Highlights

Focus on gingival health

With Premium Gum Care, even the deepest clean is gentle. As the brush head moves along the gumline, its flexible sides and bristles absorb any excessive pressure so gums are protected even if patients are brushing too hard. Its rounded profile allows the bristles to clean evenly while being gentle on gums. Extra-soft gumline bristles deliver a gentle yet effective clean along the gumline, where gum disease starts. The brush head's smaller size allows easy maneuvering even in hard-to-reach areas.

Adaptive cleaning technology

Patients get a personalized clean every time they brush with our adaptive cleaning technology. Soft, flexible rubber sides let Premium Gum Care adapt to the unique contours of the mouth. Our bristles adjust to gums and teeth, giving patients up to 2x more surface contact

than a DiamondClean brush head for deeper cleaning, even in hard-to-reach spots. Adaptive cleaning technology also: allows gentle tracking along the gumline; absorbs excessive brushing pressure; and enables an enhanced sweeping motion, for a unique in-mouth feel and superior cleaning.

Powerful plaque removal

Thanks to its flexible design, Premium Gum Care is proven to remove up to 10x more plaque than a manual toothbrush. It moves to enhance our unique Philips Sonicare cleaning technology so that however patients brush, they get an exceptional clean they can see and feel.

BrushSync mode pairing

Patients will always get their best possible clean and gum care with our BrushSync mode pairing feature. A microchip in the Premium Gum Care

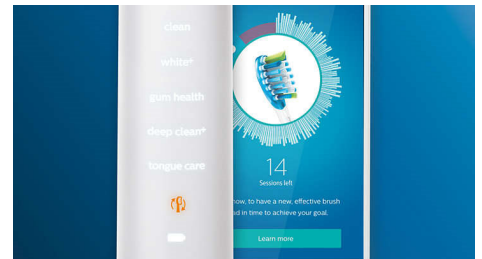

brush head syncs with the connected Philips Sonicare toothbrush handle. It prompts the handle to automatically select the optimal brushing mode and intensity level for exceptional gum health. All your patients need to do is start brushing.

Philips Sonicare technology

Philips Sonicare's advanced sonic technology pulses water between teeth, and its brush strokes break up plaque and sweep it away for an exceptional daily clean.

Smart brush head replacement

Brush heads exhibit fatigue and bristle wear after three months of normal use. Philips Sonicare smart toothbrushes provide accurate brush head replacement reminders based on how often patients brush and how much pressure they use. For those who don't use a smart toothbrush, Premium Gum Care's blue reminder bristles fade to white to let patients know it's time for a replacement brush head.
