- device of your choice, as shown in Figure(1). The system will automatically detect the available equipment around the user. When the user appears as "SA-PODC" click to start pairing. The system will play if the pairing is successful. The audio signal is sent to the sound card via Bluetooth as

ing up the Mixer:

1. Dual mobile phone live connection:

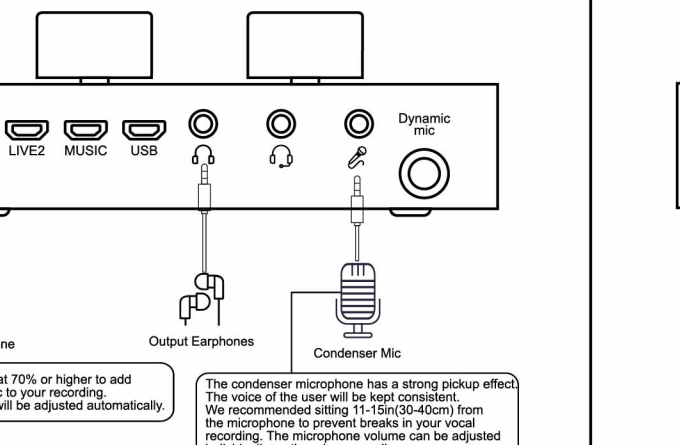

Phone volume off mobile phone

Use an additional mobile phone to add music and other effects into the background of your recording

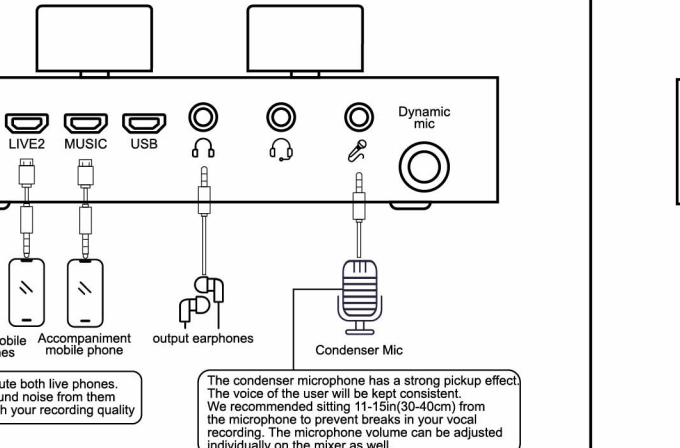

Condenser mic

The condenser microphone has a strong pickup effect. The voice of the user will be kept consistent. We recommended sitting 11-15in(30-40cm) from the microphone to prevent breaks in your vocal recording. The microphone volume can be adjusted individually on the mixer as well.

2. Single mobile phone live connection:

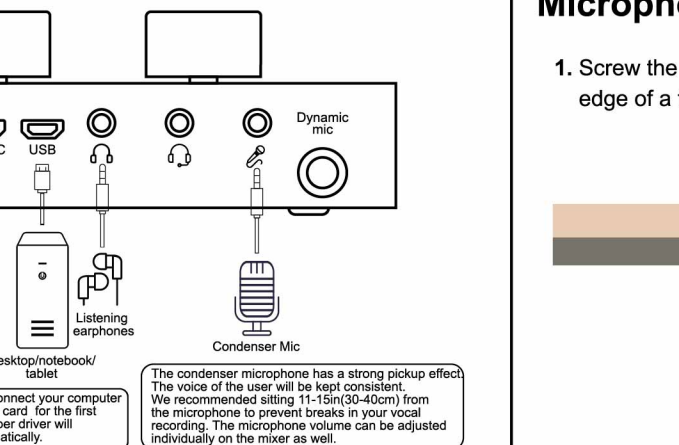

3. Three mobile phone connection method:	5.
--	----

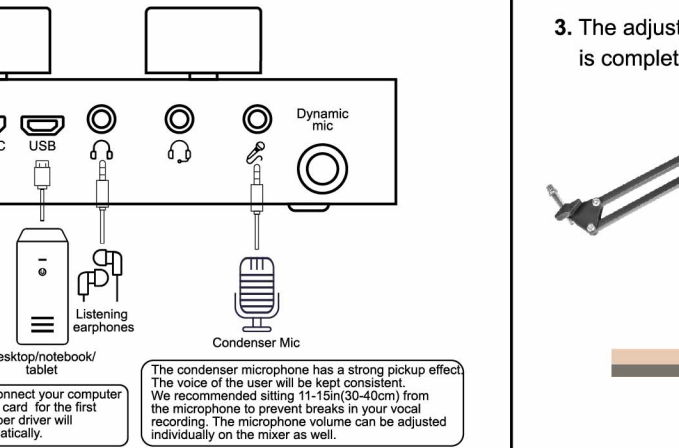

The condenser microphone has a strong pickup effect. The voice of the user will be kept consistent. We recommended sitting 11-15in(30-40cm) from the microphone to prevent breaks in your vocal recording. The microphone volume can be adjusted individually on the mixer as well.

ast with computer accompaniment connection:

test with computer recording song connection:	
---	--

The condenser microphone has a strong pickup effect. The voice of the user will be kept consistent. We recommend sitting 11-15in(30-40cm) from the microphone to prevent breaks in your vocal recording. The microphone volume can be adjusted individually on the mixer as well.

tion

- 2. Insert the adjustable arm into the hole.**
- 
- The diagram shows a black adjustable arm with a silver-colored joint being inserted into a hole in the side of a microphone stand. A white arrow points downwards, indicating the direction of insertion. The stand has a silver-colored base and a black top section.
