
3	Protected against ingress of solid objects with a diameter of more than 2.5 mm. Tools, wires, etc. with a thickness of more than 2.5 mm are prevented from approach	3	Protection against water falling at any angle up to 60° from the vertical. There must be no harmful effect (spray water)
4	Protected against ingress of solid objects with a diameter of more than 1 mm. Tools, wires, etc. with a thickness of more than 1 mm are prevented from approach	4	Protection against water splashed against the equipment (enclosure) from any direction. There must be no harmful effect (splashing water)
5	Protected against harmful dust deposits. Ingress of dust is not totally prevented but the dust must not enter in sufficient quantity to interface with satisfactory operation of the equipment. Complete protection against contact	5	Protection from water projected from a nozzle against the equipment (enclosure) from any direction. There must be no harmful effect (water jet)
6	Protection against ingress of dust (dust tight). Complete protection against contact	6	Protection against heavy seas or powerful water jets. Water must not enter the equipment (enclosure) in harmful quantities (splashing over)
		7	Protection against water when the equipment (enclosure) is immersed in water under defined conditions of pressure and time. Water must not enter in harmful quantities (immersion)
		8	The equipment (enclosure) is suitable for continuous submersion in water under conditions which must be specified by the manufacturer (submersion)
