Installation & Wiring Instructions

FE6600/BL6600/MP6600 Series

End-of-Line Resistors for EcoFlex® Electrified (NAC only) and Integrated Wired (Access 600, SE LP10)

Multi-Point Locks

1 Description

The EcoFlex multi-point lock platform, including Corbin Russwin Access 600 and SE LP10 Integrated Wired multi-point locks, is now available with internal end-of-line resistors for comprehensive monitoring of the circuit between the access control panel and lock. Integrating the end-of-line resistors into the lock not only eliminates the risk of undetected tampering, but reduces installation costs, simplifies specification, and offers the assurance of a factory installed and tested product.

2 EAC Resistor Configurations

- R01: Mercury/Lenel Standard 1K/2K
- R03: Software House Standard 1K/2K
- R04: AMAG 4-State supervision

NOTE: End-Of-Line Resistor harnesses are designated by blue shrink-tubing.

			Tamper		Normal		Tamper		Normal
