Share the camera with others

Step1:

The invitee needs to download the Vicohome APP on her/his smartphone.

Step2:

After installing and registering a new account to login, just go to the app homepage, tap on the “+” sign in the upper right corner, and then select “Add friend’s device”. Then please scan the QR code of device admin.

How to find the device admin QR code?

See the screenshot below. Just go to the administrator’s Vicohome app. Go to the settings icon > Share > Device Sharing then you will see the QR code. (QR code valid within half an hour)

A bird came to the bird feeder and triggered the camera recording and AI Identification.

Baltimore Oriole

The Baltimore oriole (*Icterus galbula*) is a small icterid blackbird common in eastern North America as a migratory breeding bird. It received its name from the resemblance of the male's colors to those on the coat-of-arms of 17th century Lord Baltimore. Observations of interbreeding between the Baltimore oriole and the western Bullock's oriole, *Icterus bullockii*, led to both being classified as a single species, called the northern oriole, from 1973 to 1995. Research by James Rising, a professor of zoology at the University of Toronto, and others showed that the two birds actually did not interbreed significantly. The Baltimore oriole is the state bird of Maryland. It is also the namesake and mascot for the Baltimore Orioles baseball team.

How to Connect charging cable and waterproof rubber stopper

When you connect the camera to the solar panel, please confirm that the charging cable plug is in good contact with camera.

1

1. Prepare the solar panel with charging cable, take the rubber stopper out.

2

2. Thread the charging cable through the rubber plug.

3

3. Insert the charging cable and firm the rubber stopper.

Incorrect Connection

PLEASE DON'T insert the charging cable directly with the rubber on the plug.

Frequently Asked Questions

Q1: Why doesn't the Wi-Fi name appear when I connect to Wi-Fi?

A1: You need to turn on the "location permission" for the app in the system settings and change it to "allow when using"

Q2: Will the camera show red lights when night vision is activated?

A2: The built-in infrared lamp beads make the camera only show some dim red lights when night vision is activated, but the image quality is still clear under no light environment.

Q3: What are the requirements for Wi-Fi?

A3: Please use a 2.4GHz wireless network. The device does not support the 5GHz wireless network. Meanwhile, please set the Wi-Fi authentication method to wpa2-psk or other lower level of the security method. A password is required.

Q4: How far should the camera be placed from the router?

A4: After testing, the WiFi connection distance can normally reach up to 100 meters in the open area. However, the actual situation depends on the strength of Wi-Fi and its surrounding environment.

Q5: What is the maximum length of recording time?

A5: You can choose the recording time in the app, The camera record for a fixed time or "auto" mode, when depending on whether there is a person, the maximum length of a video is 3 minutes.

Q6: What should I do when the device is malfunctioning?

A6: Long press the power button to restart the camera.
