HISTORY

The history of Stelpro since its foundation is first and foremost that of a visionary company that has anticipated the market's needs. Over the years, the company has earned the confidence of consumers, professionals and its partners and achieved the enviable status of being the number 1 manufacturer of electric heating appliances in North America. Stelpro continually reinvents the heating industry with its value-added philosophy based on design and technology that transcend the purely functional nature of the devices. It is firmly established in the smart home market with its range of connected products and is laying the groundwork to become a major energy transition player.

1981-1990

1991-2000

2001-2004

KICK-OFF

Employees: from 1 to 30
Square footage: 25,000
Territory covered: Quebec

Armed with an undeniable flair for business, a desire for improvement and a marked desire for innovation, John Chabot founds Chalaïr Électrik, the company that will later become Stelpro, in Drummondville in 1981. From its early years, the company made its mark in the heating industry by developing and launching innovative products, like the first open element construction heater and the smallest and quietest recessable residential fan heater. The unit in question, the Pulsair/RWF, is still on the market, proving that the company was already at the forefront of its field at this time.

EXPANSION AND ACQUISITION

Employees: 150
Square footage: 46,000
Territory covered: Canada

The 1990s are a time of growth and change. First, the company moves to Boucherville, then in 1994, it acquires its competitor, Stelpro Chauffage Itée, thereby opening the doors to the Canadian market. By the end of the decade, Yves Chabot and his brother, a second generation of entrepreneurs, have joined the company. On the commercial level, the company breaks new ground again with the launch of the Dragon ceiling fan heater.

CONTINUED EXPANSION AND DIVERSIFICATION

Employees: 200
Square footage: 118,000
Territory covered: Canada

The beginning of the millennium marks a wind of change as the company continues to expand. A new head office and a state-of-the-art plant are built in St-Bruno-de-Montarville, and Chalaïr Électrik and Stelpro Chauffage merge to become Stelpro Design Inc. With an improved integrated production capacity that makes it the Canadian leader in its category, the new entity launches another phase of development by launching its heating cable division, always with a view to serving its customers well.

CONSOLIDATION

Employees: 310
Square footage: 198,600
Territory covered: Canada and emerging onto the U.S. market

The two Chabot brothers take over as company Co-Presidents, consolidate the company's leadership position in Canada and enter the U.S. market. The creation of the Electronic Controls Division and the HVAC Division makes it possible for Stelpro to offer a full range of products that provide heating and control solutions for residential, commercial and institutional needs. These changes do not come at the expense of innovation. The company continues to reinvent the heating industry by launching the B baseboard, which is still a benchmark on the market, the sturdiest in its category and the first baseboard with a built-in electronic thermostat.

NEW VISION

Employees: 430
Square footage: 216,600
Territory covered: North America

Yves Chabot becomes the sole president of Stelpro. Now a major player in the North American market, the company revamps its brand image and logo to better reflect its aspirations. "Stelpro, 360 Comfort" offers heating solutions tailored to each specific situation to ensure comfort for all.

Square footage: 286,000
Territory covered: North America

Stelpro, well established as a North American leader, continues its expansion across all its product divisions (heating, cables, HVAC and controls) and sales channels (electrical, HVAC and retail). The company keeps focusing on value-added design and technology to set itself apart and offer its customers still greater added value. Moreover, the launch of the Maestro ecosystem puts the company in an enviable position in the connected home world. Today, Stelpro remains a visionary company with a plan to become a major energy transition player in North America while continuing to create innovative and distinctive comfort solutions.

SCR – RADIANCE™

COVE HEATER

INNOVATION AT THE HEIGHT OF YOUR EXPECTATIONS

The Radiance cove heater is one of the most efficient heating systems available today. Mounted near the ceiling, the Radiance directs heat downward across the room, without being blocked by furniture and other objects. Radiant heat warms people in the room directly, creating comfortable conditions similar to the sun. The Radiance also warms all inanimate objects in its path; these objects absorb the heat and in turn act as a "heat reserve," initiating a convection-type flow of heated air that further helps maintain the desired room temperature.

- **15% GREATER ENERGY PERFORMANCE COMPARED TO OTHER RADIANT HEATERS**
- **WALL MOUNTED 2.5 IN. FROM THE CEILING – OUT OF REACH OF CHILDREN AND FREES UP SPACE**
- **IDEAL FOR PEOPLE WITH ALLERGIES**
NO FORCED-AIR MOVEMENT
- **COMPACT AND LIGHTWEIGHT**

THE AUTHENTIC DRAGON!

The hallmark of the Dragon is that it recycles residual warm air that has accumulated at the ceiling, mixing it with the cooler air below. The result? Uniform air temperature and energy savings. The Dragon offers an output of 2000 W to 10 000 W, depending on the model, and offers voltages ranging from 208 V to 600 V. This unit can be ceiling surface mounted or ceiling recessed, suspended at a minimum of 8 feet from the floor. The Dragon is well suited for building entryways, stairwells, warehouses, garages, workshops and hallways. Nothing beats the power of the Dragon!

SFECM SERIES

ECM MOTOR – ELECTRONICALLY COMMUTATED MOTOR

COMFORT, EFFICIENCY, RELIABILITY AND SECURITY ARE AT THE HEART OF THE ECM

COMFORT	EFFICIENCY	RELIABILITY	SECURITY
Comfort level can be increased if a variable speed motor is installed. This level cannot be reached with any other method. It also allows the user to select the low speed with the desired airflow in recirculation.	Since it combines electronic circuits and a BLDC motor, it is the most efficient motor on the HVAC market. It can reach up to twice the capacity of a PSC motor.	All its electronic circuits are protected against condensation. Thanks to its design and materials, such as silicone elastomer, it is one of the most reliable motors on the market.	Its electronic system is protected by MOVs (metal oxide varistors) against lightning overvoltages.

ARE 120 V AND 240 V HEATERS INTERCHANGEABLE?

A 240 V heater run at 120 V will produce 1/4 of the rated wattage. A 120 V heater run at 240 V will be destroyed and could cause fire damage to the building.

IF I KNOW THE BTU'S REQUIRED,

HOW DO I CALCULATE THE WATTS REQUIRED?

Watts = BTU/3.412 (1 watt = 3.41 BTU)

USEFUL FORMULAS

AIRFLOW	$D = V \times A$
	$D = \text{AIRFLOW CFM (M}^3/\text{S)}$
	$V = \text{VELOCITY FPM (M/S)}$
	$A = \text{AREA, SQ.FT (M}^2\text{)}$
TRANSFER OF HEAT	$KW = (1.08 \times \Delta T (^{\circ}\text{F}) \times D (\text{CFM})) / 3412$

METRIC	$Q (\text{W}) = 1.23 \times D (\text{L/S}) \times \Delta T (^{\circ}\text{C})$
AMPERAGE	1 PHASE: $L (\text{AMPERES}) = \text{WATTAGE (W)} / \text{VOLTAGE (V)}$
	3 PHASES: $L (\text{AMPERES}) = \text{WATTAGE (W)} / \text{VOLTAGE (V)} = X / 1.73$
TEMPERATURE CONVERSION	$^{\circ}\text{F} = (^{\circ}\text{C} \times 1.8) + 32$
	$^{\circ}\text{C} = (^{\circ}\text{F} - 32) / 1.8$
	$\Delta T (^{\circ}\text{F}) = \Delta T (^{\circ}\text{C}) \times 1.8$
	$\Delta T (^{\circ}\text{C}) = \Delta T (^{\circ}\text{F}) / 1.8$
AIRFLOW CONVERSION	$1 \text{ CFM} = 0.47 \text{ L/S}$
	$1 \text{ L/S} = 2.12 \text{ CFM}$
	$1 \text{ M}^3/\text{S} = 1000 \text{ L/S}$
