12

13. Note for using

1.The device is powered by rechargeable lithium batteries. New battery is not fully charged. Please charge it firstly on the 1st installation. After power off, then you could charge it by connecting USB cable with usb adpater, power bank,PC or laptop. The mobile device APP will be prompted while the battery voltage is low. Please charge the device after received the reminder.

2.Keep the camera in range of your router. Make sure to pick a place within range of your network. Thick or insulated doors can greatly reduce the strength of your Wi-Fi signal even if your router is close by, so you should try streaming video before you mount your camera.

3.The device is a low power consumption intelligent products, can support remote wake up from the APP, PIR human detection, press doorbell wake up. The device will be works for 30 seconds after wake up then be in the resting state automatically and until to next waking up.
