

Jabra Pro 925 Dual Connectivity

How many Bluetooth devices can I pair with my Jabra Pro 925/935?

Pairing your Jabra Pro 925/935 with multiple Bluetooth devices follows this scheme.

8: The number of paired devices that your headset will remember. If you attempt to pair with a 9th device, it will replace the device that was first paired.

2: The number of paired devices that your headset can connect with simultaneously. If the headset is connected with the base, you can connect with an additional device. If the headset is not connected with the base, you can connect with 2 devices.

1: The number of paired devices that can play audio at the same time.
