Nikon Europe Service Warranty Card

We thank you for your purchasing this Nikon product. Should your Nikon product

require warranty service, please contact the dealer from whom it was purchased

or a member of our authorized service network within the sales territory of Nikon

In order to avoid any unnecessary inconvenience, we advise you to read the user

manuals carefully before contacting the dealer or our authorized service network

Your Nikon equipment is guaranteed against any manufacturing defects for one

full year from the date of original purchase. If during this period of guarantee

the product proves defective due to improper material or workmanship, our

authorized service network within the sales territory of Nikon Europe B.V. will,

set as below. Nikon reserves the right (at its sole discretion) to replace or repair

1. This warranty is only provided upon presentation of the completed warranty

card and original invoice or purchase receipt indicating the date of purchase

product type and dealer's name, together with the product. Nikon reserves the

right to refuse free-of-charge warranty service if the above documents cannot

be presented or if the information contained in it is incomplete or illegible.

• necessary maintenance and repair or replacement of parts due to normal

in user manuals, without the prior written consent of Nikon.

• modifications to upgrade the product from its normal purpose as described

• transport costs and all risks of transport relating directly or indirectly to the

made to the product, without the prior written consent of Nikon, in order

country than the ones for which the product was originally designed and/or

• any damage resulting from modifications or adjustments which may be

to comply with local or national technical standards in force in any other

· damage caused by misuse including but not limited to failure to use the

product for its normal purpose or according to the user instructions on

the proper use and maintenance, and to installation or use of the product

damage caused by accidents including but not limited to lightning, water,

• damage resulting from repairs or adjustments which have been conducted

• defects in any system into which the product is incorporated or with which

4. This service warranty does not affect the consumer's statutory rights under

applicable national laws in force, nor the consumer's right against the dealer

Notice: An overview of all authorized Nikon Service Stations can be found online

• defacing, illegibility or removal of the model or serial number on the

inconsistent with the safety standards in force in the country where it is used

without charge for labor and parts, repair the product in the terms and conditions

39 Monitor

HDMI micro connector (Type D)

Attaching/removing the lens cap and lens hood

- When you are not shooting images, attach the lens cap to protect the lens
- When the lens hood is attached, it cuts out light which adversely affects the image, and also helps protect the camera. Do not use the lens hood when shooting with a flash or when the AF-assist illuminator is necessary for shooting.
- Turn off the camera before attaching/removing the lens hood.

Inserting the battery and memory card

1 Open the battery-chamber/memory card slot cover.

2 Insert the battery and memory card.

(1), and fully insert the

battery (2).

· With the battery's positive and negative terminals oriented correctly, move the orange battery latch

- Slide the memory card in until it clicks into place (3).
- · Be careful not to insert the battery or memory card upsidedown or backward, as this could cause a malfunction.
- 3 Close the battery-chamber/memory card

Charging the battery

Charge the supplied EN-EL20a Rechargeable Li-ion Battery before use. With the battery inserted in the camera, connect the camera to the optional EH-8P AC Adapter using the separately sold UC-E25 USB Cable (featuring Type C connectors at both ends) to charge the battery.

• The EH-8P AC Adapter cannot be connected using the supplied USB cable.

■ Notes about using the battery

Read and follow the warnings and cautions in "For your safety" (overleaf) and under "The battery" (overleaf) in "Caring for the product".

Insert the EN-EL20a into the camera.

2 Connect the separately sold UC-E25 USB Cable (featuring Type C connectors at both ends) to the camera, and then connect the optional EH-8P AC Adapter (1). Plug the AC adapter into a household power outlet. Keep the plug straight during insertion and removal.

- The power-on lamp (charge lamp) (2) flashes while the battery is charging. When charging is complete, the poweron lamp (charge lamp) turns off.
- An exhausted battery will fully charge in about 3 hours. • When charging is complete, disconnect the USB cable. Be sure to keep the connectors straight when disconnecting
- The shape of the plug varies with the country or region of purchase.

■ Notes about charging the battery

- The battery cannot be charged when the power-on lamp (charge lamp) quickly flashes, possibly due to one of the reasons described
- The ambient temperature is not suited to charging.
- The USB cable or AC adapter is not properly connected. The battery is damaged.
- The camera can be operated while the battery is charging, but the charging time increases. The power-on lamp (charge lamp) turns off while the camera is being operated.

Tip: Charging the camera battery with the EH-73P Charging AC Adapter (available

he camera battery can also be charged with the EH-73P Charging AC Adapter (available separately). Connect the supplied USB cable to the camera's USB connector, and then insert the plug into an electrical outlet. Keep the plug straight during insertion and removal.

ip: Charging with third-party AC ad connectors and are compliant with USB PD (power delivery) standards

- The camera battery can also be charged with third-party AC adapters Use an AC adapter that complies with USB PD (power delivery) standards and is equipped with USB Type C connectors.
- Use an AC adapter that supports output of 15 W (5 V/3 A) or more. Use a USB cable that is Type C on both ends to connect to the camera.
- We do not guarantee that all third-party AC adapters and USB cables are able to charge the camera battery.

Opening the monitor

When moving the monitor, do not apply excessive force and move slowly within the monitor's adjustable range so that the connection will not be damaged.

Camera setup

When the camera is turned on for the first time, screens to set the display language and camera clock are displayed.

Press the power switch to turn on the camera.

- 2 Press ▲▼ on the multi selector to highlight a language and press the ® button to select.
- The displayed languages vary depending on the country or
- 3 Select [Yes] and press the ®

01.01.2025 00:00

- 4 Highlight your home time zone and press the ® button. • To turn daylight saving time
 - on, press **A**; **%** will be displayed above the map. Press ▼ to turn daylight saving time off.
- 5 Press ▲▼ to select a date format and press the ® button.
- **6** Set the date and time. Press ◀► to highlight items and
- **▲▼** to change them.
- Select the minute field and press the ® button to confirm
- When prompted, press ▲▼ to highlight [Yes] and press the
- · Setup is complete and the camera switches to the shooting

Basic operations of shooting and playback

Shooting still images

enables you to perform general shooting in a variety of shooting conditions

Rotate the mode dial to 🗖.

2 Check the battery level (**1**) and number of exposures remaining (2) on the shooting screen.

3 Hold the camera steady.

• Keep fingers and other objects away from the lens, flash, AF-assist illuminator, eye sensor, microphone, and speaker.

4 Frame the picture.

- · Move the zoom control or the side zoom control to change the zoom lens position.
- To zoom in, move toward **T** (1). • To zoom out, move toward W (2)

- 5 Press the shutter-release button halfway.
- To press the shutter-release button "halfway" means to press and hold the button at the point where you feel a slight resistance.
- **6** Without lifting your finger, press the shutterrelease button all the way down.

✓ Using a tripod

After attaching the camera to a tripod, make sure that the camera does not fall over when zooming the lens in or out. Extend one leg of the tripod toward the subject and the other two legs

When zoom is at wide-angle position When zoom is at telephoto position

Recording movies

Display the shooting screen and press the (★ movie-record) button to start recording a movie. Press the ● (🐂) button again to end recording.

Playing back images

Press the **(playback)** button to enter full-frame playback mode.

- 2 Use the multi selector to select an image to display. Use the multi selector ▲ ◀ to display the previous image, or ▼
- ▶ to display the next image.
- Press and hold down ▲▼ ◀▶ to scroll through the images
- release button.

Caring for the camera

III Storage

Remove the battery if the camera will not be used for an extended period. To prevent mold or mildew, take the camera out of storage at least once a month. Turn the camera on and release the shutter a few times before

putting the camera away agair

- Do not store the camera in any of the following locations: Places that are poorly ventilated or subject to humidity of over 60%
- Places exposed to temperatures above 50°C (122°F) or below –10°C (14°F) Places next to equipment that produces strong electromagnetic fields, such as televisions or radios

Troubleshooting

You may be able to resolve any issues with the camera by following the steps below. Check this list before consulting your retailer or Nikon authorized service representative.

Check the list of common problems.

STEP 1 Common problems and solutions are listed in the troubleshooting section of the Reference Guide.

Turn the camera off and remove the battery, then wait about a minute, reinsert the battery and turn the camera on

STEP $\mathbf{2} \mid \mathbf{\Sigma}$ The camera may continue to write data to the memory card after shooting. Wait at least a minute before removing the

Search Nikon websites.

 For support information and answers to frequently asked questions, visit the website for your country or region (see "Nikon user support" at the top left corner of this page). To download the latest firmware for your camera, visit: https://downloadcenter.nikonimglib.com/

STEP 4 Consult a Nikon-authorized service representative.

For your safety

To prevent damage to property or injury to yourself or to others, read "For your safety

After reading these safety instructions, keep them readily accessible for future

⚠ DANGER: Failure to observe the precautions marked with this icon carries a high

 \bigwedge **WARNING**: Failure to observe the precautions marked with this icon could result in

 \triangle **CAUTION**: Failure to observe the precautions marked with this icon could result in injury or property damage.

Do not use while walking or operating a vehicle. Failure to observe this precaution could result in accidents or other injury.

Do not disassemble or modify this product. Do not touch internal parts that pecome exposed as the result of a fall or other accident. Failure to observe these precautions could result in electric shock or other injury.

Should you notice any abnormalities such as the product producing smoke, heat, or unusual odors, immediately remove the battery or disconnect the power

Continued operation could result in fire, burns or other injury

Keep dry. Do not handle with wet hands. Do not handle the plug with wet hands. Failure to observe these precautions could result in fire or electric shock. Do not let your skin remain in prolonged contact with this product while it is on or plugged in. Failure to observe this precaution could result in low-temperature burns.

Do not use this product in the presence of flammable dust or gas such as propane, gasoline or aerosols.

ailure to observe this precaution could result in explosion or fire.

Do not aim the flash at the operator of a motor vehicle Failure to observe this precaution could result in accident

Keep this product out of reach of children.

Failure to observe this precaution could result in injury or product malfunction. In addition, note that small parts constitute a choking hazard. Should a child swallow any part of this product, seek immediate medical attention

Do not entangle, wrap or twist the straps around your neck Failure to observe this precaution could result in accidents.

Do not use batteries, chargers, AC adapters, or USB cables not specifically designated for use with this product. When using batteries, chargers, AC adapters, and USB cables designated for use with this product, do not: Damage, modify, forcibly tug or bend the cords or cables, place them under heavy objects, or expose them to heat or flame.

 Use travel converters or adapters designed to convert from one voltage to another or with DC-to-AC inverters.

Failure to observe these precautions could result in fire or electric shock. Do not handle the plug when charging the product or using the AC adapter

during thundersto Failure to observe this precaution could result in electric shock. Dust on or near the metal parts of the plug should be removed with a dry cloth.

Continued use could result in fire. Do not handle with bare hands in locations exposed to extremely high or low

Failure to observe this precaution could result in burns or frostbite.

/! CAUTION

Do not leave the lens pointed at the sun or other strong light sources. Light focused by the lens could cause fire or damage to product's internal parts. When shooting backlit subjects, keep the sun well out of the frame. Sunlight focused into the camera when the sun is close to the frame could cause fire

Turn this product off when its use is prohibited. Disable wireless features when the use of wireless equipment is prohibited.

The radio-frequency emissions produced by this product could interfere with equipment onboard aircraft or in hospitals or other medical facilities.

Remove the battery and disconnect the AC adapter if this product will not be used for an extended period. Failure to observe this precaution could result in fire or product malfunction

Do not touch moving parts of the lens or other moving parts. Failure to observe this precaution could result in injury.

Do not fire the flash in contact with or in close proximity to the skin or objects. Failure to observe this precaution could result in burns or fire.

Do not raise the built-in flash when using a flash unit mounted on the camera Failure to observe this precaution could result in fire or product malfunction.

Do not leave the product where it will be exposed to extremely high temperatures for an extended period, such as in an enclosed automobile or in

Failure to observe this precaution could result in fire or product malfunction. Do not transport the camera with a tripod or similar accessory attached. Failure to observe this precaution could result in injury or product malfunction Keep the product at least 5 cm (2.0 in.) from pacemakers and other medical

Medical devices in close proximity could be affected by the magnet or magnets in the product.

! DANGER (Batteries)

Do not mishandle batteries

Failure to observe the following precautions could result in the batteries leaking, overheating, rupturing, or catching fire:

Use only rechargeable batteries approved for use in this product. Do not expose batteries to flame or excessive hear

Do not disassemble Do not short-circuit the terminals by touching them to necklaces, hairpins, or other

Do not expose batteries or the products in which they are inserted to powerful

physical shocks. o not step on batteries, pierce them with nails, or strike them with ham

Charge only as indicated. Failure to observe this precaution could result in the batteries leaking, overheating, upturing, or catching fire

If battery liquid comes into contact with the eyes, rinse with plenty of clean water

and seek immediate medical attention Delaying action could result in eye injuries

Follow the instructions of airline personnel. Batteries left unattended at high altitudes in an unpressurized environment may leak, overheat, rupture, or catch fire.

/ WARNING (Batteries)

Keep batteries out of reach of children

Should a child swallow a battery, seek immediate medical attention Keep batteries out of reach of household pets and other animals The batteries could leak, overheat, rupture, or catch fire if bitten, chewed, or

otherwise damaged by animals. Do not immerse batteries in water or expose to rain.

Failure to observe this precaution could result in fire or product malfunction. Immediately dry the product with a towel or similar object should it become wet. Discontinue use immediately should you notice any changes in the batteries. such as discoloration or deformation. Cease charging EN-EL20a rechargeable batteries if they do not charge in the specified period of time. Failure to observe these precautions could result in the batteries leaking

overheating, rupturing, or catching fire. When batteries are no longer needed, insulate the terminals with tape. Overheating, rupture, or fire may result should metal objects come into contact with

/!\ WARNING (Batteries)

If battery liquid comes into contact with a person's skin or clothing, immediately rinse the affected area with plenty of clean water Failure to observe this precaution could result in skin irritation

Notices

actual product. Nikon reserves the right to change the appearance and specifications of the hardware and software described in this documentation at any time and without prior notice.

• Nikon will not be held liable for any damages resulting from the use of this product. While every effort has been made to ensure that the information in this documentation is accurate and complete, we would appreciate it were you to bring any errors or omissions to the attention of the Nikon representative in your area (address provided separately).

Notice concerning prohibition of copying or reproduction

Note that simply being in possession of material that has been digitally copied or reproduced by means of a scanner, digital camera, or other device may be punishable by law. Items prohibited by law from being copied or reproduced

Do not copy or reproduce paper money, coins, securities, government bonds, or local government bonds, even if such copies or reproductions are stamped "Sample". The copying or reproduction of paper money, coins, or securities which are

circulated in a foreign country is prohibited. Unless the prior permission of the government has been obtained, the copying or reproduction of unused postage stamps or post cards issued by the government is

The copying or reproduction of stamps issued by the government and of certified documents stipulated by law is prohibited.

Cautions on certain copies and reproductions

The government has issued cautions on copies or reproductions of securities issued by private companies (shares, bills, checks, gift certificates, etc.), commuter passes, or coupon tickets, except when a minimum of necessary copies are to be provided for business use by a company. Also, do not copy or reproduce passports issued by the government, licenses issued by public agencies and private groups, ID cards, and tickets, such as passes and meal coupons

Comply with copyright notices

Under copyright law, photographs or recordings of copyrighted works made with the camera cannot be used without the permission of the copyright holder Exceptions apply to personal use, but note that even personal use may be restricted in the case of photographs or recordings of exhibits or live performances.

This product is designed to be used with Nikon brand accessories. Nikon is not responsible for any damage caused by accidents such as malfunctions or ignition that are clearly attributable to the use of non-Nikon accessories. In these cases, repair of Nikon products is not covered under your Nikon warranty. Please understand this in advance.

EN-EL20a rechargeable Li-ion batteries are dedicated for use only with Nikon products. Nikon is not responsible for any malfunctions or accidents resulting from

use with chargers or other products that are not compatible with the EN-EL20a. Beware of counterfeit batteries. Such batteries do not allow the camera to perform

to its full potential and may cause the batteries to overheat, ignite, rupture or leak. - An EN-EL20a Rechargeable Li-ion Battery bears a Nikon holographic seal indicating that it is a genuine Nikon product.

Disposing of data storage devices

Please note that deleting images or formatting data storage devices such as memory cards does not completely erase the original image data. Deleted files can sometimes be recovered from discarded storage devices using commercially available software, potentially resulting in the malicious use of personal image data. Ensuring the privacy

of such data is the user's responsibility. Before discarding a data storage device or transferring ownership to another person, make sure to reset all of the camera's settings in the setup menu → [Reset all]. After resetting, erase all data in the device using commercial deletion software, or format the device in the setup menu **>** [Format card], then completely refill it with images containing no private information (for example, images of empty sky). Care should be taken to avoid injury or damage to property when physically destroying memory

☑ Before taking important pictures

Before taking pictures on important occasions (such as at weddings or before taking the camera on a trip), take a test shot to ensure that the camera is functioning normally. Nikon will not be held liable for damages or lost profits that may result from product malfunction.

Caring for the product

■ The camera

Do not apply strong impact to the camera

The product may malfunction if subjected to strong shock or vibration. In addition, do

not touch or apply force to the lens.

The device will be damaged if immersed in water or subjected to high humidity. Do not disassemble

Do not, under any circumstances, disassemble the camera because it is composed of many precise circuits.

Avoid sudden changes in temperature

sudden changes in temperature, such as when entering or leaving a heated building on a cold day, can cause condensation to form inside the device. To prevent condensation, place the device in a carrying case or a plastic bag before exposing it to sudden changes in temperature.

Keep away from strong magnetic fields

Do not use or store this device in the vicinity of equipment that generates strong electromagnetic radiation or magnetic fields. Doing so could result in loss of data or camera malfunction.

Do not point the lens at the sur

Avoid pointing the lens at the sun or other strong light sources when shooting or when leaving the camera unattended without a lens cap. Strong light sources such as sunlight are concentrated through the lens, which may cause deformation of the internal parts of the lens or discoloration or burn-in on

may be damaged even when the lens is pointed toward the sun for a few seconds, particularly when the lens is in a telephoto

the image sensor. The camera

The camera may not be able to perform exposure control when the internal parts of the lens are deformed. Unevenness may appear in images when discoloration or burn-in occurs on the

It is recommended that you attach the lens cap when you are not using the camera Lasers and other bright light sources

Do not direct lasers or other extremely bright light sources toward the lens, as this could damage the camera's image sensor.

 Turn the product off before removing or disconnecting the power source or memory card Do not remove the battery while the product is on, or while images are being saved or deleted. Forcibly cutting power in these circumstances could result in loss of data or in damage to the memory card or internal circuitry.

Notes about the monitor

 Monitors (including electronic viewfinders) are constructed with extremely high precision: at least 99.99% of pixels are effective, with no more than 0.01% being missing or defective. Hence while these displays may contain pixels that are always lit (white, red, blue, or green) or always off (black), this is not a malfunction and has no effect on images recorded with the device.

glass and to prevent the liquid crystal from the display touching the skin or entering

Images in the monitor may be difficult to see under bright lighting. Do not apply pressure to the monitor, as this could cause damage or malfunction. Should the monitor break, care should be taken to avoid injury caused by broken

■ The battery

Precautions for use Note that the battery may become hot after use.

Do not use the battery at ambient temperatures below 0°C (32°F) or above 40°C (104°F) as this could cause damage or malfunction.

If you notice any abnormalities such as excessive heat, smoke, or an unusual smell coming from the battery, immediately discontinue use and consult your retailer or Nikon-authorized service representative

After removing the battery from the camera, put the battery in a plastic bag, etc. in

Charging the battery Check the battery level before using the camera and replace or charge the battery if

• Charge the battery indoors with an ambient temperature of 5°C to 35°C (41°F to

- A high battery temperature may prevent the battery from charging properly or completely, and may reduce battery performance. Note that the battery may become hot after use; wait for the battery to cool before charging. When charging the battery inserted into this camera using the AC adapter or a computer, the battery is not charged at battery temperatures below 0°C (32°F) or above 50°C
- Do not continue charging once the battery is fully charged as this will result in
- reduced battery performance The battery temperature may increase during charging. However, this is not a

Carrying spare batteries Whenever possible, carry fully charged spare batteries when taking pictures on

important occasions. Using the battery when cold On cold days, the capacity of batteries tends to decrease. If an exhausted battery is used at a low temperature, the camera may not turn on. Keep spare batteries in a

warm place and exchange as necessary. Once warmed, a cold battery may recover some of its charge.

Battery terminals Dirt on the battery terminals may prevent the camera from functioning. Should the battery terminals become dirty, wipe them off with a clean, dry cloth before use.

Charging an exhausted battery urning the camera on or off while an exhausted battery is inserted in the camera

may result in reduced battery life. Charge the exhausted battery before use Storing the battery · Always remove the battery from the camera when it is not being used. Minute

amounts of current are drawn from the battery while it is in the camera, even when not in use. This may result in excessive battery drain and complete loss of function Batteries in long-term storage should be charged to about 50% at least once a year. Do not charge the battery to 100% before returning it to storage. A fully-exhausted battery will charge to around 50% in about half the time needed to charge it to

Put the battery in a plastic bag, etc. in order to insulate it and store it in a cool place. The battery should be stored in a dry location with an ambient temperature of 15°C to 25°C (59°F to 77°F). Do not store the battery in hot or extremely cold locations.

A marked drop in the time a fully charged battery retains its charge, when used at room temperature, indicates that the battery needs to be replaced. Purchase a new

Recycle rechargeable batteries in accord with local regulations, being sure to first insulate the terminals with tape.

■ Memory cards

Precautions for use

Do not put labels or stickers on memory cards.

 Use only Secure Digital memory cards. \bullet Be sure to follow the precautions described in the documentation included with the

• If the write-protect switch of the memory card is locked, you

· Do not format the memory card using a computer

cannot shoot, delete images, or format the memory card.

• The first time you insert a memory card that has been used in another device into this camera, be sure to format it with this camera.

We recommend formatting new memory cards with this camera before using them Note that formatting a memory card permanently deletes all images and other

data on the memory card.

Be sure to make copies of any images you wish to keep before formatting the

• If the message [Card is not formatted. Format card?] is displayed when the camera is turned on, the memory card must be formatted. If there is data that you do not want to delete, select $[{f No}]$. Copy the necessary data to a computer, etc. If you want to format the memory card, select [Yes]. The confirmation dialog will be displayed. To start formatting, press the ® button.

Do not perform the following during formatting, while data is being written to or deleted from the memory card, or during data transfer to a computer. Failure to observe this precaution could result in the loss of data or in damage to the camera or memory card:

 Open the battery-chamber/memory card slot cover to remove/insert the battery or memory card. Turn off the camera.

Disconnect the AC adapter
