Life/form® Venipuncture/Injection Arms

Realistic arm models are ideal for teaching venipuncture and injection techniques, including starting IVs and introducing over-the-needle IV catheters. Wound Care Models and Manikins

Teach and train with vacuum-assisted, closure and negative pressure wound therapy devices.

- » Stan with Stage IV Pressure Ulcer features a large sacral Stage IV pressure ulcer, with exposed bone of the coccyx, undermining, tunneling, slough, eschar, and a Stage III pressure ulcer on the left buttocks. The large size and depth of the Stage IV pressure ulcer, as well as the undermining and tunneling, make it ideal for practicing the proper dressing and preparation of a large wound for use with a negative pressure wound therapy device. Measures 9 x 9 x 4 ½"
- » Seymour II model is made with a flexible, life-like material that allows demonstration and practicing of wound cleansing, classification, staging, and assessment, as well as the measurement of wound length, depth, undermining, and tunneling. Model is molded from an actual 74-year-old patient and displays the following pressure ulcers: Stage I; Stage II; Stage III with undermining, tunneling, subcutaneous fat and slough; Stage IV with exposed bones, undermining, tunneling, subcutaneous fat, eschar, and slough. Also shown are a suspected deep tissue injury, unstageable full eschar/slough wound, and 5 ½" dehiscent wound. The Stage III and Stage IV are positioned so that a "bridging" dressing for use with a vacuum assisted closure and negative pressure wound therapy devices can be demonstrated and practiced. The positioning of the wounds permits multiple dressings to be demonstrated at the same time. Measures 12 x 13 ½ x 6"
