

Handsfree Stainless-Steel Push-Button Dialer Telephone

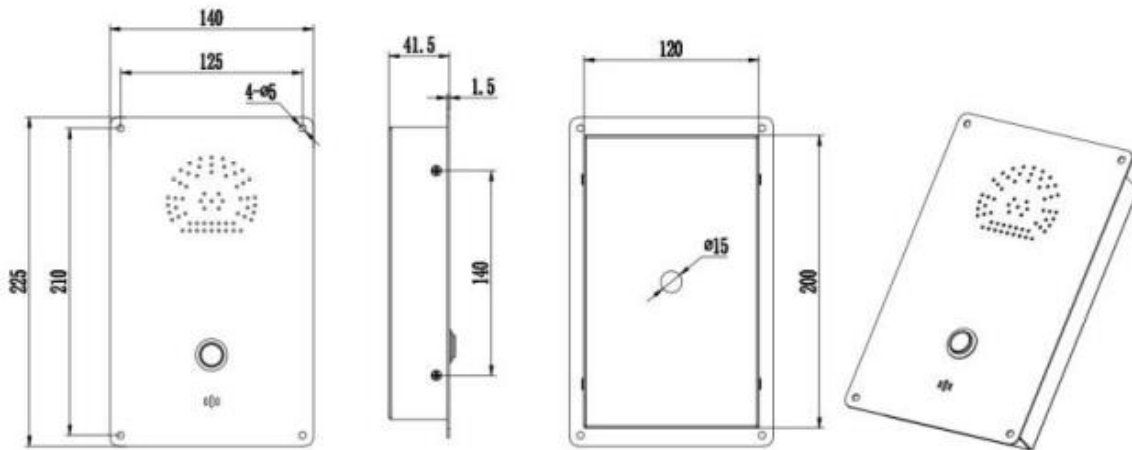

The HQ-JWATT411 Hands-free Telephone is usually used as an emergency phone in areas with public access such as elevators, lobbies, building intercoms and other environments with special requirements. The push button automatically dials a pre-programmed phone number (programming steps and keypad included).

Features:

- Waterproof grade: IP54
- Communication options: Analog / IP
- Material: Stainless Steel (Robust housing, constructed of 304 stainless steel material).
- DECG chip, with more outstanding sound, stronger anti-interference ability, digital automatic gain, no howling or intermittent call in the hands-free state.
- One button for emergency call.
- Connection: RJ11 screw terminal pair cable.
- CE, FCC, RoHS, ISO9001 compliant
- One (1) year warranty

Dimensions (millimeters):

Technical Specs:

Voltage	Telephone line /DC5V 1A
Standby Work Current	≤300MA
Frequency Response	250～3000 Hz
Ringer Level	≥80dB(A)
Corrosion Grade	WF2
Ambient Temperature	-20～+60℃
Atmospheric Pressure	80～110KPa
Relative Humidity	≤95%
Installation	Embedded
